Housekeeping and waste disposal: Paragraphs (k) and (l). The proposal contained detailed housekeeping requirements for AN and PAN. As noted above, the final standard removes all references to PAN, since the new definition of "liquid AN" will cover any polymers and polymer intermediates deemed to carry a significant skin exposure potential.

Paragraph (k)(1) of the proposal required the employer to maintain work surfaces free of "accumulations" of AN and PAN. This paragraph has been sharply criticized as redundant with the permissible exposure limits, since the presence of even small amounts of liquid AN on a work surface would result in exposures above the PEL (Exs. 148; 11:(13)). Other parties contended that the term "accumulations" needed to be defined more precisely. The use of wipe tests and bulk liquid samples, it was argued, could lead to citations for the detection of "accumulations" of "nanogram quantities" of AN (Ex. 160).

Other provisions of the housekeeping section were found by some parties to be unnecessary and not in accordance with OSHA's intention to use performance language wherever practicable (Ex. 148). Vistron determined that the housekeeping section restricted the use of water flushing to wash down work surfaces. Such washing would take advantage of the solubility of AN in water, as well as its capacity for biodegradation by bacteria (Exs. 92; 146).

In light of these comments, and in order to provide a more performance oriented standard, OSHA has determined that there is no need for a detailed housekeeping section in the final AN standard. Where there may be skin or eye contact with liquid AN, the employer is already required to provide impermeable protective clothing and equipment to his employees. The detailed requirements as proposed would appear to add little, if any, protection to that provided by the permissible exposure limits. They would also have limited the use of water washdowns of work surfaces, which the final standard expressly requires in certain circumstances, as a means of controlling the potential for AN exposures. Recommended housekeeping activities are contained in appendixes A & B.

The final standard requires the employer to assure that surfaces are maintained free of visible accumulations of liquid AN. In addition, the employer must decontaminate (as defined in paragraph (b)) areas where spills are detected.

The housekeeping provisions have also been revised from the proposal to include a lead detection program for operations involving liquid AN. OSHA has determined that it is appropriate to require direct action by the employer to detect leaks and spills of liquid AN which may result in employee exposure. The details and frequency of such a program are not specified in the standard, because of the wide variation of workplace conditions and AN sources among the affected employers. However, the housekeeping provisions specify that the employer must decontaminate those areas in which leaks and spills are found. OSHA anticipates that the use of real-time continuous monitoring systems and portable detection units will be used both for detecting sources of AN and for determining whether an area has been decontaminated.

The proposal required that AN and PAN waste materials be placed in a closed container, labeled, and disposed of. The employer was required to inform those persons handling the materials of the AN content and the hazards of exposure to AN. These provisions drew strong comment from interested parties. It was contended that the enclosure of these materials constituted a fire and explosion hazard, since AN might be concentrated within the containers. It was also argued that the downstream handler of the materials would face a serious exposure potential when the container was opened (Ex. 149).

The record clearly reflects that the provisions in the proposal which dealt with waste disposal are not supported by the record and are inappropriate for the proper handling of AN. Therefore, these provisions have been revised accordingly. Waste materials containing or contaminated with liquid AN are to be placed in a regulated area. The materials may then be treated in one of two ways: They may either be placed under ventilation, or washed with water into the plant's process waste water system. When the materials no longer release AN in airborne concentrations above the action level, they may then be disposed of in the normal manner (clearly, if the material is incapable of releasing AN above the action level, there would be no need for the employer to carry out this washing or ventilation step on that material). The purpose of this new provision is threefold: First, it reduces the number of employees with potential for exposure to AN; second, it provides a means of dispensing with the detailed disposal and labeling requirements contained in the proposal; and, third, it provides a way for the employer to assure that the material will not expose downstream handlers.

As with protective clothing, many waste materials will not release AN above 1 ppm, even without the types of treatment provided for in paragraph (l). It is clear that the standard does not require such treatment in this case.

The discussion of the revised exemption provisions of the standard makes clear that solid polymeric materials are not considered to be a significant source of AN exposure. Therefore, the disposal of PAN scrap or debris, other than for those materials defined under "liquid AN," does not require the special treatment prescribed under paragraph (l). The deletion of the term "PAN" has been made in this paragraph, accordingly.

Hygiene facilities and practices: Paragraph (m). The proposal referenced § 1910.141 and its existing requirements for hygiene facilities and practices in all workplaces. In addition, the change room and shower facility provisions, § 1910.141 (e) and (d) (3), respectively, were specifically incorporated into the standard. OSHA believes that these provisions are particularly important where there is potential for contact with liquid AN, and where protective equipment and clothing may be required.

The proposed shower provisions would have required all employees "exposed to liquid AN and PAN" to shower at the end of the work shift. This requirement has drawn considerable comment from affected employers. The term "exposure" caused considerable confusion, since it was unclear what constituted exposure to AN in these circumstances (Ex. 149). It was suggested that the term be changed to "contact or suspected contact." In addition, it was argued that skin contact with PAN did not constitute a significant risk of AN exposure (Exs. 11:(14); 148).

Several parties contended that the requirement for a shower at the end of a shift would not provide sufficient protection for an employee who has had skin contact with liquid AN. Such employee should be required to shower immediately after such contact, it was argued, because of the rapid absorption of AN through the skin (Exs. 11:(14); 149).

OSHA has determined that the shower provisions should be revised to reflect the comments and data received. The term "PAN", as has been noted elsewhere, is being deleted from this and other provisions of the standard. The list included in the definition of "liquid AN" includes those materials containing or made from AN which would be most likely to present a significant risk of skin exposure to AN.

The final standard contains a requirement for employees who have had or are suspected of having had skin contact with liquid AN to shower immediately after the contact is discovered. In addition, employees required to wear protective clothing to prevent skin contact with liquid AN are required to shower at the end of the shift. These requirements recognize the nature of the skin exposure hazard, and effectively limit the need for showers to those employees who may have contacted liquid AN.

The lunchroom provisions of the proposal have also come under close scrutiny. OSHA has determined that lunchroom provisions are not required in the final standard for several reasons. First, because the airborne hazard involves vapor rather than particulate, there is not a need for a filtered, positive pressure air supply in lunchrooms (Ex. 156). Second, the standard already prohibits eating, drinking, and smoking in regulated areas. Employees are not permitted to have food, beverages, or smoking products in areas above the permissible exposure limits. Third, the final standard retains the requirement for employees exposed above the TWA to wash before eating. Airborne concentrations above the PEL imply the concurrent possibility of skin contact with AN. Even though the standard contains a separate requirement for employees who contact liquid AN to shower afterwards, OSHA believes that this additional precautionary measure is appropriate in light of the nature of the AN exposure hazard.

Medical surveillance: Paragraph (n). The final standard, like the ETS and the Proposal, requires that each employer institute a medical surveillance program for all employees who are or will be exposed to AN at or above the action level. OSHA finds that a medical surveillance program is both necessary and appropriate to most effectively determine whether the health of employees exposed to AN is adversely affected by such exposure, and to develop information on occupational illnesses. The authority to include such a provision in this standard is set forth in section 6(b)(7) of the Act.

The standard requires that the medical surveillance program provide each covered employee with an opportunity for medical examination. All examinations and procedures are required to be performed by or under the supervision of a licensed physician, and provided without cost to the employee. While the physician will usually be selected by the employer, the standard does not so mandate, leaving the employer free to institute alternative procedures such as joint selection with employee or selection by the employee. Clearly a medical examination is most appropriately conducted by a licensed physician. However, certain parts of the required medical surveillance program do not necessarily require a physician's specific expertise and may be conducted by another person under the supervision of the physician (Ex. 141). As mandated by section 6(b)(7) of the Act, the medical examinations and procedures required by OSHA standards must be provided at no cost to the employee.

The standard requires that the medical examination include a work history, a medical history and a physical examination of the affected employees. The content of the examination is based upon recommendations from NIOSH (Exs. 42; 41) and upon procedures presently followed by several companies in their clinical evaluation of employees exposed to acrylonitrile (Exs. 128; 149). The purpose of these requirements is to make an initial medical assessment of each employee and to establish a baseline health condition against which future changes in an employee's health may be compared.

The medical surveillance provisions of the standard contain specific testing requirements, with concentration on the peripheral and central nervous systems, respiratory system and gastrointestinal system. Based upon the data from the du Pont and MCA studies of exposure to AN, these vital sites must be considered to be possible target sites for AN-induced cancer.

However, due to the lack of site-specificity associated with AN-induced cancer, all systems must be examined thoroughly (Exs. 42; 89; 92; 160). OSHA believes that these provisions will enable the examining physician to detect and hopefully make possible early treatment for any cancers which may develop due to past exposures to AN.

The standard requires fecal occult blood testing for workers over 40 years of age. This is a nontraumatic, noninvasive procedure for the early detection of gastrointestinal disease which is available and commonly used medically as a screening technique. OSHA has therefore deleted the provision requiring the routine proctosigmoidoscopic examination of workers exposed to AN. However, should the results of the fecal occult blood testing (as well as other medical tests or examination) indicate that, in the judgment of the examining physician, further testing is necessary, such additional testing would then be performed (cf. Exs. 14:(37); 42; TR. 704; 708; 710).

The standard requires that the employer provide the physician with certain information. This includes the following: (1) A copy of the regulation; (2) a description of the affected employee's duties as they relate to the employee's exposure; (3) the results of the employee's exposure monitoring; (4) the employee's anticipated exposure level; (5) whether any personal protective equipment has been or will be used; and (6) information from previous medical examinations of the affected employee which is not otherwise readily available to the physician. The purpose of making this information available to the physician is to aid in the evaluation of the employee's health in relation to his assigned duties and fitness to wear personal protective equipment when required.

The employer is required to obtain a written opinion from the examining physician containing the following information: (1) The results of the medical tests performed; (2) the physician's opinion as to whether the employee has any detected medical conditions

V 4 3 / 1 9 2

0 C 3 7 8

which would place the employee at increased risk of material impairment of health from exposure to AN; (3) any recommended limitations upon the employee's exposure to AN or upon the use of protective clothing and equipment, such as respirators; and (4) a statement that the employee has been informed by the physician of the test results of the medical examination and of any medical conditions which require further examination or treatment. This written opinion must not reveal specific findings or diagnoses which are unrelated to occupational exposure. A copy of the written opinion must be provided to the affected employee by the employer.

Commentors have objected to the requirements for the physician's written opinion as unnecessary and burdensome (Exs. 11: (25) Ex. 148; 160). They believe the requirements should be limited to situations where the findings are adverse (Exs. 73; 153).

These views are unacceptable to OSHA. Since the employer has the ultimate responsibility to assure the protection of the worker's health, where the worker's health has not been adversely affected, transmittal of the doctor's opinion serves to inform both patient and employer and provides documentary evidence that the prescribed tests were performed and evaluated. The requirement that the employee be provided with a copy of the physician's written opinion will assure that the employee is informed of the results of the medical examination and may take any necessary or appropriate action. This is consistent with those provisions of the Act which establish and implement the employee's right to know about occupational hazards and their effects. The purpose of requiring that specific findings or diagnoses unrelated to occupational exposure not be included in the written opinion is to encourage employees to submit to medical examination by removing the fear that employers may find out information about their physical condition that has no relation to their occupational exposures.

It has been suggested that physical examinations are not necessary for people under 40 and in good health (Ex. 160). This is contrary to the intent of medical surveillance. Workers under 40 may already have been exposed to AN for 15 to 20 years. Since the carcinogenic response may vary widely depending to a great extent on individual susceptibilities the long latency periods associated with carcinogens may also vary greatly among those exposed to cancer-causing substances. In addition medical surveillance is intended to aid in the early detection of cancer and other chronic effects so as to facilitate treatment of these conditions.

It has been suggested that provision be made for medical surveillance to include those employees who have a history of AN exposure but are no longer actively working with AN (Ex. 11:(2)). No such provision has been included in the standard, as OSHA has determined that the inclusion of past employees in a medical surveillance program would be unnecessarily burdensome and administratively infeasible. It would be extremely difficult, if not impossible, to determine which employees may have been exposed to AN and for how long, and to locate many such employees so as to inform them of the medical surveillance program. In addition, where the employee has worked for more than one employer, it would be difficult to determine which employer should bear the cost of such medical surveillance.

Medical removal protection. Medical removal protection was raised as an issue in the AN proposal. This requirement would maintain the rate of pay, seniority and other rights of an employee who is transferred or removed from his job to protect him from material impairment of health, as a result of an increased health risk from exposure to AN.

OSHA's primary goal is to assure that no employee suffers material impairment of health or functional capacity. The Agency does not favor transfer or removal as an alternative to controlling the level of a toxic substance in the workplace environment. Moreover, once full compliance with the permissible exposure limits is achieved by engineering controls and work practices, the need to transfer or remove employees from exposure to AN should arise infrequently.

Limited evidence on this issue was received during this proceeding. OSHA has conducted extensive hearings on medical removal protection in connection with the development of a standard for occupational exposure to lead. The final lead standard, including resolution of the question of medical removal protection, is expected to issue shortly. Once the lead standard is issued, OSHA will consider the extent to which the conclusions reached therein on medical removal protection are appropriate for acrylonitrile, and will propose the inclusion of any appropriate provisions in the AN standard.

Employee information and training: Paragraph (o). The standard requires the employer to provide a training program for employees exposed to AN. OSHA believes that an information and training program is essential for the protection of employees, because an employee can do much to protect himself if aware of the nature of the hazards in the workplace. To be effective, an employee education system must, at the minimum, apprise the employee of the specific hazards associated with his or her work environment. For this reason, the employer is required to inform each employee exposed to AN of the nature of the related health problems, the necessity for exposure control, and the medical and industrial hygiene programs. Such an educational program will go far in assuring that employees know the facts about AN and its proper handling.

The content of the training program is intended to apprise the employees of several factors: (1) The hazards to which they are exposed; (2) the action they can take to protect themselves, including avoiding exposure, using respiratory protection and taking medical examinations; (3) their role in reducing exposures; and (4) the contents of this standard. Section 6(b)(7) of the Act makes it clear that these are appropriate goals of an employee training program, and the standard, therefore, includes such provisions.

The employer is also required to provide, upon request, all materials relating to the training program to the Assistant Secretary and the Director. This is intended to provide an objective check of compliance with the requirements of the standard.

OSHA recognizes that AN may be one of many chemicals to which an employee may be exposed simultaneously in the workplace. The education and training requirements in this standard contain those elements which OSHA believes to be basic. The format of the training and information program is not rigid. An employer may, if he chooses, incorporate the required information for AN into a total program of training and education which is to be provided to his employees (Ex. 11:(14)).

Signs and labels: Paragraph (p). The requirement of the standard regarding the posting of warning signs and affixing caution labels remains primarily the same as that in the proposal. The broadening of the exemption provisions of the standard will result in a minimum of products and materials which will be required to be labeled. In addition, the wording of the signs for regulated areas has been slightly changed. These requirements are consistent with section 6(b)(7) of the Act, which prescribes the use of labels or other appropriate forms of warning to apprise employees of the hazards to which they are exposed.

Signs. The standard requires the posting of warning signs in regulated areas. These signs are intended to supplement the training which employees are required to receive under the standard. Even trained employees will need to be reminded of the locations of regulated areas and the dangers of entering those areas. In addition,

other workers, such as employees of independent maintenance contractors who are authorized to enter particular regulated areas; need to be warned of the hazard and reminded to use protective equipment. OSHA believes that both signs and training are necessary to adequately apprise employees of the hazards of acrylonitrile exposure.

The standard specifies the wording of the warning signs for regulated areas, in order to assure that the proper warning is given to employees. Some participants in the rulemaking have suggested that the word "Cancer" on the signs be replaced by "Cancer-Suspect Agent", or "Toxic Substance" (Exs. 146; 149). OSHA does not believe that the use of the term "Cancer Hazard" overstates the hazard. The reference to cancer provides the necessary warning as to the hazard associated with exposure to acrylonitrile.

It has been further suggested that the word "Danger" be replaced by the word "Caution". OSHA feels that the word "Danger" is appropriate in light of the evidence of carcinogenicity of acrylonitrile. Furthermore, the word "Danger" is used to attract the attention of workers, to alert them to the fact that they are in a hazardous area, i.e., an area where the permissible exposure limit is exceeded, and to emphasize the importance of the message to follow. The use of the word "Danger" is consistent with recent OSHA health standards dealing with carcinogens.

The signs have been changed from the proposal to read "Respirators May Be Required," instead of "Respirators Required." The reason for this involves the difference between the air concentrations in the regulated area and an employee's TWA exposure. There are many areas in which AN concentrations exceed 2 ppm, but where the employee's TWA exposures will not exceed the permissible limits. Such an employee would not be required to wear a respirator, even though the proposed sign would have indicated otherwise. The final standard has been revised to provide a more appropriate warning to employees entering the regulated area.

Labels. The standard requires the use of warning labels on all containers of liquid AN and materials made from and/or containing AN which are not exempted from the standard under paragraph (a)(2). This requirement imposes upon the employer the obligation to assure that all such containers within his workplace are at all times properly labeled, in order that his employees be apprised of the hazard.

The revision of the exemption provisions in the final standard will greatly relieve the burden of labeling of materials made from and/or containing AN. Only those materials which pose a significant potential for exposing employees to AN are required to be labled under the standard.

The standard requires that the labels remain affixed when the AN and AN-based materials leave the employer's workplace. Some comments questioned OSHA's jurisdiction to impose such a requirement (Exs. 156; 11:(14); 146). The purpose of this requirement is to assure that all employees, not only those of a particular employer, are apprised of the hazardous nature of acrylonitrile exposure. It is OSHA's view that informing employees of the hazards to which they are exposed is an important element in reducing occupational disease and injury, and one of the significant purposes of the Occupational Safety and Health Act. Section 6(b)(7) of the Act, which explicitly provides for regulations which require the use of labels or other appropriate forms of warning, is broadly drawn. This section does not limit the employer's obligation of informing employees of hazardous conditions to the employer's own employees. When an employer manufacturers, formulates, or sells a product containing a toxic substance, that employer is exposing not only his own employees, but also the employees of other employers involved in handling, transporting, or using the product. The extent of the obligation to inform should be commensurate with the extent of the exposure. This is especially true where the manufacturer, formulater, or seller will, in many cases, be the only employer capable, through his knowledge of the product, of providing the information necessary for protection of employees. A narrower reading of the statutory authority would defeat the protective purposes of the Act by effectively preventing the downstream employee from obtaining adequate information as to the hazard. Furthermore, the use of the labels required by the standard will alert other employers who utilize or handle the product and who would not otherwise know of the presence of acrylonitrile in their workplace, of their obligation to comply with the standard. OSHA, therefore, feels that this requirement is necessary and appropriate to effectuate the purposes of the Act.

The standard prescribes the legend that must be included on the label. This is to assure that employees are alerted to the fact they they are handling acrylonitrile and to the hazards involved.

The issue of labeling was of great concern as proposed, because the number of products which potentially might have required labels was substantial. The listing of exempted polymer products in paragraph (a)(2)(i) of the final standard makes it clear that these specific products do not have to be labeled. Other than liquid AN itself, OSHA does not anticipate that many products containing and/or made for AN will require labeling under the final standard. This reflects the recognition that most AN-based materials in downstream workplaces do not have a significant potential to expose employees to AN during processing use, and handling.

Recordkeeping: Paragraph (q). Section 8(c)(3) of the Act provides for the promulgation of regulations requiring employers to maintain accurate records of employee exposures to potentially toxic or harmful physical agents which are required to be monitored or measured.

The standard provides that records must be kept to identify the employee and to accurately reflect the employee's exposure. Specifically, it must include the following information: (a) The names, social security numbers, and job classifications of the employees monitored; (b) the dates, number, duration, and results of each of the samples taken, including a description of the representative sampling procedure and equipment used to determine employee exposure where applicable; (c) the type of respiratory protective devices if any, worn by the employee; and (d) a description of the sampling and analytical methods used, and evidence of their accuracy.

The standard also requires that the employer keep an accurate medical record for each employee who is subject to medical surveillance. Section 8(c) of the Act authorizes the promulgation of regulations requiring any employer to keep such records regarding the employer's activities relating to the Act as are necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational illnesses. OSHA believes that medical records (like exposure monitoring records) are necessary and appropriate to both the enforcement of the standard and the development of information regarding the causes and prevention of illness.

As explained above, it is necessary to relate employees' medical conditions with their exposures in order to develop information regarding cause and prevention. Medical records are necessary and appropriate for this purpose. In addition, medical records are necessary for the proper evaluation of an employee's health. For all of these reasons, medical records have been required in the final standard.

The standard requires that employees or their designated representatives be provided access to examine and copy records of required monitoring. The purpose of this provision is to

V 4 3 / 1 9 2

assure employees that their exposure is being properly monitored and that they are working in a safe and healthful environment. Section 8(c)(3) of the Act explicitly provides "employees or their representatives with an opportunity to observe * * * and to have access to the records thereof."

The final standard requires that employee medical records be made available upon request for examination and copying by the affected employee or former employee, or a physician designated by the affected employee or former employee. The purpose of this provision is to protect the employee's health by authorizing his designated physician to have access to medical records which may be useful in the diagnosis of illness.

The standard requires employers relying upon objective data for exemption under paragraph (a)(2)(ii) to maintain records of that data and of the basis for their reliance on that data. These records shall be maintained for the duration of the employer's reliance on that data for exemption.

Observation of monitoring: Paragraph (r). Section 8(c)(3) of the Act requires that employers provide employees and their representatives with the opportunity to observe monitoring of employee exposures to toxic substances or harmful physical agents. In accordance with this section, the standard contains provisions for such observation of monitoring of acrylonitrile exposures. To assure that the right to observe is meaningful, observers are entitled to receive an explanation of the measurement procedure, to observe all steps related to the measurement procedure, and to record the results obtained.

The observer, whether an employee or a designated representative, must be provided with, and is required to use, any personal protective equipment required to be worn by employees working in the area that is being monitored, and must comply with all other applicable safety and health procedures.

Effective date: Paragraph (s). The effective date of the standard is November 2, 1978, thirty days from publication. OSHA has determined that the circumstances of this rulemaking make it unnecessary to allow a longer period of time. Under the ETS, employers were required to perform many of the activities, such as initial monitoring, respiratory protection, and engineering control plans, which are to be required under the final standard. Since the scope of the final standard is narrower than that of the ETS, it is anticipated that all employers covered by the final standard were also subject to the ETS. There should be, therefore, no need for delay in requiring these employers to implement the provisions of the standard. In addition, the standard permits monitoring results and medical examinations obtained under the ETS to serve as initial monitoring and initial medical surveillance under the final standard.

Employers are required to reduce employee exposures to the permissible exposure limits solely by means of feasible engineering controls and work practices within 2 years of the effective date of the standard, or November 2, 1980. The record reflects a wide range of present exposure situations and capabilities of engineering development. Some companies have reported that most of their opreations are already below 2 ppm (Exs. 11:(14); 11:(10); 2:(21)). One producer expects to have engineering controls in place shortly (Ex. 92). One major company has predicted that the completion schedule for engineering projects to reach 2 ppm may take 2 to 3 years (Ex. 11:(27)). Other companies which have developed plans for engineering controls to reach 2 ppm have indicated that they will need leadtime, but have not established any timetable for implementation (Tr. 1016-1017; 978).

An SPI witness estimated that project definition for engineering solutions to reach 2 ppm/10 ppm would take about 6 months, and that implementation of those solutions would take up to 24 additional months (Ex. 74).

OSHA has determined that a 2-year period for installation of engineering controls is reasonable for the AN industry as a whole. Although some employers will be able to complete implementation of controls well within the 2-year time frame, OSHA believes that certain sectors of the industry, primarily resin and elastomer manufacturing, may require the full 2 years to comply. While employers are not required to complete installation of engineering controls until November 2, 1980, they are required to develop a compliance program which provides for completion of controls by that date, and to follow the schedule set out in the program. Failure to develop an adequate program, or failure to implement the progressive steps set out in the program to achieve compliance by November 2, 1980, will subject the employer to citation.

Training programs are to be implemented within 60 days of the effective date of the standard. OSHA believes that this should provide sufficient lead time, particularly in light of the training requirements of the ETS.

Appendices

Four appendices have been included in this permanent standard. These appendices have been included primarily for purposes of information. None of the statements contained therein should be construed as establishing a mandatory requirement not otherwise imposed by the standards, or as detracting from an obligation which the standard does impose.

The information contained in appendices A and B is designed to aid the employer is complying with requirements of the standard. The information in appendix C primarily provides information needed by the physician to evaluate the results of the medical examination. It should be noted that paragraph (o) specifically requires that the information contained in appendices A and B be provided to employees as part of their information and training program.

A new appendix D has been added to the final standard. This appendix gives the details of NIOSH method S-156, together with the NIOSH and OSHA variations on that method, for use in monitoring employee exposures to acrylonitrile. Other methods of sampling and analysis are available in the record of the rulemaking, and may be obtained from the OSHA Docket Office.

The contents of the appendices have been revised to reflect changes from the proposal. In addition, efforts have been made to clarify those sections in the appendices as proposed which were either inconsistent or unclear in relation to the standard.

Authority

This document was prepared under the direction of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210.

Accordingly, pursuant to sections 4(b)(2), 6(b), 6(c), and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1592, 1593, 1596, 1599; 29 U.S.C. 653, 655, 657), the specific statutes referred to in section 4(b)(2), Secretary of Labor's Order No. 8-76 (41 FR 25059), and 29 CFR part 1911, part 1910 of title 29, Code of Federal Regulations, is hereby amended by deleting the emergency temporary standard for occupational exposure to acrylonitrile at § 1910.1045 and adding a new permanent standard for occupational exposure to acrylonitrile as § 1910.1045, and by deleting the reference to acrylonitrile from table Z-1 of § 1910.1000. In addition, pursuant to section 4(b)(2) of the act, OSHA has determined that this new standard in § 1910.1045 is more effective than the corresponding standards now in subpart B of part 1910, and in parts 1915, 1916, 1917, 1918, and 1926 of title 29, Code of Federal Regulations. Therefore, these corresponding standards are superseded by this new § 1910.1045. This determination, and the application of the new standard to the maritime and construction industries, are implemented by revising paragraph (c) to § 1910.19.

In conjunction with the publication of the emergency temporary standard (43 FR 2586; Jan. 17, 1978), pursuant to sections 4(b)(2), 6(c), and 8(c) of the Act (84 Stat. 1592; 1996; 1599; 29 U.S.C. 653, 655, 657), title 29 of the Code of Federal Regulations was amended by adding a new paragraph (c) to § 1910.19, and by deleting the reference to acrylonitrile from table Z-1 of § 1910.1000. The authority for these amendments pursuant to section 6(c) of the act has expired. These amendments are to be carried forward in accordance with the promulgation of the new permanent standard, as noted above, pursuant to sections 4(b)(2), 6(b), 6(c), and 8(c) of the act (84 Stat. 1592, 1593, 1596, 1599; 29 U.S.C. 653, 655, 657).

Signed at Washington, D.C., this 22d day of September 1978. These amendments are effective on November 2, 1978

EULA BINGHAM,
Assistant Secretary of Labor.

Part 1910 of title 29 of the Code of Federal Regulations is hereby amended as follows:

1. Paragraph (c) of § 1910.19 is revised to read as follows:

§ 1910.19 Special provisions for air contaminants.

* * * * *

(c) *Acrylonitrile.* Section 1910.1045 shall apply to the exposure of every employee to acrylonitrile in every employment and place of employment covered by §§ 1910.12, 1910.13, 1910.14, 1910.15, or 1910.16, in lieu of any different standard on exposure to acrylonitrile which would otherwise be applicable by virtue of any of those sections.

§ 1910.1000 [Amended]

* * * * *

2. Section 1910.1000 is amended by deleting the line "Acrylonitrile——— 20———45" from table Z-1 of that section.

3. Section 1910.1045 is revised to read as follows:

§ 1910.1045 Acrylonitrile.

(a) *Scope and application.* (1) This section applies to all occupational exposures to acrylonitrile (AN), Chemical Abstracts Service Registry No. 000107131, except as provided in paragraphs (a)(2) and (a)(3) of this section.

(2) This section does not apply to exposures which result solely from the processing, use, and handling of the following materials:

(i) ABS resins, SAN resins, nitrile barrier resins, solid nitrile elastomers, and acrylic and modacrylic fibers, when these listed materials are in the form of finished polymers, and products fabricated from such finished polymers;

(ii) Materials made from and/or containing AN for which objective data is reasonably relied upon to demopstrate that the material is not capable of releasing AN in airborne concentrations in excess of 1 ppm as an eight (8)-hour time-weighted average, under the expected conditions of processing, use, and handling which will cause the greatest possible release; and

(iii) Solid materials made from and/or containing AN which will not be heated above 170° F during handling, use, or processing.

(3) An employer relying upon exemption under paragraph (a)(2)(ii) shall maintain records of the objective data supporting that exemption, and of the basis of the employer's reliance on the data, as provided in paragraph (q) of this section.

(b) *Definitions.* "Acrylonitrile" or "AN" means acrylonitrile monomer, chemical formula $CH_2=CHCN$.

"Action level" means a concentration of AN of 1 ppm as an eight (8)-hour time-weighted average.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Authorized person" means any person specifically authorized by the employer whose duties require the person to enter a regulated area, or any person entering such an area as a designated representative of employees for the purpose of exercising the opportunity to observe monitoring procedures under paragraph (r) of this section.

"Decontamination" means treatment of materials and surfaces by water washdown, ventilation, or other means, to assure that the materials will not expose employees to airborne concentrations of AN above 1 means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education, and Welfare, or designee.

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment, which results in an unexpected massive release of AN.

"Liquid AN" means AN monomer in liquid form, and liquid or semiliquid polymer intermediates, including slurries, suspensions, emulsions, and solutions, produced during the polymerization of AN.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

(c) *Permissible exposure limits.* (1) *Inhalation.* (i) *Time weighted average limit (TWA).* The employer shall assure that no employee is exposed to an airborne concentration of acrylonitrile in excess of two (2) parts acrylonitrile per million parts of air (2 ppm) as an eight (8)-hour time-weighted average.

(ii) *Ceiling limit.* The employer shall assure that no employee is exposed to an airborne concentration of acrylonitrile in excess of ten (10) ppm as averaged over any fifteen (15)-minute period during the working day.

(2) *Dermal and eye exposure.* The employer shall assure that no employee is exposed to skin contact or eye contact with liquid AN.

(d) *Notification of regulated areas and emergencies.* (1) *Regulated areas.* Within thirty (30) days following the establishment of a regulated area pursuant to paragraph (f) of this section, the employer shall report the following information to the OSHA Area Office:

(i) The address and location of each establishment which has one or more regulated areas;

(ii) The locations, within the establishment, of each regulated area;

(iii) A brief description of each process or operation which results in employee exposure to AN in regulated areas; and

(iv) The number of employees engaged in each process or operation within each regulated area which results in exposure to AN, and an estimate of the frequency and degree of exposure that occurs.

Whenever there has been a significant change in the information required to be reported by this paragraph, the employer shall promptly provide the new information to the OSHA Area Office.

(2) *Emergencies.* Emergencies, and the facts obtainable at that time, shall be reported within seventy-two (72) hours of the initial occurrence to the OSHA Area Office. Upon request of the OSHA Area Office, the employer shall submit additional information in writing relevant to the nature and extent of employee exposures and measures taken to prevent future emergencies of a similar nature.

(e) *Exposure monitoring.*—(1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to AN over an eight (8)-hour period.

(ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

OCT 3 1978

V 4 3 1 1 9 2

(2) *Initial monitoring.* Each employer who has a place of employment in which AN is present shall monitor each such workplace and work operation to accurately determine the airborne concentrations of AN to which employees may be exposed.

(3) *Frequency.* (i) If the monitoring required by this section reveals employee exposure to be below the action level, the employer may discontinue monitoring for that employee.

(ii) If the monitoring required by this section reveals employee exposure to be at or above the action level but below the permissible exposure limits, the employer shall repeat such monitoring for each such employee at least quarterly. The employer shall continue these quarterly measurements until at least two consecutive measurements taken at least seven (7) days apart, are below the action level, and thereafter the employer may discontinue monitoring for that employee.

(iii) If the monitoring required by this section reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employee at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.

(4) *Additional monitoring.* Whenever there has been a production, process, control, or personnel change which may result in new or additional exposures to AN, or whenever the employer has any other reason to suspect a change which may result in new or additional exposures to AN, additional monitoring which complies with this paragraph shall be conducted.

(5) *Employee notification.* (i) Within five (5) working days after the receipt of the results of monitoring required by this paragraph, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(ii) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that the permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

(6) *Accuracy of measurement.* The method of measurement of employee exposures shall be accurate, to a confidence level of 95 percent, to within plus or minus 35 percent for concentrations of AN at or above the permissible exposure limits, and plus or minus 50 percent for concentrations of AN below the permissible exposure limits.

(f) *Regulated areas.* (1) The employer shall establish regulated areas where AN concentrations are in excess of the permissible exposure limits.

(2) Regulated areas shall be demarcated and segregated from the rest of the workplace, in any manner that minimizes the number of persons who will be exposed to AN.

(3) Access to regulated areas shall be limited to authorized persons or to persons otherwise authorized by the act or regulations issued pursuant thereto.

(4) The employer shall assure that food or beverages are not present or consumed, tobacco products are not present or used, and cosmetics are not applied in the regulated area.

(g) *Methods of compliance.*—(1) *Engineering and work practice controls.* (i) By November 2, 1980, the employer shall institute engineering and work practice controls to reduce and maintain employee exposures to AN, to or below the permissible exposure limits, except to the extent that the employer establishes that such controls are not feasible.

(ii) Wherever the engineering and work practice controls which can be instituted are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest levels achievable by these controls, and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (h) of this section.

(2) *Compliance program.* (i) The employer shall establish and implement a written program to reduce employee exposures to or below the permissible exposure limits solely by means of engineering and work practice controls, as required by paragraph (g)(1) of this section.

(ii) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to AN above the permissible exposure limits;

(B) An outline of the nature of the engineering controls and work practices to be applied to the operation or process in question;

(C) A report of the technology considered in meeting the permissible exposure limits;

(D) A schedule for implementation of engineering and work practice controls for the operation or process, which shall project completion no later than November 2, 1980; and

(E) Other relevant information.

(iii) The employer shall complete the steps set forth in the compliance program by the dates in the schedule.

(iv) Written plans shall be submitted upon request to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, or any affected employee or representative.

(v) The plans required by this paragraph shall be revised and updated at least every six (6) months to reflect the current status of the program.

(h) *Respiratory protection.*—(1) *General.* The employer shall assure that respirators are used where required by this section to reduce employee exposure to within the permissible exposure limits. Respirators shall be used in the following circumstances:

(i) During the time period necessary to install or implement feasible engineering and work practice controls;

(ii) In work operations, such as maintenance and repair activities or reactor cleaning, in which the employer establishes that engineering and work practice controls are not feasible;

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; and

(iv) In emergencies.

(2) *Respirator selection.* (i) Where respiratory protection is required under this section, the employer shall select and provide, at no cost to the employee, the appropriate type of respirator from table I below, and shall assure that the employee wears the respirator provided.

TABLE I.—*Respiratory Protection for Acrylonitrile (AN)*

Concentration of AN or condition of use	Respirator type
(a) Less than or equal to 20 ppm	(1) Chemical cartridge respirator with organic vapor cartridge(s) and half-mask facepiece; or (2) Supplied air respirator with half-mask facepiece.
(b) Less than or equal to 100 ppm or maximum use concentration (MUC) of cartridges or canisters, whichever is lower.	(1) Full facepiece respirator with (A) organic vapor cartridges, (B) organic vapor gas mask chin-style, or (C) organic vapor gas mask canister, front- or back-mounted; (2) Supplied air respirator with full facepiece; or (3) Self-contained breathing apparatus with full facepiece.
(c) Less than or equal to 4,000 ppm	(1) Supplied air respirator operated in the positive pressure mode with full facepiece, helmet, suit, or hood.
(d) Greater than 4,000 ppm or unknown concentration.	(1) Supplied air and auxiliary self-contained breathing apparatus with full facepiece in positive pressure mode; or
(e) Firefighting	(2) Self-contained breathing apparatus with full facepiece in positive pressure mode. Self-contained breathing apparatus with full facepiece in positive pressure mode.
(f) Escape	(1) Any organic vapor respirator, or (2) Any self-contained breathing apparatus.

(ii) The employer shall select respirators from among those approved for use with organic vapors by the National Institute for Occupational Safety and Health under the provisions of 30 CFR part 11.

(3) *Respirator program.* (i) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e), and (f).

(ii) Where air/purifying respirators (chemical cartridge- or canister-type) are used, the air-purifying canister or cartridge(s) shall be replaced prior to the expiration of their service life or at the completion of each shift, whichever occurs first. A label shall be attached to the cartridge or canister to indicate the date and time at which it is first installed on the respirator.

(iii) *Testing.* Fit testing of respirators shall be performed to assure that the respirator selected provides the protection required by table I.

(A) *Qualitative fit.* The employer shall perform qualitative fit tests at the time of initial fitting and at least semiannually thereafter for each employee wearing respirators.

(B) *Quantitative fit.* Each employer with more than 10 employees wearing negative pressure respirators shall perform quantitative fit testing at the time of initial fitting and at least semiannually thereafter for each such employee.

(iv) Employees who wear respirators shall be allowed to wash their faces and to wipe clean the face-to-facepiece seals on their respirators to minimize potential skin irritation associated with respirator use.

(i) *Emergency situations.*—(1) *Written plans.* (i) A written plan for emergency situations shall be developed for each workplace where liquid AN is present. Appropriate portions of the plan shall be implemented in the event of an emergency.

(ii) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped as required in paragraph (h) of this section until the emergency is abated.

(iii) Employees not engaged in correcting the emergency shall be evacuated from the area and shall not be permitted to return until the emergency is abated.

(2) *Alerting employees.* Where there is the possibility of employee exposure to AN in excess of the ceiling limit, a general alarm shall be installed and used to promptly alert employees of such occurrences.

(j) *Protective clothing and equipment.*—(1) *Provision and use.* Where eye or skin contact with liquid AN may occur, the employer shall provide at no cost to the employee, and assure that employees wear, impermeable protective clothing or other equipment to protect any area of the body which may come in contact with liquid AN. The provision of §§ 1910.132 and 1910.133 shall be complied with.

(2) *Cleaning and replacement.* (i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this section as needed to maintain their effectiveness.

(ii) The employer shall assure that impermeable protective clothing which contacts or is likely to have contacted liquid AN shall be decontaminated before being removed by the employee.

(iii) The employer shall assure that an employee whose nonimpermeable clothing becomes wetted with liquid AN shall immediately remove that clothing and proceed to shower. The clothing shall be decontaminated before it is removed from the regulated area.

(iv) The employer shall assure that no employee removes protective clothing or equipment from the change room, except for those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

(v) The employer shall inform any person who launders or cleans protective clothing or equipment of the potentially harmful effects of exposure to AN.

(k) *Housekeeping.* (1) All surfaces shall be maintained free of visible accumulations of liquid AN.

(2) For operations involving liquid AN, the employer shall institute a program for detecting leaks and spills of liquid AN, including regular visual inspections.

(3) Where spills of liquid AN are detected, the employer shall assure that surfaces contacted by the liquid AN are decontaminated. Employees not engaged in decontamination activities shall leave the area of the spill, and shall not be permitted in the area until decontamination is completed.

(k) *Waste disposal.* AN waste, scrap, debris, bags, containers, or equipment shall be decontaminated before being incorporated in the general waste disposal system.

(m) *Hygiene facilities and practices.* (1) Where employees are exposed to airborne concentrations of AN above the permissible exposure limits, or where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, the facilities required by 29 CFR 1910.141, including clean change rooms and shower facilities, shall be provided by the employer for the use of those employees, and the employer shall assure that the employees use the facilities provided.

(2) The employer shall assure that employees wearing protective clothing or equipment for protection from skin contact with liquid AN shall shower at the end of the work shift.

(3) The employer shall assure that, in the event of skin or eye exposure to liquid AN, the affected employee shall shower immediately to minimize the danger of skin absorption.

(4) The employer shall assure that employees working in the regulated area wash their hands and faces prior to eating.

(n) *Medical surveillance.*—(1) *General.* (i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to AN at or above the action level, without regard to the use of respirators. The employer shall provide each such employee with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and that they shall be provided without cost to the employee.

(2) *Initial examinations.* At the time of initial assignment, or upon institution of the medical surveillance program, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history and medical history with special attention to skin, respiratory, and gastrointestinal systems, and those nonspecific symptoms, such as headache, nausea, vomiting, dizziness, weakness, or other central nervous system dysfunctions that may be associated with acute or with chronic exposure to AN;

(ii) A complete physical examination giving particular attention to the peripheral and central nervous system, gastrointestinal system, respiratory system, skin, and thyroid;

(iii) A 14- by 17-inch posteroanterior chest X-ray; and

OCT 3 1978

V 4 3 / 1 9 2

0 C 3 7 8

(iv) Further tests of the intestinal tract, including fecal occult blood screening, for all workers 40 years of age or older, and for any other affected employees for whom, in the opinion of the physician, such testing is appropriate.

(3) *Periodic examinations.* (i) The employer shall provide the examinations specified in paragraph (n)(2) of this section at least annually for all employees specified in paragraph (n)(1) of this section.

(ii) If an employee has not had the examination specified in paragraph (n)(2) of this section within 6 months preceding termination of employment, the employer shall make such examination available to the employee prior to such termination.

(4) *Additional examinations.* If the employee for any reason develops signs or symptoms which may be associated with exposure to AN, the employer shall provide an appropriate examination and emergency medical treatment.

(5) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this standard and its appendixes;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level;

(iv) The employee's anticipated or estimated exposure level (for preplacement examinations or in cases of exposure due to an emergency);

(v) A description of any personal protective equipment used or to be used; and

(vi) Information from previous medical examinations of the affected employee, which is not otherwise available to the examining physician.

(6) *Physician's written opinion.* (i) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The results of the medical examination and tests performed;

(B) The physician's opinion as to whether the employee has any detected medical condition(s) which would place the employee at an increased risk of material impairment of the employee's health from exposure to AN;

(C) Any recommended limitations upon the employee's exposure to AN or upon the use of protective clothing and equipment such as respirators; and (D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(ii) The employer shall instruct the physician not to reveal in the written opinion specific findings or diagnoses unrelated to occupational exposure to AN.

(iii) The employer shall provide a copy of the written opinion to the affected employee.

(o) *Employee information and training.* (1) *Training program.* (i) By January 2, 1979, the employer shall institute a training program for and assure the participaton of all employees exposed to AN above the action level, all employees whose exposures are maintained below the action level by engineering and work practice controls, and all employees subject to potential skin or eye contact with liquid AN.

(ii) Training shall be provided at the time of initial assignment, or upon institution of the training program, and at least annually thereafter, and the employer shall assure that each employee is informed of the following:

(A) The information contained in appendixes A and B;

(B) The quantity, location, manner of use, release, or storage of AN, and the specific nature of operations which could result in exposure to AN, as well as any necessary protective steps;

(C) The purpose, proper use, and limitations of respirators and protective clothing;

(D) The purpose and a description of the medical surveillance program required by paragraph (n) of this section;

(E) The emergency procedures developed, as required by paragraph (i) of this section;

(F) Engineering and work practice controls, their function, and the employee's relationship to these controls; and

(G) A review of this standard.

(2) *Access to training materials.* (i) The employer shall make a copy of this standard and its appendixes readily available to all affected employees.

(ii) The employer shall provide, upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(p) *Signs and labels.* (1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs and labels required by this paragraph

(ii) The employer shall assure that no statement appears on or near any sign or label required by this paragraph which contradicts or detracts from the required sign or label.

(2) *Signs.* (i) The employer shall post signs to clearly indicate all workplaces where AN concentrations exceed the permissible exposure limits. The signs shall bear the following legend:

DANGER

ACRYLONITRILE (AN)

CANCER HAZARD

AUTHORIZED PERSONNEL ONLY

RESPIRATORS MAY BE REQUIRED

(ii) The employer shall assure that signs required by this paragraph are illuminated and cleaned as necessary so that the legend is readily visible.

(3) *Labels.* (i) The employer shall assure that precautionary labels are affixed to all containers of liquid AN and AN-based materials not exempted under paragraph (a)(2) of this standard. The employer shall assure that the labels remain affixed when the materials are sold, distributed, or otherwise leave the employer's workplace.

(ii) The employer shall assure that the precautionary labels required by this paragraph are readily visible and legible. The labels shall bear the following legend:

DANGER

CONTAINS ACRYLONITRILE (AN)

CANCER HAZARD

(q) *Recordkeeping.* (1) *Objective data for exempted operations.* (i) Where the processing, use, and handling of materials made from or containing AN are exempted pursuant to paragraph (a)(2) (ii) of this section, the employer shall establish and maintain an accurate record of objective data reasonably relied upon in support of the exemption.

(ii) This record shall include at least the following information:

(A) The material qualifying for exemption;

(B) The source of the objective data;

(C) The testing protocol, results of testing, and/or analysis of the material for the release of AN;

(D) A description of the operation exempted and how the data supports the exemption; and

(E) Other data relevant to the operations, materials, and processing covered by the exemption.

(iii) The employer shall maintain this record for the duration of the employer's reliance upon such objective data.

(2) *Exposure monitoring.* (i) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.

(ii) This record shall include:

(A) The dates, number, duration, and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure;

(B) A description of the sampling and analytical methods used and the data relied upon to establish that the methods used meet the accuracy and precision requirements of paragraph (e)(6) of this section;

(C) Type of respiratory protective devices worn, if any; and

(D) Name, social security number, and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.

(iii) The employer shall maintain this record for at least forty (40) years, or for the duration of employment plus twenty (20) years, whichever is longer.

(3) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.

(ii) This record shall include:

(A) A copy of the physician's written opinions;

(B) Any employee medical complaints related to exposure to AN;

(C) A copy of the information provided to the physician as required by paragraph (n)(5) of this section; and

(D) A copy of the employee's medical and work history.

(iii) The employer shall assure that this record be maintained for at least forty (40) years, or for the duration of employment plus twenty (20) years, whichever is longer.

(4) *Availability.* (i) The employer shall make all records required to be maintained by this section available, upon request, to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall make records required by paragraph (q)(1) and (q)(2) of this section available upon request, for examination and copying, to affected employees, former employees, or their designated representatives.

(iii) The employer shall make an employee's medical records required to be maintained by this section available upon request, for examination and copying, to the affected employee or former employee, or to a physician designated by the affected employee or former employee.

(5) *Transfer of records.* (i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section for the prescribed period.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records for the prescribed period, these records shall be transmitted to the Director.

(iii) At the expiration of the retention period for the records required to be maintained pursuant to this section, the employer shall notify the Director at least 3 months prior to the disposal of the records, and shall transmit them to the Director upon request.

(r) *Observation of monitoring.* (1) *Employee observation.* The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to AN conducted pursuant to paragraph (e) of this section.

(2) *Observation procedures.* (i) Whenever observation of the monitoring of employee exposure to AN requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing and equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

(ii) Without interfering with the monitoring, observers shall be entitled:

(A) To receive an explanation of the measurement procedures;

(B) To observe all steps related to the measurement of airborne concentrations of AN performed at the place of exposure; and

(C) To record the results obtained.

(s) *Effective date.*

(1) This section shall become effective November 2, 1978.

(2) Monitoring and medical surveillance conducted since January 17, 1978, under the provisions of the emergency temporary standard may be relied upon by the employer to meet the initial monitoring and initial medical surveillance requirements of this section.

(3) Training programs must be implemented by January 2, 1979.

(4) Engineering and work practice controls required by paragraph (g) of this section shall be implemented no later than November 2, 1980.

(t) *Appendixes.* The information contained in the appendixes is not intended, by itself, to create any additional obligations not otherwise imposed, or to detract from any obligation.

APPENDIX A—SUBSTANCE SAFETY DATA SHEET FOR ACRYLONITRILE

I. SUBSTANCE IDENTIFICATION

A. Substance: Acrylonitrile (CH_2=CHCN).

B. Synonyms: Propenenitrile; vinyl cyanide; cyanoethylene; AN; VCN; acrylon; carbacryl; fumigrain; ventox.

C. Acrylonitrile can be found as a liquid or vapor, and can also be found in polymer resins, rubbers, plastics, polyols, and other polymers having acrylonitrile as a raw or intermediate material.

D. AN is used in the manufacture of acrylic and modiacrylic fibers, acrylic plastics and resins, specialty polymers, nitrile rubbers, and other organic chemicals. It has also been used as a fumigant.

E. Appearance and odor: Colorless to pale yellow liquid with a pungent odor which can only be detected at concentrations above the permissible exposure level, in a range of 13–19 parts AN per million parts of air (13–19 ppm).

F. Permissible exposure: Exposure may not exceed either:

1. Two parts AN per million parts of air (2 ppm) averaged over the 8-hour workday; or

2. Ten parts AN per million parts of air (10 ppm) averaged over any 15-minute period in the workday.

3. In addition, skin and eye contact with liquid AN is prohibited.

II. HEALTH HAZARD DATA

A. Acrylonitrile can affect your body if you inhale the vapor (breathing), if it comes in contact with your eyes or skin, or if you swallow it. It may enter your body through your skin.

B. Effects of overexposure: 1. Short-term exposure: Acrylonitrile can cause eye irritation, nausea, vomiting, headache, sneezing, weakness, and light-headedness. At high concentrations, the effects of exposure may go on to loss of consciousness and death. When acrylonitrile is held in contact with the skin after being absorbed into shoe leather or clothing, it may produce blisters following several hours of no apparent effect. Unless the shoes or clothing are removed immediately and the area washed, blistering will occur. Usually there is no pain or inflammation associated with blister formation.

2. Long-term exposure: Acrylonitrile has been shown to cause cancer in laboratory animals and has been associated with higher incidences of cancer in humans. Repeated or prolonged exposure of the skin to acrylonitrile may produce irritation and dermatitis.

3. Reporting signs and symptoms: You should inform your employer if you develop any signs or symptoms and suspect they are caused by exposure to acrylonitrile.

III. EMERGENCY FIRST AID PROCEDURES

A. Eye exposure: If acrylonitrile gets into your eyes, wash your eyes immediately with large amounts of water, lifting the lower and upper lids occasionally. Get medical attention immediately. Contact lenses should not be worn when working with this chemical.

B. Skin exposure: If acrylonitrile gets on your skin, immediately wash the contaminated skin with water. If acrylonitrile soaks through your clothing, especially your shoes, remove the clothing immediately and wash the skin with water. If symptoms occur after washing, get medical attention immediately. Thoroughly wash the clothing before reusing. Contaminated leather shoes or other leather articles should be discarded.

C. Inhalation: If you or any other person breathes in large amounts of acrylonitrile, move the exposed person to fresh air at once. If breathing has stopped, perform artificial respiration. Keep the affected person warm and at rest. Get medical attention as soon as possible.

D. Swallowing: When acrylonitrile has been swallowed, give the person large quantities of water immediately. After the water has been swallowed, try to get the person to vomit by having him touch the back of his

V 43 / 192 OCT 3 78

throat with his finger. Do not make an unconscious person vomit. Get medical attention immediately.

E. Rescue: Move the affected person from the hazardous exposure. If the exposed person has been overcome, notify someone else and put into effect the established emergency procedures. Do not become a casualty yourself. Understand your emergency rescue procedures and know the location of the emergency equipment before the need arises.

F. Special first aid procedures: First aid kits containing an adequate supply (at least two dozen) of amyl nitrite pearls, each containing 0.3 ml, should be maintained at each site where acrylonitrile is used. When a person is suspected of receiving an overexposure to acrylonitrile, immediately remove that person from the contaminated area using established rescue procedures. Contaminated clothing must be removed and the acrylonitrile washed from the skin immediately. Artificial respiration should be started at once if breathing has stopped. If the person is unconscious, amyl nitrite may be used as an antidote by a properly trained individual in accordance with established emergency procedures. Medical aid should be obtained immediately.

IV. RESPIRATORS AND PROTECTIVE CLOTHING

A. Respirators: You may be required to wear a respirator for nonroutine activites, in emergencies, while your employer is in the process of reducing acrylonitrile exposures through engineering controls, and in areas where engineering controls are not feasible. If respirators are worn, they must have a Mine Safety and Health Administration (MSHA or MESA) or National Institute for Occupational Safety and Health (NIOSH) label of approval for use with organic vapors. (Older respirators may have a Bureau of Mines approval label.) For effective protection, respirators must fit your face and head snugly. Respirators should not be loosened or removed in work situations where their use is required.

Acrylonitrile does not have a detectable odor except at levels above the permissible exposure limits. Do not depend on odor to warn you when a respirator cartridge or canister is exhausted. Cartridges or canisters must be changed daily or before the end-of-service-life, whichever comes first. Reuse of these may allow acrylonitrile to gradually filter through the cartridge and cause exposures which you cannot detect by odor. If you can smell acrylonitrile while wearing a respirator, proceed immediately to fresh air. If you experience difficulty breathing while wearing a respirator, tell your employer.

B. Supplied-air suits: In some work situations, the wearing of supplied-air suits may be necessary. Your employer must instruct you in their proper use and operation.

C. Protective clothing: You must wear impervious clothing, gloves, face shield, or other appropriate protective clothing to prevent skin contact with liquid acrylonitrile. Where protective clothing is required, your employer is required to provide clean garments to you as necessary to assume that the clothing protects you adequately.

Replace or repair impervious clothing that has developed leaks.

Acrylonitrile should never be allowed to remain on the skin. Clothing and shoes which are not impervious to acrylonitrile should not be allowed to become contaminated with acrylonitrile, and if they do the clothing and shoes should be promptly removed and decontaminated. The clothing should be laundered or discarded after the AN is removed. Once acrylonitrile penetrates shoes or other leather articles, they should not be worn again.

D. Eye protection: You must wear splash-proof safety goggles in areas where liquid acrylonitrile may contact your eyes. In addition, contact lenses should not be worn in areas where eye contact with acrylonitrile can occur.

V. PRECAUTIONS FOR SAFE USE, HANDLING, AND STORAGE

A. Acrylonitrile is a flammable liquid, and its vapors can easily form explosive mixtures in air.

B. Acrylonitrile must be stored in tightly closed containers in a cool, well-ventilated area, away from heat, sparks, flames, strong oxidizers (especially bromine), strong bases, copper, copper alloys, ammonia, and amines.

C. Sources of ignition such as smoking and open flames are prohibited wherever acrylonitrile is handled, used, or stored in a manner that could create a potential fire or explosion hazard.

D. You should use non-sparking tools when opening or closing metal containers of acrylonitrile, and containers must be bonded and grounded when pouring or transferring liquid acrylonitrile.

E. You must immediately remove any nonimpervious clothing that becomes wetted with acrylonitrile, and this clothing must not be reworn until the acrylonitrile is removed from the clothing.

F. Impervious clothing wet with liquid acrylonitrile can be easily ignited. This clothing must be washed down with water before you remove it.

G. If your skin becomes wet with liquid acrylonitrile, you must promptly and thoroughly wash or shower with soap or mild detergent to remove any acrylonitrile from your skin.

H. You must not keep food, beverages, or smoking materials, nor are you permitted to eat or smoke in regulated areas where acrylonitrile concentrations are above the permissible exposure limits.

I. If you contact liquid acrylonitrile, you must wash your hands thoroughly with soap or mild detergent and water before eating, smoking, or using toilet facilities.

J. Fire extinguishers and quick drenching facilities must be readily available, and you should know where they are and how to operate them.

K. Ask your supervisor where acrylonitrile is used in your work area and for any additional plant safety and health rules.

VI. ACCESS TO INFORMATION

A. Each year, your employer is required to inform you of the information contained in this Substance Safety Data Sheet for acrylonitrile. In addition, your employer must instruct you in the proper work practices for using acrylonitrile, emergency procedures, and the correct use of protective equipment.

B. Your employer is required to determine whether you are being exposed to acrylonitrile. You or your representative has the right to observe employee measurements and to record the results obtained. Your employer is required to inform you of your exposure. If your employer determines that you are being overexposed, he or she is required to inform you of the actions which are being taken to reduce your exposure to within permissible exposure limits.

C. Your employer is required to keep records of your exposures and medical examinations. These records must be kept by the employer for at least forty (40) years or for the period of your employment plus twenty (20) years, whichever is longer.

D. Your employer is required to release your exposure and medical records to your physician upon your written request.

APPENDIX B—SUBSTANCE TECHNICAL GUIDELINES FOR ACRYLONITRILE

I. PHYSICAL AND CHEMICAL DATA

A. Substance identification: 1. Synonyms: AN; VCN; vinyl cyanide; propenenitrile; cyanoethylene; Acrylon; Carbacryl; Fumigrain; Ventox.

2. Formula: $CH_2=CHCN$.

3. Molecular weight: 53.1.

B. Physical data: 1. Boiling point (760 mm Hg): 77.3°C (171° F);

2. Specific gravity (water=1): 0.81 (at 20° C or 68° F);

3. Vapor density (air=1 at boiling point of acrylonitrile): 1.83;

4. Melting point: −83° C (−117° F);

5. Vapor pressure (@20° F): 83 mm Hg;

6. Solubility in water, percent by weight @20° C (68° F): 7.35;

7. Evaporation rate (Butyl Acetate=1): 4.54; and

8. Appearance and odor: Colorless to pale yellow liquid with a pungent odor at concentrations above the permissible exposure level. Any detectable odor of acrylonitrile may indicate overexposure.

II. FIRE, EXPLOSION, AND REACTIVITY HAZARD DATA

A. Fire: 1. Flash point: −1° C (30° F) (closed cup).

2. Autoignition temperature: 481° C (898° F).

3. Flammable limits air, percent by volume: Lower: 3, Upper: 17.

4. Extinguishing media: Alcohol foam, carbon dioxide, and dry chemical.

5. Special fire-fighting procedures: Do not use a solid stream of water, since the stream will scatter and spread the fire. Use water to cool containers exposed to a fire.

6. Unusual fire and explosion hazards: Acrylonitrile is a flammable liquid. Its vapors can easily form explosive mixtures with air. All ignition sources must be controlled where acrylonitrile is handled, used, or stored in a manner that could create a potential fire or explosion hazard. Acrylonitrile vapors are heavier than air and may travel along the ground and be ignited by open flames or sparks at locations remote from the site at which acrylonitrile is being handled.

7. For purposes of compliance with the requirements of 29 CFR 1910.106, acrylonitrile is classified as a class 1B flammable liquid. For example, 7,500 ppm, approximately one-fourth of the lower flammable limit, would be considered to pose a potential fire and explosion hazard.

8. For purposes of compliance with 29 CFR 1910.157, acrylonitrile is classified as a Class B fire hazard.

9. For purpose of compliance with 29 CFR 1919.309, locations classified as hazardous due to the presence of acrylonitrile shall be Class I, Group D.

B. Reactivity:

1. Conditions contributing to instability: Acrylonitrile will polymerize when hot, and the additional heat liberated by the polymerization may cause containers to explode. Pure AN may self-polymerize, with a rapid build-up of pressure, resulting in an explosion hazard. Inhibitors are added to the commercial product to prevent self-polymerization.

2. Incompatibilities: Contact with strong oxidizers (especially bromine) and strong bases may cause fires and explosions. Contact with copper, copper alloys, ammonia, and amines may start serious decomposition.

3. Hazardous decomposition products: Toxic gases and vapors (such as hydrogen cyanide, oxides of nitrogen, and carbon monoxide) may be released in a fire involving acrylonitrile and certain polymers made from acrylonitrile.

4. Special precautions: Liquid acrylonitrile will attack some forms of plastics, rubbers, and coatings.

III. SPILL, LEAK, AND DISPOSAL PROCEDURES

A. If acrylonitrile is spilled or leaked, the following steps should be taken:

1. Remove all ignition sources.

2. The area should be evacuated at once and re-entered only after the area has been thoroughly ventilated and washed down with water.

3. If liquid acrylonitrile or polymer intermediate, collect for reclamation or absorb in paper, vermiculite, dry sand, earth, or similar material, or wash down with water into process sewer system.

B. Persons not wearing protective equipment should be restricted from areas of spills or leaks until clean-up has been completed.

C. Waste disposal methods: Waste material shall be disposed of in a manner that is not hazardous to employees or to the general population. Spills of acrylonitrile and flushing of such spills shall be channeled for appropriate treatment or collection for disposal. They shall not be channeled directly into the sanitary sewer system. In selecting the method of waste disposal, applicable local, State, and Federal regulations should be consulted.

IV. MONOTORING AND MEASUREMENT PROCEDURES

A. Exposure above the Permissible Exposure Limit:

1. Eight-hour exposure evaluation: Measurements taken for the purpose of determining employee exposure under this section are best taken so that the average 8-hour exposure may be determined from a single 8-hour sample or two (2) 4-hour samples. Air samples should be taken in the employee's breathing zone (air that would most nearly represent that inhaled by the employee.)

2. Ceiling evaluation: Measurements taken for the purpose of determining employee exposure under this section must be taken during periods of maximum expected airborne concentrations of acrylonitrile in the employee's breathing zone. A minimum of three (3) measurements should be taken on one work shift. The average of all measurements taken is an estimate of the employee's ceiling exposure.

3. Monitoring techniques: The sampling and analysis under this section may be performed by collecting the acrylonitrile vapor on charcoal adsorption tubes or other composition adsorption tubes, with subsequent chemical analysis. Sampling and analysis may also be performed by instruments such as real-time continuous monotoring systems, portable direct-reading instruments, or passive dosimeters. Analysis of resultant samples should be by gas chromatograph.

Appendix D lists methods of sampling and analysis which have been tested by NIOSH and OSHA for use with acrylonitrile. NIOSH and OSHA have validated modifications of NIOSH Method S-156 (See Appendix D) under laboratory conditions for concentrations below 1 ppm. The employer has the obligation of selecting a monitoring method which meets the accuracy and precision requirements of the standard under his unique field conditions. The standard requires that methods of monitoring must be accurate, to a 95-percent confidence level, to ±35-percent for concentrations of AN at or above 2 ppm, and to ±50-percent for concentrations below 2 ppm. In addition to the methods described in Appendix D, there are numerous other methods available for monitoring for AN in the workplace. Details on these other methods have been submitted by various companies to the rulemaking record, and are available at the OSHA Docket Office.

B. Since many of the duties relating to employee exposure are dependent on the results of monitoring and measuring procedures, employers shall assure that the evaluation of employee exposures is performed by a competent industrial hygienist or other technically qualified person.

V. PROTECTIVE CLOTHING

Employees shall be provided with and required to wear appropriate protective clothing to prevent any possibility of skin contact with liquid AN. Because acrylonitrile is absorbed through the skin, it is important to prevent skin contact with liquid AN. Protective clothing shall include impermeable coveralls or similar full-body work clothing, gloves, head-coverings, as appropriate to protect areas of the body which may come in contact with liquid AN.

Employers should ascertain that the protective garments are impermeable to acrylonitrile. Non-impermeable clothing and shoes should not be allowed to become contaminated with liquid AN. If permeable clothing does become contaminated, it should be promptly removed, placed in a regulated area for removal of the AN, and not worn again until the AN is removed. If leather footwear or other leather garments become wet from acrylonitrile, they should be replaced and not worn again, due to the ability of leather to absorb acrylonitrile and hold it against the skin. Since there is no pain associated with the blistering which may result from skin contact with liquid AN, it is essential that the employee be informed of this hazard so that he or she can be protected.

Any protective clothing which has developed leaks or is otherwise found to be defective shall be repaired or replaced. Clean protective clothing shall be provided to the employee as necessary to assure its protectiveness. Whenever impervious clothing becomes wet with liquid AN, it shall be washed down with water before being removed by the employee. Employees are also required to wear splash-proof safety goggles where there is any possibility of acrylonitrile contacting the eyes.

VI. HOUSEKEEPING AND HYGIENE FACILITIES

For purposes of complying with 29 CFR 1910.141, the following items should be emphasized:

A. The workplace should be kept clean, orderly, and in a sanitary condition. The employer is required to institute a leak and spill detection program for operations involving liquid AN in order to detect sources of fugitive AN emissions.

B. Dry sweeping and the use of compressed air is unsafe for the cleaning of floors and other surfaces where liquid AN may be found.

C. Adequate washing facilities with hot and cold water are to be provided, and maintained in a sanitary condition. Suitable cleansing agents are also to be provided to assure the effective removal of acrylonitrile from the skin.

D. Change or dressing rooms with individual clothes storage facilities must be provided to prevent the contamination of street clothes with acrylonitrile. Because of the hazardous nature of acrylonitrile, contaminated protective clothing should be placed in a regulated area designated by the employer for removal of the AN before the clothing is laundered or disposed of.

VII. MISCELLANEOUS PRECAUTIONS

A. Store acrylonitrile in tightly-closed containers in a cool, well-ventilated area and take necessary precautions to avoid any explosion hazard.

B. High exposures to acrylonitrile can occur when transferring the liquid from one container to another.

C. Non-sparking tools must be used to open and close metal acrylonitrile containers. These containers must be effectively grounded and bonded prior to pouring.

D. Never store uninhibited acrylonitrile.

E. Acrylonitrile vapors are not inhibited. They may form polymers and clog vents of storage tanks.

F. Use of supplied-air suits or other impervious coverings may be necessary to prevent skin contact with and provide respiratory protection from acrylonitrile where the concentration of acrylonitrile is unknown or is above the ceiling limit. Supplied-air suits should be selected, used, and maintained under the immediate supervision of persons knowledgeable in the limitations and potential life-endangering characteristics of supplied-air suits.

G. Employers shall advise employees of all areas and operations where exposure to acrylonitrile could occur.

VIII. COMMON OPERATIONS

Common operations in which exposure to acrylonitrile is likely to occur include the following: Manufacture of the acrylonitrile monomer; synthesis of acrylic fibers, ABS, SAN, and nitrile barrier plastics and resins, nitrile rubber, surface coatings, specialty chemicals, use as a chemical intermediate, use as a fumigant and in the cyanoethylation of cotton.

APPENDIX C—MEDICAL SURVEILLANCE GUIDELINES FOR ACRYLONITRILE

I. ROUTE OF ENTRY

Inhalation; skin absorption; ingestion.

II. TOXICOLOGY

Acrylonitrile vapor is an asphyxiant due to inhibitory action on metabolic enzyme

V 4 3 / 1 9 2

systems. Animals exposed to 75 or 100 ppm for 7 hours have shown signs of anoxia; in some animals which died at the higher level, cyanomethemoglobin was found in the blood. Two human fatalities from accidental poisoning have been reported: one was caused by inhalation of an unknown concentration of the vapor, and the other was thought to be caused by skin absorption or inhalation. Most cases of intoxication from industrial exposure have been mild, with rapid onset of eye irritation, headache, sneezing, and nausea. Weakness, lightheadedness, and vomiting may also occur. Exposure to high concentrations may produce profound weakness, asphyxia, and death. The vapor is a severe eye irritant. Prolonged skin contract with the liquid may result in absorption with systemic effects, and in the formation of large blisters after a latent period of several hours. Although there is usually little or no pain or inflammation, the affected skin resembles a second-degree thermal burn. Solutions spilled on exposed skin, or on areas covered only by a light layer of clothing, evaporate rapidly, leaving no irritation, or, at the most, mild transient redness. Repeated spills on exposed skin may result in dermatitis due to solvent effects.

Results after 1 year of a planned 2-year animal study on the effects of exposure to acrylonitrile have indicated that rats ingesting as little as 35 ppm in their drinking water develop tumors of the central nervous system. The interim results of this study have been supported by a similar study being conducted by the same laboratory, involving exposure of rats by inhalation of acrylonitrile vapor, which has shown similar types of tumors in animals exposed to 80 ppm.

In addition, the preliminary results of an epidemiological study being performed by duPont on a cohort of workers in their Camden, S.C. acrylic fiber plant indicate a statistically significant increase in the incidence of colon and lung cancers among employees exposed to acrylonitrile.

III. SIGNS AND SYMPTOMS OF ACUTE OVEREXPOSURE

Asphyxia and death can occur from exposure to high concentrations of acrylonitrile. Symptoms of overexposure include eye irritation, headache, sneezing, nausea and vomiting, weakness, and light-headedness. Prolonged skin contact can cause blisters on the skin with appearance of a second-degree burn, but with little or no pain. Repeated skin contact may produce scaling dermatitis.

IV. TREATMENT OF ACUTE OVEREXPOSURE

Remove employee from exposure. Immediately flush eyes with water and wash skin with soap or mild detergent and water. If AN has been swallowed, and person is conscious, induce vomiting. Give artificial resuscitation if indicated. More severe cases, such as those associated with loss of consciousness, may be treated by the intravenous administration of sodium nitrite, followed by sodium thiosulfate, although this is not as effective for acrylonitrile poisoning as for inorganic cyanide poisoning.

V. SURVEILLANCE AND PREVENTIVE CONSIDERATIONS

A. As noted above, exposure to acrylonitrile has been linked to increased incidence of cancers of the colon and lung in employees of the duPont acrylic fiber plant in Camden, S.C. In addition, the animal testing of acrylonitrile has resulted in the development of cancers of the central nervous system in rats exposed by either inhalation or ingestion. The physician should be aware of the findings of these studies in evaluating the health of employees exposed to acrylonitrile.

Most reported acute effects of occupational exposure to acrylonitrile are due to its ability to cause tissue anoxia and asphyxia. The effects are similar to those caused by hydrogen cyanide. Liquid acrylonitrile can be absorbed through the skin upon prolonged contact. The liquid readily penetrates leather, and will produce burns of the feet if footwear contaminated with acrylonitrile is not removed.

It is important for the physician to become familiar with the operating conditions in which exposure to acrylonitrile may occur. Those employees with skin diseases may not tolerate the wearing of whatever protective clothing may be necessary to protect them from exposure. In addition, those with chronic respiratory disease may not tolerate the wearing of negative-pressure respirators.

B. Surveillance and screening. Medical histories and laboratory examinations are required for each employee subject to exposure to acrylonitrile above the action level. The employer must screen employees for history of certain medical conditions which might place the employee at increased risk from exposure.

1. *Central nervous system dysfunction.* Acute effects of exposure to acrylonitrile generally involve the central nervous system. Symptoms of acrylonitrile exposure include headache, nausea, dizziness, and general weakness. The animal studies cited above suggest possible carcinogenic effects of acrylonitrile on the central nervous system, since rats exposed by either inhalation or ingestion have developed similar CNS tumors.

2. *Respiratory disease.* The du Pont data indicate an increased risk of lung cancer among employees exposed to acrylonitrile.

3. *Gastrointestinal disease.* The du Pont data indicate an increased risk of cancer of the colon among employees exposed to acrylonitrile. In addition, the animal studies show possible tumor production in the stomachs of the rats in the ingestion study.

4. *Skin disease.* Acrylonitrile can cause skin burns when prolonged skin contact with the liquid occurs. In addition, repeated skin contact with the liquid can cause dermatitis.

5. *General.* The purpose of the medical procedures outlined in the standard is to establish a baseline for future health monitoring. Persons unusually susceptible to the effects of anoxia or those with anemia would be expected to be at increased risk. In addition to emphasis on the CNS, respiratory and gastro-intestinal systems, the cardiovascular system, liver, and kidney function should also be stressed.

APPENDIX D.—SAMPLING AND ANALYTICAL METHODS FOR ACRYLONITRILE

There are many methods available for monitoring employee exposures to acrylonitrile. Most of these involve the use of charcoal tubes and sampling pumps, with analysis by gas chromatograph. The essential differences between the charcoal tube methods include, among others, the use of different desorbing solvents, the use of different lots of charcoal, and the use of different equipment for analysis of the samples.

Besides charcoal, considerable work has been performed on methods using porous polymer sampling tubes and passive dosimeters. In addition, there are several portable gas analyzers and monitoring units available on the open market.

This appendix contains details for the methods which have been tested at OSHA Analytical Laboratory in Salt Lake City, and NIOSH in Cincinnati. Each is a variation on NIOSH Method S-156, which is also included for reference. This does not indicate that these methods are the only ones which will be satisfactory. There also may be workplace situations in which these methods are not adequate, due to such factors as high humidity. Copies of the other methods available to OSHA are available in the rulemaking record, and may be obtained from the OSHA Docket Office. These include the Union Carbide, Monsanto, Dow Chemical and Dow Badische methods, as well as NIOSH Method P & CAM 127.

Employers who note problems with sample breakthrough should try larger charcoal tubes. Tubes of larger capacity are available, and are often used for sampling vinyl chloride. In addition, lower flow rates and shorter sampling times should be beneficial in minimizing breakthrough problems.

Whatever method the employer chooses, he must assure himself of the method's accuracy and precision under the unique conditions present in his workplace.

NIOSH METHOD S-156 (UNMODIFIED)

Analyte: Acrylonitrile.
Matrix: Air.
Procedure: Absorption on charcoal, desorption with methanol, GC.

1. *Principle of the method* (Reference 11.1).

1.1 A known volume of air is drawn through a charcoal tube to trap the organic vapors present.

1.2 The charcoal in the tube is transferred to a small, stoppered sample container, and the analyte is desorbed with methanol.

1.3 An aliquot of the desorbed sample is injected into a gas chromatograph.

1.4 The area of the resulting peak is determined and compared with areas obtained for standards.

2. *Range and sensitivity.*

2.1 This method was validated over the range of 17.5-70.0 mg/cu m at an atmospheric temperature and pressure of 22° C and 760 mm Hg, using a 20-liter sample. Under the conditions of sample size (20 liters) the probable useful range of this method is 4.5-135 mg-cu m. The method is capable of measuring much smaller amounts if the desorption efficiency is adequate. Desorption efficiency must be determined over the range used.

2.2 The upper limit of the range of the method is dependent on the adsorptive capacity of the charcoal tube. This capacity varies with the concentrations of acrylonitrile and other substances in the air. The first section of the charcoal tube was found to hold at least 3.97 mg of acrylonitrile when a test atmosphere containing 92.0 mg/cu m of acrylonitrile in air was sampled 0.18 liter per minute for 240 minutes; at that time the concentration of acrylonitrile in the effluent was less than 5 percent of that in the influent. (The charcoal tube consists of two sections of activated charcoal separated by a section of urethane foam. See section 6.2.) If a particular atmosphere is suspected of containing a large amount of contaminant, a smaller sampling volume should be taken.

3. *Interference.*

3.1 When the amount of water in the air is so great that condensation actually occurs in the tube, organic vapors will not be trapped efficiently. Preliminary experiments using toluene indicate that high humidity severely decreases the breakthrough volume.

3.2 When interfering compounds are known or suspected to be present in the air, such information, including their suspected identities, should be transmitted with the sample.

3.3 It must be emphasized that any compound which has the same retention time as the analyte at the operating conditions described in this method is an interference. Retention time data on a single column cannot be considered proof of chemical identity.

3.4 If the possibility of interference exists, separation conditions (column packing, temperature, etc.) must be changed to circumvent the problem.

4. *Precision and accuracy.*

4.1 The Coefficient of Variation (CV_T) for the total analytical and sampling method in the range of 17.5-70.0 mg/cu m was 0.073. This value corresponds to a 3.3 mg/cu m standard deviation at the (previous) OSHA standard level (20 ppm). Statistical information and details of the validation and experimental test procedures can be found in Reference 11.2.

4.2 On the average the concentrations obtained at the 20 ppm level using the overall sampling and analytical method were 6.0 percent lower than the "true" concentrations for a limited number of laboratory experiments. Any difference between the "found" and "true" concentrations may not represent a bias in the sampling and analytical method, but rather a random variation from the experimentally determined "true" concentration. Therefore, no recovery correction should be applied to the final result in section 10.5.

5. *Advantages and disadvantages of the method.*

5.1 The sampling device is small, portable, and involves no liquids. Interferences are minimal, and most of those which do occur can be eliminated by altering chromatographic conditions. The tubes are analyzed by means of a quick, instrumental method.

The method can also be used for the simultaneous analysis of two or more substances suspected to be present in the same sample by simply changing gas chromatographic conditions.

5.2 One disadvantage of the method is that the amount of sample which can be taken is limited by the number of milligrams that the tube will hold before overloading. When the sample value obtained for the backup section of the charcoal tube exceeds 25 percent of that found on the front section, the possibility of sample loss exists.

5.3 Furthermore, the precision of the method is limited by the reproducibility of the pressure drop across the tubes. This drop will affect the flow rate and cause the volume to be imprecise, because the pump is usually calibrated for one tube only.

6. *Apparatus.*

6.1 A calibrated personal sampling pump whose flow can be determined within ±5 percent at the recommended flow rate. (Reference 11.3).

6.2 Charcoal tubes: Glass tubes with both ends flame sealed, 7 cm long with a 6-mm O.D. and a 4-mm I.D., containing 2 sections of 20/40 mesh activated charcoal separated by a 2-mm portion of urethane foam. The activated charcoals prepared from coconut shells and is fired at 600° C prior to packing. The adsorbing section contains 100 mg of charcoal, the backup section 50 mg. A 3-mm portion of urethane foam is placed between the outlet end of the tube and the backup section. A plug of silicated glass wool is placed in front of the adsorbing section. The pressure drop across the tube must be less than 1 inch of mercury at a flow rate of 1 liter per minute.

6.3 Gas chromatograph equipped with a flame ionization detector.

6.4 Column (4-ft × ¼-in stainless steel) packed with 50/80 mesh Poropak, type Q.

6.5 An electronic integrator or some other suitable method for measuring peak areas.

6.6 Two-milliliter sample containers with glass stopers or Teflon-lined caps. If an automatic sample injector is used, the associated vials may be used.

6.7 Microliter syringes: 10-microliter, and other convenient sizes for making standards.

6.8 Pipets: 1.0-ml delivery pipets.

6.9 Volumetric flask: 10-ml or convenient sizes for making standard solutions.

7. *Reagents.*

7.1 Chromatographic quality methanol.
7.2 Acrylonitrile, reagent grade.
7.3 Hexane, reagent grade.
7.4 Purified nitrogen.
7.5 Prepurified hydrogen.
7.6 Filtered compressed air.

8. *Procedure.*

8.1 Cleaning of equipment. All glassware used for the laboratory analysis should be detergent washed and thoroughly rinsed with tap water and distilled water.

8.2 Calibration of personal pumps. Each personal pump must be calibrated with a representative charcoal tube in the line. This will minimize errors associated with uncertainties in the sample volume collected.

8.3 Collection and shipping of samples.

8.3.1 Immediately before sampling, break the ends of the tube to provide an opening at least one-half the internal diameter of the tube (2 mm).

8.3.2 The smaller section of charcoal is used as a backup and should be positioned nearest the sampling pump.

8.3.3 The charcoal tube should be placed in a vertical direction during sampling to minimize channeling through the charcoal.

8.3.4 Air being sampled should not be passed through any hose or tubing before entering the charcoal tube.

8.3.5 A maximum sample size of 20 liters is recommended. Sample at a flow of 0.20 liter per minute or less. The flow rate should be known with an accuracy of at least ±5 percent.

8.3.6 The temperature and pressure of the atmosphere being sampled should be recorded. If pressure reading is not available, record the elevation.

83.7 The charcoal tubes should be capped with the supplied plastic caps immediately after sampling. Under no circumstances should rubber caps be used.

8.3.8 With each batch of 10 samples submit one tube from the same lot of tubes which was used for sample collection and which is subjected to exactly the same handling as the samples except that no air is drawn through it. Label this as a blank.

8.3.9 Capped tubes should be packed tightly and padded before they are shipped to minimize tube breakage during shipping.

8.3.10 A sample of the bulk material should be submitted to the laboratory in a glass container with a Teflon-lined cap. This sample should not be transported in the same container as the charcoal tubes.

8.4 *Analysis of samples.*

8.4.1 Preparation of samples. In preparation for analysis, each charcoal tube is scored with a file in front of the first section of charcoal and broken open. The glass wool is removed and discarded. The charcoal in the first (larger) section is transferred to a 2-ml stoppered sample container. The separating section of foam is removed and discarded; the second section is transferred to another stoppered container. These two sections are analyzed separately.

8.4.2 Desorption of samples. Prior to analysis, 1.0 ml of methanol is pipetted into each sample container. Desorption should be done for 30 minutes. Tests indicate that this is adequate if the sample is agitated occasionally during this period. If an automatic sample injector is used, the sample vials should be capped as soon as the solvent is added to minimize volatilization.

8.4.3 GC conditions. The typical operating conditions for the gas chromatograph are:

1. 50 ml/min (60 psig) nitrogen carrier gas flow.
2. 65 ml/min (24 psig) hydrogen gas flow to detector.
3. 500 ml/min (50 psig) air flow to detector.
4. 235° C injector temperature.
5. 255° C manifold temperature (detector).
6. 155° C column temperature.

8.4.4 Injection. The first step in the analysis is the injection of the sample into the gas chromatograph. To eliminate difficulties arising from blowback or distillation within the syringe needle, one should employ the solvent flush injection technique. The 10-microliter syringe is first flushed with solvent several times to wet the barrel and plunger. Three microliters of solvent are drawn into the syringe to increase the accuracy and reproducibility of the injected sample volume. The needle is removed from the solvent, and the plunger is pulled back about 0.2 microliter to separate the solvent flush from the sample with a pocket of air to be used as a marker. The needle is then immersed in the sample, and a 5-microliter aliquot is withdrawn, taking into consideration the volume of the needle, since the sample in the needle will be completely injected. After the needle is removed from the sample and prior to injection, the plunger is pulled back 1.2 microliters to minimize evaporation of the sample from the tip of the needle. Observe that the sample occupies 4.9-5.0 microliters in the barrel of the syringe. Duplicate injections of each sample and standard should be made. No more than a 3 percent difference in area is to be expected. An automatic sample injector can be used if it is shown to give reproducibility at least as good as the solvent flush method.

8.4.5 Measurement of area. The area of the sample peak is measured by an electron-

OCT 3 1978

V 4 3 / 1 9 2

ic integrator or some other suitable form of area measurement, and preliminary results are read from a standard curve prepared as discussed below.

8.5. *Determination of desorption efficiency.*

8.5.1 Importance of determination. The desorption efficiency of a particular compound can vary from one laboratory to another and also from one batch of charcoal to another. Thus, it is necessary to determine at least once the percentage of the specific compound that is removed in the desorption process, provided the same batch of charcoal is used.

8.5.2 Procedure for determining desorption efficiency. Activated charcoal equivalent to the amount in the first section of the sampling tube (100 mg) is measured into a 2.5 in, 4-mm I.D. glass tube, flame sealed at one end. This charcoal must be from the same batch as that used in obtaining the samples and can be obtained from unused charcoal tubes. The open end is capped with Parafilm. A known amount of hexane solution of acrylonitrile containing 0.239 g/ml is injected directly into the activated charcoal with a microliter syringe, and tube is capped with more Parafilm. When using an automatic sample injector, the sample injector vials, capped with Teflon-faced septa, may be used in place of the glass tubes.

The amount injected is equivalent to that present in a 20-liter air sample at the selected level.

Six tubes at each of three levels (0.5X, 1X, and 2X of the standard) are prepared in this manner and allowed to stand for at least overnight to assure complete adsorption of the analyte onto the charcoal. These tubes are referred to as the sample. A parallel blank tube should be treated in the same manner except that no sample is added to it. The sample and blank tubes are desorbed and analyzed in exactly the same manner as the sampling tube described in section 8.4.

Two or three standards are prepared by injecting the same volume of compound into 1.0 ml of methanol with the same syringe used in the preparation of the samples. These are analyzed with the samples.

The desorption efficiency (D.E.) equals the average weight in mg recovered from the tube divided by the weight in mg added to the tube, or

D.E. = Average weight recovered (mg)/weight added (mg)

The desorption efficiency is dependent on the amount of analyte collected on the charcoal. Plot the desorption efficiency versus weight of analyte found. This curve is used in section 10.4 to correct for adsorption losses.

9. *Calibration and standards.*

It is convenient to express concentration of standards in terms of mg/1.0 ml methanol, because samples are desorbed in this amount of methanol. The density of the analyte is used to convert mg into microliters for easy measurement with a microliter syringe. A series of standards, varying in concentration over the range of interest, is prepared and analyzed under the same GC conditions and during the same time period as the unknown samples. Curves are established by plotting concentration in mg/1.0 ml versus peak area.

NOTE.—Since no internal standard is used in the method, standard solutions must be analyzed at the same time that the sample analysis is done. This will minimize the effect of known day-to-day variations and variations during the same day of the FID response.

10. *Calculations.*

10.1 Read the weight, in mg, corresponding to each peak area from the standard curve. No volume corrections are needed, because the standard curve is based on mg/1.0 ml methanol and the volume of sample injected is identical to the volume of the standards injected.

10.2 Corrections for the blank must be made for each sample.

mg = mg sample − mg blank

Where:
mg sample = mg found in front section of sample tube.
mg sample = mg found in front section of blank tube.

A similar procedure is followed for the backup sections.

10.3 Add the weights found in the front and backup sections to get the total weight in the sample.

10.4 Read the desorption efficiency from the curve (see sec. 8.5.2) for the amount found in the front section. Divide the total weight by this desorption efficiency to obtain the corrected mg/sample.

Corrected mg/sample = Total weight/D.E.

10.5 The concentration of the analyte in the air sampled can be expressed in mg/cu m.

mg/cu m = Corrected mg (section 10.4) × 1,000 (liter/cu m)/air volume sampled (liter)

10.6 Another method of expressing concentration is ppm.

$$ppm = mg/cu \times 24.45/M.W. \times 760/P \times T + 273/298$$

Where:
P = Pressure (mm Hg) of air sampled.
T = Temperature (°C) of air sampled.
24.45 = Molar volume (liter/mole) at 25° C and 760 mm Hg.
M.W. = Molecular weight (g/mole) of analyte.
760 = Standard pressure (mm Hg).
298 = Standard temperature (°K).

NIOSH MODIFICATION OF NIOSH METHOD S-156

The NIOSH recommended method for low levels for acrylonitrile is a modification of method S-156. It differs in the following respects:

(1) Samples are desorbed using 1 ml of 1 percent acetone in CS_2 rather than methanol.

(2) The analytical column and conditions are:

Column: 20 percent SP-1000 on 80/100 Supelcoport 10 feet x ⅛ inch S.S.

Conditions:
Injector temperature: 200° C.
Detector temperature: 100° C.
Column temperature: 85° C.
Helium flow: 25 ml/min.
Air flow: 450 ml/min.
Hydrogen flow: 55 ml/min.

(3) A 2 µl injection of the desorbed analyte is used.

(4) A sampling rate of 100 ml/min is recommended.

OSHA LABORATORY MODIFICATION OF NIOSH METHOD S-156

Analyte: Acrylonitrile.
Matrix: Air.
Procedure: Adsorption on charcoal, desorption with methanol, GC.

1. *Principle of the Method* (Reference 1).

1.1 A known volume of air is drawn through a charcoal tube to trap the organic vapors present.

1.2 The charcoal in the tube is transferred to a small, stoppered sample vial, and the analyte is desorbed with methanol.

1.3 An aliquot of the desorbed sample is injected into a gas chromatograph.

1.4 The area of the resulting peak is determined and compared with areas obtained for standards.

2. *Advantages and disadvantages of the method.*

2.1 The sampling device is small, portable, and involves no liquids. Interferences are minimal, and most of those which do occur can be eliminated by altering chromatographic conditions. The tubes are analyzed by means of a quick, instrumental method.

2.2 This method may not be adequate for the simultaneous analysis of two or more substances.

2.3 The amount of sample which can be taken is limited by the number of milligrams that the tube will hold before overloading. When the sample value obtained for the backup section of the charcoal tube exceeds 25 percent of that found on the front section, the possibility of sample loss exists.

2.4 The precision of the method is limited by the reproducibility of the pressure drop across the tubes. This drop will affect the flow rate and cause the volume to be imprecise, because the pump is usually calibrated for one tube only.

3. *Apparatus.*

3.1 A calibrated personal sampling pump whose flow can be determined within ±5 percent at the recommended flow rate.

3.2 Charcoal tubes: Glass tube with both ends flame sealed, 7 cm long with a 6-mm O.D. and a 4-mm I.D., containing 2 sections of 20/40 mesh activated charcoal separated by a 2-mm portion of urethane foam. The activated charcoal is prepared from coconut shells and is fired at 600° C prior to packing. The absorbing section contains 100 mg of charcoal, the back-up section 50 mg. A 3-mm portion of urethane foam is placed between the outlet end of the tube and the back-up section. A plug of silated glass wool is placed in front of the adsorbing section. The pressure drop across the tube must be less than one inch of mercury at a flow rate of 1 liter per minute.

3.3 Gas chromatograph equipped with a nitrogen phosphorus detector.

3.4 Column (10-ft x 1/8"-in stainless steel) packed with 100/120 Supelcoport coated with 10 percent SP 1000.

3.5 An electronic integrator or some other suitable method for measuring peak areas.

3.6 Two-milliliter sample vials with Teflon-lined caps.

3.7 Microliter syringes: 10-microliter, and other convenient sizes for making standards.

3.8 Pipets: 1.0-ml delivery pipets.

3.9 Volumetric flasks: convenient sizes for making standard solutions.

4. *Reagents.*

4.1 Chromatographic quality methanol.

4.2 Acrylonitrile, reagent grade.

4.3 Filtered compressed air.

4.4 Purified hydrogen.

4.5 Purified helium.

5. *Procedure.*

5.1 Cleaning of equipment. All glassware used for the laboratory analysis should be properly cleaned and free of organics which could interfere in the analysis.

5.2 Calibration of personal pumps. Each pump must be calibrated with a representative charcoal tube in the line.

5.3 Collection and shipping of samples.

5.3.1 Immediately before sampling, break the ends of the tube to provide an opening at least one-half the internal diameter of the tube (2 mm).

5.3.2 The smaller section of the charcoal is used as the backup and should be placed nearest the sampling pump.

5.3.3 The charcoal should be placed in a vertical position during sampling to minimize channeling through the charcoal.

5.3.4 Air being sampled should not be passed through any hose or tubing before entering the charcoal tube.

5.3.5 A sample size of 20 liters is recommended. Sample at a flow rate of approximately 0.2 liters per minute. The flow rate should be known with an accuracy of at least ±5 percent.

5.3.6 The temperature and pressure of the atmosphere being sampled should be recorded.

5.3.7 The charcoal tubes should be capped with the supplied plastic caps immediately after sampling. Rubber caps should not be used.

5.3.8 Submit at least one blank tube (a charcoal tube subjected to the same handling procedures, without having any air drawn through it) with each set of samples.

5.3.9 Take necessary shipping and packing precautions to minimize breakage of samples.

5.4 Analysis of samples.

5.4.1 Preparation of samples. In preparation for analysis, each charcoal tube is scored with a file in front of the first section of charcoal and broken open. The glass wool is removed and discarded. The charcoal in the first (larger) section is transferred to a 2-ml vial. The separating section of foam is removed and discarded; the section is transferred to another capped vial. These two sections are analyzed separately.

5.4.2 Desorption of samples. Prior to analysis, 1.0 ml of methanol is pipetted into each sample container. Desorption should be done for 30 minutes in an ultrasonic bath. The sample vials are recapped as soon as the solvent is added.

5.4.3 GC conditions. The typical operating conditions for the gas chromatograph are:

1. 30 ml/min (60 psig) helium carrier gas flow.
2. 3.0 ml/min (30 psig) hydrogen gas flow to detector.
3. 50 ml/min (60 psig) air flow to detector.
4. 200° C injector temperature.
5. 200° C dejector temperature.
6. 100° C column temperature.

5.4.4 Injection. Solvent flush technique or equivalent.

5.4.5 Measurement of area. The area of the sample peak is measured by an electronic integator or some other suitable form of area measurement, and preliminary results are read from a standard curve prepared as discussd below.

5.5 Determination of desorption efficiency.

5.5.1 Importance of determination. The desorption efficiency of a particular compound can vary from one laboratory to another and also from one batch of charcoal to another. Thus, it is necesary to determine, at least once, the percentage of the specific compound that is removed in the desorption process, provided the same batch of charcoal is used.

5.5.2 Procedure for determining desorption efficiency. The reference portion of the charcoal tube is removed. To the remaining portion, amounts representing 0.5X, 1X, and 2X (X represents TLV) based on a 20 l air sample are injected onto several tubes at each level. Dilutions of acrylonitrile with methanol are made to allow injection of measurable quantities. These tubes are then allowed to equilibrate at least overnight. Following equilibration they are analyzed following the samc procedure as the samples. A curve of the desorption efficiency

amt recovered/amt added

is plotted versus amount of analyte found. This curve is used to correct for adsorption losses.

6. *Calibration and standards.*

A series of standards, varying in concentration over the range of interest, is prepared and analyzed under the same GC conditions and during the same time period as the unknown samples. Curves are prepared by plotting concentration versus peak area.

NOTE—Since no internal standard is used in the method, standard solutions must be analyzed at the same time that the sample analysis is done. This will minimize the effect of known day-to-day variations and variations during the same day of the NPD response. Multiple injections are necessary.

7. *Calculations.*

Read the weight, corresponding to each peak area from the standard curve, correct for the blank, correct for the desorption efficiency, and make necessary air volume corrections.

8. *Reference.* NIOSH Method S-156.

V 43 / 193

TAMPA, FLORIDA, WORKSHOP

HOW TO USE THE FEDERAL REGISTER

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register in cooperation with the University of South Florida Library and Department of Library, Media, and Information Studies, the University of Tampa Library, Hillsborough Community College Library and the Tampa Public Library.

WHAT: Free public workshop (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHEN: October 23, 1978, at 2:00 p.m.

WHERE: University of South Florida Tampa Campus, 4202 Fowler Avenue, College of Education Building, Room 302.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

RESERVATIONS: Call 813-974-2100, Ext. 301 or 813-974-2557.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

PART 201—EXTENSIONS OF CREDIT BY FEDERAL RESERVE BANKS

Changes in Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Change in discount rates.

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of adjusting discount rates with a view to accommodating commerce and business in accordance with other related rates and the general credit situation of the country.

Pursuant to the authority of 5 U.S.C. Section 553 (b)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that economic and financial considerations require that these amendments must be adopted immediately and that delay would be contrary to the public interest.

EFFECTIVE DATE: The changes were effective on the date specified below (September 22, 1978).

FOR FURTHER INFORMATION CONTACT:

Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3257.

Pursuant to section 14(d) of the Federal Reserve Act (12 U.S.C. 357), Part 201 is amended as set forth below:

1. Section 201.51 is amended to read as follows:

§ 201.51 Advances and discounts for member banks under sections 13 and 13a.

The rates for all advances and discounts under sections 13 and 13a of the Federal Reserve Act (except advances under the last paragraph of such section 13 to individuals, partnerships, or corporations other than member banks) are:

Federal Reserve Bank of—	Rate	Effective
Boston	8	Sept. 22, 1978.
New York	8	Do.
Philadelphia	8	Do.
Cleveland	8	Do.
Richmond	8	Do.
Atlanta	8	Do.
Chicago	8	Do.
St. Louis	8	Do.
Minneapolis	8	Do.
Kansas City	8	Do.
Dallas	8	Do.
San Francisco	8	Do.

2. Section 201.52 is amended to read as follows:

§ 201.52 Advances to member banks under section 10(b).

(a) The rates for advances to member banks under section 10(b) of the Federal Reserve Act are:

Federal Reserve Bank of—	Rate	Effective
Boston	8½	Sept. 22, 1978.
New York	8½	Do.
Philadelphia	8½	Do.
Cleveland	8½	Do.
Richmond	8½	Do.
Atlanta	8½	Do.
Chicago	8½	Do.
St. Louis	8½	Do.
Minneapolis	8½	Do.
Kansas City	8½	Do.
Dallas	8½	Do.
San Francisco	8½	Do.

(b) The rates for advances to member banks for prolonged periods and significant amounts under section 10(b) of the Federal Reserve Act and § 201.2(e) (2) of regulation A are:

Federal Reserve Bank of—	Rate	Effective
Boston	9	Sept. 22, 1978.
New York	9	Do.
Philadelphia	9	Do.
Cleveland	9	Do.
Richmond	9	Do.
Atlanta	9	Do.
Chicago	9	Do.
St. Louis	9	Do.
Minneapolis	9	Do.
Kansas City	9	Do.
Dallas	9	Do.
San Francisco	9	Do.

3. Section 301.53 is amended to read as follows:

§ 201.53 Advances to persons other than member banks.

The rates for advances under the last paragraph of section 13 of the Federal Reserve Act to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the United States or any agency thereof are:

Federal Reserve Bank of—	Rate	Effective
Boston	11	Sept. 22, 1978.
New York	11	Do.
Philadelphia	11	Do.
Cleveland	11	Do.
Richmond	11	Do.
Atlanta	11	Do.
Chicago	11	Do.
St. Louis	11	Do.
Minneapolis	11	Do.
Kansas City	11	Do.
Dallas	11	Do.
San Francisco	11	Do.

(12 U.S.C. 248(i). Interprets or applies 12 U.S.C. 357.)

By order of the Board of Governors, September 25, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

PART 207—SECURITIES CREDIT BY PERSONS OTHER THAN BANKS, BROKERS OR DEALERS

PART 220—CREDIT BY BROKERS AND DEALERS

PART 221—CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

PART 224—RULES GOVERNING BORROWERS WHO OBTAIN SECURITIES CREDIT

List of OTC Margin Stocks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

V 43/193
OCT 4 78

SUMMARY: The list of OTC margin stocks is comprised of stocks traded over-the-counter (OTC) that have been determined by the Board of Governors of the Federal Reserve System to be subject to margin requirements under certain Federal Reserve regulations. The list is published from time to time by the Board as a guide for lenders subject to the regulations and the general public. This document sets forth additions to or deletions from the previously published list and will serve to give notice to the public about the changed status of certain stocks.

EFFECTIVE DATE: October 2. 1978.

FOR FURTHER INFORMATION CONTACT:

Jamie Lenoci, Financial Analyst, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2781.

SUPPLEMENTARY INFORMATION: Set forth below are stocks representing additions to or deletions from the Board's list of stocks traded over-the-counter on file at the Office of the Federal Register as of April 3, 1978. The list, as amended, includes those stocks that the Board of Governors has found meet the criteria specified by the Board and thus have the degree of national investor interest, the depth and breadth of market, the availability of information respecting the stock and its issuer to warrant incorporating such stocks within the requirements of regulation G, T, U, and X. Copies of the current list may be obtained from any Federal Reserve bank. A copy is also on file at the Office of the Federal Register.[1]

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion on the list specified in 12 CFR 207.5(d) and (e), 220.8(h) and (i), and 221.4(d) and (e). No additional useful information would be gained by public participation. The requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of this list as soon as possible.

Accordingly, pursuant to the authority of sections 7 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78g and w) and in accordance with § 207.2(f)(2) of regulation G, § 220.2(e)(2) of regulation T, and § 221.3(d)(2) of regulation U, there is set forth below additions to and deletions from the Board's list:

ADDITIONS TO LIST

Aceto Chemical Co., Inc., $9.01 par common.
Aztec Manufacturing Co., $1 par common.
Beneficial National Corp., $9.25 par common.
Berkley, W. R. Corp., $9.20 par common.

Title 14—Aeronautics and Space

CHAPTER V—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

PART 1210—DEVELOPMENT WORK FOR INDUSTRY IN NASA WIND TUNNELS

Final Rules

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rules.

SUMMARY: NASA currently does not have a prescribed policy and procedure for industry to request the use of NASA wind tunnels. These rules define the classes of NASA wind tunnels and the classes of industry work, and provide information on scheduling, occupancy time charges and test data transmitted.

DATE: October 4, 1978

ADDRESS: Director, Space Technology Coordinating Office, Code RC, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT:

Fred J. DeMeritte, telephone 202-755-8501.

SUPPLEMENTARY INFORMATION: On May 19, 1978, NASA published proposed rules (43 FR 21691-21693) to revise its rules and procedures for industry use of NASA wind tunnels. Interested parties were given until June 19, 1978, to submit comments or suggestions. No such comments or suggestions were received. However, NASA made the following changes to clarify the regulations: (1) In § 1210(c), line 6, after "wind tunnel" the words "(and the new 80- by 120-foot test section)" were added; and (2) In § 1210.3(a), line 4, "laboratory" was changed to "wind tunnel." With these two exceptions, the proposed rules are hereby adopted without change and are set forth below.

ROBERT A. FROSCH,
Administrator.

1. 14 CFR Part 1210 is revised in its entirety to read as follows:

PART 1210—DEVELOPMENT WORK FOR INDUSTRY IN NASA WIND TUNNELS

Secs.
1210.1 Introduction.
1210.2 General classes of work.
1210.3 Priorities and schedules.
1210.4 Company projects.
1210.5 Government projects.
1210.6 Test preparation and conduct.

AUTHORITY: 50 U.S.C. 511-515, 42 U.S.C. 2473(c) (5) and (6).

§ 1210.1 Introduction.

(a) *Authority.* The regulations, as they apply to the Unitary Wind Tunnel Plan facilities, are promulgated under authority of the Unitary Wind Tunnel Plan Act of 1949, Pub. L. 85-568, and codified in 50 U.S.C 511-515. This statute states that "The facilities authorized * * * shall be operated and staffed by the National Aeronautics and Space Administration but shall be available primarily to industry for testing experimental models in connection with the development of aircraft and missiles. Such tests shall be scheduled and conducted in accordance with industry's requirements, and allocation of laboratory time shall be made in accordance with the public interest, with proper emphasis upon the requirements of each military service and due consideration of civilian needs."

(b) *Unitary wind tunnel plan facilities.* The unitary wind tunnel plan facilities are the Ames Research Center 11- by 11-foot wind tunnel, 9- by 7-foot wind tunnel, and 8- by 7-foot wind tunnel; the Langley Research Center 4- by 4-foot high Mach number test section and the 4- by 4-foot low Mach number test section; and the Lewis Research Center 10- by 10-foot wind tunnel. These wind tunnels are operated by NASA for industry, NASA, the Department of Defense, and other Government agency projects.

(c) *National aeronautical facilities.* When completed, the national aeronautical facilities will be the national transonic facility at Langley Research Center and the modified 40- by 80-foot wind tunnel and the new 80- by 120-foot test section at Ames Research Center. The wind tunnels will be operated by NASA for industry, NASA, the Department of Defense, and other Government agency projects.

(d) *All other wind tunnels.* All other NASA wind tunnels will be used primarily for NASA research. However, all of these wind tunnels may be used for industry work when it is in the public interest either in joint programs with NASA or on a fee basis.

(e) *NASA policy.* All the projects to be performed in any of the NASA wind tunnels must be appropriate to the facility.

§ 1210.2 General classes of work.

Work for industry in the NASA facilities shall be divided into four project categories:

(a) *Company projects.* Includes work for industry on:

(1) Projects which are neither under contract nor supported by a letter of intent from a Government agency, and

(2) Company desired tests which are related to a project which is either under contract with or supported by a letter of intent from a Government agency, but are beyond the scope of the tests requested by the Government agency. A fee will be charged for these company projects.

(b) *Government projects.* Includes work for industry on projects which are either under contract with or supported by a letter of intent from a Government agency. The work must be requested by the Government agency. No fee will be charged for this type of work. (An exception is the national transonic facility for which a reimbursable policy is being developed.)

(c) *United States/foreign industry consortium projects.* This involves U.S. companies, which have formed a consortium or any other type of association with foreign companies, that desire tests on aerospace projects of joint or foreign interest. An application for work for such a consortium shall disclose the foreign interest in or

V 43/193
OCT 4 78

anticipated foreign benefit from tests to be conducted and shall first be reviewed by the Director, International Affairs Division for consistency with current U.S. foreign policy and for compatibility with section 102 of the National Aeronautics and Space Act of 1958, as amended, prior to a final decision being reached on the application. A fee will be charged for these consortium projects unless, in the review procedure above, it is determined that Government agency cooperative sponsorship warrants a nonfee arrangement.

(d) *Foreign company projects.* Foreign company requests for wind tunnel use that are not related to U.S. Government or U.S. industry interests or programs will generally not be granted and will in no event be granted prior to a review, as required in paragraph (c) of this section, by the Director, International Affairs Division.

§ 1210.3 Priorities and schedules.

(a) *Priorities.* Unitary wind tunnels shall be available primarily to industry for development work. However, allocations of wind tunnel time shall be in accordance with the public interests, with proper emphasis upon the requirements of the military services and due consideration of civilian needs. Research work shall have priority in all other NASA facilities. Priority conflicts may be referred to the Associate Administrator for Aeronautics and Space Technology for review and final determination.

(b) *Schedules.* Schedules showing the allocation of testing time for Government projects and for company projects for unitary wind tunnels and other major wind tunnels will be established by the appropriate Center each month for the ensuing 3-month period and submitted to NASA Headquarters, Attn.: Code RA, by the first day of each month.

§ 1210.4 Company projects.

(a) *Initiation of company projects.* Company projects will be initiated by a letter to the Center Director followed by a conference between company and NASA representatives at the Center having responsibility for the facility proposed for the project. The company representatives will be required to explain the technical need for the project and why the NASA facility is required, as well as to define the extent of the test program, model and equipment requirements, and schedule. The Center shall maintain a file of all company requests and their disposition. The company may be required to provide a safety analysis report (SAR) to augment the wind tunnel SAR by describing potential hazards that the company test program, model and equipment may present to NASA facilities and personnel.

(b) *Scheduling of tests.* In scheduling time for company projects, the responsible NASA Center will take into account priorities as specified in § 1210.3 and all projects, including Government, company, and NASA research work relative to the national interest. Every reasonable attempt will be made to accommodate technically justifiable projects on as timely a basis as possible.

(c) *Fees for company projects.* The policy on charges for the use of NASA facilities is explained in NASA Management Instruction 9080.1A, dated November 21, 1975, titled, "Review, Approval and Imposition of User Charges." The fee imposed for a company project will cover all direct and indirect costs to NASA for the wind tunnel test.

(1) *Occupancy time charge.* (i) The occupancy time will be computed from the start of installation of the test article in the wind tunnel test section through the time on which the test article is removed from the test section and the test section restored to its original condition.

(ii) The occupancy time rate will be computed from the sum of the annual cost of the operating crew plus the estimated annual maintenance cost of the facility and will be determined in accordance with NASA Management Instruction 9080.1A.

(iii) The sum of the annual cost for the operating crew and the estimated annual maintenance cost divided by the number of operational weeks, depending on the facility, gives the weekly occupancy rate. This fee will be charged per basic week of 5 days, each day to be one-fifth week. The remaining weeks over the number of operational weeks for each year are the estimated maintenance reserve and holiday allowance; hence, no charge will be made for a holiday occurring during a test period.

(2) *Energy/fuel.* The charge for energy/fuel will be determined from the energy/fuel consumed during the tests and the actual cost to the NASA.

(3) *Data reduction.* The cost of data reduction and the data report will include labor, materials, computing machine rental, and appropriate indirect charges in accordance with NASA Management Instruction 9080.1A.

(4) *Cancellation of scheduled wind tunnel time.* Upon determination of a test schedule by the representatives of the company and of the NASA, it becomes the responsibility of the company to meet this schedule. A project may be canceled by the company without charge on 60 days' notice depending upon the readiness of succeeding projects. In the event subsequently scheduled work cannot be scheduled in lieu of the company's work, when canceled with less than 60 days' notice, the company shall be required to pay the occupancy time charge for the scheduled test period or for the period the facility test section is idle due to the cancellation, whichever results in the smaller charge. Curtailment of a project underway before the end of the scheduled test period may be made by the company. In this event, the company shall be required to pay the occupancy charge for the time used plus the unused scheduled time or for the idle time of the test section, whichever is the smaller.

(5) *High power requirements.* Unavailability of adequate power or economic considerations may, on occasion, cause delay or cancellation of high-powered test runs. The company shall cooperate with the facility staff in the scheduling of low-powered runs during periods when large blocks of power are unavailable. However, should rescheduling of test runs to accommodate power shortages be impractical, occupancy time charge credits will be made for time lost arising from such shortages. The basis for these credits, which will also be made for delays due to breakdown or malfunction of Government-furnished equipment or instrumentation, or due to other reasons beyond the control of the company, will be determined by each Center. The test period allotted for the program may be extended to offset delays in lieu of refund.

(d) *Test data transmittal.* The basic data for company projects will be transmitted to the requesting company without detailed analysis but with the necessary description of methods and techniques employed to permit proper interpretation of the data.

(e) *Proprietary rights.* In order to protect the trade secrets of companies, NASA will generate one set of final results, which will become the property of the company and be promptly transmitted to the company. If, subsequently, there is need to review the results, it will be the responsibility of the company to provide the NASA Center with copies of the resulting data on loan. Upon completion of the review, the data will be returned to the company. Should the company desire to maintain its trade secret rights in the data during the loan period, it should mark the data with a notice stating that the data shall not be used or disclosed other than for review purposes without prior written permission of the company. NASA, in turn, will protect that data covered by the notice which is protected under the law as a trade secret.

(f) *Test preparation and conduct* (see § 1210.6).

§ 1210.5 Government projects.

(a) *Initiation of Government projects.* Government projects shall be initiated through a conference of representatives from the contracted company, the sponsoring Government agency, and the staff of the NASA Center having responsibility for the facility proposed for the project. The purpose of the conference will be to establish the technical basis for the project and why the NASA facility is required as well as to define the extent of the test program, model and instrumentation requirements, and schedule. Upon concurrence of the Center Director, the sponsoring Government agency will submit a letter of request to NASA Headquarters for approval as well as clearing the request through the projects allocation and priority group (see paragraph (b) of this section). A safety analysis report (SAR) may be required to augment the wind tunnel SAR by describing the potential hazards that the project test program, model, and equipment may present to NASA facilities and personnel.

(b) *Projects allocation and priority group.* For coordinating Government projects, there is a group established jointly by the Department of Defense and the NASA. It consists of one representative each from the Air Force, Army, Navy, and NASA, competent to determine military priorities in the use of the NASA and other Government-owned facilities. The group is known as the aircraft, missile and propulsion projects allocation and priority group.

(c) *Scheduling of tests.* Government projects will be scheduled with due consideration of the priorities established by the projects allocation and priority group.

(d) *Test data transmitted.* The basic data for Government projects, without detailed analysis but with the necessary description of methods and techniques employed to permit the proper interpretation of the data, will be transmitted to the company for whom the tests were made and the sponsoring Government agency. Further disclosure by NASA of the test results will be made only with the prior concurrence of the sponsoring Government agency.

§ 1210.6 Test preparation and conduct.

(a) *Programing by user.* The user will be given the greatest possible freedom within the objectives of the scheduled program to obtain the precise information it requires, to determine the sequence and number of test runs to be made, and to make modifications to the program arising from the results currently being obtained, subject to requirements of safety, energy conservation, practicability, and the total time assigned.

(b) *Instrumentation.* Each facility will provide basic instrumentation suitable for the test range of the respective facility and computing equipment for the reduction of test data. Information will be furnished for each facility on the permissible size of model, standard balances, safety margins to be used in the construction of models, model mounting details, and other pertinent factors. If the basic instrumentation furnished by the facility does not meet the test requirements, the company will provide suitable instrumentation which will generally be calibrated by the facility staff to insure accuracy of measurement. This instrumentation will be made available sufficiently in advance of the test date to accomplish the calibration. Serious delays arising from inaccuracies in user supplied instrumentation, if occurring during the scheduled test period, may result in reassignment of the position of the tests on the facility schedule. Detailed specifications and arrangements for special instrumentation will be established by mutual agreement. All model criteria required by the facility for safety consideration including the necessary drawings and stress analyses of the articles to be tested will be furnished at a time specified by the facility staff for their use in preparing for the test. The user will also be required to furnish all information necessary to prepare the data reduction software program at a date specified by the facility staff.

(c) *Test program.* All tests will be conducted under NASA supervision and by NASA personnel or by NASA support service contractor personnel unless approved otherwise by the facility manager. By agreement between the user (company representatives and the requesting agency) and the Center staff, changes in the test program may be made within the objectives of the scheduled program if time is available. When tests are not totally conducted by NASA personnel or by NASA support service contractor personnel, the NASA Field Installation Safety Officer shall verify that the company personnel are fully cognizant of facility safety problems and operations. A current SAR on the facility shall be available to the company personnel for review.

(d) *Handling test data.* The NASA staff will be responsible for obtaining all test data, its reduction to suitable coefficient form, and the accuracy of the final data, but the NASA will assume no responsibility for the interpretation of the data by others. Transmittal of the data will be made as rapidly as possible. For company projects, the data will be transmitted as directed by the company. The data for Government projects will be transmitted simultaneously to the sponsoring Government agency and the contractor, unless otherwise directed by the sponsoring agency.

(e) *Shops and office space.* During the conduct of user testing, the NASA will make available machine tools in the facility shop and desk space to the user whose projects are under tests.

(f) *Company furnished personnel.* User personnel furnished for each project will be agreed upon between the user and facility staff prior to the test.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 15—REPORTS—GENERAL PROVISIONS

PART 19—REPORTS BY PERSONS HOLDING BONA FIDE HEDGE POSITIONS PURSUANT TO § 1.3(z) OF THIS CHAPTER AND BY MERCHANTS, PROCESSORS, AND DEALERS IN COTTON

Cash Market Positions; Reporting Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is amending parts 15 and 19 of its regulations concerning the reporting of cash positions on series '04 reports. The major changes will:

1. Make the reporting requirements applicable to persons engaged in bona fide hedging transactions as defined in § 1.3(z) of the regulations and to merchants, processors and dealers in cotton. Reporting requirements for merchants, processors and dealers in cotton are to be retained to enable the Commission to continue to publish the weekly "Cotton On Call" reports.

2. Delete the requirements in § 19.01 to report unfixed price purchase and unfixed price sales commitments for grains.

3. Increase the allowed filing time for all commodities, except cotton.

These amendments will enable the Commission to carry out its surveillance activities with respect to persons now permitted to exceed the speculative limits in accordance with the recently expanded definition of bona fide hedging under § 1.3(z).

V 43 / 193 OCT 4 78 UMI

Section 15.02 has also been amended to reflect the current use of the forms 2601 and 2603 for reporting positions in the financial instrument futures.

EFFECTIVE DATE: November 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Wayne Olson, Director, Commodity Futures Trading Commission, Division of Market Surveillance and Analysis, 2033 K Street NW., Washington, D.C. 20581, telephone 202-254-3312.

SUPPLEMENTAL INFORMATION: On December 23, 1977, the Commission published a proposal to revise parts 15 (17 CFR Part 15 (1977)) and 19 (17 CFR Part 19 (1977)) of its regulations.[1] Comments were due on or before February 6, 1978. Only one comment letter was received. This letter did not address any of the term of the Commission's proposal, but dealt instead with suggestions for the scheduling of changes. The Commission has considered the comment and has determined to adopt the proposal with certain revisions. Set forth below is a synopsis of the major changes.

CHANGES TO PARTS 15 AND19

Cash position information is required by parts 15 and 19 of the regulations from traders who hold reportable positions [2] in futures commodities with Federal speculative limits [3] and who are merchandisers, processors, and dealers in such commodities. This information is used to check compliance with speculative limits by insuring that persons classifying their futures positions as hedging actually own or control offsetting cash positions. For all commodities with speculative limits, major changes have been made to parts 15 and 19 which affect who must file series '04 reports, the time of filing the report and the information which must be provided.

WHO MUST FILE

Changes were made to parts 15 and 19 which may require additional traders to file series '04 reports. Amendments to §§ 15.01(d) and 19.00 require that all traders who own or control futures position in a commodity with Federal speculative limits (including cotton) any part of which constitutes bona fide hedging as defined in § 1.3(z) of the regulations, 17 CFR 1.37 (1977), and which exceeds the '04 reporting level must file such reports. Previously, only traders who were merchandisers, processors, or dealers and whose futures position equaled or exceeded the series '04 reporting levels were required to file. With the exception of cotton, language concerning merchandisers, processors, and dealers has been deleted from the regulations.[4]

Three groups of persons are primarily affected by this amendment: (1) Anticipatory hedgers of livestock and poultry feeds, (2) certain hedgers of crop production, and (3) cross hedgers. Prior to the adoption of amendments to the definition of bona fide hedging in § 1.3(z), the first two categories of traders were allowed to hold or control positions equal to or in excess of series '04 reporting levels, but were not obligated to file CFTC series '04 reports unless they were merchants, processors, or dealers.[5] The third category, cross hedgers, has only been permitted to exceed speculative limits since the Commission adopted the revised definition of bona fide hedging.[6]

Some traders may no longer be required to file series '04 reports because the reference to grain sorghums has been deleted from § 19.01. The Commission does not believe that trading and position limits for grains imposed by § 150.1 apply to grain sorghums since they are not expressly included in the definition of grains (see § 150.1(e)).

TIME OF FILING REPORTS

With the exception of form 304 reports for cotton, § 19.10 has been amended to change the date by which the CFTC series '04 reports must be filed with the Commission.[7] As amended, § 19.10 will provide that the due date for filing series '04 reports in a city where the Commission is located will be the third (rather than the first) business day following the period covered by the report. In cities where the Commission does not have an office, series '04 reports are to be mailed not later than the second (as opposed to the first) business day following the period covered by the report. The filing dates for the form 304 reports remain unchanged. For convenience, § 19.10 has also been revised to refer specifically to the number of the series '04 report required to be filed.

INFORMATION REQUIRED

Changes have been made to part 19 which affect the type of information that is filed. The amendments to part 19 contain special provisions for reporting cash positions that may be cross hedged. Under the amendments to § 19.00, cross hedged cash positions must be reported in two ways—in terms of the commodity used for hedging as well as in terms of the actual physical commodity being hedged. For example, a producer of grain sorghums hedging that commodity in corn futures must report the number of hundredweight (cwt.) of grain sorghum hedged and the equivalent quantity in terms of bushels of corn. By reporting the physical quantity hedged and the equivalent quantity of the commodity in which it is hedged, the Commission will be able to determine whether the size of the cross hedge is justified.

An amendment to § 19.01 deletes the requirement that traders in wheat, corn, oats, rye, barley, flaxseed, or soybeans report on the form 204 information concerning their unfixed price purchase and unfixed price sales commitments. Because of the limited purpose of the CFTC series '04 reports (i.e., monitoring compliance with the speculative limits) unfixed price information for cash commodities is not relevant.

MISCELLANEOUS CHANGES

Section 15.03 has been amended to clarify the language of the present regulation. The quantity fixed for the purpose of filing 304 reports for cotton under parts 17, 18, and 19 is 5,000 bales; this requirement is presently stated in § 15.03(a) only. As amended, § 15.03(a) pertains to reports filed under parts 17 and 18, and § 15.03(b) pertains to reports filed under part 19. The 5,000-bale quantity fixed for cotton reports will be listed in each paragraph. No substantive changes were made in this regulation.

[1] See 42 FR 64364 (Dec. 23, 1977).

[2] Reporting levels for series '04 reports are given in § 15.03(b) of the regulations and generally are set at or near the speculative limit for each commodity.

[3] Sec. 4a of the Commodity Exchange Act, 7 U.S.C. 6a (1976), authorizes the Commission to fix limits on the amount of trading and positions in commodity futures which may be held by any person, except that such limits may not apply to transactions or positions which are shown to be bona fide hedging transactions or positions as such terms are defined by the Commission. Federal speculative limits have been established for the following commodities: Corn, wheat, oats, soybeans, cotton, potatoes, eggs, rye, barley, and flaxseed.

[4] Reports from merchandisers, processors, and dealers concerning cotton are used in compiling the weekly CFTC "Cotton On Call" report. Because of the unique significance of call transactions in the marketing of cotton and their relationship to the futures market, the Commission has determined not to make changes in its series '04 reporting requirements for cotton that would result in any loss of information or affect the timeliness of issuing the "Cotton On Call" report.

[5] See 42 FR 42748 (August 24, 1977).

[6] The definition of bona fide hedging transactions and positions includes • • •

(iii) Sales and purchases for future delivery described in paragraphs (z)(2)(i) and (z)(2)(ii) of this section may also be offset other than by the same quantity of the same cash commodity, provided that the fluctuations in value of the position for future delivery are substantially related to the fluctuations in value of the actual or anticipated cash positions • • •.

17 CFR 1.3(z)(2)(iii) (1977), 42 FR 42751 (August 24, 1977).

[7] See footnote 5 for the reason for not making this change applicable to cotton.

Section 15.00(b)(2) has been amended to conform to the changes made in § 15.03(b) and to make explicit that series '04 reports are required only if a trader's position is reportable on the last business day of the week. This change was omitted in the original proposal that appeared in the December 23, 1977, FEDERAL REGISTER; however, this change is not substantive.

With one exception in § 19.03, each of §§ 19.01(b), 19.02(b), 19.03(b), and 19.04(b) presently give identical instructions to traders on the use of standards and conversion factors and exceptions to reporting certain products and byproducts of the respective commodities on the series '04 reports. Since these instructions are common to each of §§ 19.01 through 19.04, it is more appropriate that they be contained in one section—revised § 19.00 (General Information). Accordingly §§ 19.01(b), 19.02(b), 19.03(b), and 19.04(b) have been deleted and new language has been added to § 19.00 which is applicable to all commodities which are the subject of part 19.

The exception in § 19.03 (which no longer will be permitted) allowed persons filing series '04 reports for eggs to exclude from their report certain eggs not in cold storage if it was the regular business practice of the person filing the report to exclude the same in determining his cash position for hedging.

This exclusion was appropriate when the only futures contract being traded in fresh shell eggs required delivery from cold storage warehouses.[8] Due to changes in cash marketing practices for eggs, the cold storage egg contract has been changed to require in-plant delivery. This makes the exclusion in § 19.03 inconsistent with the purpose of part 19 (i.e., determining the hedgeable cash position of traders) and with the requirements for other commodities included in part 19.[8]

Section 15.02 is being amended to reflect the current use of forms 2601 and 2603 by FCM's and large traders to report positions in the financial instruments futures.

In consideration of the foregoing, pursuant to its authority under §§ 4g(1), 4(i), and 8a(5) of the Act, 7 U.S.C. 6g(1), 6(i), and 12a(5) (1976), the Commission hereby amends parts 15 and 19 of the 17 CFR Chapter I as follows.

PART 15—REPORTS—GENERAL PROVISIONS

1. Section 15.00 is amended by revising paragraph (b)(2) as follows:

§ 15.00 Definitions.

• • • • • •

(b) • • •

(2) For the purpose of reports required by part 19, any open contract position in any one future or all futures combined, either gross long or gross short, of any commodity on any one contract market which, at the close of the market on the last business day of the week, equals or exceeds the quantity fixed in § 15.03(b) for reporting purposes for the particular commodity.

2. Section 15.01(d) is amended to read as follows:

§ 15.01 Persons required to report.

• • • • • •

(d) Persons holding or controlling positions for future delivery (any part of which constitutes bona fide hedging positions as defined in § 1.3(z)) in the commodities enumerated in § 15.03(b) that exceed the amounts set forth in that section and merchants, processors, and dealers of cotton holding or controlling positions for future delivery in cotton that equal or exceed the amount set forth in § 15.03(b), as specified in part 19 of this chapter.

• • • • • •

3. Section 15.02 is amended by adding to the list of reporting forms currently included in § 15.02 the forms 2601 and 2603 as follows:

§ 15.02 Reporting forms.

Forms on which to report may be obtained from any office of the Commission. Reporting forms are identified by number as to the commodity and class of person reporting. The initial digit or digits of the form number identify the commodity or commodities, and the two final digits or series identify the class of person reporting. All reports shall be prepared in accordance with instructions supplied with the applicable form. Forms to be used for the filing of reports are as follows:

Commodity	Futures commission merchants and foreign brokers (series '01 forms)	Traders who hold or control reportable positions (series '03 forms)	All hedgers and merchants, processors and dealers in cotton (series '04 forms)
Grains (including soybeans)	201	203	204

[8] The Chicago Mercantile Exchange revised its fresh shell egg contract so that, beginning with the April 1971 future, eggs were deliverable both in CME-approved warehouses and in-plant. Beginning with the March 1972 future, egg deliveries could be made in-plant only.

[8] This change was omitted in the Dec. 23, 1977, proposal, but must be made to insure that the intended purpose of pt. 19 is carried out.

V 43 N 193 OCT 4 78

4. Section 15.03 is amended to read as follows:

§ 15.03 Quantities fixed for reporting.

(a) The quantities fixed for the purpose of reports filed under parts 17 and 18 of this chapter are as follows:

Commodity	Quantity
Wheat	500,000 bushels.
Corn	Do.
Soybeans	Do.
Oats	200,000 bushels.
Barley	Do.
Flaxseed	Do.
Rye	Do.
Soybean oil	50 contracts.
Soybean meal	Do.
Live cattle	Do.
Hogs	Do.
Sugar	Do.
Copper	Do.
Gold	Do.
Silver coins	Do.
Silver bullion	100 contracts.
Cotton	5,000 bales.
All other commodities	25 contracts.

(b) The quantities fixed for the purpose of reports filed under part 19 of this chapter are as follows:

Commodity	Quantity
Wheat	3,000,000
Corn	Do.
Soybeans	Do.
Oats	2,000,000 bushels
Barley	Do.
Flaxseed	Do.
Rye	500,000 bushels.
Cotton	5,000 contracts.
Potatoes	150 contracts.
Eggs	Do.

5. Part 19 is revised to read as follows:

PART 19—REPORTS BY PERSONS HOLDING BONA FIDE HEDGE POSITIONS PURSUANT TO § 1.3(z) OF THIS CHAPTER AND BY MERCHANTS, PROCESSORS, AND DEALERS IN COTTON

Sec.
19.00 General provisions.
19.01 Cash reports pertaining to futures positions in wheat, corn, oats, rye, barley, flaxseed, and soybeans.
19.02 Cash reports pertaining to futures positions in cotton.
19.03 Cash reports pertaining to futures positions in eggs.
19.04 Cash reports pertaining to futures positions in potatoes.
19.05–19.09 [Reserved]
19.10 Time and place of filing reports.

AUTHORITY: Secs. 4g(1), 4(i) and 8a(5) of the Act, 7 U.S.C. 6g(1) and 12a(5) (1976).

§ 19.00 General provisions.

(a) *Who must file series '04 reports.* The following persons are required to file series '04 reports:

(1) All persons holding or controlling positions for future delivery that are reportable pursuant to § 15.00(b)(2) of this chapter and any part of which constitute bona fide hedging positions as defined in § 1.3(z) of this chapter, and

(2) Merchants, processors, and dealers of cotton holding or controlling positions for future delivery in cotton that are reportable pursuant to § 15.00(b)(2) of this chapter.

(b) *Information required.* Persons required to file series '04 reports shall show the information specified in:

Sec.
19.01 If the reportable futures position is in wheat, corn oats, rye, barley, flaxseed, and soybeans.
19.02 If the reportable futures position is in cotton.
19.03 If the reportable futures position is in eggs.
19.04 If the reportable futures position is in potatoes.

The manner of reporting the information required in §§ 19.01 through 19.04 is subject to the following:

(1) *Excluding products or byproducts of the cash commodity hedged.* If the regular business practice of the reporting trader is to exclude certain products or byproducts in determining his cash positions for bona fide hedging (as defined in § 1.3(z) of this chapter), the same shall be excluded in the report. Such persons shall furnish to the Commission upon request detailed information concerning the kind and quantity of product or byproduct so excluded.

(2) *Cross hedges.* Cash positions that represent a commodity or products or byproducts of a commodity that is different from the commodity for future delivery in which such cash position is being hedged shall be shown both in terms of the commodity for future delivery and in terms of the cash commodity as provided for on the appropriate series '04 form.

(3) *Standards and conversion factors.* In computing their cash position, every person shall use such standards and conversion factors that are usual in the particular trade or that otherwise reflect the value-fluctuation-equivalents of the cash position in terms of the commodity for future delivery. Such person shall furnish to the Commission upon request detailed information concerning the basis for and derivation of such conversion factors.

§ 19.01 Cash reports pertaining to futures positions in wheat, corn, oats, rye, barley, flaxseed, and soybean.

Persons holding or controlling positions for future delivery in wheat, corn, oats, rye, barley, flaxseed, or soybeans that are reportable pursuant to § 15.00(b)(2) of this chapter and any part of which constitute bona fide hedging positions as defined in § 1.3(z) of this chapter shall file CFTC Form 204 reports showing the composition of the fixed price cash position of each commodity hedged in the above enumerated grain or soybean futures including:

(a) The quantity of stocks owned of such commodities and their products and byproducts.

(b) The quantity of fixed price purchase commitments open in such cash commodities and their products and byproducts.

(c) The quantity of fixed price sale commitments open in such cash commodities and their products and byproducts.

§ 19.02 Cash reports pertaining to futures positions in cotton.

Persons holding or controlling positions for future delivery in cotton which are reportable pursuant to § 15.00(b)(2) of this chapter and any part of which constitute bona fide hedging positions as defined in § 1.3(z) of this chapter and merchants, processors, and dealers in cotton holding or controlling positions for future delivery in cotton which are reportable pursuant to § 15.00(b)(2) of this chapter shall file CFTC Form 304 reports containing the following information:

(a) For each commodity hedged in cotton futures—the quantity of open fixed price spot positions (long and short) including:

(1) Unfilled open fixed price purchase commitments;

(2) Stocks on hand (owned and at fixed prices); and the quantity of the commodity in process of manufacture, and finished products; and

(3) Unfilled fixed price sale commitments of the commodity and of finished products.

(b) The quantity of call cotton bought or sold on which the price has not been fixed, together with the respective futures on which based. As used herein, call cotton refers to spot cotton bought or sold, or contracted for purchase or sale, at a price to be fixed later based upon a specified future.

(c) The quantity of certificated cotton owned.

§ 19.03 Cash reports pertaining to futures positions in eggs.

Persons holding or controlling positions for future delivery in eggs that are reportable pursuant to § 15.00(b)(2) of this chapter and any part of which constitute bona fide hedging positions as defined in § 1.3(z) of this chapter shall file CFTC Form 604 reports containing the following information:

(a) The composition of the fixed price cash position of each commodity hedged in potato futures including;

(1) The quantity of stocks owned of such commodities and their products and byproducts and the quantity in process of manufacture,

(2) The quantity of fixed price purchase commitments open in such cash commodities, and

(3) The quantity of fixed price sale commitments open in such cash commodities and their products and byproducts, identified as to kind of product.

(b) The amount of potatoes being raised or expected to be raised by such persons in the ensuing 12 months, specifying the potato acreage in each State and country.

§§ 19.05–19.09 [Reserved]

§ 19.10 Time and place of filing reports.

If a person required to file CFTC series '04 reports has an office in a city in which the Commission has an office, each report shall be filed at such Commission office not later than the third business day; and, in the case of the CFTC Form 304 report required for cotton, not later than the first business day following Friday of the week or other period covered by the report. If a person is not located in a city in which the Commission has an office, each report shall be transmitted by mail, postmarked not later than midnight of the second business day and, in the case of the CFTC Form 304 report required for cotton, not later than the first business day following the week or other period covered by the report, as follows:

(a) CFTC Form 204 reports with respect to transactions in wheat, corn, oats, rye, barley, flaxseed, and soybeans and CFTC Form 504 reports with respect to transactions in eggs should be sent to the Commission office in Chicago, Ill., unless otherwise specifically authorized by the Commission.

(b) CFTC Form 304 reports with respect to transactions in cotton and CFTC Form 604 reports with respect to transactions in potatoes should be sent to the Commission office in New York, N.Y., unless otherwise specifically authorized by the Commission.

Issued in Washington, D.C., by the Commission on September 27, 1978.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

COMMODITY FUTURES TRADING COMMISSION
WEEKLY STATEMENT OF CASH POSITIONS IN GRAIN

(See reverse side for instructions)

CFTC CODE NO.

Report as of close of business Friday (DATE)

_____, 19____

NOTICE: Failure to file a report required by the Commodity Exchange Act and the regulations thereunder, or the filing of a false or fraudulent report may be a basis for administrative action under 7 U.S.C. Sec. 9, and may be punishable by fine or imprisonment, or both, under 7 U.S.C. Sec. 13, or 18 U.S.C. Sec. 1001.

PART I: FIXED-PRICE CASH POSITIONS IN TERMS OF COMMODITY FOR FUTURE DELIVERY
Report all quantities in thousand bushels, i.e., 000 omitted. Show products and byproducts in terms of grain equivalent. If you have no cash position, write "None" on the form and return it to CFTC.

FURTHER EXPLANATION/CORRECTION OF PREVIOUS REPORTS

CFTC-204
(Rev. 9-78)

INSTRUCTIONS FOR PREPARING AND FILING REPORTS ON FORM 204

(See Regulations Under The Commodity Exchange Act)

WHO SHOULD REPORT – Every person (individual, partnership, association, corporation or trust) who holds or controls open contracts in any one grain future on any contract market which are reportable pursuant to Regulation 15.00(b)(2), any part of which is classified as hedging.

WHEN TO REPORT – Weekly, as of the close of business Friday. (Note: If Friday is a holiday, report as of the last preceding business day.) Reports must be filed not later than the third business day following the date of the report or mailed not later than the second business day following the date of the report.

WHERE TO REPORT – The CFTC Central Region Headquarters, 233 South Wacker Drive, Suite 4600, Chicago, Illinois 60606, unless otherwise specifically authorized by the Commission.

WHAT TO REPORT – For each commodity futures contract in which you hold a position as specified above, you must report the following:

Part I. Report the entire quantity of stocks owned and fixed-price purchases and sales of the cash commodity and its products and byproducts. When reporting soybeans, show the soybean equivalent of both soybean oil and soybean meal and their products.

If you are "cross hedging," use the space labeled "Other" for cash commodities and report your cash position for the commodity hedged. The quantities should be converted to the equivalent amounts of the commodity future being used for hedging (for example, if you are cross hedging cash milo in corn futures, show your milo cash position in terms of equivalent quantities of corn.)

Part II. If you are "cross hedging," report the entire quantity of stocks owned and fixed-price purchases and sales of the commodity you are cross hedging in terms of the acutal commodity (for example, show your milo cash position in terms of actual quantities of milo). Specify the futures commodity in which you are hedging.

GENERAL PROVISIONS – Use standards and conversion factors usual and common to your business.

If it is your practice to exclude certain products or byproducts in determining your hedgeable cash positions, such products or byproducts should be excluded from the form CFTC-204 report.

If you own no stocks and have no fixed-price cash position, indicate by writing "None."

If inter-company or inter-office purchases and sales of cash grain are included in your fixed-price cash grain positions, they must be separately identified as such in a footnote at the bottom of the report, showing for each related company or office the quantities of grain or grain products involved.

(Rev. 9-78)

(Continued on reverse)

FURTHER EXPLANATION/CORRECTION OF PREVIOUS REPORTS

INSTRUCTIONS FOR PREPARING AND FILING REPORTS ON FORM 304

(See Regulations Under The Commodity Exchange Act)

WHO SHOULD REPORT – Every person (individual, partnership, association, corporation or trust) who holds or controls open contracts in any one cotton future on any contract market which are reportable pursuant to Regulation 15.00(b)(2) and is (1) a merchant, processor or dealer or (2) a person who classifies any part of his cotton futures position as hedging.

WHEN TO REPORT – Weekly as of the close of business Friday. (If Friday is a holiday, report as of the last preceding business day.) Reports must be filed not later than the first business day following the date of the report.

WHERE TO REPORT – The CFTC Eastern Region Headquarters, One World Trade Center, Suite 4747, New York, New York 10048, unless otherwise specifically authorized by the Commission.

WHAT TO REPORT –

Part I. Show your fixed-price long and short spot positions in cotton and cotton products. On the long side, include your open fixed-price purchase commitments of raw cotton, stocks of raw cotton on hand, owned, paid for or at fixed prices, cotton in process of manufacture, finished products, and the total. On the short side, include your unfilled fixed-price sale commitments of raw cotton and your unfilled fixed-price sale commitments of finished products. Do not include in your purchase and sale commitments any contracts on which the price has not been fixed.

If you are "cross hedging" a commodity in cotton futures, report the entire quantity of stocks owned and fixed-price purchases and sales of the commodities you are cross hedging in the space labeled "Other." The quantities should be converted to the equivalent amounts of the commodity future being used for hedging. You must also complete Part II.

Part II. If you are "cross hedging" report the entire quantity of stocks owned and fixed-price purchases and sales of the commodity you are cross hedging in terms of the actual commodity.

Part III. Report the amount of unfixed-price cotton "on call." Under "call purchases," include stocks on hand which the price has not yet been fixed. Indicate the amount of your "on call" purchases and sales by the delivery month and year on which they are based.

Part IV. Report the total number of bales of certificated cotton which you own.

GENERAL PROVISIONS – Use standards and conversion factors usual and common to your business.

If it is your practice to exclude certain products or byproducts in determining your hedgeable cash positions, such products or byproducts should be excluded from the form CFTC-304 report.

If you own no stocks and have no fixed-price cash position, indicate by writing "None."

If inter-company or inter-office spot cotton purchases and sales of spot cotton are included in your fixed-price positions, they must be separately identified as such in a footnote at the bottom of the report, showing for each related company or office the quantities of cotton or cotton products involved.

FURTHER EXPLANATION/CORRECTION OF PREVIOUS REPORTS

CFTC-604
(Rev. 9-78)

INSTRUCTIONS FOR PREPARING AND FILING REPORTS ON FORM 604

(See Regulations Under The Commodity Exchange Act)

WHO SHOULD REPORT -- Every person (individual, partnership, association, corporation or trust) who holds or controls open contracts in any one potato future on any contract market which are reportable pursuant to Regulation 15.00(b)(2), any part of which is classified as hedging.

WHEN TO REPORT -- Weekly, as of the close of business Friday. (Note: If Friday is a holiday, report as of the last preceding business day.) Reports must be filed not later than the third business day following the date of the report or mailed not later than the second business day following the date of the report.

WHERE TO REPORT -- The CFTC Eastern Region Headquarters, One World Trade Center, Suite 4747, New York, New York 10048, unless otherwise specifically authorized by the Commission.

WHAT TO REPORT -- The makeup of your cash position in potatoes and potato products.

Part I. Show your cash position in potatoes. Report your inventory of potatoes owned, in storage and in transit (rail or truck); your open fixed-price purchase commitments and your unfilled fixed-price sale commitments in potatoes. Do not include in your purchase or sales commitments any contracts on which the price has not been fixed.

Show your cash position in potato products, identified as to the precise kind of potato product. The amount of stocks owned or in process of manufacture, and your open fixed-price purchase commitments and your unfilled fixed-price sales commitments of potato products, expressed in terms of fresh potato equivalent, i.e., in carlots of 50,000 lbs. of fresh potatoes.

If you are "cross hedging," use the space labeled "Other," and report the entire quantity of stocks owned and fixed-price purchases and sales of the commodities you are cross hedging. The quantities should be converted to the equivalent amounts of the commodity future being used for hedging. In addition, you must complete Part II.

Part II. If you are "cross hedging," report the entire quantity of stocks owned and fixed-price purchase and sales of the commodity you are cross hedging in terms of the actual commodity.

Part III. Report the entire quantity of potatoes which you are raising or expect to raise within the next 12 months on land which you own or lease. Show the state and/or country in which potatoes are being raised and the estimated acreage in potatoes.

GENERAL PROVISIONS -- Use standards and conversion factors usual and common to your business.

If it is your practice to exclude certain products or byproducts in determining your hedgeable cash positions, such products or byproducts should be excluded from the form CFTC-604 report.

If you own no stocks and have no fixed-price position, indicate by writing "None."

If inter-company or inter-office potato purchases and sales of cash potatoes are included in your fixed-price cash positions, they must be separately identified as such in a footnote at the bottom of the report, showing for each related company or office the quantities of potatoes or potato products involved.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER H—RIGHT-OF-WAY AND ENVIRONMENT

PART 772—PROCEDURES FOR ABATEMENT OF HIGHWAY TRAFFIC NOISE AND CONSTRUCTION NOISE

Traffic Noise Level Prediction Methods—Amendment

AGENCY: Federal Highway Administration, DOT.

ACTION: Amendment to final rule.

SUMMARY: This amendment revises current procedures by which the Federal Highway Administration (FHWA) approves traffic noise level prediction methods for use on Federal-aid highway projects. Section 772.25 of title 23, Code of Federal Regulations, specifically approves two prediction methods and provides for submission of other methods or variations to FHWA's headquarters office for approval prior to use. This section is being revised to indicate that any method which is consistent with the FHWA Highway Traffic Noise Prediction Model and which uses noise emission levels obtained from approved FHWA procedures is approved for use.

EFFECTIVE DATE: October 9, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Jerry Reagan, Environmental Quality Division, Office of Environmental Policy, 202-426-4836, or Mr. Stan Abramson, Office of the Chief Counsel, 202-426-0791, Federal Highway Administration, 20590. Hours are from 7:45 a.m. to 4:15 p.m., eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: It is anticipated that this revision will provide State highway agencies and FHWA field offices with the information needed and the proper degree of flexibility to arrive at acceptable traffic noise level prediction methods utilizing state-of-the-art methodology.

The revised requirements of § 772.25 are not retroactive. In addition, the two approved prediction methods currently listed in § 772.25 and all other methods approved pursuant to that section remain approved for use on Federal-aid projects until July 1, 1979. Any noise analysis performed after that date must comply with the revised procedures.

The approved FHWA procedures for obtaining noise emission levels are being distributed directly to all State highway agencies and FHWA field offices and will be made available for inspection and copying at all FHWA offices in accordance with the provisions of 49 CFR Part 7, Appendix D.

Although the substantive provisions of paragraphs (d) and (e) of the old § 772.25 are not being revised, the paragraphs have been redesignated as (b) and (c) and are reprinted herein in the interest of clarity and for ease of reference.

Accordingly, 23 CFR Part 772 is amended as follows:

§ 772.13 [Amended]

1. In § 772.13(e)(3) the reference to "§ 772.25(e)" is changed to read "§ 772.25(c)";

2. Section 772.25 is revised to read as follows:

§ 772.25 Traffic noise level prediction methods.

(a) Any traffic noise prediction method is approved for use in any noise analysis required by this part if it meets the following two conditions:

(1) The methodology is consistent with the methodology in the FHWA Highway Traffic Noise Prediction Model (Report No. FHWA-RD-77-108);

(2) The prediction method uses noise emission levels obtained from one of the following:

(i) Federal-Aid Highway Program Manual, Volume 7, Chapter 7, Section 3, Attachment 1 (National Reference Energy Mean Emission Levels as a Function of Speed),

(ii) Report No. FHWA-OEP/HEV-78-1, Determination of Reference Energy Mean Emission Levels.[4]

(b) In predicting noise levels and assessing noise impacts the following traffic characteristics shall be used:

(1) *Automotive volume.*—The future volume (reduced for truck traffic) obtained from the lesser of the design hourly volume or the maximum volume which can be handled under traffic level of service C conditions. For automobiles, level of service C is considered to be the combination of speed and volume which creates the worst noise conditions. The average hourly volume for the highest 3 hours on an average day for the design year may be used for those highway sections where the design hourly volume or the level of service C condition is not anticipated to occur on a regular basis during the design year.

(2) *Speed.*—The operating speed which corresponds with the design year traffic volume selected in paragraph (b)(1) of this section and the truck traffic predicted from paragraph (b)(3) of this section. The operating speed must be consistent with the volume used.

(3) *Truck volume.*—The design hourly truck volume shall be used for those cases where either the design hourly volume or level of service C was used for the automobile volume. Where the average hourly volume for the highest 3 hours on an average day was used for automobile traffic, comparable truck volumes should be used.

(c) An an alternative to paragraph (b) of this section, the highway agency may select traffic characteristics to correspond with the critical times of day and night which will create the most adverse traffic noise impacts upon the nearby activities and land uses. When such alternative traffic characteristics are used, a thorough discussion of such alternative characteristics shall be included in the noise study report.

(d) Traffic noise prediction methods approved pursuant to prior requirements of this part (41 FR 16936, Apr. 23, 1976) remain approved until July 1, 1979. Any noise analysis performed after July 1, 1979, must comply with the requirements of paragraph (a) of this section.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major regulation according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Postal Service Manual—Correction of Errors and Omissions in Transmittal Letter 44

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The purpose of this document is to correct publicly certain errors and omissions contained in a recent transmittal letter making changes to the Postal Service Manual. The Postal Service published on page 2 of the Postal Bulletin of September 14, 1978, the corrections to be made to the Postal Service Manual and advised subscribers to make the changes to their manuals pending receipt of the next transmittal letter. The present publication is intended to reach holders of the manual who may not be subscribers of the Postal Bulletin or who happened not to see the notice in it.

EFFECTIVE DATE: August 21, 1978.

FOR FURTHER INFORMATION CONTACT:

Paul J. Kemp, 202-245-4638.

SUPPLEMENTARY INFORMATION: Chapter I of the Postal Service Manual has been incorporated by reference in the FEDERAL REGISTER (see 39 CFR 111.1). This chapter was amended by the issuance of Post Office Services (Domestic) Transmittal Letter 44, issue 120, dated August 21, 1978, and the amended parts were published in full text in the FEDERAL REGISTER on Wednesday, September 13, 1978 (43 FR 40810). The present document refers to and corrects errors and omissions in the FEDERAL REGISTER document referenced above.

ROGER P. CRAIG,
Deputy General Counsel.

On page 40859, in the left hand column, add at the appropriate place new .435 and revise .44 to read as follows:

.435 For mailings of value of $15 or less, or negotiable items or currency or bullion, the indemnity will be $15.

.44 Exclusions. Indemnity will not be paid for:

a. Negotiable items (except as provided in 189.435).

b. Currency or bullion (except as provided in 189.435).

c. Consequential loss (except as provided in 189.422c).

d. Nonmailable items (as defined in PSM 123), or items packaged in a manner that they could not have reached their destination undamaged in the normal course of the mail.

e. Articles of sentimental value (except as provided in 189.436).

f. Acts of employees or agents of the sender or addressee.

g. Radioactive injury or electrical or magnetic injury or erasure of electrical recordings, except by lightning.

h. War, insurrection, or civil disturbance, or seizure by an agency of government.

[7710-12]

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

City Delivery Service Policy

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: These regulations, which are a revision of proposed regulations published in the FEDERAL REGISTER on March 23, 1978, 43 FR 12044-12047, prescribe Postal Service policy for offering "city delivery" service to customers residing in family housing (other than apartment houses), to which city delivery service is not provided. They prescribe the rules under which postmasters and other local postal officials decide whether to offer such service and which kinds of city delivery service to offer, and the general rules which customers must comply with in order to be eligible for receiving city delivery service. The regulations do not depart from the proposal except in certain minor respects noted below.

EFFECTIVE DATE: November 3, 1978.

ADDRESS: Written questions about the regulations should be directed to Assistant General Counsel, Special Projects, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Charles R. Braun, 202-245-4620.

SUPPLEMENTARY INFORMATION: A discussion of the general basis and purpose of these regulations accompanied the proposal when it was published for comment in March, 43 FR 12044-12046. Eight letters of comment were received on the proposal, two from the same commenter. Seven comments opposed the adoption of the proposal on the ground that it generally did not provide for door delivery service in new single family housing in city delivery areas. Those comments urged the adoption of regulations which would instead require door delivery service in all city delivery areas. One comment opposed door delivery and supported curbside and cluster box delivery, on the ground that door delivery was a hazard to the carrier, resulting in injuries from "* * * dog bites, slipping on ice and snow, falling down stairs, carrying heavy bags of mail, etc."

The principal substantive arguments against adoption of the proposal were as follows: (1) Door service would provide better security, convenience, and service than other forms of delivery service; (2) the proposal is unreasonably discriminatory against persons residing in new areas; (3) the proposal is unreasonably discriminatory against new homebuilders by placing them at a "competitive disadvantage to those who sell existing homes"; and, (4) the proposal is unreasonably discriminatory against those of the elderly who may be unable during inclement weather to pick up their mail.

The proposal insofar as it would restrict the offering of door service to new homes is intended to achieve substantial cost savings in postal operations. Door service is the most expensive form of delivery that can be provided, and is substantially more expensive than any other form of home delivery service.

There is no evidence that nondoor delivery in residential city delivery areas where such delivery is authorized results in a reduction of mail security. Regardless of the form of delivery, moreover, a customer will receive essentially the same mail deliveries in his mail receptacle or door slot on the same day. While door service may be convenient, a walk to a sidewalk, curbside, or central delivery point is not ordinarily a great inconvenience. Other postal customers, such as those receiving rural delivery service or apartment house delivery, may have to walk farther to receive their mail.

Two comments questioned whether it was appropriate to seek cost savings in postal operations, one arguing that, "The Federal Government is spending millions of dollars trying to figure out how to put people back to work * * *", and the other arguing that: "Any economies achieved (by the proposal) would soon be squandered by * * * postal management * * *" through other means. The postal laws, however, clearly require the postal system to be operated economically and efficiently. See, for example: 39 U.S.C. 101(a), 403 (a), (b), 1001(e)(4), 2010, 3621, 3661(a). The postal system is therefore not operated so as to "make work" or to end unemployment; reasonable efforts to operate the system efficiently, including the elimination of unnecessary work, must therefore be made.

It has, moreover, always been necessary to restrict door delivery service to those parts of the country where it could economically be provided. Customers of rural delivery service, for example, who are not affected by these regulations, have never been offered door delivery service. Residents of apartment houses similarly do not receive door service.

The argument that a general policy of not providing door service to new single family housing is illegally discriminatory against affected customers has already been rejected by the courts, *e.g., Parsons* v. *United States Postal Service*, 380 F. Supp. 815 (D. N.J. 1974); *Grover City* v. *United States Postal Service*, 391 F. Supp. 982 (C.D. Calif. 1975). These courts have reasoned that the policy against door service has a reasonable economic basis, and that the Postal Service is bound to consider economies in its operations in formulating policy.

V 4 3 1 1 9 3

The argument that nondoor service would be specially discriminatory against the elderly overlooks the fact that many elderly persons are able-bodied enough not only to pick up their mail but also to continue working regularly. In addition, the argument overlooks 155.222 of the proposal, carried forward without change in these final regulations, providing for cases of "extreme hardship" regardless of age.

There was, moreover, no evidence offered to indicate that the general policy of not offering door service in new housing areas (which has been in effect for several years) has had any practical effect on the sales of new houses. Commonsense and a perusal of newspaper advertisements for new and used homes for sale both tend to suggest that the differences between door, curb, sidewalk, and central delivery have no substantial effect on home buying decisions.

It was also argued that the proposed regulations could not be adopted by the Postal Service now because it was legally required first to submit them to the Postal Rate Commission under 39 U.S.C. 3661(b) for an advisory opinion. Section 3661(b), however, requires that such advisory opinions be sought before certain proposals to change the general nature of service are implemented: "When the Postal Service determines that there should be a change in the nature of postal services which will generally affect service on a nationwide or substantially nationwide basis, it shall submit a proposal, with a reasonable time prior to the effective date of such proposal, to the Postal Rate Commission requesting an advisory opinion on the change."

The commenter did not, however, specify what change or changes to which it believed section 3661 might apply. The general policy to which the commenter objected, or seeking to provide city delivery service in new areas in more cost effective ways than door delivery, is a longstanding one which antedates section 3661's effective date of July 1, 1971. Postal regulations adopted in 1968 provided, with certain exceptions, that, "All other establishments and extensions of city delivery service normally should be by motorized delivery to curbside boxes." Post Office Department Regional Instructions, City Delivery Service, No. 331-1, part IIA4 at p. 6, January 15, 1968. Under the 1968 instructions, the authority to offer door delivery in new city delivery areas was generally circumscribed and an offer of door delivery was generally not required. Id., part IIA at 6. Existing postal regulations already provide: "Delivery service normally should be by motorized carrier to neighborhood cluster boxes or to curbline boxes. "U.S. Postal Service, Regional Instructions, Delivery Service, No. 331-1, Amendment No. 5, part IA at p. 1, September 29, 1972. The limited discretion in these regulations to offer door service to certain new residential housing in city delivery areas has rarely been exercised since 1972, because of the general overriding policy in favor of effecting economies of postal operations wherever possible. A legal challenge under 39 U.S.C. 3661 to this aspect of present city delivery regulations—general nonprovision of door delivery service to new city delivery residential areas—was unsuccessful last year. *Bradley* v. *United States Postal Srvice*, 554 F. 2d 186 (5th Cir. 1977).

The city delivery regulations, moreover, by generally encouraging nondoor delivery only in new city delivery points, affect only the small percentage of delivery points nationwide which become eligible for establishment or extension of city delivery each year. We estimate this pecentage to be lesss than 3 percent of total nationwide delivery points (city, rural, or other). The immediate impact of changes in city delivery policies for service establishments and extensions is therefore to leave most delivery service in the country unaffected. Thus, even substantial changes in such nationwide city delivery policies would not "generally affect service" as contemplated by section 3661.

One of the commenters recommended that the extreme hardship exception (155.222) be stated in mandatory terms, thus—"Door delivery will be provided • • •—instead of, as proposed—"Door delivery will be considered • • •." Another commenter expressed concern that the exception might be too broad: "Hardships can be reduced to a minimum if a handicapped peroson would authorize a close neighbor to pick up the mail for him." In experience local postal officials have been able to exercise sound judgment in this area without mandatory regulations.

Present regulations are even more general than those just proposed: "Obviously, predetermined criteria cannot be prescribed to fit every circumstance. Therefore, good judgment should be exercised in rendering decisions where unusual conditions necessitate deviation from these criteria." Reg. Inst. No. 331-1, Amendment No. 5, September 29, 1972, part ID at page 2. The proposed hardship exception was stated permissively in order to permit local officials to continue to exercise sound judgment based on a consideration of all relevant factors, such as whether persons other than the disabled customer reside in the same place. The exception was therefore intended only; to define when consideration should be given to providing door delivery in cases of extreme hardship. No reasons were given for stating the exception in mandatory terms, and it is unclear whether such a revision of the regulations would lead to improved administration. Instead, it might lead to dealing with such matters on the basis of interpretation instead of judgment. The exception is therefore adopted as proposed.

In the same vein, the proposed mandatory language in proposed 155.21—"• • • city delivery service shall be offered • • • " is revised to be permissive—" • • • city delivery service will be considered • • • ." Existing regulations are stated permissively: "Consideration for establishing (city) delivery service will be given • • • ." Postal Service Manual 155.1, incorporated by reference, 39 CFR 111.1 (1977). In instances where no home delivery service is provided, and the requirements for city delivery service have been fulfilled, local officials are expected to offer city delivery service. In other instances, however, such as when rural delivery service is already provided to the same community, an offer of conversion to city delivery is authorized but not required. Such conversions can be unnecessarily disruptive and cause controversy in the community, since they entail several changes in the way postal services are provided, and rural carrier jobs would be eliminated in favor of city carrier jobs. Thus, where a community receiving rural delivery service becomes sufficiently urban to be eligible for city delivery service, local postal officials should exercise sound discretion in deciding whether even to raise the question of conversion to city delivery service. A conforming change is made in 155.11.

Minor errors appearing in the proposal, such as the use of the word "report" in 155.12 where the context clearly requires the word "part." have been corrected. Also, minor changes are made in style and form.

In view of the foregoing considerations, the Postal Service adopts the following revisions of the Postal Service Manual:

PART 155—CITY DELIVERY

1. Sections 155.1 and 155.2 are revised to read as follows:

155.1 Requirements for delivery service.

.11 *Establishments.* In this part "establishment" refers to the initiation of city delivery service in a community which currently does not receive it. In establishing city delivery service, a combination of delivery methods should be considered to provide adequate service to all residential and business sections of a community. All establishments of delivery service must have final approval of the Regional Postmaster General or his designee.

Establishment of delivery service will be considered when the following essential requirements are met:

a. Within the area to be served there is a population of 2,500 or more or 750 possible deliveries. (The postal population may vary greatly from the general census population because of different boundary interpretations and designations.)

b. Fifty percent of the building lots in the area to be served are improved with houses or business places. Where a house or building and its yard or ground cover more than one lot, all lots so covered are considered to be improved.

c. The streets are paved or otherwise improved to permit the travel of post office vehicles at all times without damage or delay.

d. Streets are named and house numbers are assigned by the appropriate municipal authorities in a manner that precludes duplicative mailing addresses.

e. The street signs are in place and the house numbers are displayed.

f. The rights-of-way, turnouts, and areas adjacent to the roads and streets are sufficiently improved so that the installation and servicing of boxes will not be hazardous to the public or postal employees.

g. Satisfactory walks exist for the carrier where required.

h. Approved mail receptacles or door slots are installed at designated locations.

.12 *Extensions.* In this part the word "extension" refers to the initiation of city delivery service in any areas which are not included in the boundaries of present delivery service, but which are part of a community for which city delivery service has already been established. The delivery service requirements for extensions are the same as those listed in 155.11 for establishments, except that paragraph (a) does not apply to extensions.

.13 *Existing establishments and extensions not affected.* Nothing in this part shall be interpreted to require any changes in any city delivery service which was initiated under prior city delivery regulations.

155.2 Delivery policy-establishments and extensions.

.21 *Criteria.*

.211 *General.* Establishment or extension of city delivery service will be considered for those areas that meet the criteria in 155.11 and 155.12. Normally, this will be by motorized carrier to curbline boxes or to central delivery points or receptacles, supplemented as given below.

.212 *Business areas.* The type and design of buildings will govern the method of delivery service to be implemented. The delivery options are:

a. Central delivery service for business office buildings which may include: (1) Call windows; (2) lockboxes; or (3) mechanical conveyors.

NOTE.—This is available only for high rise, multiple-tenant buildings, and only if certain conditions are met. For details consult your postmaster.

b. Single points, receptacles, or door slots provided by business management.

.213 *Residential housing other than apartment houses or mobile or trailer homes.*

a. *General.* For all residential areas, except apartment houses and mobile or trailer homes, the delivery options are either curbside, sidewalk or central delivery, under the regulations given below.

b. *Curbside delivery.* Delivery may be provided to boxes located at the curb so they can be safely and conveniently served by the carrier from his vehicle.

c. *Sidewalk delivery.* (1) If the sidewalk abuts the curb or if other unusual conditions exist (e.g., excessive street parking) which make it difficult or impractical to install or serve boxes at the curbline, these customers may be permitted to install all of their boxes at the edge of the sidewalk nearest the residence, where they can all be served by the carrier from the sidewalk.

(2) If the average lot frontage is 75 feet or less, the boxes are not required to be grouped together, but if the average lot frontage is more than 75 feet, the boxes must be installed in groups of at least two.

(3) If the average lot frontage is 50 feet or less, customers may locate their mailboxes at the edge of the sidewalk nearest the residence rather than at the curb, regardless of whether the sidewalk abuts the curb or other unusual conditions exist. All the boxes must be located so that the carrier can serve them from the sidewalk.

d. *Central delivery.* Central delivery may be provided at one or more central points within a residential housing development, community, or area. The requirements for such delivery are:

(1) The local postal managers must approve the mailbox sites and equipment;

(2) There must be a minimum of two mailboxes erected at one site (there is no maximum limit); and,

(3) The customers will not be required to travel an unreasonable distance to obtain their mail.

.214 *Apartment houses.* See 155.6 for delivery options.

.215 *Mobile or trailer homes.* The delivery options for mobile or trailer home developments depend upon whether the development is permanent or transient.

a. Permanent developments consist of managed mobile home parks or residential mobile home subdivisions where: The lots are permanently assigned, the streets are maintained for public use, and the conditions are similar to those of a normal residential subdivision. For permanent developments, the delivery options are either curbside, sidewalk, or central delivery, under the regulations given below.

(1) *Curbside delivery.* Delivery service may be provided to boxes which are located at the curb so that they can be safely and conveniently served by the carrier from the vehicle.

(2) *Sidewalk delivery.* (a) If the sidewalk abuts the curb or other unusual conditions exist (e.g., excessive street parking) which make it difficult or impractical to install or serve boxes at the curbline, these customers may install all of their boxes at the edge of the sidewalk nearest the residence where they can all be served by the carrier from the sidewalk.

b. In such conditions, if the average lot frontage is 75 feet or less, the sidewalk boxes are not required to be grouped together, but if the average lot frontage is more than 75 feet, the sidewalk boxes must be installed in groups of at least two.

c. If the average lot frontage is 50 feet or less, the customers may be permitted to locate all of their mailboxes at the edge of sidewalk, nearest the residence rather than at the curb, regardless of whether the sidewalk abuts the curb or other unusual conditions exist. All of the boxes must be located so the carriers can serve them from the sidewalk.

(3) *Central delivery.* (a) Delivery service may be provided to a single point or receptacle designated by the management of the development for the receipt of mail for distribution by its employees.

(b) Delivery service may be provided to one or more central points for the direct receipt of mail by postal customers within the area.

(c) The requirements for such central delivery are:

(i) The local postal manager must approve the mailbox sites and equipment;

(ii) There must be a minimum of two mailboxes erected at one site (there is no maximum limit); and,

(iii) The customers are not required to travel an unreasonable distance to obtain their mail.

c. Transient developments are recreational vehicle parks and trailer courts where the lots are temporarily rented and the occupants are generally transient. Such developments are considered transient, even though some families may live in them for an extended period of time. For these developments, the only option is delivery to a single point or receptacle designated by the trailer park management and approved by local postal managers for the receipt of mail for distribution by the trailer park's employees.

NOTE.—This method is one of the service options for permanent developments.

.22 *Exceptions.*

.221 *Fill-in.* New homes built within a block of existing homes will receive the same type of service as the older ones. When new housing replaces more than one block in a city delivery area, delivery methods will comply with extension procedures.

.222 *Hardship cases.* Door delivery will be considered for an individual customer where service through central, curbline, sidewalk, lockbox, or general delivery would place an extreme hardship on the customer.

.223 *Local ordinances.* If a customer chooses not to erect a curbside box because of a local, city, county, or State ordinance prohibiting the installation of mailboxes at the curb, the delivery options in establishments and extensions are:

a. Central delivery service may be provided at one or more central points in a residential housing development, community or area, if:

(1) The local postal managers approve the mailbox sites and equipment;

(2) There is a minimum of two mailboxes erected at each mailbox site (there is no maximum limit); and

(3) The customers are not required to travel an unreasonable distance to obtain their mail; or

b. Lockbox or general delivery service may be provided at the nearest postal facility where carrier delivery emanates.

155.41 [Amended]

2. The following sentence is added at the end of 155.41:

Purchase, installation, maintenance, and replacement of delivery box equipment are not the responsibility of the U.S. Postal Service.

A Post Office Services (Domestic) transmittal letter making these changes in the pages of the Postal Service Manual will be published and will be transmitted to subscribers automatically. These changes will be

OCT 4 1978

V 43 1 93

published in the FEDERAL REGISTER as provided in 39 CFR 111.3. (39 U.S.C. 101, 401(2), 403, 404(a)(1), 410(a).)

ROGER P. CRAIG,
Deputy General Counsel.

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Temp. Reg. E-47, Supp. 4]

APPENDIX—TEMPORARY REGULATIONS

Teleprocessing Services Program

AGENCY: Automated Data and Telecommunications Service, General Service Administration.

ACTION: Temporary regulation.

SUMMARY: This supplement extends to April 30, 1979, the expiration date of FPMR temporary regulation E-47 regarding teleprocessing services program (TSP).

DATES: Effective date: October 1, 1978. Expiration date: April 30, 1979.

FOR FURTHER INFORMATION CONTACT:

L. Perlman, 202-566-0834, Policy and Evaluation Division.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

In 41 CFR chapter 101, this temporary regulation is listed in the appendix at the end of subchapter E.

Dated: September 26, 1978.

JAY SOLOMON,
Administrator of General Services.

FEDERAL PROPERTY MANAGEMENT REGULATIONS TEMPORARY REGULATION E-47 SUPPLEMENT 4

TO: Heads of Federal agencies.

SUBJECT: Teleprocessing Service Program (TSP).

1. *Purpose.* This supplement extends the expiration date of FPMR temporary regulation E-47.

2. *Effective date.* This regulation is effective October 1, 1978.

3. *Expiration date.* This supplement expires on April 30, 1979.

4. *Explanation of changes.* GSA issued FPMR temporary regulation E-47 on August 3, 1976, and extended its expiration date to September 30, 1977, through supplement 1 to E-47. Paragraph 9 of temporary regulation E-47 established interim procedures for acquiring teleprocessing services pending the determination that the TSP would be the mandatory means by which Federal agencies would acquire teleprocessing services. Supplement 2 to E-47 set August 1, 1977, as the effective date for mandatory use of the TSP, thereby eliminating any need for the interim procedures established under paragraph 9. Effective August 1, 1977, paragraph 9 was canceled and appropriately remains canceled with the issuance of this directive. Supplement 3 to E-47 extended the mandatory procedures of the TSP to September 30, 1978. This supplement 4 revises the expiration date in paragraph 3 of FPMR temporary regulation E-47 to April 30, 1979, and cancels supplement 3.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 78-681]

PART 1—PRACTICE AND PROCEDURE

PART 73—RADIO BROADCAST SERVICES

Reregulation of Radio and Television Broadcasting

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: As a result of its continuing study of the reregulation of broadcasting, the Commission continues the restructuring of part 73 of its rules into a more concise and orderly form by transferring to subpart H of part 73 all rules, the subject matter of which is common to AM, FM, and TV broadcasting stations but are at present repeated in each of the subparts for those services. Revisions are made in the rules where needed. Rules which are unique to a particular broadcasting service will remain in their respective subparts.

EFFECTIVE DATE: November 1, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John Reiser, Steve Crane, Philip Cross, Broadcast Bureau, 202-632-9660.

SUPPLEMENTARY INFORMATION:

Adopted: September 22, 1978.

Released: October 16, 1978.

By the Commission: Commissioners Lee and Fogarty absent.

Order. In the matter of reregulation of radio and TV broadcasting.

1. In this order, the Commission continues the reorganization and restructuring of its rule book for the AM, FM, and TV broadcast services.

2. With the adoption on July 12, 1978, of the reregulation order, FCC 78-502, 43 FR 32778, the Commission began its restructuring of parts 73 and 74 of volume III of the rules. Upon completion of the project, all rules in part 73 with subject matter common to AM, FM, and TV, will have been transferred to subpart H, which will bring about simplified access and better understanding of the regulations.

3. Implementation of the project continues in this order. Where appropriate, rule clarifications have been made for the reasons shown in the text. The alphabetical index will reflect each transfer and redesignation of section numbers, thus insuring the user of our rules a continuing, instant and easy-to-follow guide to FCC regulations in part 73. Also, the order continues the cross-referencing of the new section numbers under the old rule section headnotes in subparts A, B, C, and E. Much case law, many documents and policy statements reference these old section numbers and, for the present, we will retain them with the direction to "See § 73. New Subpart H number." When the restructuring is finished, a complete listing of the transfers will be made a part of the rules for such number of years as this type of record is needed.

4. The following sets forth in detail the changes[1] made in this order:

(a) The rules regarding the hours for inspections of stations by FCC personnel, and the logs and records that the licensee must make available for such inspections are now found in §§ 73.97 (AM), 73.263 (FM), 73.563 (NCE-FM), and 73.665 (TV). Rules for availability of logs and records for inspections and investigations are further stated in § 1.6 (in subpt. A of pt. 1) which contains (FCC) "General Rules of Practice and Procedure," in § 1.613 (in subpt. D of pt. 1) which contains rules pertaining to (FCC) "Broadcast Application and Proceedings;" and in §§ 73.116 (for AM), 73.286 (FM), 73.586 (NCE-FM), and 73.674 (TV). Via this order, these requirements are restated into two new rules: § 73.1225, "Station inspections by FCC," and § 73.1226, "Availability to FCC of station logs and records," and placed in subpart H, of part 73. Sections 1.6 and 1.613 will remain in part 1, and the eight separate broadcast rules will be deleted from subpart A, B, C, and E. The rules pertaining to public inspection of station's program logs are revised and designated new

[1] Certain changes relax present requirements. No substantive changes are made which impose additional burdens or remove provisions relied upon by licensees or the public.

§ 73.1850 in subpart H, and positioned to follow the log rules. (See paragraph (h) of this order.) Rewriting is done for clarification purposes in these revisions.

(b) The rules regarding the posting of station and operator licenses are presently found in § 73.92 (AM stations), § 73.264 (FM stations), § 73.564 (NCE-FM stations), and § 73.660 (TV stations). These separate sections are deleted from their respective subparts, and the rule, which is applied exactly the same for all broadcast stations, is relocated in subpart H as § 73.1230, and retitled "Posting of operator and station licenses."

(c) Our rules prescribe certain procedures and make certain allowances for stations broadcasting emergency information to listeners/viewers in their areas when conditions exist which imperil life and peoperty. These rules are titled "Operation during emergency" and are numbered §§ 73.98, 73.298, 73.597, and 73.675 in the separate subparts of part 73.

The rule title is herein changed to "Broadcasting emergency information." The present title, "Operation during emergency" has led many to conclude these rules pertained to station equipment emergencies which result in reduced broadcast service, caused by such "emergencies" as downed towers, equipment fires, power underages, and so forth.

Clarification revisions are made in the rule's text for ease of understanding and use with EBS activation directions. Relocated in subpart H as applicable to all broadcast services, it will be designated as § 73.1250, "Broadcasting emergency information."

(d) Extension meter regulations are in §§ 73.70 (AM stations), 73.276 (FM), 73.574 (NCE-FM), and 73.678 (TV). They are combined in this order into a single rule appropriate to all services, revised as needed for clarification, placed in subpart H and renumbered § 73.1550.

(e) References to international broadcast agreements which the United States has signed with other countries are presently found in part 73 in:

§ 73.15 NARBA and the United States/Mexican agreement (for AM);
§ 73.204 International agreements and other restrictions on use of channels (for FM);
§ 73.504 Noncommercial educational channel assignments under the United States-Mexico FM broadcast agreement (for NCE-FM); and
§ 73.608 International agreements (for TV).

The text of the AM and TV rules are fairly specific to the rule subject: International agreements. The FM and NCE-FM rules include, in addition, restrictions on use of channels in the FM subpart and, in the NCE-FM subpart, a table of allotment of NCE-FM channels in the area within 199 miles of the United States-Mexican border. Since these tables and restrictions are unique to these two services, they will remain there.

The new rule, placed in subpart H, has been streamlined and, for parties interested in the agreements, directions are given for reviewing them at the FCC in Washington, D.C., or procuring copies from our copy-contractor. The rule is designated § 73.1650, International agreements.

The sections retained in the FM and NCE-FM subparts will be redesignated:

§ 73.220 Restrictions on use of channels; and
§ 73.504 Channel assignments under the United States-Mexico FM broadcast agreement.

(f) The umbrella term, "time of station operation," covers numerous rule sections which are spread throughout the subparts for the separate services. Some of the specific regulations are buried within a rule section, the title of which fails to reveal their location within that section.

Via this order, we redefine and rearrange these rules into 11 sections, with their titles clearly and solely related to the subject matter therein. The general term, "Operating Hours," will be used as an undersignated headnote for this group of rules.

The rules are relocated in subpart H with designations of section numbers and titles as follows:

OPERATING HOURS

Sec.
73.1700 Broadcast day.
73.1705 Time of operation.
73.1710 Unlimited time.
73.1715 Share time.
73.1720 Daytime.
73.1725 Limited time.
73.1730 Specified hours.
73.1735 Presunrise service authority.
73.1740 Minimum operating schedule.
73.1745 Unathorized operation.
73.1750 Discontinuance of operation.

(g) The present TV rule for "Time of operation" (§ 73.651)—see paragraph immediately above—contains, in addition to that subject, directions for the functional operation of TV aural and visual transmitters (§ 73.651(c)). These "functional" directions are left in the TV subpart, edited for timeliness, placed in new § 73.653 and titled "Operation of TV aural and visual transmitters."

(h) The requirements relating to the various types of logs which a licensee must maintain are to be found in 24 different sections in the AM, FM, NCE-FM, and TV Subparts.

These 24 sections are herein rewritten and consolidated into 6 new sections, and placed in subpart H. The new section designations are:

Sec.
73.1800 General requirements relating to logs.
73.1810 Program logs.
73.1820 Operating logs.
73.1830 Maintenance logs.
73.1840 Retention of logs.
73.1850 Public Inspection of program logs.

As part of these revisions, we have excised from the rules §§ 73.116, 73.286, 73.586, and 73.674, "Availability of logs and records." These rules state which logs and records must be available for FCC inspection and also the terms of the availability of program logs for public inspection. The requirements pertaining to the logs and records to be made available to an FCC representative are relocated in the new section entitled "Station inspections by FCC" (new § 73.1225) and "Availability to the FCC of station logs and records." (New § 73.1226. See paragraph (a) of this order.) The terms of the program logs' availability for inspection by the public are then set forth in a new rule, § 73.1850 in subpart H, and titled "Public inspection of program logs" (as listed above).

A sensible relaxation pertaining to the automatic logging portion of the operating log rule is also made herein: Heretofore, the rule provided that an alarm circuit must operate continuously or the devices which recorded the parameters must read each parameter once during each 10-minute period. This is relaxed to once each 30-minute period.

Additionally, the rules on log corrections are moved into the general requirements section and plainly stated; clarification is added regarding computation of commercial time for religious and political programs; the texts of the automatic program and operating log regulations are embellished to clarify employee certifications and procedures in the event of equipment malfunction; and rewrites of the log rule texts and reformatting of paragraphs and subparagraphs are done as needed for easier comprehension.

(i) With this order, we add to the rules a separate section, and a new separate listing in tha alphabetical index for "Fairness Doctrine." Heretofore, references to this important area of Commission policy were merely footnoted in the rule pertaining to personal attacks and political editorials. The new rule simply states that the Fairness Doctrine is in section 315(a) of the Communications Act, directs the rule user to the FCC public notice "Fairness Doctrine and the Public Interest Standards," 39 FR 26372, and includes information on obtaining copies of this document from the FCC.

The present rule section concerning personal attack and political editorials is herein divided into two separate rule sections (except NCE-FM, where edi-

OCT 4 1978

V 43 / 1978 OCT 4

torializing is not allowed). After appropriate test revisions, the three rules will be redesignated in subpart H as:

Sec.
73.1910 Fairness Doctrine.
73.1920 Personal attacks.
73.1930 Political editorials.

(j) The rules pertaining to broadcasts by candidates for public office were formerly contained in subparts A, B, C, and E of part 73. The rule numbers were §§ 73.120, 73.290, 73.590, and 73.657 for AM, FM, NCE—FM, and TV, respectively. These rules were combined into one rule and redesignated § 73.1940 in the report and order, "In the matter of • • • Broadcasts • • • By Candidates for Public Office." (BC Docket No. 78—103, adopted July 12, 1978; effective August 28, 1978).

In this order the rule is further clarified for broadcast licensees by additional paragraphs, which will reflect the requirements of sections 315 and 312 if the Communications Act. One further addition to the new rule directs the broadcasts attention to the new "Primer" in the public notice adopted by the Commission on July 20, 1978, entitled "The Law of Political Broadcasting and Cablecasting."

(k) The part 73 alphabetical index is revised to reflect the rule changes described herein. (Appendix B.)

5. We conclude that, for the reasons set forth above, adoption of these revisions will serve the public interest and inasmuch as these amendments impose no additional burdens and raise no issue upon which comments would serve any useful purpose, prior notice of rulemaking, effective date provisions, and public procedure thereon are unnecessary pursuant to the Administrative Procedure and Judicial Review Act provisions of 5 U.S.C. (b)(3)(B).

6. *Therefore, it is ordered,* That pursuant to sections 4(i) and 303(r) of the Communications Act of 1934, as amended, the Commission's rules and regulations are amended as set forth below, effective October 16, 1978.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082 (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

1. Section 1.526 is amended to read as follows:

§ 1.526 Records to be maintained locally for public inspection by commercial applicants, permittees, and licensees.

(a) • • •

(4) Such records as are required to be kept by § 73.1940 of this chapter, concerning broadcasts by candidates for public office.

• • • • •

(c) • • •

(3) Although not part of the regular file for public inspection, program logs for TV and radio stations will be available for public inspection under the circumstances set forth in § 73.1860 and discussed in the Public and Broadcasting Procedural Manual; Revised Edition.

• • • • •

(g) *Period of retention.* the records specified in paragraph (a)(4) of this section shall be retained for the period specified in § 73.1940 of this chapter. The manual specified in paragraph (a)(6) of this section shall be retained indefinitely. The records specified in paragraphs (a) (1), (2), (3), (5), (7), (b), and (c) of this section shall be retained as follows:

• • • • •

3. Section 73.6 is amended to read as follows:

§ 73.6 Daytime.

See § 73.1720.

4. Section 73.9 is amended to read as follows:

§ 73.9 Broadcast day.

See § 73.1700.

5. Section 73.15 is amended to read as follows:

§ 73.15 NARBA and the U.S./Mexican Agreement.

See § 73.1650.

6. Section 73.23 is amended to read as follows:

§ 73.23 Time of operation of the several classes of stations.

See § 73.1705.

7. Section 73.38 is amended to read as follows:

§ 73.38 Limited time operation.

See § 73.1725.

8. Section 73.70 is amended to read as follows:

§ 73.70 Extension meters.

See § 73.1550.

9. Section 73.71 is amended to read as follows:

§ 73.71 Minimum operating schedule.

See § 73.1740.

10. Section 73.73 is amended to read as follows:

§ 73.73 Specified hours.

See § 73.1730.

11. Section 73.74 is amended to read as follows:

§ 73.74 Sharing time.

See § 73.1715.

12. Section 73.76 is amended to read as follows:

§ 73.76 Sharing time; experimental period.

See § 73.1715.

13. Section 73.77 is amended to read as follows:

§ 73.77 Sharing time; departure from regular schedule.

See § 73.1715.

14. Section 73.78 is amended to read as follows:

§ 73.78 Sharing time stations; notification to Commission.

See § 73.1715.

15. Section 73.79 is amended to read as follows:

§ 73.79 License to specify sunrise and sunset hours.

See § 73.1720.

16. Section 73.80 is amended to read as follows:

§ 73.80 Secondary station; filing of operating schedule.

See § 73.1725.

17. Section 73.81 is amended to read as follows:

§ 73.81 Secondary station; failure to reach agreement.

See § 73.1725.

18. Section 73.82 is amended to read as follows:

§ 73.82 Departure from schedule; material violation.

See § 73.1725.

19. Section 73.87 is amended to read as follows:

§ 73.87 Times and modes of program transmission.

See § 73.1745.

20. Section 73.91 is amended to read as follows:

§ 73.91 Discontinuance of operation.

See § 73.1750.

21. Section 73.92 is amended to read as follows:

§ 73.92 Station and operator licenses; posting of.

See § 73.1230.

22. Section 73.97 is amended to read as follows:

§ 73.97 Station inspection.

See § 73.1225.

23. Section 73.98 is amended to read as follows:

§ 73.98 Operation during emergency.

See § 73.1250.

24. Section 73.99 is amended to read as follows:

§ 73.99 Presunrise service authority.

See § 73.1735.

25. Section 73.111 is amended to read as follows:

§ 73.111 General requirements relating to logs.

See § 73.1800.

26. Section 73.112 is amended to read as follows:

§ 73.112 Program logs.

See § 73.1810.

27. Section 73.113 is amended to read as follows:

§ 73.113 Operating logs.

See § 73.1820.

28. Section 73.114 is amended to read as follows:

§ 73.114 Maintenance logs.

See § 73.1830.

29. Section 73.115 is amended to read as follows:

§ 73.115 Retention of logs.

See § 73.1840.

30. Section 73.116 is amended to read as follows:

§ 73.116 Availability of logs and records.

See §§ 73.1225 and 73.1850.

31. Section 73.123 is amended to read as follows:

§ 73.123 Personal attacks; political editorials.

See §§ 73.1910, 73.1920, and 73.1930.

32. Section 73.204 is amended to read as follows:

§ 73.204 International agreements and other restrictions on use of channels.

See §§ 73.220 and 73.1650.

33. New § 73.220 is added to subpart B, part 73, to read as follows:

§ 73.220 Restrictions on use of channels.

(a) The frequency 89.1 MHz (channel 206) is reserved in the New York City metropolitan area for the use of the United Nations with the equivalent of an antenna height of 500 feet above average terrain and effective radiated power of 20 kilowatts, and the FCC will make no assignments which would cause objectionable interference with such use.

(b) In Alaska, the frequency band 88-100 MHz is allocated exclusively to Government radio services and the non-Government fixed service. The frequencies 87.9 through 99.9 MHz (channels 200 through 260) will not be assigned in Alaska for use by FM broadcast stations.

(c) In Hawaii, the frequency band 98-108 MHz is allocated for nonbroadcast use. The frequencies 98.1 through 107.9 MHz (channels 251 through 300) will not be assigned in Hawaii for use by FM broadcast stations.

34. Section 73.261 is amended to read as follows:

§ 73.261 Time of operation.

See §§ 73.1705 and 73.1740.

35. Section 73.263 is amended to read as follows:

§ 73.263 Station inspection.

See § 73.1225.

36. Section 73.264 is amended to read as follows:

§ 73.264 Station and operator licenses; posting of.

See § 73.1230.

37. Section 73.271 is amended to read as follows:

§ 73.271 Discontinuance of operation.

See § 73.1750.

38. Section 73.276 is amended to read as follows:

§ 73.276 Extension meters.

See § 73.1550.

39. Section 73.281 is amended to read as follows:

§ 73.281 General requirements relating to logs.

See § 73.1800.

40. Section 73.282 is amended to read as follows:

§ 73.282 Program logs.

See § 73.1810.

41. Section 73.283 is amended to read as follows:

§ 73.283 Operating logs.

See § 73.1820.

42. Section 73.284 is amended to read as follows:

§ 73.284 Maintenance logs.

See § 73.1830.

43. Section 73.285 is amended to read as follows:

§ 73.285 Retention of logs.

See § 73.1840.

44. Section 73.286 is amended to read as follows:

§ 73.286 Availability of logs and records.

See §§ 73.1225 and 73.1850.

45. Section 73.298 is amended to read as follows:

§ 73.298 Operation during emergency.

See § 73.1250.

46. Section 73.300 is amended to read as follows:

§ 73.300 Personal attacks; political editorials.

See §§ 73.1910, 73.1920, and 73.1930.

47. Section 73.504 headnote is amended to read as follows:

§ 73.504 Channel assignments under the U.S.A.-Mexico FM Broadcast Agreement.

• • • • •

48. Section 73.561 is amended to read as follows:

§ 73.561 Operating schedule; time sharing.

• • • • •

NOTE.—See §§ 73.1705, 73.1715, and 73.1740.

49. Section 73.563 is amended to read as follows:

§ 73.563 Station inspection.

See § 73.1225.

50. Section 73.564 is amended to read as follows:

§ 73.564 Station and operator licenses; posting of.

See § 73.1230.

V 43 1 93 OCT 4 78

51. Section 73.571 is amended to read as follows:

§ 73.571 Discontinuance of operation.

See § 73.1750.

52. Section 73.574 is amended to read as follows:

§ 73.574 Extension meters.

See § 73.1550.

53. Section 73.581 is amended to read as follows:

§ 73.581 General requirements relating to logs.

See § 73.1800.

54. Section 73.582 is amended to read as follows:

73.582 Program logs.

See § 73.1810.

55. Section 73.583 is amended to read as follows:

§ 73.583 Operating logs.

See § 73.1820.

56. Section 73.584 is amended to read as follows:

§ 73.584 Maintenance logs.

See § 73.1830.

57. Section 73.585 is amended to read as follows:

§ 73.585 Retention of logs.

See § 73.1840.

58. Section 73.586 is amended to read as follows:

§ 73.586 Availability of logs and records.

See §§ 73.1225 and 73.1850.

59. Section 73.597 is amended to read as follows:

§ 73.597 Operation during emergency.

See § 73.1250.

60. Section 73.598 is amended to read as follows:

§ 73.598 Personal attacks.

See §§ 73.1910 and 73.1920.

61. Section 73.608 is amended to read as follows:

§ 73.608 International agreements.

See § 73.1650.

62. Section 73.623 is amended to read as follows:

§ 73.623 Applications for sharing of television channels.

See § 73.1715

63. Section 73.651 is amended to read as follows:

§ 73.651 Time of operation.

See §§ 73.653, 73.1705, and 73.1740.

64. New § 73.653 is added to Subpart E, Part 73, to read as follows:

§ 73.653 Operation of TV aural and visual transmitters.

(a) The aural and visual transmitters of a TV station shall not be operated separately, or to present different or unrelated program material, except in the following cases:

(1) Emergency fills due to either visual or aural equipment failures leaving the licensee with only the audio or video programming to announce the equipment failures to the audience;

(2) For equipment tests or experimentation pursuant to § 73.1510 (Experimental authorizations) and § 73.1520 (Operation for tests and maintenance).

(b) During visual transmissions of a test pattern, still pictures or slides, the aural transmission shall consist of a single tone, or series of variable tones; a presentation of the upcoming program schedule; aural news broadcasts; or music. This type program material shall not exceed 15 minutes immediately prior to the start of the station's programming for the day or for a total period not to exceed more than one hour in any broadcast day.

65. Section 73.660 is amended to read as follows:

§ 73.660 Station and operator licenses; posting of.

See § 73.1230.

66. Section 73.665 is amended to read as follows:

§ 73.665 Station inspection.

See § 73.1225.

67. Section 73.667 is amended to read as follows:

§ 73.667 Discontinuance of operation.

See § 73.1750.

68. Section 73.669 is amended to read as follows:

§ 73.669 General requirements relating to logs.

See § 73.1800.

69. Section 73.670 is amended to read as follows:

§ 73.670 Program logs.

See § 73.1810.

70. Section 73.671 is amended to read as follows:

§ 73.671 Operating logs.

See § 73.1820.

71. Section 73.672 is amended to read as follows:

§ 73.672 Maintenance logs.

See § 73.1830.

72. Section 73.673 is amended to read as follows:

§ 73.673 Retention of logs.

See § 73.1840.

73. Section 73.674 is amended to read as follows:

§ 73.674 Availability of logs and records.

See §§ 73.1225 and 73.1850.

74. Section 73.675 is amended to read as follows:

§ 73.675 Operation during emergency.

See § 73.1250.

75. Section 73.678 is amended to read as follows:

§ 73.678 Extension meters.

See § 73.1550.

76. Section 73.679 is amended to read as follows:

§ 73.679 Personal attacks; political editorials.

See §§ 73.1910, 73.1920 and 73.1930.

77. New § 73.1225 is added to part 73, subpart H, to read as follows:

§ 73.1225 Station inspections by FCC.

(a) The licensee of a broadcast station shall make the station available for inspection by representatives of the FCC during the station's business hours, or at any time it is in operation.

(b) In the course of an inspection or investigation, an FCC representative may require special equipment tests, program tests or operation with nighttime or presunrise facilities during daytime hours pursuant to § 0.314, Part 1, of the FCC rules.

(c) The following logs and records shall be made available upon request by representatives of the FCC:

(1) *For AM stations.* (i) Program, operating and maintenance logs.

(ii) Equipment performance measurements required by § 73.47.

(iii) Copy of the most recent antenna resistance or commonpoint impedance measurements submitted to the Commission.

(iv) Copy of the most recent field strength measurements made to establish performance of directional antennas required by § 73.151.

(v) Copy of the partial and skeleton directional antenna proofs of performance as directed by § 73.154 and made pursuant to the following requirements:

(A) Section 73.67, Remote control operation.

(B) Section 73.68, Sampling systems for antenna monitors.

(C) Section 73.69, Antenna monitors.

(D) Section 73.93, Operator requirements.

(vi) Chief operator agreement; and contracts with first-class operators employed part time for maintenance duties.

(2) *For FM stations.* (i) Program, operating and maintenance logs.

(ii) Equipment performance measurements required by §§ 73.254 and 73.554.

78. New § 73.1226 is added to part 73, subpart H, to read as follows:

§ 73.1226 Availability to FCC of station logs and records.

The following shall be made available to any authorized representative of the FCC upon request:

(a) Station records and logs shall be made available for inspection or duplication at the request of the FCC or its representative. Such logs or records may be removed from the licensee's possession by an FCC representative or, upon request, shall be mailed by the licensee to the FCC by either registered mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by an FCC representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the FCC has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this Chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the chief of the law enforcement agency promptly certifies in writing to the FCC that removal of the logs or records will hinder law enforcement activities of the agency, stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records will be released to the FCC.

(c) The following contracts, agreements, or understandings, which need not be filed with the FCC (per § 1.613, Filing of contracts), shall be kept at the station and made available for inspection by any authorized representative of the FCC upon request: Contracts relating to the sale of broadcast time to "time brokers" for resale; subchannel leasing agreements for subsidiary communications authorization operation; time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station; and contracts with the chief operators and other engineering personnel.

(iii) Chief operator agreements and contracts with first-class operators employed part-time for maintenance duties.

(3) *For TV stations.* (i) Program, operating and maintenance logs.

79. New § 73.1230 is added to subpart H, part 73, to read as follows:

§ 73.1230 Posting of station and operator licenses.

(a) The station license and any other instrument of station authorization shall be posted in a conspicuous place and in such a manner that all terms are visible at the place the licensee considers to be the principal control point of the transmitter. At all other control or ATS monitoring and alarm points a photocopy of the station license and other authorizations shall be posted.

(b) The operator license or form 759 (verification of operator license or permit) of each station operator employed full-time or part-time or via contract, shall be permanently posted and shall remain posted so long as the operator is employed by the licensee. The operator license shall be posted where the operator is on duty, either:

(1) At the transmitter; or

(2) At the extension meter location; or

(3) At the remote control point, if the station is operated by remote control; or

(4) At the monitoring and alarm point, if the station is using an automatic transmission system.

(c) Posting of the operator licenses and the station license and any other instruments of authorization shall be done by affixing the licenses to the wall at the posting location, or by enclosing them in a binder or folder which is retained at the posting location so that the documents will be readily available and easily accessible.

80. New § 73.1250 is added to subpart H, part 73, to read as follows:

§ 73.1250 Broadcasting emergency information.

(a) Emergency situations in which the broadcasting of information is considered as furthering the safety of life and property include, but are not limited to the following: Tornadoes, hurricanes, floods, tidal waves, earthquakes, icing conditions, heavy snows, widespread fires, discharge of toxic gasses, widespread power failures, industrial explosions, civil disorders and school closings and changes in school bus schedules resulting from such conditions.

(b) If requested by responsible public officials, a station may, at its discretion, and without further FCC authority, transmit emergency point-to-point messages for the purpose of requesting or dispatching aid and assisting in rescue operations.

(c) If the Emergency Broadcast System (EBS) is activated for a national level emergency while a local or State level emergency operation is in progress, the national level EBS operation shall take precedence. If, during the broadcasting of local or State emergency information, the attention signal described in § 73.906 is used, the broadcasts are considered as being carried out under a State level or local level EBS operational plan.

(d) Any emergency operation undertaken in accordance with this section may be terminated by the FCC if required in the public interest.

(e) Immediately upon cessation of an emergency during which broadcast facilities were used for the transmission of point-to-point messages under paragraph (b) of this section, or when daytime facilities were used during nighttime hours by an AM station in accordance with paragraph (f) of this section, a report in letter form shall be forwarded to the FCC in Washington, D.C., setting forth the nature of the emergency, the dates and hours of the broadcasting of emergency information, and a brief description of the material carried during the emergency. A certification of compliance with the noncommercialization provision of paragraph (f) of this section must accompany the report where daytime facilities are used during nighttime hours by an AM station, together with a detailed showing, under the provisions of that paragraph, that no other broadcast service existed or was adequate.

(f) AM stations may, without further FCC authority, use their full daytime facilities during nighttime hours to broadcast emergency information (examples listed in paragraph (a) of this section), when necessary to the safety of life and property, in dangerous conditions of a general nature and when adequate advance warning cannot be given with the facilities authorized. Because of skywave interference impact on other stations assigned to the same channel, such operation may be undertaken only if regular, unlimited-time service, is non-existent, inadequate from the standpoint of coverage, or not serving the public need. All operation under this paragraph must be conducted on a non-

V 43 1 93 OCT 4 78

commerical basis. Recorded music may be used to the extent necessary to provide program continuity.

(g) Broadcasting of emergency information shall be confined to the hours, frequencies, powers and modes of operation specified in the station license, except as otherwise provided for AM stations in paragraph (f) of this section.

(h) Any emergency information transmitted by a TV station in accordance with this section shall be transmitted both aurally and visually or only visually. TV stations may use any method of visual presentation which results in a legible message conveying the essential emergency information. Methods which may be used include, but are not necessarily limited to, slides, electronic captioning, manual methods (e.g., hand printing) or mechanical printing processes. However, when emergency operation is being conducted under a national, State or local level Emergency Broadcast System (EBS) plan, emergency information shall be transmitted both aurally and visually.

81. New § 73.1550 is added to subpart H, part 73, to read as follows:

§ 73.1550 Extension meters.

(a) A broadcast station may, without further authority from the FCC, install and use extension meters and monitoring devices provided:

(1) The transmitter is in the same building as the normal operating location of the station's licensed operator and is no more than one floor above or below the normal operating location.

(2) The path from the normal operating location to the transmitter is no longer than 100 feet and provides the operator with ready access to the transmitter.

(3) The required extension meters and monitoring devices are sufficiently close to the operator's normal operating location that deviations from normal indications of such instruments can be observed from that location.

(4) The transmitter is installed and protected so it is not accessible to unauthorized persons.

(5) Each extension meter or monitoring device required for the type of station, pursuant to paragraph (b) of this section, shall continuously sample the parameter for which it is installed and constantly indicate that parameter.

(6) Installation and operation of these meters shall be in accordance with the requirements prescribed for their corresponding regular meters and monitoring devices.

(7) Devices used for obtaining extension meter indications do not affect the accuracy of their corresponding regular meters.

(b) Extension metering and monitoring devices shall be installed as follows:

(1) *AM stations.* (i) Meters for indicating the DC input power of the last radio frequency power amplifier stage of the transmitter.

(ii) A meter for indicating non-directional antenna current or directional antenna common point current.

(iii) The modulation monitor or a percentage modulation meter and peak indicating device which provides continuous and accurate indications of the modulation levels.

(iv) For stations using directional antenna systems, either the antenna monitor or external meters meeting the specifications for accuracy and repeatability prescribed for the monitor itself.

(2) *FM stations operating with transmitter output power more than 10 watts.* (i) Meters for indicating the DC input power to the last radio frequency power amplifier stage of the transmitter.

(ii) A meter for indicating the relative transmission line voltage, current or power.

(iii) The modulation monitor or a percentage modulation meter and peak indicating device which provide continuous and accurate indications of total modulation levels.

(3) *FM stations operating with transmitter power of 10 watts or less.* (i) An indicator to show when the transmitter is in operation.

(ii) A percentage modulation indicator or a calibrated program level meter from which a satisfactory indication of the percentage of modulation can be determined.

(4) *TV stations.* (i) Meters for indicating the DC input power to the last radio frequency power amplifier stages for the aural and visual transmitters.

(ii) Meters for indicating the relative transmission line voltage, current or power for the aural and visual transmitters.

(iii) The aural modulation monitor or a percentage modulation meter and peak indicating device which provide continuous and accurate indications of modulation levels.

(iv) Visual monitoring equipment suitable for monitoring the visual signal so that it may be maintained in accordance with the FCC requirments.

(c) The extension meters required, pursuant to paragraph (b) of this section, must be calibrated against their corresponding regular meters as often as necessary to insure their accuracy, but in no event less than once each week, and

(1) The results of such calibrations shall be entered in the station's maintenance log.

(2) In no event shall an extension meter be calibrated against another remote or extension meter.

(3) Each extension meter shall be accurate to within 2 percent of the value read on its corresponding regular meter.

(4) For AM stations, such calibrations shall be made for each mode of operation.

(d) If a malfunction of any component of the extension metering or monitoring system causes inaccurate readings, the following procedures shall apply:

(1) *All stations.* If the malfunction affects the meters for indicating the DC input power to the last radio stage of the transmitter power amplifier, the indications must be read at the transmitter and entered in the operating log at the same intervals. If the malfunction affects the extended indications of the modulation monitor (aural) the licensee shall, pending repair or replacement, provide other suitable means for monitoring modulation at the extended meter location.

(2) *AM stations.* In addition to subparagraph (1) of this paragraph, if the malfunction affects the antenna or common point current indications, the regular antenna or common point ammeter may be read and the indications entered in the operating log once daily for each mode of operation pending the return to service of the extension antenna or common point ammeter. If the malfunction affects the extended indications of the directional antenna monitor, the pertinent entries required in the operating log must be read and logged at the specified intervals at the monitor location.

(3) *FM stations.* In addition to subparagraph (1) of this paragraph, if the malfunction affects the transmission line meter, the indications must be read at the transmitter and entered in the operating log at the same intervals.

(4) *TV stations.* In addition to subparagraph (1) of this paragraph, if the malfunction affects the transmission line meter(s), indications must be read at the transmitter and entered in the operating log at the same intervals. If the malfunction affects the indications of the visual monitoring equipment, the licensee shall, pending repair or replacement, provide other suitable means for monitoring the visual modulation at the extension meter location.

(e) When a malfunction in the extension metering or monitoring equipment is detected, an appropriate entry shall be made in the station's maintenance log showing the date of the observance and identifying the indicating device(s) affected. A dated entry shall also be made when repair or replacement is completed. If a malfunc-

tioning component cannot be repaired or replaced within 60 days from the date faulty operation is detected, the Engineer in Charge of the radio district in which the station is located shall be notified and request made for such additional time as is needed to complete the necessary repairs or replacement.

82. New § 73.1650 is added to subpart H, part 73, as follows:

§ 73.1650 International broadcasting agreements.

(a) *AM broadcast station agreements.* (1) The U.S.A. is signatory to the North American Broadcasting Agreement (NARBA) with the Bahama Islands and Jamaica, Canada, Cuba and the Dominican Republic.

(2) The U.S.A. and Mexico are signatories to a separate agreement (U.S./Mexican Agreement).

(3) The U.S.A. has separate, bilateral agreements with Canada, Mexico and the Bahama Islands pertaining to presunrise authority.

(b) *FM broadcast stations agreements.* The U.S.A. is a signatory to separate, bilateral agreements concerning FM broacast stations with the governments of Canada and Mexico.

(c) *TV broadcast station agreements.* The U.S.A. is signatory to separate, bilateral agreements concerning TV broadcast stations with the governments of Canada and Mexico.

(d) All AM, FM and TV broadcast stations agreements to which the U.S.A. is a signatory are available for inspection in the Office of the Chief, Broadcast Bureau of the FCC in Washington, D.C. Copies may be ordered from the FCC copy contractor. The contractor is:

Downtown Copy Center, 1114 21st Street NW., Washington, D.C. 20037.

83. A new undesignated headnote, OPERATING HOURS, is added to subpart H, immediately preceding § 73.1700, Broadcast Day.

OPERATING HOURS

84. New § 73.1700 is added to subpart H, part 73, to read as follows:

§ 73.1700 Broadcast day.

The term "broadcast day" means that period of time between the station's sign-on and its sign-off.

85. New § 73.1705 is added to subpart H, part 73, to read as follows:

§ 73.1705 Time of operation.

(a) Commercial and noncommercial educational TV and commercial FM stations will be licensed for unlimited time operation. Application may be made for voluntary share-time operation.

(b) Noncommercial educational FM stations will be licensed for unlimited and share time operation according to the provisions of § 73.561.

(c) AM stations will be licensed for unlimited time, limited time, daytime, share time or specified hours.

86. New § 73.1710 is added to subpart H, part 73, to read as follows:

§ 73.1710 Unlimited time.

Operation is permitted 24 hours a day.

87. New § 73.1715 is added to subpart H, part 73, to read, as follows:

§ 73.1715 Share time.

Operation is permitted by two or more broadcast stations using the same channel in accordance with a division of hours mutually agreed upon and considered part of their licenses.

(a) If the licenses of stations authorized to share time do not specify hours of operation, the licensees shall endeavor to reach an agreement for a definite schedule of periods of time to be used by each. Such agreement shall be in writing and each licensee shall file it in triplicate original with each application to the FCC in Washington, D.C. for renewal of license. If and when such written agreements are properly filed in conformity with this section, the file mark of the FCC will be affixed thereto, one copy will be retained by the FCC, one copy forwarded to the engineer in charge of the radio district in which the station is located, and one copy returned to the licensee to be posted with the station license and considered as a part thereof. If the license specifies a proportionate time division, the agreement shall maintain this proportion. If no proportionate time division is specified in the license, the licensees shall agree upon a division of time. Such division of time shall not include simultaneous operation of the stations unless specifically authorized by the terms of the license.

(b) If the licensees of stations authorized to share time are unable to agree on a division of time, the FCC in Washington, D.C. shall be so notified by a statement filed with the applications for renewal of licenses. Upon receipt of such statement, the FCC will designate the applications for a hearing and, pending such hearing, the operating schedule previously adhered to shall remain in full force and effect.

(c) A departure from the regular schedule in a time-sharing agreement will be permitted only in cases where an agreement to that effect is put in writing, is signed by the licensees of the stations affected thereby and filed in triplicate by each licensee with the FCC in Washington, D.C. prior to the time of the time of the proposed change. If time is of the essence, the actual departure in operating schedule may precede the actual filing of written agreement, provided appropriate notice is sent to the FCC.

(d) If the license of an AM station authorized to share time does not specify the hours of operation, the station may be operated for the transmission of regular programs during the experimental period provided an agreement thereto is reached with the other stations with which the broadcast day is shared: *And further provided,* Such operation is not in conflict with § 73.72 (Operating during the experimental period). Time-sharing agreements for operation during the experimental period need not be submitted to the FCC.

(e) Noncommercial educational FM stations are authorized for share time operation according to the provisions of § 73.561.

88. New § 73.1720 is added to subpart H, part 73, to read as follows:

§ 73.1720 Daytime.

Operation is permitted during the hours between average monthly local sunrise and average monthly local sunset.

(a) The controlling times for each month of the year are stated in the station's instrument of authorization. Uniform sunrise and sunset times are specified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of the month adjusted to the nearest quarter hour. Sunrise and sunset times are derived by using the standardized procedure and the tables in the 1946 American Nautical Almanac issued by the United States Naval Observatory.

89. New § 73.1725 is added to subpart H, part 73, to read as follows:

§ 73.1725 Limited time.

(a) Operation is applicable only to class II (secondary) AM stations on a clear channel with facilities authorized before November 30, 1959. Operation of the secondary station is permitted during daytime and until local sunset if located west of the dominant station on the channel, or until local sunset at the dominant station if located east of that station. Operation is also permitted during nighttime hours not used by the dominant station or stations on the channel.

(b) No authorization will be granted for:

(1) A new limited time station;

(2) A limited time station operating on a changed frequency;

(3) A limited time station with a new transmitter site materially closer to the 0.1 mV/m contour of a co-channel U.S. class I station; or

(4) Modification of the operating facilities of a limited time station result

V 43 / 193

ing in increased radiation toward any point on the 0.1mV/m contour of a co-channel U.S. class I station during the hours after local sunset in which the limited time station is permitted to operate by reason of location east of the class I station.

(c) The licensee of a secondary station which is authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule. It shall bear a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the FCC will affix its file mark and return one copy to the licensee authorized to operate limited time. This shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only pursuant to §73.1715 (Share time).

(d) If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the FCC in Washington, D.C. shall be so notified by the licensee of the station authorized limited time. After receipt of such notice, the FCC will designate for hearing the applications of both stations for renewal of license and, pending the hearing, the schedule previously adhered to shall remain in full force and effect.

90. New §73.1730 is added to subpart H, part 73, to read as follows:

§73.1730 Specified hours.

(a) Specified hours stations must operate in accordance with the exact hours specified in their license. However, such stations, operating on local channels, unless sharing time with other stations, may operate at hours beyond those specified in their licenses to carry special events programing. When such programs are carried during nighttime hours, the station's authorized nighttime facilities must be used.

(b) Other exceptions to the adherence to the schedule of specified hours of operation are provided in §73.72 (Operating during the experimental period), §73.1250 (Broadcasting emergency information) and §73.1740 (Minimum operating schedule).

91. New §73.1735 is added to subpart H, part 73, to read as follows:

§73.1737 Presunrise service authority (PSA).

Licensees of certain classes of AM stations are eligible to request presunrise service authority (see §73.99).

92. New §73.1740 is added to subpart H, part 73, to read as follows:

§73.1740 Minimum operating schedule.

(a) All commercial broadcast stations are required to operate not less than the following minimum hours:

(1) *AM and FM stations.* Two-thirds of the total hours they are authorized to operate between 6 a.m. and 6 p.m. local time and two-thirds of the total hours they are authorized to operate between 6 p.m. and midnight, local time, each day of the week except Sunday.

(i) Daytime AM stations need comply only with the minimum requirements for operation between 6 a.m. and 6 p.m., local time.

(2) *TV stations.* (i) During the first 36 months of operation, not less than 2 hours daily in any 5 broadcast days per calendar week and not less than a total of:

(A) 12 hours per week during the first 18 months.

(B) 16 hours per week during the 19th through 24th months.

(C) 20 hours per week during the 25th through 30th months.

(D) 24 hours per week during the 31st through 36th months.

(ii) After 36 months of operation, not less than 2 hours in each day of the week and not less than a total of 28 hours per calendar week.

(iii) Visual transmissions of test patterns, slides, or still pictures accompanied by unrelated aural transmissions may not be counted in computing program service (see §73.653).

(3) "Operation" includes the period during which the station is operated pursuant to temporary authorization or program tests, as well as during the license period.

(4) In the event that causes beyond the control of a licensee make it impossible to adhere to the operating schedule of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the FCC. Notification must be sent to the FCC in Washington, D.C. not later than the 10th day of limited or discontinued operation. During such period, the licensee shall continue to adhere to the requirements in the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the licensee will so notify the FCC of this date. If the causes beyond the control of the licensee make it impossible to comply within the allowed period, informal written request shall be made to the FCC no later than the 30th day for such additional time as may be deemed necessary.

(b) Noncommercial educational AM and TV stations are not required to operate on a regular schedule and no minimum hours of operation are specified; but the hours of actual operation during a license period shall be taken into consideration in the renewal of noncommercial educational AM and TV broadcast licenses. Noncommercial educational FM stations are subject to the operating schedule requirements according to the provisions of §73.561.

93. New §73.1745 is added to subpart H, part 73, to read as follows:

§73.1745 Unauthorized operation.

(a) No broadcast station shall operate at times, or with modes or power, other than those specified and made a part of the license, unless otherwise provided in this part.

(b) Any unauthorized departure from an operating schedule which is required to be filed with the FCC in Washington, D.C., will be considered as a violation of a material term of the license.

94. New §73.1750 is added to subpart H, part 73, to read as follows:

§73.1750 Discontinuance of operation.

The licensee of each station shall notify the FCC in Washington, D.C., and the Engineer in Charge of the radio district where such station is located of permanent discontinuance of operation at least two days before operation is discontinued. Immediately after discontinuance of operation, the licensee shall forward the station license and other instruments of authorization to the Washington, D.C., office of the FCC for cancellation.

95. New §73.1800 is added to subpart H, part 73, to read as follows:

§73.1800 General requirements relating to logs.

(a) The licensee of each station shall maintain program, operating and maintenance logs as set forth in §§73.1810, 73.1820, and 73.1830. Each log shall be kept by the station employee or employees (or contract operator) competent to do so, having actual knowledge of the facts required. The person keeping the log must make entries that accurately reflect the operation of the station. In the case of program and operating logs, the employee shall sign the appropriate log when starting duty and again when going off duty and setting forth the time of each. In the case of maintenance logs, the employee shall sign the log upon completion of the required maintenance and inspection entries. When the employee keeping a program or operating log signs it upon going off duty or completing maintenance log entries, that person attests to the fact that the log, with any corrections or additions made before it was signed, is an accurate representation of what transpired.

(b) The logs shall be kept in an orderly and legible manner, in suitable form and in such detail that the data required for the particular class of station concerned are readily available. Key letters or abbreviations may be used if proper meaning or explanation is contained elsewhere in the log. Each sheet shall be numbered and dated. Time entries shall be made in local time and shall be indicated as advanced (e.g., e.d.t.) or non-advanced time (e.g., e.s.t.).

(c) Any necessary corrections of a manually kept log after it has been signed in accordance with paragraph (a) of this section shall be made only by striking out the erroneous portion and making a corrective explanation on the log or attachment to it. For program logs, such corrections shall be dated and signed by the person who kept the log or the program director, or the station manager or an officer of the licensee. For operating and maintenance logs, such corrections shall be dated and signed by the person who kept the log or the station technical supervisor, the station manager, or an officer of the licensee.

(d) No automatically kept log shall be altered in any way after entries have been recorded. When automatic logging processes fail or malfunction, the log must be kept manually for that period and in accordance with the requirements of this section.

(e) No log, or portion thereof, shall be erased, obliterated or willfully destroyed during the period in which it is required to be retained. (Section 73.1840, Retention of logs.)

(f) Entries shall be made in the logs as required by §§73.1810, 73.1820 and 73.1830. Additional information such as that needed for administrative or operational purposes may be entered on the logs. Such additional information, so entered, shall not be subject to the restrictions and limitations in the FCC's rules on the making of corrections and changes in logs and may be physically removed, without otherwise altering the log in any way, before making the log a part of an application or available for public inspection.

(g) The operating log and the maintenance log may be kept individually on the same sheet in one common log, at the option of the licensee.

(h) Application forms for licenses and other authorizations require that certain operating and program data be supplied. These application forms should be kept in mind in connection with maintenance of station program and operating records.

96. New §73.1810 is added to subpart H, part 73, to read as follows:

§73.1810 Program logs.

COMMERCIAL STATIONS

(a) Commercial stations shall keep a program log in accordance with the provisions of §73.1800 for each broadcast day which, in this context, means from the station's sign-on to its sign-off.

(b) *Entries.* The following entries shall be made in the program log:

(1) *For each program.* (i) An entry identifying the program by name or title.

(ii) entries which indicate the time each program begins and ends. If programs are broadcast during which separately identifiable program units of a different type or source are presented, and if the licensee wishes to count such units separately, the beginning and ending time for the longer program need be entered only once. The program units which the licensee wishes to count separately shall then be entered underneath the entry for the longer program, with the beginning and ending time of each such unit.

(iii) An entry classifying each program as to type, using the definitions given in paragraph (d)(1) of this section.

(iv) An entry classifying each program as to source, using the definitions set forth in paragraph (d)(2) of this section. (For network programs, also give name or initials of the network, e.g., ABC, CBS, NBC, Mutual.)

(v) An entry for each program presenting a political candidate, showing the name and political affiliation of such candidate.

(2) *For commercial matter.* (i) An entry identifying: The sponsor(s) of the program, the person(s) who paid for the announcement or the person(s) who furnished materials or services. The entry shall constitute a representation that identification was announced on the air as required by section 317 of the Communications Act and §73.1212 of the FCC's rules. See paragraph (d)(3) of this section for the definition of commercial matter.

(ii) An entry or entries showing the total duration of commercial matter in each hourly time segment (beginning on the hour) or the duration of each commercial message (commercial continuity in sponsored programs, or commercial announcements) in each hour. See paragraph (d)(3)(ii) of this section concerning computation of commercial time.

(3) *For public service announcements.* An entry showing that a public service announcement (PSA) has been broadcast together with the name of the organization or interest on whose behalf it is made. See paragraph (d)(4) of this section for definition of a public service announcement.

(4) *For other announcements.* (i) An entry of the time that each required station identification announcement is made (pursuant to §73.1201).

(ii) An entry for each announcement presenting a political candidate, showing the name and political affiliation of such candidate.

(iii) An entry for each announcement made pursuant to the local notice requirements of §§1.580 (pregrant), 1.594 (designation for hearing) and 73.1202 (licensee obligations), showing the time it was broadcast.

(iv) An entry for each announcement made pursuant to §73.1208 concerning the broadcast of taped, filmed or recorded material.

(5) *For Emergency Broadcast System Operations.* An entry for tests of the EBS procedures pursuant to the requirements of subpart G of this part and the appropriate station EBS checklist, unless such entries are consistently made in the station operating log.

(c) *National network programming.* A station broadcasting the programs of a national network which will supply it with all information as to such programs for the composite week need not log such data but shall record in its log the time when it joined the network, the name of each network program broadcast, the time it leaves the network, and any non-network matter broadcast which is required to be logged. The information supplied by the network for the composite week which the station will use in its renewal application, shall be retained with the program logs and associated with the log pages to which it relates.

(d) *Definitions.*—(1) *Program type.* The definitions of the first eight types of programs (i) through (viii), below, are intended not to overlap each other and will normally include all the various programs broadcast. Definitions (ix) through (xi) are subcategories and the programs classified thereunder will also be classified under one of the appropriate first eight types. There may also be further duplication within types (ix) through (xi) (e.g., a program presenting a candidate for public office, prepared by an educational institution, would be classified as public affairs (PA), political (POL) and educational institution (ED)).

(i) *Agricultural programs* (A) include market reports, farming or other information specifically addressed, or primarily of interest to the agricultural population.

(ii) *Entertainment programs* (E) include all programs intended primarily

OCT 4 1978 UMI

V 43 / 193 OCT 4 78 UMI

as entertainment, such as music, drama, variety, comedy, quiz, etc.

(iii) *News programs* (N) include reports dealing with current local, national, and international events, including weather and stock market reports; and commentary, analysis and sports news when an integral part of a news program.

(iv) *Public affairs programs* (PA) are programs dealing with local, State, regional, national, or international issues or problems, including, but not limited to, talks, commentaries, discussions, speeches, editorials, political programs, documentaries, mini-documentaries, panels, roundtables, vignettes, and extended coverage (whether live or recorded) of public events or proceedings, such as local council meetings, congressional hearings and the like.

(v) *Religious programs* (R) include sermons or devotionals; religious news; and music, drama and other types of programs designed primarily for religious purposes.

(vi) *Instructional programs* (I) are primarily intended to instruct. They further the appreciation or understanding of such subjects as literature, music, fine arts, history, geography, the natural and social sciences, hobbies and occupations and vocations.

(vii) *Sports programs* (S) include play-by-play and pre-game or post-game related activities and separate programs of sports instruction, news or information (e.g., fishing opportunities, golfing instruction, etc.)

(viii) *Other programs* (O) include all programs not falling within definitions (i) through (vii).

(ix) *Editorials* (EDIT) include programs presented for the purpose of stating opinions of the licensee.

(x) *Political programs* (POL) include those which present candidates for political office or which give expressions (other than in station editorials) to views on such candidates or on issues subject to public ballot.

(xi) *Educational Institution programs* (ED) include those prepared by, in behalf of, or in cooperation with, educational institutions, educational organizations, libraries, museums, PTA's, or similar organizations. Sport programs shall not be included.

(2) *Program source.*—(i) *A local program* (L) is any program originated or produced by the station or for the production of which the station is primarily responsible, employing live talent more than 50 percent of the time. Such a program, taped, recorded or filmed for later broadcast, shall be classified as local. A local program fed to a network shall be classified by the originating station as local. Programs primarily featuring records, tapes, syndicated or feature film or other nonlocally recorded programs, shall be classified as recorded (REC) even though a station announcer appears in connection with such material. However, identifiable units of such programs which are live and separately logged as such may be classified as local. For example, if during the course of a program featuring records or films, a nonnetwork 2-minute news report is given and logged as a news program, the report may be classified as local.

(ii) *A network program* (NET) is any program furnished to the station by a network (national, regional or special). Delayed broadcasts of programs originated by networks are classified as network.

(iii) *A recorded program* (REC) is any program not otherwise defined in this paragraph including, without limitation, those using recordings, tapes or films.

(3) *Commercial matter* (CM) includes commercial continuity (network and nonnetwork) and commercial announcements (network and nonnetwork) as follows: (Distinction between continuity and announcements is made only for definition purposes. There is no need to distinguish the two types of commercial matter when logging.)

(i) *Commercial continuity* (CC) is the advertising message of a program sponsor.

(ii) *A commercial announcement* (CA) is any other advertising message for which a charge is made, or other consideration is received. Included are bonus spots, trade-out spots, promotional announcements of a future program where consideration is received for such an announcement or where such announcement identifies the sponsor of a future program beyond mention of the sponsor's name as an integral part of the title of the program, and promotional announcements broadcast by any AM, FM or TV station for another commonly owned or controlled station serving the same community.

(iii) *Computation of commercial time:* Duration of commercial matter shall be as close an approximation to the time consumed as possible. The amount of commercial time scheduled will usually be sufficient. It is not necessary, for example, to correct an entry of a 1-minute commercial to accommodate varying reading speeds even though the actual time consumed might be a few seconds more or less than the scheduled time. However, it is incumbent upon the licensee to ensure that the entry represents as close an approximation of the time actually consumed as possible. For certain sponsored programs, it is difficult to measure the exact length of what would be considered as commercial matter, e.g., some sponsored religious and political programs. For such programs, the licensee is not required to compute the amount of commercial matter, but merely to log and announce the program as sponsored. This exception does nor apply to any program advertising commercial products or services, not to any commercial announcements.

(4) *Public service announcement* (PSA) in one for which no charge is made and which promotes programs, activities or services of Federal, State or local governments (e.g., recruiting, sales of U.S. Savings Bonds, etc.) or the programs, activities or services of nonprofit organizations (e.g. UGF, Red Cross, Blood Donations, etc.) or any other announcements regarded as serving community interests.

NONCOMMERCIAL EDUCATIONAL STATIONS

(e) A program log for stations licensed or operating as noncommercial educational stations shall be kept in accordance with the provisions of § 73.1810 for each broadcast day, which, in this context means from the station's sign-on to its sign-off.

(f) *Entries:* The following entries shall be made in the program log:

(1) *For each program.* (i) An entry identifying the program by name or title.

(ii) Entries which indicate the time each program begins and ends. If programs are broadcast during which separately identifiable program units of a different type or source are presented, and if the licensee wishes to count such units separately, the beginning and ending time for the longer program need be entered only once. The program units which the licensee wishes to count separately shall then be entered underneath the entry for the longer program with the beginning and ending time of each such unit.

(iii) An entry classifying each program as to source using the definitions set forth in paragraph (h)(1) of this section. (For network programs, also give name or initials or network, e.g., PBS, NPR, etc.)

(iv) An entry classifying each program as to type, using the definitions set forth in paragraph (h)(2) of this section.

(v) An entry for each program presenting a political candidate, showing the name and political affiliation of such candidates.

(2) *For donor announcements.* An entry giving the name(s) of any donor(s) or person(s) furnishing money, service or other valuable consideration, in accordance with the provisions of §§ 73.503, 73.621, including Notes, and § 73.1212, respectively; and the entry shall constitute a representation that identification was announced on the air in accordance with

the provisions of those sections and section 317 of the Communications Act. As an alternative to giving the name, an entry of the word "Donor(s)" may be made, provided that the log shall clearly indicate that the name of the donor(s) or person(s) is retained in the station's public file. Such information for a given series of programs need be entered in the public file only once: *Provided,* The information is identical for each program in the series. The information shall be retained in the public file for a period of two years. Program logs submitted to the FCC must include a list of the names of donors indicated thereon.

(3) *For public service announcements.* An entry showing that a public service announcement (PSA) has been broadcast, together with the name of the organization or interest on whose behalf it is made. See paragraph (h)(3) of this section for definition of a public service announcement.

(4) *For other announcements.* (i) An entry of the time that each required station identification announcement is made pursuant to § 73.1201.

(ii) An entry for each announcement presenting a political candidate showing the name and political affiliation of such candidate.

(iii) An entry for each announcement made pursuant to the local notice requirements of § 1.580 (pregrant) and § 1.594 (designation of hearing), showing the time it was broadcast.

(iv) An entry for each announcement made pursuant to § 73.1208 concerning the broadcast of taped, filmed or recorded material.

(5) *For emergency broadcast system operations.* An entry for each test of the EBS procedures pursuant to the requirements of subpart G of this part and the appropriate station EBS checklist, unless such entries are consistently made in the station operating log.

(g) *Network programming.* A station broadcasting the programs of a network (see "network program," paragraph (h)(1)(iii) of this section) which will supply it with all information as to such programs necessary for the "full week of operation" (FCC form 342) need not log such data but shall record in its log the name of each network program broadcast, the time the program was broadcast (beginning and ending) and any non-network matter broadcast which is required to be logged. The information supplied by the network for the "full week" which the station will use in its renewal application shall be retained with the program logs and associated with the log pages to which it relates.

(h) *Definitions.*—(1) *Program source.*—(i) *A local program* (L) is any program originated or produced by the station or for the production of which the station is primarily responsible, employing live talent more than 50 percent of the time. Such a program, taped, filmed or recorded for later broadcast, shall be classified as local. A local program fed to the network shall be classified by the originating station as local.

(ii) *A record program* (REC) (radio only) is any program not falling within the definition of "local" above, which utilizes records, transcriptions or taped music, with or without commentary by a local announcer or other station personnel.

(iii) *A network program* (NET) is any program furnished to the station by a network (national, regional or special). Delayed broadcasts of programs originated by networks are classified as network.

(iv) *Other programs* (OTHER) are any programs not defined above, including, without limitation, syndicated and feature films, and taped or transcribed programs.

(2) *Program type.*—(i) *Instructional* (I) include all programs designed to be utilized by any level of educational institution in the regular instructional program of the institution. In-school, in-service for teachers and college credit courses are examples of instructional programs.

(ii) *General educational* (GEN) is an educational program for which no formal credit is given.

(iii) *Performing arts* (A) is a program in which the performing aspect predominates such as drama or concert, opera or dance.

(iv) *News* (NS) programs include reports dealing with current local, national and international events, including weather and stock market reports; and commentary, analysis or sports news when an integral part of a news program.

(v) *Public affairs* (PA) includes programs dealing with local, state, regional, national or international issues or problems, including, but not limited to, talks, commentaries, discussions, speeches, political programs, documentaries, mini-documentaries, panels, roundtables, vignettes and extended coverage (whether live or recorded) of public events or proceedings such as local council meetings, congressional hearings, and the like.

(vi) *Light entertainment* (LE) includes programs consisting of popular music or other light entertainment.

(vii) *Other* (O) includes all programs not falling within the definitions of Instructional, General Education, Performing Arts, News, Public Affairs or Light Entertainment. Sports programs should be reported as "Other."

(3) *Public service announcement* (PSA) is one which promotes programs, activities, or services of Federal, State or local governments (e.g., recruiting, sales of U.S. Savings Bonds, etc.) or the programs, activities or services of nonprofit organizations (e.g., UGF, Red Cross, Blood Donations, etc.), or any other announcement regarded as serving community interest. See, however, §§ 73.503(d) and 73.621(e) with respect to the preclusion of announcements promoting the sale of a product or service.

ALL STATIONS, COMMERCIAL AND NONCOMMERCIAL

(i) *Manually kept logs.* Entries on a manually kept log may be made either at the time of or prior to broadcast. The employee responsible for keeping the log shall sign the log when starting duty and when going off duty and enter the time of each. If entries are preprinted prior to broadcast and any deviation therefrom occurs in what was actually broadcast, an appropriate correction must be made on the log. When the employee keeping the log signs the log upon going off duty, that person attests to the fact that the log, with any corrections or additions made before he signed off, is an accurate representation of what was actually broadcast.

(j) *Automatically kept logs.* (1) Entries on an automatically kept program log may be made by automatic logging instruments with sequential language printouts corresponding to manually kept log entries.

(2) An employee on duty shall be responsible for the automatic logging process and the keeping of the log. In the event of failure or malfunctioning of the automatic logging process, the person responsible for the log shall make the required entries in the log manually.

(3) The employee responsible shall sign the log, or a separate page to be affixed to the log, when starting duty and when going off duty and enter the time of each. The signature when going off duty constitutes a certification that, as to the automatic printout part of the log, the employee checked the automatic logging equipment periodically throughout the tour and that to the best of his knowledge and belief, at no time during his tour did it fail or malfunction, unless otherwise noted above the signature; and that, as to any part of the log which was kept manually with any corrections or additions made thereon before signing off duty, it was an accurate representation of what was actually broadcast.

(k) *Automatic maintenace of logging data.* (1) An employee on duty shall be responsible for any automatic maintenance of data and the keeping of the log. In the event of failure or malfunctioning of the said automatic process, the employee responsible for the log

V 43 / 193

shall make the required entries in the log manually at that time.

(2) The employee responsible shall sign, on a separate page to be affixed to the logging data, when starting duty and when going off duty and enter the time of each. The signature, when going off duty, constitutes a certification that the employee periodically checked the automatic maintenance of data equipment throughout the tour and to the best of his knowledge and belief it did not fail or malfunction, unless otherwise noted above the signature. The signature further certifies that any part of the log which was kept manually is an accurate representation of what was actually broadcast.

(3) The licensee shall extract any required information from automatically maintained program logging data for days specified by the FCC or its duly authorized representative and submit it in written form, together with the underlying recording, tape or other means employed, within such time as the FCC may specify.

(1) *Information required.* The licensee, whether employing manual logging, automatic logging or automatic maintenance of logging data, or any combination thereof, must be able to accurately furnish the FCC with all information required to be logged.

97. New § 73.1820. is added to subpart H, part 73, to read as follows:

§ 73.1820 Operating logs.

(a) Entries shall be made in the operating log either manually by a properly licensed operator in actual charge of the transmitting apparatus, or by automatic devices meeting the requirements of paragraph (b) of this section. Indications of operating parameters shall be logged prior to any adjustment of the equipment. Where adjustments are made to restore parameters to their proper operating values, the corrected indications shall be logged and accompanied, if any parameter deviation was beyond a prescribed tolerance, by a notation describing the nature of the corrective action. Indications of all parameters whose values are affected by modulation of the carrier shall be read without modulation. The actual time of observation shall be included in each log entry. The following information must be entered.

(1) *All stations:* (i) Entries of the time the station begins to supply power to the antenna and the time it ceases to do so.

(ii) Entries required by § 17.49(a), (b) and (c) of this chapter concerning the time the tower lights are turned on and off each day if manually controlled, the time the daily check of proper operation of the tower lights was made if an automatic alarm system is not used, and any observed failure of the lighting system. See § 17.47(a) for daily tower lighting observation or automatic alarm system requirements.

(iii) Any entries not specifically required in this section, but required by the instrument of authorization or elsewhere in this part.

(iv) An entry of each test of the emergency broadcast system procedures pursuant to the requirements of subpart G of this part and the appropriate station EBS checklist, unless such entries are consistently made in the station program log.

(2) *AM stations.* (i) An entry at the beginning of operations and at intervals not exceeding 3 hours, of the following (actual readings observed prior to making any adjustments to the equipment and an indication of any corrections to restore parameters to normal operating values):

(A) Operating constants for determining the DC input power to the last radio frequency power amplifier stage of the transmitter (plate voltage and current or other parameters appropriate for the type of amplifier used).

(B) Antenna current for nondirectional operation or common point current for directional operation.

(ii) The additional entries required by § 73.51(c)(2) when power is being determined by the indirect method.

(iii) For stations with directional antennas, the following additional indications shall be read and entered in the operating log at the time of commencement of operation in each mode and thereafter, at successive intervals not exceeding three hours in duration:

(A) Antenna monitor phase or phase deviation indications.

(B) Antenna monitor sample currents, current ratios, or ratio deviation indications.

(3) *FM stations.* (i) For each station licensed for transmitter output power greater than 10 watts, an entry, at the beginning of operation and at intervals not exceeding 3 hours, of the following (actual reading observed prior to making any adjustments to the equipment and an indication of any corrections made to restore parameters to normal operating values):

(A) Operating constants for determining the DC input power to the last radio frequency power amplifier stage of the transmitter (plate voltage and current or other parameters appropriate for the type of amplifier used).

(B) RF transmission line meter readings when the transmitter operating power is determined by the direct method.

(4) *TV stations.* (i) An entry at the beginning of operation and at intervals not exceeding 3 hours, of the following (actual readings observed prior to making any adjustments to the equipment and an indication of any corrections to restore parameters to normal operating values):

(A) Operating constants for determining the DC input power to the last radio frequency power amplifier stage of the aural transmitter (plate voltage and current or other parameters appropriate for the type of amplifier used) if power of the aural transmitter is being determined by the indirect method.

(B) RF transmission line meter readings for visual transmitter, and also for the aural transmitter when the aural transmitter operating power is determined by the direct method.

(C) For remote control operation, the results of observations of vertical interval test signal (VIT) transmissions (see § 73.676(f)).

(b) Automatic devices accurately calibrated and with appropriate time, date and circuit functions may be utilized to record the entries in the operating log provided:

(1) The recording devices do not affect the operation of circuits or accuracy of indicating instruments of the equipment being recorded;

(2) The recording devices have an accuracy equivalent to the accuracy of the indicating instruments;

(3) The calibration is checked against the original indicators at least once each calendar week and the results noted in the maintenance log;

(4) Provision is made to actuate automatically an aural alarm circuit located near the operator on duty if any of the automatic log readings are not within the tolerances or other requirements specified in the rules or station license;

(5) The alarm circuit operates continuously or the devices which record each parameter in sequence must read each parameter at least once during each 30-minute period;

(6) The automatic logging equipment is located at the remote control point if the transmitter is remotely controlled, or at the transmitter location if the transmitter is manually controlled;

(7) The automatic logging equipment is located in the near vicinity of the operator on duty and is inspected periodically during the broadcast day. In the event of failure of malfunctioning of the automatic equipment, the employee responsible for the log shall make the required entries in the log manually at that time.

(8) The indicating equipment conforms to the requirements of § 73.1215 (Indicating instruments—specifications) except that the scales need not exceed 2 inches in length. Arbitrary scales may not be used.

(c) In preparing the operating log, original data may be recorded in rough form and later transcribed into the log.

OCT 4 1978

(d) If required by AM or FM station operator requirements, each completed operating log shall bear a signed notation by the station's designated chief operator of the results of the review of that log, and show the date and time of such review.

98. New § 73.1830 is added to subpart H, part 73, to read as follows:

§ 73.1830 Maintenance logs.

(a) The licensee of each broadcast station shall keep a maintenance log. Entries in the log shall be made by the holder of a radiotelephone first-class license (or the holder of a radiotelephone second-class license for noncommercial educational FM stations authorized to operate with a transmitter output power of 1 kilowatt or less), and shall reflect the results of maintenance procedures or of observations performed. The following information shall be entered.

(1) *All stations.* (i) An entry of the time and result of auxiliary transmitter test(s).

(ii) An entry of the calibration check of automatic logging devices when used under the provisions of § 73.1820 (Operating logs).

(iii) An entry of all carrier frequency measurements, including the date performed and description of method used as required by § 73.1540 (Carrier frequency measurements).

(iv) An entry of the results of calibration of extension meters used against their corresponding regular meters as required by § 73.1550 (Extension meters).

(v) An entry of the results of calibration of indicating instruments at each remote control point against the corresponding instruments at the transmitter site, as required by the rules for use of remote control (AM, § 73.67; FM, § 73.275; NCE-FM, § 73.573; and TV, § 73.676).

(vi) The entries required by § 17.49(d) of this chapter concerning quarterly inspections of the condition of tower lights and associated control equipment and entries when towers are cleaned or repainted as required by § 17.50 of this chapter.

(vii) An entry to describe fully any experimental operation pursuant to § 73.1510 (Experimental operation) and § 73.1520 (Operation for tests and maintenance).

(viii) An entry of the date and time of removal from and restoration to service of any of the following equipment in the event it becomes defective:

(A) Modulation monitor (aural).

(B) Any transmission system meter, the reading of which is required to be entered into the station operating or maintenance log.

(C) Devices for monitoring or generating the EBS Attention Signal.

(2) *AM stations.* In addition to the entires specified in subparagraph (a)(1) of this section:

(i) An entry of the calibration check of remote reading antenna and common point ammeters against their corresponding regular meters when used under the provisions of § 73.57, including the actual readings of the meters prior to and after calibration.

(ii) For stations using directional antennas, an entry of the calibration of the antenna monitor using procedures specified by the monitor manufacturer's instructions.

(iii) For stations using directional antennas, an entry of the result of field strength measurements made at the specified monitoring points if such measurements are required either by the terms of the station license or § 73.93(e)(4) (Operator requirements).

(iv) For stations using directional antennas, an entry of the following observations (made without modulation if readings are affected by modulation) for each directional radiation pattern. Observations must be made at least three days of each calendar week, not less than 44 hours, nor more than 76 hours, apart.

(A) Common point current.

(B) Base currents, their ratios, and the deviations of those ratios, in percent, from values specified in the station authorization.

(C) Antenna monitor sample currents or current ratios and computed deviations of current ratios, in percent, from values specified in the station authorization.

(D) Antenna monitor phase indications and the deviations of those indications, in degrees, from values specified in the station authorization.

NOTE.—Direct control stations having a radiotelephone first-class operator on duty for all periods of directional antenna operation and having a station authorization permitting antenna base current readings at less frequent intervals than specified in this subparagraph, may make entries pursuant to the schedule specified in that authorization.

(v) Entries specified in § 73.68 (Sampling systems for antenna monitors) or § 73.69 (Antenna monitors), for stations using directional antennas, when the antenna sampling system or the antenna monitor is out of service.

(vi) A signed statement by the inspecting operator upon completion of the inspection required by § 73.93 showing that the inspection has been made. The statement shall include details of tests, adjustments and repairs which were accomplished in order to insure operation in accordance with the provisions of the technical operating standards for AM stations and the station authorization. If repairs could not be completed, include details of the items of equipment concerned, the manner and degree in which they are defective, and the reasons complete repairs could not be made.

(3) *FM stations.* In addition to the entries specified in paragraph (a)(1) of this section:

(i) For stations using the direct method of power determination, an entry for each six month period of the results of calibration of the transmission line meter used for determining operating power as specified for FM stations in § 73.267, or for NCE-FM stations, in § 73.567 (Operating power, determination and maintenance of).

(ii) For stations transmitting stereophonic programs, an entry each calendar month of measurements of the stereophonic pilot carrier frequency, including the date performed and description of the procedure used as specified for FM stations in § 73.397 or for NCE-FM stations in § 73.596.

(iii) For stations using SCA, an entry, once each calendar month, of the measurements of each subcarrier frequency, including the date performed and description of the procedure used as required by § 73.295 for FM stations or § 73.595 for NCE-FM stations (Operation under subsidiary communications authorizations).

(iv) A signed statement by the inspecting operator upon completion of the inspections specified in Operator requirements for FM stations in § 73.265 or for NCE-FM stations in § 73.565, showing that the inspection has been made. The statement shall include details of tests, adjustments and repairs which were accomplished in order to insure operation in accordance with the provisions of the technical operating standards for FM stations and the station authorization. If repairs could not be completed, include details of the items of equipment concerned, the manner and degree in which they are defective, and the reasons complete repairs could not be made.

(4) *TV stations.* In addition to the entries specified in paragraph (a)(1) of this section;

(i) An entry of the date and time of removal from and restoration to service of the visual modulation monitoring equipment.

(ii) An entry of the results of calibration of the transmission line meters used for determining the operating power as specified in § 73.689 (Operating power, determination and maintenance of).

(b) As entries of these maintenance procedures are made, the operator shall sign and date them. In preparing the maintenance log, original data may be recorded in rough form and later transcribed into the log.

99. New § 73.1840 is added to subpart H, part 73, to read as follows:

V 4 3 / 1 9 3
0 C 4 7 8
LIMI

§ 73.1840 Retention of logs.

Logs of all stations shall be retained by the licensee for a period of 2 years. However, logs involving communications incident to a disaster or which include communications incident to or involved in an investigation by the FCC and about which the license has been notified, shall be retained by the licensee until specifically authorized in writing by the FCC to destroy them. Logs incident to or involved in any claim or complaint of which the licensee has notice shall be retained by the licensee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for filing of suits upon such claims.

100. New § 73.1850 is added to Part 73, Subpart H, to read as follows:

§ 73.1850 Public inspection of program logs.

(a) The station program logs shall be made available for public inspection and reproduction at a location convient and accessible to the residents of the community to which the station is licensed. All such requests for inspection shall be subject to the procedural requirements in paragraph (b) of this section. Where good cause exists, the licensee may refuse to permit such inspection. (See paragraph 64, the Public and Broadcasting Procedural Manual.) The licensee shall remain responsible for the safekeeping of the logs when permitting inspections.

(b) The following procedural requirements apply to requests for inspection:

(1) Parties wishing to inspect shall make a prior appointment with the licensee and at that time identify themselves by name and address; identify the organization they represent, if any; and state the general purpose of the examinaion.

(2) Inspection of the logs shall take place at the station or at any other convenient and accessible location specified by the licensee. At its option the licensee may make an exact copy available in lieu of the original program logs.

(3) Copies of logs shall be available provided the inspecting party pays the reasonable cost of reproduction.

(4) An inspecting party shall have a reasonable time to examine the program logs. If examination is requested beyond a reasonable time, the licensee may condition such further inspection upon the inspecting party's willingness to either duplicate such logs at the examiner's expense, or reimburse the licensee for whatever reasonable expense is incurred if supervision is deemed necessary.

(5) No log need be made available for public inspection until 45 days have elapsed from the day covered by the log in question.

(6) In cases where the logging system used does not provide for a written program log, the licensee shall retain, subject to the above provisions, either copies of the station's pre-logs (operating schedules), which have been updated and certified correct, or recordation produced by an automatic maintenance of logging data device (i.e., tapes or encoded printouts). See § 73.1810 (Program logs).

101. New § 73.1910 is added to Subpart H, Part 73, to read as follows:

§ 73.1910 Fairness Doctrine.

The Fairness Doctrine is contained in section 315(a) of the Communications Act of 1934, as amended, which provides that broadcasters have certain obligations to afford reasonable opportunity for the discussion of conflicting views on issues of public importance. See FCC public notice "Fairness Doctrine and the Public Interest Standards," 39 FR 26372. Copies may be obtained from the FCC upon request.

102. New § 73.1920 is added to Subpart H, Part 73, to read as follows:

§ 73.1920 Personal attacks.

(a) When, during the presentation of views on a controversial issue of public importance, an attack is made upon the honesty, character, integrity or like personal qualities of an identified person or group, the licensee shall, within a reasonable time and in no event later than one week after the attack, transmit to the persons or group attacked:

(1) Notification of the date, time and identification of the broadcast;

(2) A script or tape (or an accurate summary if a script or tape is not available) of the attack; and

(3) An offer of a reasonable opportunity to respond over the licensee's facilities.

(b) The provisions of paragraph (a) of this section shall not be applicable:

(1) To attacks on foreign groups or foreign public figures;

(2) To personal attacks which are made by legally qualified candidates, their authorized spokesmen, or those associated with them in the campaign on other such candidates, their authorized spokesmen or persons associated with the candidates in the campaign; and

(3) To bona fide newscasts, bona fide news interviews, and on-the-spot coverage of a bona fide news event, including commentary or analysis contained in the foregoing programs.

(c) The provisions of paragraph (a) of this section shall be applicable to editorials of the licensee, except in the case of noncommercial educational stations since they are precluded from editorializing (section 399(a), Communications Act).

103. New § 73.1930 is added to subpart H, part 73, to read as follows:

§ 73.1930 Political editorials.

(a) Where a licensee, in an editorial, (1) endorses or (2) opposes a legally qualified candidate or candidates, the licensee shall, within 24 hours after the editorial, transmit to, respectively, (i) the other qualified candidate or candidates for the same office or (ii) the candidate opposed in the editorial, (A) notification of the date and the time of the editorial, (B) a script or tape of the editorial and (C) an offer of a reasonable opportunity for the candidate or a spokesman of the candidate to respond over the licensee's facilities. Where such editorials are broadcast within 72 hours prior to the day of the election, the licensee shall comply with the provisions of this paragraph sufficiently far in advance of the broadcast to enable the candidate or candidates to have a reasonable opportunity to prepare a response and to present it in a timely fashion.

(b) Inasmuch as noncommercial educational stations may not engage in editorializing nor may support nor oppose any candidate for political office (section 399(a), Communications Act), the provisions of paragraph (a) of this section, do not apply to such stations.

104. Section 73.1940 is amended by adding new paragraphs (g) and (h) to read as follows:

§ 73.1940 Broadcasts for candidates for public office.

* * * * * * *

(g) *General requirements.* (1) Except as otherwise indicated in paragraph (g)(2) of this section, no station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other candidates for that office to use such facilities. Such licensee shall have no power of censorship over the material broadcast by any such candidate. Appearance by a legally qualified candidate on any (i) bona fide newscast, (ii) bona fide interview, (iii) bona fide documentary (if the appearance of the candidate is incidental to the presentation of the subject covered by the news documentary), or (iv) on-the-spot coverage of bona fide news events (including, but not limited to political conventions and activities incidental thereto) shall not be deemed to be use of a broadcasting station. (Section 315(a) of the Communications Act.)

(2) Section 312(a)(7) of the Communications Act provides that the Commission may revoke any station license or construction permit for willful or repeated failure to allow reasonable access to, or to permit purchase of, reasonable amounts of time for the use of a broadcasting station by a legally qualified candidate for Federal elective office on behalf of his candidacy.

(h) *Political broadcasting primer.* A detailed study of these rules regarding broadcasts by candidates for Federal and non-Federal public office is available in the FCC public notice of July 20, 1978, "The Law of Political Broadcasting and Cablecasting." Copies may be obtained from the FCC upon request.

APPENDIX B

1. Part 73 is amended with the following revised "Alphabetical Index of Rules Titles—Part 73." This index contains all rule revisions adopted in Reregulation Order FCC 78-681, mimeo: 4013.

ALPHABETICAL INDEX OF RULES TITLES—PART 73

SUBPART A—AM BROADCAST STATIONS

Acceptability of broadcast transmitters for licensing 73.48
Agreements, International broadcasting 73.1650
Alarm and monitoring points, Automatic transmission system 73.146
Allocation, Engineering standards of 73.183
Allocation, Field intensity measurements in; establishment of effective field at one mile 73.186
AM broadcast band (definition) 73.2
Alternate main transmitters 73.64
AM broadcast channel (definition) 73.3
AM broadcast station (definition) 73.1
(AM technical standards), Introduction 73.181
Ammeters, antenna and common point, Remote reading 73.57
Antenna, directional, Field intensity measurements to establish performance of 73.151
Antenna heights, Minimum, or field intensity requirements 73.189
Antenna input power; how determined 73.51
Antenna input power; maintenance of 73.52
Antenna monitors, Requirments for type approval of 73.53
Antenna monitors 73.69
Antenna monitors, Sampling system for 73.68
Antenna resistance and reactance; how determined 73.54
Antenna structure, marking and lighting 73.1213
Antenna systems 73.45
Antenna system and equipment, Changes in 73.43
Antenna systems, Directional 73.150
Antenna systems; showing required 73.33
Applications for broadcast facilities, showing required 73.37
Approval of modulation monitors, Requirements for 73.50
Areas, Service (definition) 73.11
Assignment of Class II-A stations 73.22
Assignment of stations to channels 73.28
Attacks, Personal 73.1920
Audio recordings, Retention of 73.127
Authority, Presunrise service 73.1735
Authority to move main studio 73.31
Authorization, Special field test 73.36
Authorizations, Experimental 73.1510
Authorizations, Remote control 73.66
Automatic transmission system facilities 73.142
Automatic transmission system monitoring and alarm points 73.146
Automatic transmission systems, Fail-safe transmitter control for 73.144
Automatic transmission systems (ATS), Use of 73.140
Auxiliary transmitters 73.63
Auxiliary transmitters, Use of modulation monitors at 73.69
Availability to FCC of station logs and records 73.1226
Billing practices, Fraudulent 73.1205
Blanketing interference 73.88
Broadcasting agreements, International 73.1650
Broadcast band, AM (definition) 73.2
Broadcast channel, AM (definition) 73.3
Broadcast day (definition) 73.1700
Broadcast facilities; showing required 73.24
Broadcast facilities, showing required for applications 73.37
Broadcast of lottery information 73.1211
Broadcast of taped, filmed or recorded material 73.1208
Broadcast of telephone conversation 73.1206
Broadcast station, AM (definition) 73.1
Broadcast transmitters, Acceptability for licensing 73.48
Broadcasting emergency information 73.1250
Broadcasts by candidates for public office 73.1940
Candidates for public office, Broadcast by 73.1940
Carrier frequency measurements 73.1540
Carrier power; Maximum rated, how determined 73.42
Carrier power; Maximum rated, tolerances 73.41
Changes in equipment and antenna system 73.43
Channel, AM broadcast (definition) 73.3
Channels and stations, Classes of AM broadcast 73.21
Channels, Assignment of stations to 73.28
Charts, Engineering 73.190
Charts, Groundwave field intensity 73.184
Class II-A stations, Assignment of 73.22
Class IV stations, Local channels 73.27
Class IV stations on regional channels 73.29
Classes of AM broadcast channels and stations 73.21
Classes I and II stations, Clear channels; 73.25
Classes III-A and III-B stations, Regional channels 73.26
Clear channels; Classes I and II stations 73.25
Common point, and antenna ammeters, Remote reading 73.57
Computation of interfering signal 73.185
Construction, design, and safety of life requirements, Transmitter 73.40
Control, transmitter, Fail-safe, for automatic transmission systems 73.144
Critical hours (definition) 73.13
Cross reference to rules in other Parts 73.1010
Day, Broadcast (definition) 73.1700
Daytime (definition) 73.1720
Daytime radiation, Limitation on 73.187
Definitions, Technical 73.14
Design, construction and safety of life requirement, Transmitter 73.40
Directional antennas, Field strength measurements to establish performance of 73.151
Directional antenna data, Modification of 73.152
Directional antenna systems 73.150
Discontinuance of operation 73.1750
Doctrine, Fairness 73.1910
Dominant station (definition) 73.4
EBS (Emergency Broadcast System) ..... (1)
Editorials, political 73.1930
Effective field at one mile, Field intensity measurements for establishment of 73.186
Emergency Broadcast System (EBS) ..... (1)
Emergency information, Broadcasting 73.1250
Employment opportunities, Equal 73.125
Engineering charts 73.190
Engineering standards of allocation 73.182
Equal employment opportunities 73.125
Equipment and antenna system, Change in 73.43
Equipment performance measurements 73.47
Equipment tests 73.1610
Exclusivity, Territorial (Network) 73.132
Experimental authorizations 73.1510
Experimental period (definition) 73.10
Experimental period, Operating during the 73.72
Extension meters 73.1560
Facilities, Automatic transmission system 73.142
Facilities, Broadcast; showing required 73.24
Fail-safe transmitter control for automatic transmission systems 73.144
Fairness Doctrine 73.1910
FCC, Station inspections by 73.1235
Field intensity charts, Groundwave 73.184
Field intensity measurements in allocations; establishment of effective field at one mile 73.186
Field intensity measurements in support of applications or evidence at hearing 73.153
Field intensity measurements: partial and skeleton proofs of performance 73.154
Field intensity requirements or, Minimum antenna heights 73.189
Field strength measurements to establish performance of directional antennas 73.151
Field test authorization, Special 73.36
File, Political 73.1940
Filmed, taped, or recorded material, Broadcast of 73.1208
Fraudulent billing practices 73.1205
Frequency measurement, Carrier 73.1540
Frequency tolerance 73.59
General requirements relating to logs 73.1800
Groundwave field intensity charts 73.184
Groundwave signals 73.183
Hours, Critical 73.13
Hours, Specified 73.1730
Identification, Sponsorship; list retention; related requirements 73.1212
Identification, Station 73.1201
Indicating instruments (requirements for) 73.58
Indicating instruments—specifications 73.1215
Information, Broadcasting emergency 73.1250
Input power, Antenna; how determined 73.51
Input power, Antenna; Maintenance of 73.52
Inspection of program logs, Public 73.1850
Inspections, Station, by FCC 73.1225
Instruments, Indicating (requirements for) 73.58
Instruments, Indicating—specifications 73.1215
Interference, Blanketing 73.88
Interference to Astronomy, Research and Receiving installations, Notifications concerning 73.1030
Interfering signal, Computations of 73.185
International broadcasting agreements 73.1650
Introduction (AM technical standards) 73.181
License period, Station 73.1020
Licensee-conducted contests 73.1216
Licensee obligations, Public notice of 73.1202
Licenses, station and operator, Posting of 73.1250
Licensing, Acceptability of broadcast transmitter for 73.48
Lighting and marking, Antenna structure 73.1213
Limitation on daytime radiation 73.187
Limited time 73.1725
List retention; Sponsorship indentification related requirements 73.1212
Local channel; Class IV stations 73.27
Location of transmitter 73.188
Logs and records, Availability to FCC 73.1226
Logs, Maintenance 73.1830
Logs, Operating 73.1820
Logs, Program 73.1810
Logs, General requirements relating to 73.1800
Logs, program, Public inspection of 73.1850
Logs, Retention of 73.1840
Lottery information, Broadcast of 73.1211
Marking and Lighting, Antenna structure 73.1213
Main studio, Authority to move 73.31
Main transmitters, Alternate 73.64
Maintenance and tests, Operation for 73.1520
Maintenance logs 73.1830
Maintenance of antenna input power 73.52

V 43 / 193
OCT 4 1978

ALPHABETICAL INDEX OF RULES TITLES—PART 73—Continued

Maximum rated carrier power; how determined 73.42
Maximum rated carrier power; tolerances 73.41
Measurements, Equipment performance. 73.47
Measurements, Field intensity, for establishment of effective field at one mile 73.186
Measurements, Carrier frequency 73.1540
Measurements, Field intensity in support of applications of evidence at hearings 73.153
Measurements, Field intensity, skeleton and partial proofs of performance 73.154
Measurements, Field strength, to establish performance of directional antennas 73.151
Meters, Extension 73.1550
Minimum antenna heights or field intensity requirements 73.189
Minimum operating schedule 73.1740
Modes and times of program transmission 73.87
Modification of directional antenna data 73.152
Modulation 73.55
Modulation monitors 73.56
Modulation monitors, Requirements for type approval of 73.50
Modulation monitors, Use of at auxiliary transmitters 73.89
Monitoring and alarm points, Automatic transmission system 73.146
Monitors, Antenna 73.69
Monitors, antenna, Requirements for type approval of 73.53
Monitors, antenna, Sampling system for. 73.68
Monitors, Modulation 73.60
Monitors, modulation, Requirements for type approval of 73.50
Monitors, modulation, Use of at auxiliary transmitters 73.89
Move main studio, Authority to 73.31
Multiple ownership 73.35

(Network), Territorial exclusivity 73.132
Nighttime (definition) 73.7
Notice, Public, of licensee obligations 73.1202
Notifications concerning interference to Radio Astronomy, Research and Receiving installations 73.1030

Operating during the experimental period 73.72
Operating logs 73.1820
Operation, Discontinuance of 73.1750
Operation for tests and maintenance 73.1520
Operation, Time of 73.1705
Operation, Remote Control 73.67
Operation, Unauthorized 73.1745
Operating schedule, Minimum 73.1740
(Operation), Specified hours 73.73
Operator and station licenses, Posting of 73.1250
Operator requirements 73.93
Origination, program, and Station location 73.30
Ownership, Multiple 73.35

Partial and skeleton proofs of performance, Field intensity measurements 73.154
Performance measurements, Equipment. 73.47
Performance of directional antennas, Field strength measurements to establish 73.151
Personal attacks 73.1920
Political editorials 73.1930
Political file 73.1940
Portable test stations 73.1530
Posting of station and operator licenses.. 73.1250
Power, Antenna input; how determined .. 73.51
Power, Antenna input; maintenance of ... 73.52
Presunrise service authority 73.1735
Program logs 73.1810
Program logs, Public inspection of 73.1850
Program origination, Station location 73.30
Program tests 73.1620
Program transmission, Times and modes of 73.67
Proofs of performance, partial and skeleton, Field intensity measurements 73.154
Public inspection of program logs 73.1850
Public office, Broadcasts by candidates for 73.1940

ALPHABETICAL INDEX OF RULES TITLES—PART 73—Continued

Radiation, daytime, Limitation on 73.187
Rebroadcast 73.1207
Recorded, taped or filmed material; Broadcast of 73.1208
Recordings, audio, Retention of 73.127
Records and logs, Availability to FCC 73.1226
Reference, Cross, to rules in other Parts. 73.1010
References to time (local) 73.83
Regional channels; Classes III-A and III-B stations 73.26
Regional channels, Class IV stations on .. 73.29
Remote control authorizations 73.66
Remote control operation 73.67
Remote reading antenna and common point ammeters 73.57
Requirements for type approval of modulation monitors 73.50
Requirements for type approval of antenna monitors 73.53
Requirements, relating to logs, General .. 73.1800
Requirements, Operator 73.93
Reservation of time upon sale of a station, Special rules relating to contracts providing for 73.139
Retention of audio recordings 73.127
Retention of logs 73.1840
(Rules common to all broadcast stations), Scope 73.1001
Rules in other Parts, Cross reference to.. 73.1010

Safety of life, design, construction requirements, Transmitter 73.40
Sale of station, Special rules relating to contracts providing for reservation of time 73.139
Sampling systems for antenna monitors . 73.68
Schedule, Minimum operating 73.1740
Scope (rules common to all broadcast stations) 73.1001
Secondary station (definition) 73.5
Service areas (definition) 73.11
Share time 73.1715
Showing required; Applications for broadcast facilities 73.37
Showing required; Antenna system 73.33
Signal, interfering, Computation of 73.185
Signal, Groundwave 73.183
Skeleton and partial proofs of performance, Field intensity measurements 73.154
Special field test authorization 73.36
Special rules relating to contracts providing for reservation of time upon sale of a station 73.139
Specifications—Indicating instruments ... 73.1215
Specified hours 73.1730
Sponsorship identification; list retention; related requirements 73.1212
Standards of allocation, Engineering 73.182
Station and operator licenses, Posting of 73.1230
Station, Dominant (definition) 73.4
Station identification 73.1201
Station inspections by FCC 73.1225
Station license period 73.1020
Station location and program origination 73.30
Stations and channels, standard broadcast, Classes of 73.21
Stations, Assignment of, to channels 73.28
Studio, main, Authority to move 73.31
Sunrise and sunset (definition) 73.8
Taped, filmed, or recorded material; Broadcast of 73.1208

Technical definitions 73.14
(Technical Standards, AM broadcast), Introduction 73.181
Telephone conversations, Broadcast of ... 73.1206
Territorial exclusivity (Network) 73.132
Test authorization, Special field 73.36
Test Stations, Portable 73.1530
Tests and maintenance, Operation for 73.1520
Tests, Equipment 73.1610
Tests, Program 73.1620
Time, Limited 73.1725
Time of operation 73.1705
Time, Reference to (local) 73.83
Time, Share 73.1715
Time, Special rules providing for reservation of, upon sale of a station 73.139
Time, Unlimited 73.1710

ALPHABETICAL INDEX OF RULES TITLES—PART 73—Continued

Times and modes of program transmission 73.87
Tolerance, Frequency 73.59
Tolerances, Maximum rated carrier power 73.41
Transmission, program, Times and modes of 73.87
Transmission system, Automatic, monitoring and alarm points 73.146
Transmission system facilities, Automatic 73.142
Transmission systems, automatic, Fail-safe transmitter control for 73.144
Transmission systems, automatic (ATS), Use of 73.140
Transmitter (standards of engineering practice) 73.46
Transmitter control, Fail-safe, for automatic transmission system 73.144
Transmitter; design, construction, and safety of life requirements 73.40
Transmitter, Location of 73.188
Transmitters, Alternate main 73.64
Transmitters, Auxiliary 73.63
Transmitters, auxiliary, Use of modulation monitor at 73.89
Type approval of antenna monitors, Requirements for 73.53
Type approval of modulation monitors, Requirements for 73.50
Unauthorized operation 73.1745
Unlimited time 73.1710
Use of automatic transmission systems (ATS) 73.140
Use of modulation monitors at auxiliary transmitters 73.89

SUBPART B—COMMERCIAL FM BROADCAST STATIONS

Acceptability of broadcast transmitters for licensing 73.360
Adjacent channel and co-channel stations, Minimum mileage, separation between 73.207
Administrative changes in authorizations 73.212
Agreements, International broadcasting . 73.1650
Alarm and monitoring points, Automatic transmission system 73.346
Alternate main transmitters 73.256
AM and FM programing, Duplication of . 73.242
Antenna height and Power, requirements 73.211
Antenna site, Use of common 73.239
Antenna structure, marking and lighting 73.1213
Antenna system and equipment, Changes in 73.257
Antenna systems 73.316
Antennas, Emergency 73.273
Assignments, Table of 73.202
Attacks, Personal 73.1920
Authorizations, Remote control 73.274
Authorizations, Special field test 73.278
Authorizations, Administrative changes in 73.212
Authorizations, Experimental 73.1510
Authorizations, Subsidiary Communications (SCA) 73.293
Authorizations, subsidiary Communications, Operation under 73.295
Automatic tranamission system facilities 73.342
Automatic transmission system monitoring and alarm points 73.346
Automatic transmission systems, Fail-safe transmitter control for 73.344
Automatic transmission systems (ATS), Use of 73.340
Auxiliary transmitters 73.255
Auxiliary transmitters, Use of modulation monitors at 73.330
Auxiliary transmitters (Performance characteristics) 73.321
Availability of channels 73.203
Availability to FCC of station logs and records 73.1226

Billing practices, Fraudulent 73.1205
Broadcast day (definition) 73.1700
Broadcast of lottery information 73.1211
Broadcast of taped, filmed, or recorded material 73.1208

SUBPART B—COMMERCIAL FM BROADCAST STATIONS—Continued

Broadcast of telephone conversations 73.1206
Broadcast transmitters, Acceptability for licensing 73.250
Broadcasting agreements, International . 73.1650
Broadcasting emergency information 73.1250
Broadcasting, Stereophonic 73.297
Broadcasts by candidates for public office 73.1940

Broadcasts for public office, Broadcasts by 73.1940
Carrier frequency measurements 73.1540
Changes in authorizations, Administrative 73.212
Changes in equipment and antenna system 73.257
Channels, Availability of 73.203
Channels, Classes of commercial, and stations operating thereon 73.206
Channels, FM broadcast, Numerical designation of 73.201
Channels, Restrictions on use of 73.220
Charts, Engineering 73.333
Classes of commercial channels, and stations operating thereon 73.206
Co-channel and adjacent channel stations, Minimum separation 73.207
Common antenna site, Use of 73.239
Computations, Reference points and distance 73.208
Contests, Licensee-conducted 73.1216
Contours, Field strength 73.311
Contracts for reservation of time upon sale of a station, Special rules relating to 73.241
Control, transmitter, Fail-safe, for automatic transmission systems 73.344
Coverage, Prediction of 73.313
Cross reference to rules in other Parts 73.1010

Day, Broadcast (definition) 73.1700
Definitions (technical) 73.310
Determination and maintenance of operating power 73.267
Discontinuance of operation 73.1750
Distance and Reference points, computations of 73.208
Doctrine, Fairness 73.1910
Dual-language broadcasting in Puerto Rico, TV/FM 73.1210
Duplication of AM and FM programming 73.242

EBS (Emergency Broadcasting System) .. (*)
Editorials, political 73.1930
Emergency antennas 73.273
Emergency information, Broadcasting 73.1250
Emergency Broadcast System (EBS) ..... (*)
Employment opportunities, Equal 73.301
Engineering charts 73.333
Engineering standards, Subsidiary communications multiplex operations 73.319
Equal employment opportunities 73.301
Equipment and antenna system, Changes in 73.257
Equipment performance measurements .. 73.254
Equipment tests 73.1610
Equipment, Transmitters associated 73.317
Exclusivity, Territorial (Network) 73.232
Experimental authorizations 73.1510
Extension meters 73.1550

Facilities, Automatic transmission system 73.342
Fail-safe transmitter control for automatic transmission systems 73.344
Fairness Doctrine 73.1910
FCC, Station inspections by 73.1225
Field test authorization, Special 73.278
Field strength contours 73.311
Field strength measurements 73.314
File, Political 73.1940
Filmed, taped, or recorded material; Broadcast of 73.1208
FM and AM programming, Duplication of 73.242
FM broadcast channels, Numerical designation of 73.201
FM/TV dual-language broadcasting in Puerto Rico 73.1210
Fraudulent billing practices 73.1205
Frequency measurements, Carrier 73.1540
Frequency tolerance 73.269

SUBPART B—COMMERCIAL FM BROADCAST STATIONS—Continued

General requirements relating to logs 73.1810

Identification, Sponsorship; list retention; related requirements 73.1212
Identification, Station 73.1201
Indicating instruments (requirements for) 73.258
Indicating instruments—specifications ... 73.1215
Information, Broadcasting emergency 73.1250
Inspection of program logs, Public 73.1850
Inspections, Station, by FCC 73.1225
Instruments, Indicating (requirements for) 73.258
Instruments, Indicating—specifications... 73.1215
Interference, Protection from 73.209
Interference to Astronomy, Research and Receiving installations, Notifications concerning 73.1030
International broadcasting agreements ... 73.1650

License period, Station 73.1020
Licensee-conducted contests 73.1216
Licensee obligations, Public notice of..... 73.1202
Licenses, station and operator, Posting of 73.1230
Licensing, Acceptability of broadcast transmitters for 73.250
Lighting and marking, Antenna structure 73.1213
List retention; Sponsorship identification; related requirements 73.1212
Location, Station, main studio, and program origination 73.210
Location, Transmitter 73.315
Logs and records, Availability to FCC..... 73.1226
Logs, Maintenance 73.1830
Logs, Operating 73.1820
Logs, Program 73.1810
Logs, General requirements relating to ... 73.1800
Logs, program, Public inspection of 73.1850
Logs, Retention of 73.1840
Lottery information, Broadcast of 73.1211

Main studio location, Station location and program origination 73.210
Main transmitters, Alternate 73.256
Maintenance and determination, Operating power 73.267
Maintenance and tests, Operation for 73.1520
Maintenance logs 73.1830
Main tansmitters, Alternate 73.256
Marking and lighting, Antenna structure 73.1213
Measurements, Carrier frequency 73.1540
Measurements, Equipment performance. 73.254
Measurements, Field strength 73.314
Meters, Extension 73.1550
Minimum mileage separations between co-channel and adjacent channel stations on commercial channels 73.207
Minimum operating schedule 73.1740
Minimum separation, Stations at spacings below 73.213
Modulation 73.268
Modulation monitors 73.253
Modulation monitors, Requirements for type approval 73.332
Modulation monitors, Use of at auxiliary transmitters 73.330
Monitoring and alarm points, Automatic transmission system 73.346
Monitors, Modulation 73.253
Monitors, modulation, Requirements for type approval 73.332
Monitors, modulation, Use of at auxiliary transmitters 73.330
Multiple ownership 73.240
Multiplex operations, Subsidiary communications, engineering standards 73.319

Nature of the SCA (Subsidiary Communications Authorizations) 73.294
(Network), Territorial exclusivity 73.232
Notice, Public, of licensee obligations 73.1202
Notifications concerning interference to Radio Astronomy, Research and Receiving installations 73.1030
Numerical designation of FM broadcast channels 73.201

Operating logs 73.1820
Operating power; determination and maintenance of 73.267
Operating schedule, Minimum 73.1740
Operation, Discontinuance of 73.1750
Operation for tests and maintenance 73.1520
Operation, Remote control 73.275
Operation, Time of 73.1705
Operation, Unauthorized 73.1745
Operation Under Subsidiary Communications Authority, (SCA) 73.295
Operator and station licenses, Posting of 73.1230
Operator requirements 73.265
Origination, program, Station location, and main studio location 73.210
Ownership, Multiple 73.240

Performance measurements, Equipment. 73.254
Permissible transmissions 73.277
Personal attacks 73.1920
Political editorials 73.1930
Political file 73.1940
Portable test stations 73.1530
Posting of station and operator licenses.. 73.1225
Power and antenna height requirements 73.211
Power, Operating, determination and maintenance of 73.267
Prediction of coverage 73.313
Program logs 73.1810
Program logs, Public inspection of 73.1850
Program origination, Station location, main studio location 73.210
Program Tests 73.1620
Programming, Duplication of AM and FM 73.242
Protection from interference 73.209
Public inspection of program logs 73.1850
Public notice of licensee obligations 73.1202
Public office, Broadcast by candidates for 73.1940
Puerto Rico TV/FM, dual-language broadcasting in 73.1210

Rebroadcast 73.1207
Recorded, taped, filmed material; Broadcast of 73.1208
Records and logs, Availability to FCC 73.1226
Reference, Cross, to rules in other Parts. 73.1010
Reference points and distance computations 73.208
Remote control authorizations 73.274
Remote control operation 73.275
Required transmitter performance 73.254
Requirements for type approval of modulations monitors 73.332

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Second Rev. S. O. No. 1332]

PART 1033—CAR SERVICE

Railroad Operating Regulations for Freight Car Movement

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Second Revised Service Order No. 1332.

SUMMARY: There are severe shortages of freight cars throughout the country. Revised Service Order No. 1332 requires all railroads to place, remove, forward, weigh, clean, or repair cars within 60 hours in order to expedite the handling of freight cars and to increase their availability for reloading. Gondola cars, flatcars, and boxcars with mechanical designations LC and LU are removed from the order. The expiration date of the

V 43 / 193

order is extended until November 30, 1978.

DATES: Effective 11:59 p.m., September 30, 1978. Expires 11:59 p.m., November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: September 27, 1978.

There are acute shortages of freight cars throughout the country resulting in failures of carriers to furnish an adequate supply of freight cars to shippers located on their lines. These shortages of freight cars are impeding both the domestic and export movements of agricultural, mineral, forest, and manufactured products, and other commodities. The existing car service rules, regulations, and practices of the railroads are ineffective with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of freight cars to meet the requirements of shippers. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1332 Second Revised Service Order No. 1332.

(a) *Railroad operating regulations for freight car movement.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Application.* (i) The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(ii) This order shall apply to all freight cars which are listed in the Official Railway Equipment Register, ICC-RER No. 408, issued by W. J. Trezise, or successive issues thereof, as having one of the mechanical designations shown on page 1167-1169 under the headings: "Class 'X'—Box Car Type," "Class 'H'—Hopper Car Type," and those special type cars described under the heading "Class 'L'—Special Car Type" which bear mechanical designation "LO"—Covered Hopper Car.

(iii) *Exception.* Empty cars owned by the Alaska Railroad, while held in the State of Washington, pursuant to instructions of the carowner, are exempt from the provisions of this order.

(iv) *Exception.* Empty cars of private ownership reported and awaiting instructions from the carowner, are exempt from the provisions of this order.

(v) *Exception.* To alleviate hardships or inequities, including, but not limited to those caused by extreme weather disruptions, exceptions to this order may be authorized to the carrier by the Railroad Service Board, Interstate Commerce Commission, Washington, D.C. Requests for such exceptions may be made only by carriers and shall be sent to Joel E. Burns, Chairman, Railroad Service Board, Interstate Commerce Commission, Washington, D.C. 20423, with a copy to W. H. Van Slyke, Chairman, Car Service Division, Association of American Railroads, Washington, D.C. 20036.

(vi) *Exception.* Cars held less than 7 days because daily train or switching service required for movement from point where held is not scheduled, are exempt from the provisions of this order.

(vii) Actual placement means placing a car in an accessible position for loading or unloading, or placing on an industrial interchange track serving the consignor or consignee. If such placing is prevented by any cause attributable to consignor or consignee and car is placed on the private or other-than-public-delivery tracks serving the consignor or consignee, it shall be considered constructively placed without notice.

(viii) Holidays shall be those listed in item 525 of Agent D. M. Rogers' Tariff 4-K, ICC H-74, General Car Demurrage Rules and Charges, supplements thereto, or successive issues thereof.

(ix) *Definitions.* System cars are cars bearing the registered reporting marks of the railroad holding the cars, including any railroad identified as a component part of a system of railroads as defined in the list of "Home Roads" published on page 1112 of the Official Railway Equipment Register, ICC-RER No. 408, issued by W. J. Trezise, or successive issues thereof. Foreign cars are cars bearing the registered reporting marks of a railroad other than the one holding the cars neither of which is listed in the list of "Home Roads" as being a part of the same system. Private cars are cars bearing the registered reporting marks of a company or person other than a railroad.

(x) *Records required.* Carriers shall maintain a written record showing for each car the actual date and time of arrival, forwarding placement, notice, release, removal, designation for repairs, cleaning or weighing, and completion of repairs, cleaning, or weighing. It is not intended that carriers make and maintain duplicative records in order to comply with this section. Compliance can be made by augmenting existing records so that they contain all of the required information, but such records shall be maintained at the yard or station where such cars are held, or if held at a nonagency station, at the station responsible for such nonagency station.

(2) *Placing of cars.* (i) Loaded cars other than cars requiring notice of constructive placement, shall be placed within 60 hours, exclusive of Saturdays, Sundays, and holidays, following arrival at destination, or after arrival at the yard from which cars are dispatched for actual placement.

(ii) Empty foreign and private cars, other than cars requiring notice of constructive placement, which after placement will be subject to demurrage, storage, or detention rules applicable to cars for loading, shall be placed within 60 hours, exclusive of Saturdays, Sundays, and holidays, after arrival at the point where held.

(iii) When delivery of a car, either empty or loaded, consigned or ordered to an industrial interchange track or to an other-than-public-delivery track, cannot be made because of any condition attributable to consignor or consignee, such car shall be held at destination or, if it cannot reasonably be accommodated there, at an available hold point; and constructive placement notice shall be sent or given the consignor or consignee within 24 hours, exclusive of Saturdays, Sundays, and holidays, after arrival of car at destination or hold point.

(iv) Proper notice for cars placed on public delivery tracks shall be sent or given within 24 hours after placement, exclusive of Saturdays, Sundays, and holidays.

(v) Cars held at destination for accessorial terminal services described in the applicable tariffs, such as holding for orders or inspection, and cars subject to storage rules applicable to assigned cars, shall be placed on hold, or inspection, tracks; and proper notice shall be given within 24 hours, exclusive of Saturdays, Sundays, and holidays, after arrival of car at destination or at hold point. Time and charges shall be computed following such notice and demurrage, detention or storage charges assessed in accordance with provisions of governing tariffs.

(3) *Removal of cars.* (i) Empty cars must be removed from point of unloading or interchange tracks of industrial plants within 60 hours, exclusive of Sundays and holidays, following unloading or release by consignee or shipper, unless such empty cars are ordered or appropriated by the shipper for reloading within such 60-hour period. Empty foreign or private cars not ordered for loading at point where made empty must be forwarded or set aside to be cleaned, repaired, or weighed, if to be weighed at that point, within 60 hours following removal of empty cars. Empty system cars not required for loading may be held on carrier tracks at any point on the lines of the carowner, after completion of any light repairs, cleaning or weighing that may be required. (See pt. (5) of this section.)

(ii) Outbound loaded freight cars must be removed from point of loading or interchange tracks of industrial plants within 60 hours, exclusive of Sundays and holidays, following acceptance by carrier of the shipper instructions covering the cars.

(iii) Cars subject to parts (i) and (ii) of this section, not made accessible to the carrier, shall be subject to demurrage until such time as they become, and remain, accessible to the carrier.

(iv) Cars shall not be removed from point of unloading or from industrial interchange tracks, nor released from demurrage or detention status, until all bracing, blocking, dunnage, paper, residue of lading, debris, and other foreign matter directly related to the inbound load have been removed from the car in accordance with the requirements of rules 14 and 27 of the Uniform Freight Classification, ICC 9, issued by G. F. Earl, supplements thereto, or reissues thereof.

Exception. Dunnage being returned to shipper under provisions of the applicable tariffs may be left in cars released as empty: *Provided,* That proper shipper instructions are received by the carrier prior to 5 p.m., of the first day which is not a Saturday, Sunday, or holiday, immediately following release of the car.

(4) *Forwarding of cars.* (i) Loaded cars and empty foreign or private cars shall be forwarded within 60 hours, except cars described in parts (ii) or (iii) of this section, or cars described in part (ii) of section (2).

(ii) *Exception.* Loaded cars held subject to instructions of consignee, consignor, or other qualified owner of the freight contained therein, while subject to applicable tariffs.

(iii) *Exception.* Cars held for repairs, weighing, or cleaning. (See sec. (5).)

(5) *Cars held for repairs, weighing, or cleaning.* (i) Cars of system, foreign, or private ownership which are held for light repairs or cleaning shall be placed on repair or cleaning tracks within 60 hours after time carded for repairs or cleaning. Light repairs or cleaning shall be accomplished within 24 hours, exclusive of Sundays and holidays, after placement on repair or cleaning tracks; except that when necessary to order material from car owner to make the repairs to foreign or private cars held awaiting such material, repairs shall be completed within 24 hours, exclusive of Sundays and holidays, after receipt of such material at the station at which the repair point is located.

(ii) Light repairs are defined as repairs requiring less than 20 man-hours by repair track forces to complete.

(iii) Cars which must be weighed shall be weighed and restenciled, if required, within 60 hours, exclusive of Sundays and holidays, after it becomes available for weighing at the point at which weighing is to be accomplished.

(iv) Cars which have been repaired, cleaned, or weighed shall become subject to sections 2, 3, or 4, as applicable, from the date such repairs, cleaning, or weighing have been accomplished.

(6) *Movement of freight cars.* (i) No common carrier by railroad subject to the Interstate Commerce Act shall delay the movement of cars by holding such cars in yards, terminals, or sidings for the purpose of increasing the time in transit of such cars.

(ii) Backhauling cars for the purpose of increasing the time in transit is prohibited.

(iii) Through cars shall not be handled on local or way freight trains for the purpose of increasing the time in transit of such cars.

(iv) The use by any common carrier by railroad, or the acceptance of instructions from the shipper, for the movement of cars over its line via any route other than its shortest available route or its usual and customary fast freight route from point of receipt of the car from consignor, or connecting line, to point of delivery to consignee, or to next connecting line, except for the purpose of according a lawfully established transit privilege (not including a diversion or reconsignment privilege) is hereby prohibited.

(7) *Force majeure defence protected.* Nothing in this order shall deny any carrier its defense of force majeure as construed by the courts.

(b) *Rules and regulations suspended.* The operation of all rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.

(c) *Effective date.* This order shall become effective at 11:59 p.m., September 30, 1978.

(d) *Expiration date.* This order shall expire at 11:59 p.m., November 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission:

(49 U.S.C. 1(10-17).)

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission. Commissioners O'Neal, Christian, Brown, Stafford, Gresham, and Clapp.

NANCY L. WILSON,
Acting Secretary.

[Amdt. No. 1 to service order No. 1324]

PART 1033—CAR SERVICE

Chicago, Rock Island & Pacific Railroad Co. Authorized to Operate Over Tracks of Burlington Northern Inc.

Decided: September 27, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order amendment No. 1 to service order No. 1324.

SUMMARY: The line of the Chicago, Rock Island & Pacific Railroad between Eldon, Iowa, and Keokuk, Iowa has become inoperable because of track conditions. An alternative route between Keokuk and other stations on the Chicago, Rock Island & Pacific exists by use of the tracks of the Burlington Northern between Keokuk and Burlington, Iowa. Service order No. 1324 authorizes the Chicago, Rock Island & Pacific to operate over these tracks of the Burlington Northern in order to provide continued railroad service to shippers served by the Chicago, Rock Island & Pacific at Keokuk. Service order No. 1324 is published in full in volume 43 of the FEDERAL REGISTER at page 19395. Amendment No. 1 extends the order until March 31, 1979.

DATES: Effective 11:59 p.m., September 30, 1978. Expires 11:59 p.m., March 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

Upon further consideration of service order No. 1324 (43 FR 19395), and good cause appearing therefor:

It is ordered service order No. 1324 is amended by substituting the following paragraph (e) for paragraph (e) thereof:

OCT 4 1978

V 43/193

§ 1033.1324 Service Order No. 1324.

(a) *Chicago, Rock Island & Pacific Railroad Co., authorized to operate over tracks of Burlington Northern Inc.* • • •

• • • • • •

(e) Expiration date. The provisions of this order shall expire at 11:59 p.m., March 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., September 30, 1978.

(49 U.S.C. 1(10-17).)

A copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael. Member Joel E. Burns not participating.

NANCY L. WILSON,
Acting Secretary.

[7035-01]

[Amdt. No. 2 to Service Order No. 1321]

PART 1033—CAR SERVICE

Lenawee County Railroad Co., Inc., Authorized To Operate Over Tracks of Consolidated Rail Corp.

Decided: September 28, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (amendment No. 2 to service order No. 1321).

SUMMARY: The Lenawee County Railroad operates two separate lines of railroad in the vicinity of Grosvenor, Mich. Service order No. 1321 authorizes the Lenawee County Railroad to operate over 3.6 miles of a line of the Consolidated Rail Corp. between Lenawee Junction, Mich., and Grosvenor, Mich., which permits their single locomotive to serve both line segments. The order is printed in full in the FEDERAL REGISTER volume 43 at page 16341. The amendment extends this order until December 15, 1978.

DATES: Effective 11:59 p.m., September 30, 1978. Expires 11:59 p.m., December 15, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

Upon further consideration of service order No. 1321 (43 FR 16341 and 34150), and good cause appearing therefor:

It is ordered service order No. 1321 is amended by substituting the following paragraph (d) for paragraph (d) thereof:

§ 1033.1321 Service order No. 1321.

(a) *Lenawee County Railroad Co., Inc., authorized to operate over tracks of Consolidated Rail Corp.* • • •

• • • • • •

(d) Expiration date. The provisions of this order shall expire at 11:59 p.m., December 15, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., September 30, 1978.

(49 U.S.C. 1(10-17).)

A copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

NANCY L. WILSON,
Acting Secretary.

PART 1033—CAR SERVICE

Demurrage and Free Time on Freight Cars

Decided: September 27, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order revised service order No. 1315.

SUMMARY: Second revised service order No. 1315 establishes minimum periods for the detention of cars by shippers and receivers free of demurrage and increases demurrage charges for cars held beyond the free time. Class G-Gondola cars are removed from the order, and the expiration time is extended 2 months.

DATES: Effective 6:59 a.m., October 1, 1978. Expires 6:59 a.m., December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION:

An acute shortage of certain types of freight cars exists throughout the country. Certain carriers are unable to furnish adequate supplies of such freight cars to shippers located on their lines. These shortages of freight cars are impeding the movement of many commodities. Many freight cars are held by shippers for excessive periods awaiting loading, unloading, or disposition instructions immobilizing large numbers of freight cars needed by shippers for the transportation of other freight. Existing demurrage and detention rules, regulations, and practices of the railroads are ineffective to control such use of freight cars. It is, therefore, the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, we find that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1315 Demurrage and free time on freight cars.

(a) Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Application:*

(i) The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(ii) This order shall apply to all freight cars which are listed in the Official Railway Equipment Register, ICC R.E.R. No. 408, issued by W. J. Trezise, or successive issues thereof, as having one of the mechanical designations shown on pages 1167-1169 inclusive, under the following headings:

"Class 'X'—Box Car Type," except mechanical designation 'XLI' and 'XT' XXX

"Class 'H'—Hopper Car Type"

"Class 'L'—Special Car Type" mechanical designation 'LO', covered hopper, only.

(iii) This order shall apply to all detention of freight cars subject to freight car demurrage or detention rules which occurs on or after the effective date of this order and which may have been shipped, placed or constructively placed prior to that date.

(iv) *Exception:* This order shall apply to cars while such cars are subject to section 1900, Items 1900-1950, inclusive, or to Section 2000, Items 2000-2005, inclusive, of General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof.

(v) *Exception:* This order shall not apply to cars held at or outside of ocean, Great Lakes, or river ports, for loading or unloading with freight requiring transfer between rail and water carriers.

(vi) *Exception:* This order shall not apply to freight cars of Mexican ownership while held by or for shippers at Mexican border crossings, viz:

Brownsville, Tex., Laredo, Tex., Eagle Pass, Tex., Presidio, Tex., El Paso, Tex., Douglas, Ariz., XXXX, Nogales, Ariz., Calexico, Calif.

(vii) *Exception:* This order shall not apply to cars subject to items 710, 720, 725, 730, 740, 750, 755, 760, or 765 of General Car Demurrage Tariff 4-K ICC H-74, issued by D. M. Rogers, supplements thereto or reissue thereof.

(viii) *Exception:* The provisions of section 1400, items 1400-1440, inclusive, of General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, or similar provisions of other applicable demurrage, detention, or storage tariffs shall govern the adjustment, cancellation, or refund of demurrage assessed as a result of the causes described in such rules.

(ix) *Exception:* Exceptions to this order may be authorized to carriers by the Railroad Service Board. Requests for exceptions must be submitted in writing to Chairman, Railroad Service Board, Interstate Commerce Commission, Washington, D.C. 20423. Each such request must specifically identify the type of cars for which an exception is desired and must clearly state the reasons why such cars cannot be utilized in other services.

(x) The terms "loading," "unloading," "constructive placement," and "forwarding directions" as defined in General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, shall apply to cars subject to this order.

(xi) The term "holidays" means holidays as listed in item 525 of General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof.

(2) *Free time:* (i) Not more than a total of 48 hours' free time, computed in accordance with the provisions of the applicable tariffs naming demurrage or detention rules and charges, shall be allowed for the complete unloading of each car.

(ii) Not more than a total of 24 hours' free time, computed in accordance with the applicable tariffs naming demurrage or detention rules and charges, shall be allowed for loading or for any purpose other than complete unloading.

(iii) If the maximum free time authorized in applicable tariffs is less than the periods described in paragraphs (i) or (ii) of this section, the free-time periods, if any, provided in such tariffs shall apply.

(3) *Demurrage, detention, or storage charges—Cars not subject to average demurrage basis:* (i) After the expiration of the free-time period described in part (2) of this order, or without free-time allowance when none is provided, demurrage charges shall be assessed at the following rates, until car is released:

$10 per car per day, or fraction of a day, for each of the first two days.

$20 per car per day, or fraction of a day, for each of the next two days.

$30 per car per day, or fraction of a day, for each of the next two days.

$50 per car per day, or fraction of a day, for each subsequent day.

(ii) Except as provided in item 1225, General Car Demurrage Tariff 4-K, ICC H-74, the applicable demurrage charges provided herein will accrue on all Saturdays, Sundays, and holidays subsequent to the free time, or without free time when none is provided, including a Saturday, Sunday, or holiday immediately following the day on which the last day of free time begins, provided such last day of free time begins to run at or before 7 a.m., or expires at or before 11:59 p.m., of the day immediately prior to the Saturday, Sunday, or holiday.

(iii) If the demurrage rates published in applicable tariffs is greater than the demurrage rates named in paragraph (i) of this section, the rates provided in such tariffs shall apply.

(4) *Cars subject to average demurrage basis:* (i) One credit will be allowed for each car released before the expiration of the first twenty-four (24) hours of free time. After the expiration of the free time (or the adjusted free time if provided in applicable tariffs), one debit per car per day, or fraction of a day, will be charged for each of the first two days. In no case shall more than one credit be allowed on any one car, and in no case shall more than four credits be applied in cancellation of debits accruing on any one car. When a car has accrued two debits, a charge of $20 per car per day, or fraction of a day, will be made for each of the next two days; $30 per car per day, will be made for each of the next two days; and $50 per car per day, or fraction of a day, will be made for all subsequent detention. In computing time under this rule, all Saturdays, Sundays, and holidays will be counted after the free time, including a Saturday, Sunday, or holiday immediately following the day on which the last day of free time begins.

(ii) Credits earned on cars held for loading shall not be used in offsetting debits accruing on cars held for unloading, nor shall credits earned on cars held for unloading be used in offsetting debits accruing on cars held for loading.

(iii) An average agreement may not include cars held for:

(a) Purposes other than loading and unloading.

(b) Loading or unloading in intraplant switching service.

(iv) Credits cannot be earned by private cars subject to section 700, item 765, of General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, or subject to similar rules in other tariffs, but debits charged on such cars while under constructive placement may be offset by credits earned on other cars.

(v) At the end of the calendar month the total number of applicable credits will be deducted from the total number of debits at the ratio of two credits for one debit, and $10 per debit will be charged for the remainder. (See note). If the total number of debits are offset by credits through deduction at the above ratio of two credits for one debit, no charge will be made for the detention of the cars except as otherwise provided herein for detention beyond the second debit day, and no payment will be made by the railroad on account of such excess of credits; nor shall the credits in excess of the debits of any one month be considered in computing the average detention for another month.

NOTE.—For the purpose of applying part (v) of this paragraph, when an odd number of credits is earned, one of such credits will be disregarded in the computation.

(vi) Credits earned on cars subject to this order shall not be used in offsetting debits accruing on cars not subject to this order; nor shall debits ac-

xxxx Naco, Arizona, eliminated. No longer used for interchanges with Mexican railroads.

OCT 4 1978

V 43 / 193 OCT 4 78

cruing on cars subject to this order be offset by credits earned on cars not subject to this order.

(5) Existing tariff rules requiring the placement or release, as a unit, of all cars in a multiple-car shipment shall remain in effect.

(6) The demurrage, detention, or storage rates provided herein shall supersede all published storage charges expressed in cents per hundredweight, per bushel, or other unit of measure, for all freight held in cars, in excess of the free-time periods provided in paragraph (2) herein.

(7) If the demurrage, detention, or storage rates authorized in the applicable tariffs are greater than those described herein, such higher rates shall apply.

(8) *Notices of arrival, constructive placement, etc.:* (i) Existing tariff provisions defining constructive placement and establishing the requirements for the placement, the giving of arrival or constructive placement notice of freight destined for unloading or transshipment, shall apply.

(ii) If no such rules with respect to arrival, or regarding constructive placement are published in the applicable tariffs, the rules published in General Car Demurrage Tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, shall apply.

(b) *Rules and regulations suspended.* The operation of all rules and regulations, including rates, rules and free-time periods granted by authority of Part 1, Section 22 of the Interstate Commerce Act, insofar as they conflict with the provisions of this order, is hereby suspended.

(c) *Notification of shipper required.* (1) Carriers shall send or deliver a written notice to shippers or consignees of the requirements of this order at or prior to the time of actual or constructive placement of cars for loading or unloading or at the time notice of arrival or of constructive placement is given. On cars held for instructions from the shipper or qualified owner of the freight, such notices must accompany or precede the arrival notice.

(2) If a notice described in paragraph (1) of this section has been given to a shipper or receiver at origin, destination, or hold point, no further notices of the requirements of this order need be given.

(3) Carriers are required to maintain a copy of all notices of the requirements of this order sent to shippers, receivers, or qualified owners of freight, at the station or point from which sent.

(4) Failure of a carrier to send and preserve copies of the notices required by paragraph (1) of this section shall not be deemed as nullifying the requirements of sections (a) and (b) of this order.

(d) Effective date. This order shall become effective at 7 a.m., October 1, 1978.

(e) Expiration date. This order shall expire at 6:59 a.m., December 1, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

A copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the FEDERAL REGISTER.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael. Member Joel E. Burns not participating.

NANCY L. WILSON,
Acting Secretary.

[Service Order No. 1290, Amdt. No. 2]

PART 1033—CAR SERVICE

Chesapeake & Ohio Railway Co. Authorized To Operate Over Tracks of Consolidated Rail Corp.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order, amendment No. 2 to service order No. 1290.

SUMMARY: Service order No. 1290 authorizes the Chesapeake & Ohio Railway to operate over tracks of Consolidated Rail Corp. between Hallett, Ohio, and Walbridge, Ohio, to avoid congestion on the tracks of the Toledo Terminal Railroad Co., formerly used by the Chesapeake & Ohio to traverse this territory. Service order No. 1290 is published in full in volume 42 of the FEDERAL REGISTER at page 63890. Amendment No. 2 to service order No. 1290 extends this order for 6 months.

DATES: Effective 11:59 p.m., September 30, 1978. Expires 11:59 p.m., March 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: September 28, 1978.

Upon further consideration of service order No. 1290 (42 FR 63890 and 43 FR 14021), and good cause appearing therefor:

It is ordered, That § 1033.1290 *The Chesapeake & Ohio Railway Co. authorized to operate over tracks of Consolidated Rail Corp.,* service order No. 1290 be, and it is hereby, amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

EFFECTIVE DATE: This amendment shall become effective at 11:59 p.m., September 30, 1978.

(49 U.S.C. 1(10-17).)

A copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

NANCY L. WILSON,
Acting Secretary.

[Service Order No. 1329, Amdt. No. 1]

PART 1033—CAR SERVICE

Chicago, Rock Island & Pacific Railroad Co. Authorized To Operate Over Tracks of Chicago & North Western Transportation Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order, amendment No. 1 to service order No. 1329.

SUMMARY: Because of damage to a bridge on its line the Chicago & North Western Transportation Co. is unable to operate to or from Livermore, Iowa. Several shippers served by that line require continued rail service. Service order No. 1329 authorizes the Chicago, Rock Island & Pacific Railroad to operate over tracks of the Chicago & North Western Transportation Co. in Livermore, in order to provide urgently needed railroad service to these shippers. Service order No. 1329 is published in full in volume 43 of the FEDERAL REGISTER at page 26581. Amendment No. 1 extends this order for 6 months.

DATES: Effective 12:01 a.m., September 30, 1978. Expires 11:59 p.m., March 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: September 28, 1978.

Upon further consideration of service order No. 1329 (43 FR 26581), and good cause appearing therefor:

It is ordered, That § 1033.1329 *Chicago, Rock Island & Pacific Railroad Co. authorized to operate over tracks of Chicago & North Western transportation Co.,* service order No. 1329 is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

EFFECTIVE DATE: This amendment shall become effective at 11:59 p.m., September 30, 1978.

(49 U.S.C. 1(10-17).)

A copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—HUNTING

Opening of Wildlife Management Areas 10 and 11 to Public Pheasant Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of parts of the Lacreek National Wildlife Refuge to public hunting of cock pheasants is compatible with the objectives for which the area was established, will utilize a renewable natural resource and will supply additional recreational opportunities to the public.

DATES: October 21, 1978 through December 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Lacreek National Wildlife Refuge, Martin, S. Dak. 57551, or telephone 605-685-6508.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; hunting ringnecked pheasant; for individual wildlife refuge areas.

Public hunting of cock ringneck pheasant on the Lacreek National Wildlife Refuge, S. Dak., is permitted in those parts of wildlife management areas 10 and 11 (2,800 acres) delineated on maps available at designated parking areas, at Refuge Headquarters, Martin, S. Dak. 57551 and at the U.S. Fish and Wildlife Service, Area Office, Pierre, S. Dak. 57501, and not designated closed. Hunting shall be according to State and Federal regulations governing the hunting of cock pheasants subject to the following special conditions:

a. The hunting of other than cock pheasant is prohibited.

b. Designated hunting access and parking sites will be available. Entering and parking at other sites will be prohibited.

c. Hunting will be allowed only by special permit/report forms available at designated parking sites.

The provisions of this special regulation supplements the regulations which governs hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1978. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. fish and Wildlife Service had determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 21, 1978.

ROLF H. KRAFT,
Refuge Manager, Lacreek National Wildlife Refuge, Martin, S. Dak.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 258—FISHERMEN'S PROTECTIVE ACT PROCEDURES

Compensation for Damage Caused by Foreign Vessels in the Fishery Conservation Zone

AGENCY: National Oceanic and Atmospheric Administration, National Marine Fisheries Service.

ACTION: Final regulations.

SUMMARY: The National Marine Fisheries Service previously proposed, and is now adopting, regulations to govern section 10 ("Section 10") of the Fishermen's Protective Act of 1967, as amended (the "Act"). Section 10 provides a program to compensate domestic fishermen who have suffered vessel or gear damage, loss, or destruction as the result of foreign vessel operations in the U.S. Fishery Conservation Zone (and beyond, in appropriate instances).

EFFECTIVE DATE: Immediately October 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael L. Grable, Chief, Financial Services Division, or Kathryn E. Hensley, Financial Assistance Specialist, Financial Services Division, National Marine Fisheries Service, Washington, D.C. 20235, telephone 202-634-7496.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On November 18, 1977, the Act was amended by adding a new section 10 (Pub. L. 95-194). Section 10 authorizes the establishment of a loan program for domestic fishermen whose fishing vessels or gear were damaged, lost, or

V 4 3 / 1 9 3

destroyed as the result of foreign vessel operations. The program will apply to incidents occurring in the geographical area defined in these regulations as the "fishermen's protective zone" (which consists of the fishery conservation zone ("FCZ") established by the Fishery Conservation and Management Act of 1976 and an area beyond the FCZ in appropriate instances).

The proposed regulations published May 11, 1978, set forth procedures and standards for the loan program authorized by section 10. Rules governing the Act currently appear at 50 CFR 258.1 through 258.9. 50 CFR will be amended to include regulations governing section 10 by adding a new heading "Subpart A" for the Act's existing regulations (§§ 258.1 through 258.9) and adding a new "Subpart B" for these rules implementing section 10.

Section 10 authorizes the Secretary of Commerce (the "Secretary") to make low-interest loans to eligible fishermen after making a determination that the eligibility and evidentiary criteria of section 10 relating to the lost, destroyed, or damaged property have been met. After making the loan, the Secretary is directed to investigate the circumstances of the incident resulting in the compensated loss, damage, or destruction and determine whether the loan will continue according to its original terms, be canceled, or be repaid over a shortened time period.

This rulemaking governs: (1) Eligibility for the program, (2) evidence to be submitted with loan applications, (3) procedures for making loans, (4) guidelines for determining the amount of the loan, (5) procedures and standards by which the Secretary will determine whether to modify or cancel loans, and (6) loan repayment and cancellation requirements.

One section governing the Government's disposition of rights assigned to it by loan recipients is being reserved for a proposal of rules to be made at a later time.

COMMENTS

Response to the proposal for comments on these rules questioned the need for three estimates of the purchase price of replacement gear. The requirement for those estimates was retained, since this will tend to assure the reasonability of estimates upon which the Secretary will determine loan amounts.

A 60-day time requirement was suggested for loan processing (approval/denial) and a 30-day time requirement for notification of preliminary determination of fault. This suggestion was not incorporated since time constraints could result in an incomplete review of applications. All claims will be processed as promptly as circumstances permit. If a loan is approved, disbursement of the proceeds will not be held pending determination of fault, but will be accomplished as soon as possible.

Another comment objected to a proposed loan fee. The Act allows the Secretary to charge a fee to cover the costs of administering this program. The loan fee will be retained. The proposed fee will probably be insufficient to cover the administrative costs and, in any event, appears to be reasonable in view of the expected costs in processing loan applications and the substantial benefits to claimants from section 10 assistance.

Another comment requested that damages resulting from lost income during the period in which claimant did not have use of the damaged, lost, or destroyed gear be included for compensation. A thorough review of the statute and its legislative history does not substantiate inclusion of these damages and that previously reserved section has been eliminated.

Another comment, requested whether payment could be made directly to loan recipients instead of suppliers. Payment will ordinarily be made directly to suppliers, but may be made to loan recipients if circumstances warrant.

Dated: September 28, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

50 CFR Part 258 is amended as follows:

1. Add a new heading "Subpart A—Seizures of U.S. Commercial Fishing Vessels" for §§ 258.1 through 258.9.

2. Add a new subpart B as follows:

Subpart B—Compensation for Damage Caused by Foreign Vessels in the Fishermen's Protective Zone

Sec.
258.20 Purpose.
258.21 Definitions.
258.22 Eligibility.
258.23 Applications.
258.24 Approval of loan applications.
258.25 Terms and conditions of loans.
258.26 Determination of amount of loss, damage, or destruction.
258.27 Determination of fault.
258.28 Loan Repayment or cancellation.
258.29 Government collection. [Reserved]

AUTHORITY: Sec. 10, 91 Stat. 1413 (22 U.S.C. 1980).

Subpart B—Compensation for Damage Caused by Foreign Vessels in the Fishermen's Protective Zone.

§ 258.20 Purpose.

This subpart provides rules and procedures for the granting, repayment, and cancellation of loans to owners and operators of U.S. commercial fishing vessels for the loss, damage, or destruction of their fishing vessles or gear caused by a vessel (or its crew or fishing gear) of a foreign nation operating in the Fishermen's Protective Zone.

§ 258.21 Definitions.

Unless the context otherwise requires, in this subpart:

(a) "Alternative claim" means any claim not made under this subpart which seeks compensation for the same loss, damage, or destruction of a fishing vessel or fishing gear as a claim under this subpart.

(b) "At fault" means negligence or willfulness, through action or inaction, causing the loss, damage, or destruction involved.

(c) "Fishermen's Protective Zone" means; (1) The area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured, (2) all areas in which U.S. Continental Shelf fishery resources are found, and (3) the area representing the migratory range of any species of anadromous fish of the United States; except that such area shall not extent within any foreign nation's territorial sea or fishery conservation zone (or the equivalent) to the extent that such sea or zone is recognized by the United States.

(d) "Foreign vessel" means a vessel of a foreign nation, its crew, or fishing gear.

(e) "Secretary" means the Secretary of Commerce or his or her designated representative.

(f) "Loan" means a loan under section 10 of the Fishermen's Protective Act of 1967, as amended (22 U.S.C. 1980).

§ 258.22 Eligibility.

(a) *Applicants.* An applicant must be the owner or operator of a vessel which is used primarily for the commercial catching, processing, or transporting of fish or shellfish and which is either documented under the laws of the United States in the fisheries trade or certified or registered under

the laws of any political subdivision of the United States.

(b) *Loss, damage, or destruction.* The applicant's vessel or its fishing gear must have been lost, damaged, or destroyed after July 1, 1976, as a result of the operation of a foreign vessel (or its crew or gear) in the Fishermen's Protective Zone. The total amount of such loss, damage, or destruction must exceed $2,000, as determined by the Secretary under § 258.26.

(c) *Alternative claims.* Any applicant who has made an alternate claim shall not be eligible for a loan if the Secretary determines that the alternative claim is substantially resolved at the time of the application or at the time of the loan. An alternative claim shall be regarded as substantially resolved if, at the time of the application or loan, the alternative claim proceeding has resulted in compensation for the claimant (whether or not such compensation is less than the amount applied for under a loan application) or in a final denial of the claims.

(d) *Insurance.* An applicant's claim for such loss, damage, or destruction cannot be of such a nature as would ordinarily be covered under the collision clause, or other clauses, of a full hull and machinery policy of commercial insurance or under a full protection and indemnity of policy of commercial insurance.

§ 258.23 Applications.

(a) *Form.* Applications for loan shall be submitted to the Financial Services Division, National Marine Fisheries Service, Washington, D.C. 20235, by the owner or operator of the vessel concerned. Each application must be in a form suitable to establish that the situation involved meets the eligibility criteria in § 258.22 and must include as attachments the affidavits and estimates referred to in this section.

(b) *Affidavit of vessel master.* Applications shall include an affidavit by the master of the applicant's vessel (or by different masters if more than one was involved during any material period) fully describing the circumstances before, during, and after the incident resulting in loss, damage, or destruction which states, among other things:

(1) Time, date, and locational coordinates (longitude and latitude) of the incident;

(2) Actions of the foreign vessel alleged to have caused the loss, damage, or destruction, before, during, and after the incident (if such actions were observed);

(3) Actions of the applicant's vessel or crew before, during, and after the incident, including a full description of circumstances involving deployment and retrieval of fishing gear (for example: time, date, locational coordinates, and circumstances of the gear's retrieval, and all attempts at retrieval);

(4) Description of the size, type, flag, identifying number, color of house or hull, or other identifying characteristics, including a photograph, if available, of the foreign vessel alleged to have caused the loss, damage, or destruction (if such vessel was observed);

(5) A full statement of the reasons for belief that the loss, damage, or destruction was caused by a foreign vessel rather than by: wind, weather, sea, or other natural conditions; defective gear; defective deployment (for example, means of fixing gear); defective retrieval (for example, means to have been used for relocating gear); or a domestic vessel;

(6) Names and statements of any material witnesses;

(7) Nature and extent of loss, damage, or destruction, including, if possible, photographs of the damage, even if taken after return to port; and

(8) Description of the property which was lost, damaged, or destroyed, including type, size, material of construction, number of units, and remaining economically useful life at the time of the incident.

(c) *Affidavit of owner or operator.* Applications shall include an affidavit from the owner or operator of the vessel or gear for which a claim is being made stating the date, cost, and place of acquisition of the property which was lost, damaged, or destroyed, as well as its age and remaining economically useful life when acquired, and shall attach, if available, a copy of the original invoice or bill of sale of the property concerned.

(d) *Estimates.* Applications shall include three estimates from commercial sources, acceptable to the Secretary, setting forth the replacement cost of the property concerned as well as its repair cost, if repairable.

(e) *Evidence of foreign vessels in the area.* Applications shall include documentation from the U.S. Coast Guard or National Marine Fisheries Service indicating all foreign vessels known to have been in the vicinity of the incident at any time after deployment of the gear lost, damaged, or destroyed and before its retrieval or attempted retrieval.

(f) *Other evidence.* The Secretary may, in his or her discretion, require further affidavits, other evidence, or supplementary information.

(g) *Application fee.* Applications shall be accompanied by a fee in the form of a check or money order made payable to "National Marine Fisheries Service" in the amount of $50. This fee shall not be refunded.

(h) *Time requirement.* After October 1, 1978, applications must be postmarked not later than 60 calendar days after the date the claimed loss, damage, or destruction occurred.

(i) *Abandoned applications.* As soon as practicable after receipt of an incomplete or improperly executed application, the applicant shall be notified by the National Marine Fisheries Service of any deficiency in the application. If the applicant fails to supply the deficient information or otherwise fails to correct the deficiency within 60 calendar days following the date of notification, the application shall be considered abandoned.

§ 258.24 Approval of loan applications.

A loan may be made to the applicant, if the Secretary finds that:

(a) The eligibility requirements of § 258.22 are met;

(b) The application satisfies the requirements of § 258.23; and

(c) The Secretary reasonably determines that the claimed loss, damage, or destruction was caused, or could reasonably have been caused, by the operation of a foreign vessel in the Fishermen's Protective Zone.

§ 258.25 Terms and conditions of loans.

(a) *Loan amount.* The amount of a loan will equal the extent of the loss, damage, or destruction involved as determined under § 258.26.

(b) *Time period.* The terms of a loan shall not exceed the economically useful life of the vessel or gear acquired or repaired with the proceeds of the loan, and may, at the discretion of the Secretary, be for a shorter period of time.

(c) *Collateral.* Collateral for the loan shall be required at the discretion of the Secretary and may include a secured interest in the vessel or gear acquired or repaired with the proceeds of the loan. All loans will be evidenced by a promissory note payable to the Secretary from the owner of such vessel or gear.

(d) *Interest rate.* The interest rate for loans will be 3½ percentum per annum.

(e) *Loan fees.* A fee for granting the loan shall be charged and deducted from the proceeds of the loan. The amount of this fee shall be equal to the difference during the loan's first year between the loan's 3½ percent interest rate and the approximate cost of Government borrowings of about a 7-year maturity.

(f) *Payment.* The Secretary may require that the proceeds of a loan be escrowed and subsequently paid directly to the supplier of goods or services in connection with the replacement or repair of vessels or gear after the Secretary's receipt of all properly executed loan documents and upon presentation of proper invoices and authorizations to pay. Payment may be made to

OCT 4 1978

V 4 3 / 1 9 3

loan recipients if circumstances warrant.

(g) *Assignment.* Loan recipients shall assign, or agree to assign, to the Secretary any rights they might have to recover moneys or damages from any person for the loss, damage, or destruction for which a loan is made.

(h) *Repayment or cancellation.* Loans shall be repaid or canceled in accordance with § 258.28.

(i) *Collection efforts.* Loan recipients shall agree to assist the Secretary's efforts under § 258.29.

(j) *Other terms and conditions.* Loans shall be subject to such other terms and conditions as the Secretary deems necessary and appropriate.

§ 258.26 Determination of amount of loss, damage, or destruction.

(a) *Value of property.* In the case of property which has been lost or destroyed, the Secretary shall determine the value of the loss or destruction by using the replacement cost of such property as if it had been the original acquisition cost of such property and by depreciating such replacement cost on a straight line basis over the economically useful life of such property. In the case of property which is capable of being repaired, the Secretary shall determine the value of damage in light of the estimates of repair submitted under § 258.23(d), but in no event shall damage determinations exceed the depreciated, present, replacement cost of the property concerned. Example: 100 lobster pots with a present replacement cost of $100 each were totally lost. Each pot had an economically useful life of 36 months and was 18 months old, leaving a remaining economically useful life of 18 months. The value of loss would be calculated as follows:

(1) 100 pots × $100 = $10,000 present replacement cost.

(2) $10,000 ÷ 36 months = $277.78 depreciation per month.

(3) $277.78 × 18 months remaining useful life = $5,000 for depreciated, present, replacement cost.

If the casualty were confined to property which could be repaired, the value of the casualty would be the actual cost of repair up to, but not exceeding, the depreciated, present, replacement cost of $5,000 as calculated above. If partial loss, damage, or destruction occurs, and the applicant is unable to determine which receipts of purchase pertain to the lost, damaged, or destroyed gear, the applicant must submit proof of purchase for all gear involved in the incident in order that an averaging method may be used to determine the depreciation. If the gear involved was purchased on several dates, the number of months between the first and last purchases will be divided in half and depreciation will start from the midpoint. The following is an example: Purchase dates are January, March, and June. Date of loss is December. Computation will be made as follows:

(1) January to June = 6 months.

(2) 6 months ÷ 2 = 3 months.

(3) Three months from the first date of purchase (January) is April.

(4) Depreciation will be computed from April to the date of the incident in December. The allowable depreciation in this example is 9 months.

§ 258.27 Determination of fault.

(a) *Investigation.* Following the granting of each loan, the Secretary shall investigate the circumstances of the incident resulting in the loss, damage, or destruction concerned in an attempt to ascertain the facts required for a determination of whether or not the loan recipient was at fault for the loss, damage, or destruction.

(b) *Factors to be considered.* In making a determination of fault, the Secretary shall take into account: (1) Evidence submitted with the application in accordance with § 258.23; (2) whether the loan recipitent, prior to the incident involved, reported the location of the fishing gear to the U.S. Coast Guard for broadcasting to foreign vessels in accordance with 50 CFR 611.11 (failure to do so will create a presumption that the loan recipient was at fault); and (3) such other matters as the Secretary may deem appropriate.

(c) *Notification of preliminary determination.* Upon completing the investigation, the Secretary shall make a preliminary determination of whether it is possible to ascertain who was at fault for the incident and, if so, whether the loan recipient was at fault and notify the loan recipient of these determinations.

(d) *Review of record.* The loan recipient may examine the complete record upon which the determinations of the Secretary are made under this section.

(e) *Comments.* The loan recipient shall have 30 calendar days after the receipt of notification under paragraph (c) of this section to submit any comments, data, or other information concerning the preliminary determination of the Secretary. All timely comments, data, or other information shall be considered by the Secretary prior to making a final determination.

(f) *Final determination.* As soon as practicable after the termination of the period described in paragraph (e) of this section, the Secretary shall make a final determination of fault and shall notify the loan recipient of the determination.

§ 258.28 Loan repayment or cancellation.

Based upon the final determinations made under § 258.27 the Secretary shall:

(a) If it is determined that the loan recipient was not at fault, cancel repayment of the loan and refund any principal and interest payments made thereon;

(b) If it is determined that the loan recipient was at fault, require that the loan be repaid prior to its original term within a reasonable time as determined by the Secretary, taking into account its original duration and the percentage of fault attributable to the loan recipient; or

(c) If it cannot be determined whether or not the loan recipient was at fault, continue the loan according to its original terms.

§ 258.29 Government collection [Reserved].

[3510-22]

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 651—ATLANTIC GROUNDFISH REGULATIONS

Approval of Fishery Management Plan Amendments, Emergency Regulations, and Proposed Rulemaking

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Approval of amendments to the Fishery Management plan for the Atlantic groundfish fishery; emergency regulations and proposed rulemaking.

SUMMARY: Amendments to the Fishery Management plan for the Atlantic groundfish fishery (FMP), submitted by the New England Fishery Management Council (the Council), to regulate fishing during a fishing year beginning October 1, 1978, and ending on September 30, 1979, are approved. Regulations implementing these amendments are promulgated as emergency regulations under section 305(e) of the Fishery Conservation and Management Act, as amended (the Act). These amendments reinstate the optimum yields and quotas adopted by the Council in March 1978. The Council's earlier FMP amendment establishing separate haddock commercial quotas for the Gulf of Maine and for Georges Bank and south is approved. At the request of the Council, the Secretary is also promulgating emergency regulations which amend the provisions in the FMP on incidental catches. The regulations implementing the FMP are also amended on an emergency basis to provide for closure of the fisheries in sufficient time to avoid an overrun of the quarterly quotas specified in the FMP. The regulations are completely revised to make them more effective and understandable.

EFFECTIVE DATE: The revised regulations take effect on October 1, 1978, and will remain in effect on an emergency basis until November 14, 1978. These emergency regulations are also being published as a proposed rulemaking; public comments on the amendments and regulations are invited until November 14, 1978.

ADDRESS: Send comments to the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Washington, D.C. 20235. Mark "Groundfish Comments" on the outside of the envelope.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: On March 31, 1978, emergency regulations were published in the FEDERAL REGISTER implementing the Fishery Management plan for the Atlantic groundfish fishery (cod, haddock, and yellowtail flounder). On April 24, allocations of quotas to vessel classes were instituted. On May 5, the Assistant Administrator for Fisheries, using the authority provided in the emergency regulations, adjusted the landing restrictions. On June 30, the emergency regulations became final; the revised landing restrictions were continued. Effective July 2, the landing restrictions were further amended. Further emergency amendments to the regulations were made on July 19. The April 24 regulations were made final on July 21. All emergency regulations in effect were extended on August 30 to October 14, 1978. All prior regulations are rescinded and replaced by the regulations promulgated today.

The Council has submitted to the Secretary an amendment to the FMP and requested that the quotas of the March 31, 1978, regulations be reinstated, and that a new fishing year begin on October 1, 1978, to run through September 30, 1979. The Council believes that managing the fishery on a fishing year, rather than a calendar year, basis will facilitate the best utilization of new scientific information, and will coincide better with actual fishing patterns.

OCT 4 1978

In taking this action, the Council has not continued the increase in optimum yield for cod in the Gulf of Maine, contained in an amendment to the FMP proposed by the Secretary on July 19, 1978. This represented an increase in the quota for commercial fishermen of 33⅓ percent. In starting a new fishing year beginning October 1, 1978, there will be impacts on stock sizes in each fishing area. With the exception of cod in the Gulf of Maine, these will be insignificant. The determination to discontinue the increase in the optimum yield for cod in the Gulf of Maine indicates the Council's judgment that the benefits of the increase would not be sufficient to justify such impacts on that stock.

One of the effects of the Council's amendment is to "open the season" for fishing groundfish 3 months earlier than would have occurred without the amendments. Experience in managing this fishery has indicated that the fishery is less predictable and harder to control than originally believed. The influx of new vessels into this fishery has affected the determination of optimum yield. Socioeconomic impacts of the management of this fishery have been more severe than anticipated.

The Council has embarked on the formulation of a comprehensive fishery management plan to replace the plan currently in effect. These interim amendments are designed to provide for a limited and more orderly fishery while this major revision is accomplished. Questions concerning the description of an appropriate fishery management unit as well as the whole range of conservation and management measures appropriate for this fishery, will be considered.

The Assistant Administrator has authority to revise catch limits under the FMP. These limits for haddock in all areas and for cod in Georges Bank and south remain at the levels which took effect May 7. These limits for cod in the Gulf of Maine and for yellowtail flounder are more restrictive than the May 7 limits, in order to spread fishing over the entire quarter.

The catch limitations for yellowtail flounder are applied differently from those for cod and haddock because of the different nature of the fishery. The yellowtail flounder fishery is characterized by two basic types of fishing: Short trips lasting 3 days or less; and longer trips lasting about 9 days. Catch limitations for the former type of fishing regulate catch per fishing week; for the latter type, catch per trip. The catch limitations for yellowtail flounder are the same, both east and west of 69° west longitude, and apply equally to all vessel classes. This is not intended to be a departure from the area and vessel class allocation systems, but rather an adjustment of catch limitations as authorized by the FMP and regulations to these levels. Further adjustments may be made based on areas and/or vessel classes.

The plan amendments submitted by the Council on March 31, 1978, differentiated between the haddock stocks in the Gulf of Maine and those on Georges Bank and south. By oversight, this distinction was not incorporated into the FMP regulations. That action is now taken.

The regulations implementing the FMP have been revised and are published here both as emergency regulations effective October 1, 1978, and as proposed regulations for public comment prior to final implementation, pursuant to section 305(a) of the Act. These regulations do not incorporate any significant changes in the policy of management for this fishery. They are basically a restructuring and rewording of the current regulations. The above-discussed policy issues have been incorporated. Some of the other changes incorporated and the effects of the new regulations are discussed below.

A number of definitions have been added. "Discard" has been defined to allow the release of live fish before they have been taken onboard the vessel. "Fishing week" has been defined and is significant in terms of reporting requirements and catch limitations.

Reporting requirements have been revised to clarify the requirement that any vessel which catches groundfish within the fishery conservation zone (FCZ) during any voyage must report its total catch for that voyage, including species other than groundfish, and also including all fish taken within the territorial sea. The former regulations required this reporting, but were read by some as applying only to those groundfish which were caught within the FCZ.

These new regulations also require mandatory reporting by all vessels. The National Marine Fisheries Service is currently in the process of revising its logbook and dealer reporting forms. The Regional Director, Northeast Region, National Marine Fisheries Service, will implement this regulation gradually over the next few months, with full implementation anticipated in January 1979.

In order more clearly to state the norm of conduct required under these regulations, all of the prohibitions have been grouped together at § 651.7.

The revised procedures for closing a fishery are designed to implement more effectively the Council's intent that optimum yield shall not be exceeded. The new regulations contain a revised provision for incidental catches during a closure. The Secretary has

V 43 / 193
OCT 4 78
UMI

found that this action is necessary for conservation and management, and that the Council has failed to prepare an amendment accomplishing this action within a period of time which would be reasonable under the circumstances. During the period these regulations are in effect as emergency regulations, this provision will be treated as an FMP amendment. Before the regulations are adopted as final, this secretarial amendment will have to have been approved pursuant to section 304(c) of the Act.

The Council's amendments to the Atlantic Groundfish FMP are approved; the secretarial amendments discussed above are proposed. The secretarial amendment will be transmitted to the Council pursuant to section 304(c) of the Act. The resulting changes to be made in the FMP are as follows:

1. Table 54 is amended by deleting the number 10,500 under the column headed "Optimum Yield" for cod, 5Y, and substituting the number 8,500.

2. Section II.C.3(a) is amended by deleting the last paragraph and substituting the following:

The annual optimum yields for cod are specified as follows: Gulf of Maine—8,500 metric tons; Georges Bank/southern New England—26,000 metric tons.

3. Section II.C(b) is amended by deleting the words "in 1978."

4. Section II.C.4.(A)(1)(a) is amended by deletion and substituting the following:

(a) It is recommended that the annual catch of cod in the Gulf of Maine be limited to 6,000 metric tons (U.S. commercial) and 2,500 metric tons (U.S. charter boat and headboat).

5. Section II.C.4.(A)(I)(c) is amended by deletion and substituting the following:

(c) It is recommended that the cod quotas for the U.S. commercial fishery be allocated on a quarterly basis during the fishing year as follows:

[In metric tons]

Quarter	Gulf of Maine	Georges Bank[1]
Oct. 1 to Dec. 31	1,420	5,640
Jan. 1 to Mar. 31	1,400	4,600
Apr. 1 to June 30	1,760	6,130
July 1 to Sept. 30	1,420	5,630

[1]Southern New England.

The catch of the fixed gear vessel class shall be allocated quarterly to reflect the historic record of landings.

6. Section II.C.4.A.(3)(b) is amended by deletion and substituting the following:

(b) It is recommended that the haddock quota of 14,900 metric tons for the U.S. commerical fishery be allocated on a quarterly basis during the fishing year as follows:

[In metric tons]

Quarter	Gulf of Maine	Georges Bank[1]
Oct. 1 to Dec. 31	728	1,902
Jan. 1 to Mar. 31	767	2,167
Apr. 1, to June 30	991	4,463
July 1 to Sept. 30	644	3,236

[1]Southern New England.

The catch of the fixed gear vessel class shall be allocated quarterly to reflect the historic record of landings.

7. Section II.C.4.E.(4) is amended by deletion and substituting the following:

(4) Incidental catches during a closure. During a closure all affected vessels shall be permitted to fish, so long as catches of any species to which the closure applies do not exceed the following amounts:

(a) Cod and haddock:

Vessel Class and Trip Limit

0–60 gross registered tons—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

61–125 gross registered tons—1,000 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

126 gross registered tons or more—2,000 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

Fixed gear—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

(b) Yellowtail flounder:

Vessel Class and Trip Limit

All vessels—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

8. A new section II.C.4.(I) is added as follows:

(I) *Fishing year.* It is recommended that the fishing year, for purposes of this fishery management plan, shall be from October 1 to September 30 of the following calendar year.

NOTE.—An emergency continues to exist in this fishery, which justifies the use of section 305(e) procedures to implement the amendments.

NOTE.—This emergency makes it unnecessary, impractical and contrary to the public interest to withhold action to obtain further public comment. Public comment is invited, however, on these emergency regulations as proposed rulemaking.

NOTE.—A supplement to the environmental impact statement covering these amendments will be filed with the Environmental Protection Agency.

NOTE.—This action does not constitute a major proposal requiring preparation of an economic impact statement under E.O. 11821, as amended by E.O. 11949 and OMB Circular A-107.

Signed at Washington, D.C., this 28th day of September 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

Part 651 is revised to read as set forth below:

Subpart A—General

Sec.
651.1 Purpose and scope.
651.2 Definitions.
651.3 Relation to other laws. [Reserved]
651.4 Vessel permits.
651.5 Recordkeeping and reporting requirements.
651.6 Vessel identification.
651.7 Prohibitions.
651.8 Enforcement.
651.9 Penalties.

Subpart B—Management Measures

651.20 General limitations.
651.21 Closed areas.
651.22 Gear limitations.
651.23 Catch limitations.
651.24 Closures.

AUTHORITY: Sec. 305(e), Fishery Conservation and Management Act, as amended.

Subpart A—General

§ 651.1 Purpose and scope.

The regulations in this part govern fishing for groundfish by fishing vessels of the United States within that portion of the Atlantic Ocean over which the United States exercises exclusive fishery management authority. These regulations implement the Atlantic groundfish fishery management plan developed by the New England Fishery Management Council.

§ 651.2 Definitions.

Some definitions in the Act have been repeated here to aid understanding of the regulations. In addition to the terms defined in the Act, the terms used in this part shall have the following meanings:

Act means the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801–1882, as amended.

Assistant Administrator means the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, Department of Commerce, or an individual to whom appropriate authority has been delegated.

Authorized Officer means: (a) Any commissioned, warrant, or petty officer of the U.S. Coast Guard;

(b) Any certified enforcement officer or special agent of the National Marine Fisheries Service;

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Commandant of the Coast Guard to enforce the provisions of the Act; or

(d) Any Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (a) of this definition.

Catch, take, or harvest includes, but is not limited to, any activity which results in killing any fish, or bringing any live fish on board a vessel.

Discard means to release a fish into the wild. Releasing a live fish before it is brought on board a vessel shall not be considered a discard.

Fishery Conservation Zone (FCZ) means that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured.

Fishing means any activity, other than scientific research activity conducted by a scientific research vessel, which involves:

(a) The catching, taking, or harvesting of fish;

(b) The attempted catching, taking, or harvesting of fish;

(c) Any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish; or

(d) Any operations at sea in support of, or in preparation for, any activity described above.

Fishing vessel means any vessel, boat, ship, or other craft which is used for, equipped to be used for, or of a type which is normally used for: (a) Fishing; or (b) aiding or assiting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing.

Fishing week means the weekly period running from 0001 hours Sunday through 2400 hours Saturday.

Fixed gear includes, but it not limited to, all gill nets, longlines, and line trawls.

Georges Bank and south means that area of the northwest Atlantic Ocean subject to the fishery jurisdiction of the United States, except the Gulf of Maine.

Groundfish means any cod (*Gadus morhua*), haddock (*Melanogrammus aeglefinus*), or yellowtail flounder (*Limanda ferruginea*).

Gulf of Maine means that portion of the northwest Atlantic Ocean north of 42°20′ N. latitude, plus that area south of 42°20′ N. latitude which is west of 70°00′ W. longitude and which is bounded on the south by the northern shore of Cape Cod.

Land means to begin offloading fish, or to arrive in port with the intention of offloading fish.

Operator, with respect to any vessel, means the master or other individual on board and in charge of that vessel.

Owner, with respect to any vessel, means: (a) Any person who owns that vessel in whole or in part;

(b) Any charterer of the vessel, whether bareboat, time, or voyage;

(c) Any person who acts in the capacity of a charterer, including but not limited to parties to a management agreement, operating agreement, or any similar agreement that bestows control over the destination, function, or operation of the vessel; or

(d) Any agent designated as such by any person in (a), (b), or (c).

Person means any individual (whether or not a citizen or national of the United States), corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of any such government.

Regional Director means the Regional Director, Northeast Region, National Marine Fisheries Service, or his designee.

Regulated species means any species for which fishing by a vessel of the United States is regulated pursuant to the Act.

Trip means a period of time during which fishing is conducted, beginning when the vessel leaves port and ending when the vessel begins to offload fish in port.

Vessel of the United States means: (a) Any vessel documented or numbered by the Coast Guard under U.S. law; or

(b) Any vessel, under 5 net tons, which is registered under the laws of any State.

§ 651.3 Relation to other laws. [Reserved]

§ 651.4 Vessel permits.

(a) *General.* Any vessel of the United States which is fishing for groundfish must have been issued a permit under this part.

(b) *Application.* (1) An application for a vessel permit for the groundfish fishery must be submitted and signed by the vessel owner on an appropriate form, which may be obtained from the Regional Director. The application must be submitted to the Regional Director, prior to the date on which the applicant desires to have the permit made effective.

(2) Applicants shall provide all of the following information:

(i) The name, mailing address, and telephone number of the applicant and the vessel's master;

(ii) The name of the vessel;

(iii) The vessel's U.S. Coast Guard documentation number or State license number;

(iv) The home port, gross tonnage, and net tonnage of the vessel;

(v) The engine horsepower of the vessel;

(vi) The approximate fish-hold capacity of the vessel in pounds;

(vii) The type and quantity of fishing gear used by the vessel; and

(viii) The size of the crew, which may be stated in terms of a range.

(c) *Issuance.* (1) Upon receipt of a completed application, the Regional Director shall issue a permit within 30 days.

(2) Upon receipt of an incomplete or improperly executed application, the Regional Director shall notify the applicant of the deficiency in the application. If the applicant fails to correct the deficiency within 10 days following the date of notification, the application shall be considered abandoned.

(d) *Expiration.* A permit shall expire when the owner or name of the vessel changes.

(e) *Duration.* A permit shall continue in full force and effect until it expires or is revoked, suspended, or modified pursuant to 50 CFR Part 621.

(f) *Alteration.* Any permit which has been substantially altered, erased, or mutilated shall be invalid.

(g) *Replacement.* Replacement permits may be issued. An application for a replacement permit shall not be considered a new application.

(h) *Transfer.* Permits issued under this part are not transferable or assignable. A permit shall be valid only for the vessel for which it is issued.

(i) *Display.* Any permit issued under this part must be carried on board the fishing vessel at all times. The permit shall be displayed for inspection upon request of any Authorized Officer.

(j) *Revocation.* Subpart D of 50 CFR Part 621 shall govern the imposition of sanctions against a permit issued under this part. As specified in that subpart D, a permit may be revoked, modified, or suspended if the vessel for which the permit is issued is used in the commission of an offense prohibited by the Act or by this part; or if a civil penalty or criminal fine imposed under the Act and pertaining to such a vessel is not paid.

(k) *Fees.* No fee shall be required for any permit under this part.

(l) *Change in application information.* Any change in the information specified in paragraph (b) of this section shall be reported to the Regional Director within 15 days of any such change.

§ 651.5 Recordkeeping and reporting requirements.

(a) *Fishing vessel records.* (1) The operator of any fishing vessel conduct-

V 43 / 193

ing any fishing operation subject to this part shall:

(i) Maintain an accurate and complete fishing logbook on forms supplied by the Regional Director, according to the requirements of § 651.5(a)(2);

(ii) Make the fishing logbook available for inspection by an Authorized Officer, or any employee of the National Marine Fisheries Service designated by the Regional Director to make such inspection, at any time during or after a trip;

(iii) Keep each fishing logbook for 1 year after the date of the last entry in the logbook;

(iv) Submit fishing logbook reports, as specified in § 651.5(a)(2).

(2) The owner or operator of any fishing vessel conducting any fishing operation subject to this part shall submit a complete fishing logbook report to the Regional Director within 48 hours after the end of any fishing week or fishing trip, whichever is the longer time period. Fishing logbooks shall contain information on a daily basis for the entirety of any trip during which any regulated species are caught, and shall contain information for all fish which are caught.

(3) The Assistant Administrator may revoke, modify, or suspend the permit of a vessel whose owner or operator falsifies or fails to submit the records and reports prescribed by this section, in accordance with the provisions of 50 CFR Part 621.

(b) *Fish dealer or processor reports.* Any person who receives groundfish for a commercial purpose from a fishing vessel subject to this part shall:

(1) File a report with the Regional Director on forms supplied by him, within 48 hours of the end of any fishing week. Such report shall include information on all transfers, purchases or receipts of all fish made during that fishing week; and

(2) Permit an authorized officer, or any employee of the National Marine Fisheries Service designated by the Regional Director to make inspections, to inspect any records of transfers, purchases or receipts of groundfish.

§ 651.6 Vessel identification.

(a) *Official number.* Each fishing vessel subject to this part over 25 feet in length shall display its official number on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck so as to be visible from above. The official number is the documentation number issued by the Coast Guard or the certificate of number issued by a State or by the Coast Guard for undocumented vessels.

(b) *Numerals.* The official number shall be permanently affixed to each vessel subject to this part in contrasting block arabic numerals at least 18 inches in height for vessels over 65 feet and at least 10 inches in height for all other vessels over 25 feet in length.

(c) *Vessel length and number.* The length of a vessel, for purposes of this section, shall be that length set forth by Coast Guard or State records.

(d) *Duties of operator.* The operator of each vessel subject to this part shall:

(1) Keep the identifying markings clearly legible and in good repair; and

(2) Insure that no part of the vessel, its rigging or its fishing gear obstructs the view of the official number from an enforcement vessel or aircraft.

(e) *Nonpermanent markings.* Vessels carrying fishing parties on a per capita basis or by charter must use markings that meet the above requirements, except for the requirement that they be permanently affixed. The nonpermanent markings must be displayed in conformity with the above requirements when the vessel is fishing for groundfish.

§ 651.7 Prohibitions.

It is unlawful for any person to:

(a) Fish for, take, catch or harvest any groundfish in an area specified in § 651.21 during a period in which that area is closed, unless allowed by that section;

(b) Fish for, take, catch, harvest or land any groundfish during a closure under § 651.24, except to the extent allowed by that section;

(c) Fish for, take, catch, harvest or land any groundfish in excess of the fishing vessel's applicable catch limitation, if any, established by § 651.23;

(d) Fish for, catch, take, harvest or land any groundfish caught with nets having smaller than the minimum mesh size allowed by § 651.22 except as provided for under § 651.22(e);

(e) Discard, at sea, any groundfish;

(f) Use any vessel for taking, catching, harvesting or landing of any groundfish unless the vessel has a valid permit issued pursuant to this part, and the permit is on board the vessel;

(g) Fail to report to the Regional Director, within 15 days of any such change, any change in the information contained in a permit application for a vessel;

(h) Falsify or fail to make, keep, maintain, or submit any logbook, or other record or report required by this part;

(i) Refuse to permit an authorized officer, or any employer of the National Marine Fisheries Service designated by the Regional Director to make such inspections, to inspect any logbooks or records relating to the taking, catching, harvesting, landing, purchase or sale of any groundfish;

(j) Make any false statement, oral or written, to an authorized officer, concerning the taking, catching, harvesting, landing, purchase, sale or transfer of any groundfish;

(k) Possess, have custody or control of, ship, transport, offer for sale, sell, purchase, import, or export any groundfish taken in violation of the Act, this part, or any other regulation promulgated under the Act;

(l) Fail to affix and maintain permanent or nonpermanent markings as required by § 651.6;

(m) Refuse to permit an authorized officer to board a fishing vessel subject to such person's control for purposes of conducting any search or inspection in connection with the enforcement of this Act, this part, or any other regulation promulgated under the Act;

(n) Forcibly assault, resist, oppose, impede, intimidate or interfere with any authorized officer in the conduct of any inspection or search described in paragraph (m) of this section;

(o) Resist a lawful arrest for any act prohibited by this part;

(p) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person, with the knowledge that such other person has committed any act prohibited by this part;

(q) Interefere with, obstruct, delay, or prevent by any means the lawful investigation or search in the process of enforcing this Act;

(r) Fail to comply with enforcement and boarding procedures specified in § 651.8;

(s) Violate any other provision of this part, the Act, or any other regulation promulgated pursuant thereto.

§ 651.8 Enforcement.

(a) *General.* The owner or operator of any fishing vessel subject to this part shall immediately comply with instructions issued by an authorized officer to facilitate safe boarding and inspection of the vessel, its gear, equipment, logbook, and catch for purposes of enforcing the Act and this part.

(b) *Signals.* Upon being approached by a Coast Guard cutter or aircraft, or other vessel or aircraft authorized to enforce the Act, the operator of a fishing vessel shall be alert for signals conveying enforcement instructions. The following signals extracted from the International Code of Signals are among those which may be used:

(1) "L" meaning "You should stop your vessel instantly,"

(2) "SQ3" meaning "You should stop or heave to; I am going to board you," and

(3) "AA AA AA etc.," which is the call to an unknown station, to which the signaled vessel must respond by illuminating the vessel identification required by § 651.6(a).

(c) *Boarding.* A vessel signaled to stop or heave to for boarding shall:

(1) Stop immediately and lay to or maneuver in such a way so as to permit the authorized officer and his/her party to come aboard;

(2) Provide a ladder for the authorized officer and his/her party;

(3) When necessary to facilitate the boarding, provide a man rope, safety line and illumination for the ladder; and

(4) Take such other actions as are necessary to insure the safety of the authorized officer and his/her party and to facilitate the boarding.

§ 651.9 Penalties.

Any person or fishing vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forfeiture provisions of the Act, and to 50 CFR Parts 620 (Citations) and 621 (Civil Procedures), and other applicable Federal law.

OCT 4 1978

Subpart B—Management Measures

§ 651.20 General limitations.

(a) *Fishing year.* The fishing year for groundfish begins on October 1 and ends on September 30.

(b) *Headboat and charter boat quotas.* Quotas limiting the amount of groundfish which may be taken during the fishing year by headboats and charter boats are: For cod in the Gulf of Maine, 2,500 metric tons; for haddock in all areas, 2,000 metric tons.

(c) *Other quotas.* Quarterly and annual quotas limiting the amount of groundfish which may be taken by commercial and recreational vessels subject to this part are set forth in appendix A to this part. The quotas for cod and haddock apply only to commercial fishing vessels. The quotas for yellowtail flounder apply to commercial and recreational fishing vessels.

(d) *Adjustment of quarterly quotas.* The Assistant Administrator may adjust the quarterly quotas set forth in appendix A in the following circumstances:

(1) If a quarterly quota is not reached, to add the surplus onto quotas in subsequent quarters;

(2) If a quarterly quota is exceeded, to deduct the overage from quotas in subsequent quarters.

§ 651.21 Closed areas.

(a) *General.* Except as allowed by paragraph (b) of this section, during the months of March, April and May, no person may fish for, catch, take or harvest any groundfish within the following areas:

(1) An area known as closed area I bounded by straight lines connected by the following coordinates in the order stated:

69°55' W., 42°10' N.; 69°10' W., 41°10' N.; 68°30' W., 41°35' N.; 68°45' W., 41°50' N.; 69°00' W., 41°50' N.;

(2) An area known as closed area II bounded by straight lines connected by the following coordinates in the order stated:

67°00' W., 42°20' N.; 67°00' W., 41°15' N.; 65°40' W., 41°15' N.; 65°40' W., 42°00' N.; 66°00' W., 42°40' N.;

(b) *Exceptions.* Paragraph (a) of this section shall not apply to:

(1) Vessels that fish in closed area I with hooks having a gape of not less than 1.18 inches;

(2) Vessels that fish in either closed area I or II or both using only the following fishing gear:

(i) Pot gear designed and used to take lobster; or

(ii) Dredges designed and used to take scallops.

(c) *Prohibition.* It shall be unlawful for any person fishing in closed areas I or II to attach any protective device to midwater fishing gear or to employ any modification to any gear that would, in effect, make it possible to fish for groundfish.

§ 651.22 Vessel class and gear limitations

(a) *Vessel classes.* The following vessel classes are established:

(1) Mobile gear

(i) 0–60 gross registered tons.

(ii) 61–125 gross registered tons.

(iii) Over 125 gross registered tons.

(2) Fixed gear.

(3) Charter boats and headboats.

(4) Recreational. All other vessels, including but not limited to those using hand-held hook and line and jig lines, shall be treated as recreational vessels.

(b) *Trawl nets.* Except as provided in paragraph (e) of this section, the minimum mesh size for any trawl net used by a vessel subject to this part is 5⅛ inches in the cod end, and 4½ inches in the body of the net.

(c) *Gill nets.* Except as provided in paragraph (e) of this section, the minimum mesh size for any gill net used by a vessel subject to this part is 5½ inches.

(d) *Mesh measurements.* Mesh sizes are measured when wet after use by a wedge-shaped gauge having a taper of 2 centimeters in 8 centimeters and a thickness of 2.3 millimeters, inserted into the meshes under pressure or pull of 5 kilograms. The mesh size of the body of the net shall be the average of the measurements of any series of 20 consecutive meshes. The cod end shall be measured in the same manner at least 10 meshes from the lacings, beginning at the after end and running parallel to the long axis.

(e) *Exceptions.* The mesh size limitations contained in paragraphs (b) and (c) of this section do not apply to a vessel which can demonstrate that its catch of groundfish for the entire trip:

(1) Is less than each of the following amounts:

(i) The larger of 1,000 pounds or 10 percent of the total fish landed, by weight, for any groundfish species;

(ii) The amount allowed under any applicable catch limitation established under § 651.23;

(iii) During a closure, the amount allowed under incidental catch provisions contained in § 651.24(d); and

(2) Includes at least 2,000 pounds of fish other than groundfish caught on the same trip (this subparagraph (2) does not apply to vessels in the northern shrimp fishery).

§ 651.23 Catch limitations

(a) *General.* Appendix B to this part sets forth the catch limitations which govern fishing for groundfish.

(b) *Overruns.* A mobile-gear vessel may overrun its applicable trip limitation for cod and haddock, as set forth in appendix B to this part. The amount of any overrun will be deducted from the vessel's limitation for the following week. No overruns are allowed for fixed-gear vessels or for yellowtail flounder.

(c) *Fishing weeks.* For purposes of this section, a vessel which is at sea during more than 1 fishing week may count its fish against any fishing week during which fishing was conducted on that trip. However, a vessel whose logbook fails to indicate when fishing was conducted shall have its fish counted against the fishing week in which they were landed.

(d) *Cod and haddock.* The catch limitations in appendix B govern the amount of cod and haddock which may be caught, taken, harvested or landed during a fishing week.

(e) *Yellowtail flounder.* The catch limitations in appendix B govern the amount of yellowtail flounder which may be caught, taken, harvested or landed during a trip or during a fishing week, whichever time period is longer.

(f) *Adjustments.* (1) The Assistant Administrator shall, upon a finding that any vessel class in any area is likely to exceed its quarterly quota for any species, adjust the limitations and overrun allowances set forth in appendix B to this part for any or all such species and vessel classes, if he finds such adjustment necessary to achieve any of the following purposes:

(i) To spread fishing effort over the entire quarter;

(ii) To reduce the need for quarterly or annual closures;

V 43/193 OCT 4 78 UMI

(iii) To allow each of the vessel classes to harvest its historic percentage of the catch.

(2) In making the findings and adjustments referred to in subparagraph (1) of this paragraph, the Assistant Administrator shall consider:

(i) Landings for the current or previous quarters;

(ii) Projected harvests;

(iii) Geographic and seasonal availability of fish;

(iv) Traditional and anticipated fishing patterns;

(v) Number of vessels of each class in the fishery;

(vi) Capability of vessels to fish in other locations or for other species;

(vii) Status of unregulated species in the trawl fishery; and

(viii) Incidental catch of cod, haddock, and yellowtail flounder during fishing for unregulated species.

§ 651.21 Closures.

(a) *Projected catch.* The Regional Director shall monitor catches and landings of groundfish, and other data, and shall, on or about the 1st and 16th day of each month, project a date when the allocation of any species of groundfish, by vessel class, less an anticipated amount of such species to be taken incidentally pursuant to paragraph (d) of this section, below, shall have been taken for each relevant area and quarterly or annual period.

(b) *Recommendation of closure.* As soon as possible after projecting a closure date pursuant to paragraph (a) of this section, if such closure date is within 30 days of the projection, the Regional Director shall recommend to the Assistant Administrator that the groundfish fishery be closed on that date for the relevant species, vessel class, area, and quarter or fishing year. The Regional Director may, based upon subsequent information, rescind or revise such recommendation at any time before the Assistant Administrator has taken action pursuant to paragraph (c) of this section.

(c) *Notice of closure.* The Assistant Administrator shall, by publication in the FEDERAL REGISTER, close the fishery for groundfish for the relevant species, vessel class, and area, on the date recommended under paragraph (b) of this section or on such other date as the Assistant Administrator determines will prevent the quarterly or annual quota from being exceeded.

(d) *Incidental catch.* During any closure, any vessel in the following vessel classes to which the closure applies may catch, take, harvest or land no more than the following amounts of the species to which the closure applies:

(1) Cod and haddock:

0 to 60 GRT—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

61 to 125 GRT—1,000 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

Over 125 GRT—2,000 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

Fixed gear—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

(2) Yellowtail flounder:

All vessels—500 pounds or 4 percent by weight of all fish on board, whichever is the lesser amount, per trip.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Parts 1064 and 1065]

[Docket Nos. AO 23-A51 and AO-86-A38]

MILK IN THE GREATER KANSAS CITY AND NEBRASKA-WESTERN IOWA MARKETING AREAS

Hearing on Proposed Amendments to Tentative Marketing Agreements and Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: The hearing is being held to consider a cooperative association's proposal to amend the Greater Kansas City and Nebraska-Western Iowa milk marketing orders. The proposal would increase the funding rate for the advertising and promotion programs of each order and would tie the rate to the level of producers' pay prices. The rate under each order is now at a fixed level. The cooperative association contends that the requested change for each order is needed to keep the funding rate current with the inflationary trend in the economy.

DATE: October 23, 1978.

ADDRESS: Airport Ramada Inn, 2002 Locust East, Omaha, Nebr. 68110.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7183.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public hearing to be held at the Airport Ramada Inn, 2002 Locust East, Omaha, Nebr., beginning at 1:30 p.m. on October 23, 1978, with respect to proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in the Greater Kansas City and Nebraska-Western Iowa marketing areas.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreements and orders.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 1

Amend the Greater Kansas City and Nebraska-Western Iowa orders by changing the funding rate for the advertising and promotion programs of each order from a 5 cent per hundredweight assessment to a rate determined yearly by multiplying the average of each order's uniform price for the last quarter of the year by 0.75 percent and rounded to the nearest full cent. The resulting figure would be the funding rate beginning the following April and would continue for a 12 month period until the procedure was repeated. This proposal would require conforming changes in several sections of each order.

PROPOSED BY THE DAIRY DIVISION AGRICULTURAL MARKETING SERVICE

PROPOSAL NO. 2

Make such changes as may be necessary to make the entire marketing agreements and orders conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and orders may be procured from the Market Administrator, U. Grant Grayson, P.O. Box 4606, Overland Park, Kans. 66204; or from the Hearing Clerk, Room 1077-South Building, U.S. Department of Agriculture, Washington, D.C. 20250, or may be there inspected.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture.
Office of the Administrator, Agricultural Marketing Service.
Office of the General Counsel.
Dairy Division, Agricultural Marketing Service (Washington office only).
Office of the Market Administrator, Greater Kansas City and Nebraska-Western Iowa marketing areas.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Signed at Washington, D.C., on: September 29, 1978.

JAMES E. SPRINGFIELD,
Acting Deputy Administrator, Marketing Program Operations.

[Docket No. AO-86-A39]

MILK IN NEBRASKA-WESTERN IOWA MARKETING AREA

Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: The hearing is being held to consider industry proposals to amend certain provisions of the Nebraska-Western Iowa milk marketing order. The major proposals would modify the shipping requirements for pool supply plants, change the Class I price structure within the marketing area, modify location adjustment provisions and revise the diversion limitations on producer milk. Proponents contend that the requested order changes are needed to reflect changed marketing conditions and to insure orderly marketing in the area.

DATE: October 24, 1978.

ADDRESS: Airport Ramada Inn, 2002 Locust East, Omaha, Nebr. 68110.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7183.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public

V 43 / 193

hearing to be held at the Airport Ramada Inn, 2002 Locust East, Omaha, Nebr., beginning at 9:30 a.m., local time, October 24, 1978, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Nebraska-Western Iowa marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

Proposals 13 and 15 redefine the territory included in the present pricing zones of the marketing area. Such proposals do not open for consideration at the hearing any changes in the presently defined marketing area.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 1

Amend the pool plant provisions of § 1065.7(b) to provide that a supply plant must ship 50 percent of its receipts of grade A milk from dairy farmers (including receipts of producer milk diverted from the plant pursuant to § 1065.13) and handlers described in § 1065.9(c) to a pool distributing plant(s) during each of the months of September through December and 30 percent of such receipts during each of the months of January through August. The percentages specified in this paragraph may be increased or decreased up to 20 percentage points by the market administrator if he finds such revision is necessary to obtain needed milk shipments or to prevent uneconomical shipments. Before making such a finding the market administrator shall investigate the need for revision either on his own initiative or at the request of interested persons and, if his investigation shows that a revision might be appropriate, he shall issue a notice stating that revision is being considered and inviting data, views and arguments with respect to the proposed revision.

PROPOSED BY WELLS DAIRY, INC.

PROPOSAL NO. 2

Amend § 1065.7(b), *Pool plant*, to provide for a 60 percent minimum shipping requirement for the pooling of a supply plant each month of the year, except that if the plant is a pool supply plant in each of the months of August through December, the shipping requirement for the succeeding months of January through July shall be a minimum of 40 percent.

PROPOSED BY ROBERTS DAIRY CO.

PROPOSAL NO. 3

Amend § 1065.7(b), *Pool plant*, to change the minimum 40 percent shipping requirement now required for the pooling of a supply plant to a minimum of 50 percent, to be applicable for each month of the year.

PROPOSED BY FAIRMONT FOODS CO.

PROPOSAL NO. 4

Amend § 1065.7(b), *Pool plant*, as follows:

Eliminate the present minimum pooling requirements for supply plants and provide that the market administrator announce on the 5th day of the month the shipping requirement for the following month, such shipping requirement to be about 90 percent of the projected Class I utilization.

PROPOSED BY ASSOCIATED MILK PRODUCERS, INC.

PROPOSAL NO. 5

Amend § 1065.7(b), *Pool plant*, to provide that a cooperative association that operates a supply plant may include as qualifying shipments its deliveries to pool distributing plants directly from farms of producers pursuant to § 1065.9(c).

PROPOSED BY KRAFT, INC.

PROPOSAL NO. 6

Amend § 1065.7 by deleting the present provisions of paragraph (b) and substituting the following:

§ 1065.7 Pool plant.

* * * * * *

(b) A supply plant:

(1) From which the volume of fluid milk products, except filled milk, shipped during the month to pool plants qualified pursuant to paragraph (a) of this section (excluding fluid milk products transferred from any such distributing plant to the supply plant or to any other plant operated by the operator of the supply plant) is not less than 40 percent of the Grade A milk received at such plant from dairy farmers (including receipts of producer milk diverted from the plant pursuant to § 1065.13) and handlers described in § 1065.9(c) (except receipts of milk diverted pursuant to § 1065.13) during such month. A supply plant that qualifies as a pool plant in each of the immediately preceding months of September through December shall be a pool plant for the months of January through August unless the plant operator requests of the market administrator, in writing, that such plant not be a pool plant, such nonpool plant status to be effective the first month following such notice and thereafter until the plant again qualifies as a pool plant on the basis of shipments.

(i) A cooperative association that operates a supply plant may include as qualifying shipments its deliveries to pool distributing plants directly from farms of producers.

(ii) A proprietary handler may include as qualifying shipments milk diverted to pool distributing plants pursuant to § 1065.13(d).

(2) Or, located within 100 miles of the nearest edge of the marketing area, by

(i) Giving notification to each Order 65 pool distributing plant, with copy to the market administrator, on or before the 20th day of the month, of the supply plant's schedule of its estimate of the pounds of milk, by days, for the ensuing month that such plant shall have available for delivery to Order 65 pool distributing plants";

(ii) Delivering to such distributing plants according to a schedule, providing for 24 hours advance notice, directed by the market administrator (except in case of deliveries not made by reason of Act-of-God, catastrophe, strike, labor dispute or similar unusual event), such deliveries for any day not to exceed 90 percent of the producer milk received by the supply plant on that day and the total of such deliveries for the month not to exceed the quantity obtained by applying the percentage of the Class I utilization of the Order 65 producer milk for the same month of the previous year to the receipts of producer milk at such supply plant during the current month.

PROPOSAL NO. 7

Amend § 1065.13 by deleting the present provisions and substituting the following:

§ 1065.13 Producer milk.

"Producer milk" of each handler means all skim milk and butterfat contained in milk from producers that is:

(a) Received at a pool plant directly from a producer or a handler described in § 1065.9(c).

(b) Received by a handler described in § 1065.9(c) from producers in excess of the quantity delivered to pool plants; or

(c) Received from producers by a handler described in § 1065.9(b), subject to the conditions stated in paragraph (d) of this section.

(d) Diverted from the pool plant of a propietary handler for the account of the handler operating such plant to another pool plant; or diverted from a pool plant to a nonpool plant (other than a producer-handler plant) for the account of the handler operating such plant or for the account of a handler described in § 1065.9(b), subject to the following conditions:

(1) A cooperative association handler described in § 1065.9(b) may divert to nonpool plants for its account the milk of any member producer if at least 2 days' production of such producer milk is received at a pool plant(s) during the month. The total quantity of milk so diverted to nonpool plants by the cooperative association handler shall not exceed, in each of the months of January, February, March, September, October and November, 30 percent, and in any other month 40 percent of the larger of:

(i) The total quantity of milk of member producers received at all pool plants during the current month; or

(ii) The average daily quantity of milk of member producers received at all pool plants during the immediately preceding month, multiplied by the number of days in the current month;

(2) A handler, other than a cooperative association, in his capacity as the operator of a pool plant, may divert to nonpool plants for his account the milk of any producer other than a member of a cooperative association, if at least 2 days' production of such producer milk is received at a pool plant(s) during the month. The total quantity of milk so diverted to nonpool plants by the handler shall not exceed, in each of the months of January, February, March, September, October, and November, 30 percent, and in any other month 40 percent, of the larger of:

(i) The total quantity of milk of producers received at his pool plant(s) during the current month exclusive of milk received from producers who are members of a cooperative association; or

(ii) The average daily quantity of milk of producers received at his pool plant(s) and diverted from such plant(s) during the immediately preceding month, exclusive of milk received from producers who are members of a cooperative association, multiplied by the number of days in the current month;

(3) In the event the quantity of milk diverted is in excess of the applicable quantity specified in paragraph (d)(1) and (2) of this section, the diverting handler may designate the dairy farmers whose milk will not be producer milk, otherwise the milk last diverted in lots of an entire day's production shall be excluded first in determining which milk shall not be producer milk; and

(4) For the purpose of location adjustment pursuant to §§ 1065.52 and 1065.75, milk so diverted shall be priced at the location of the plant to which diverted.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 8

Amend § 1065.13(c)(1) and (2) may be increased or decreased up to 20 percentage points by the market administrator if he finds such revision is necessary to obtain needed milk shipments or to prevent uneconomical shipments. Before making such a finding the market administrator shall investigate the need for revision either on his own initiative or at the request of interested persons, and if his investigation shows that a revision might be appropriate, he shall issue a notice stating that revision is being considered and inviting data, views and arguments with respect to the proposed revision.

PROPOSED BY ASSOCIATED MILK PRODUCERS, INC.

PROPOSAL NO. 9

Amend § 1065.13 by revising paragraph (c)(1) to read as follows:

§ 1065.13 Producer milk.

* * * * * *

(c) * * *

(1) A cooperative association handler described in § 1065.9(b) may divert for its account the milk of any member producer if at least 1 day's production of such milk producer milk is received at a pool plant(s) during the month. The total quantity of milk so diverted by the cooperative handler shall not exceed, in each of the months of September through December, 40 percent, and in the months of January through August, 50 percent, of the total quantity of milk of producer members received at or diverted from all pool plants during the current month.

* * * * * *

PROPOSED BY KRAFT, INC.

PROPOSAL NO. 10

Revise § 1065.41(b)(2) by replacing the words "except that" with the words "and milk diverted to such plant from another pool plant, except that in either case".

PROPOSAL NO. 11

Amend § 1065.42 by revising paragraph (a) as follows:

§ 1065.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant or by a handler described in § 1065.9(c) to another handler's pool plant shall be classified as follows:

(1) Such transfers from a pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers or diversions shall be subject to the following conditions:

(i) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee plant or the divertee plant after the computations pursuant to § 1065.44(a)(12) and the corresponding step of § 1065.44(b);

(ii) If the transferor plant or divertor plant received during the month other source milk to be allocated pursuant to § 1065.44(a)(7) or the corresponding step of § 1065.44(b); the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(iii) If the transferor handler or divertor plant received during the month other source milk to be allocated pursuant to § 1065.44(a)(11) or (12) or the corresponding steps of § 1065.44(b) the skim milk or butterfat so transferred or diverted up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent that would be the case if the other source milk had been received at the transferee plant or divertee plant.

* * * * * *

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 12

Amend § 1065.45(d), *Market administrator's reports and announcements concerning classification*, to provide that the report to a cooperative that so requests the amount and class utilization of milk received by each handler shall also include shipments of supply plant milk.

PROPOSED BY ROBERTS DAIRY CO.

PROPOSAL NO. 13

a. Amend § 1065.2 (a) and (b), *Nebraska-Western Iowa marketing area*, to combine Zones 1 and 2 into a single zone for pricing purposes;

OCT 4 1978

V 43 1 93
OCT 4 78

b. Amend § 1065.50(a) *Class I price,* to apply the $1.60 price adjustment to the combined Zones 1 and 2 pricing area and change the Zone 3 pricing adjustment from $1.75 to $1.70.

PROPOSED BY WELLS DAIRY, INC.

PROPOSAL NO. 14

Amend § 1065.50(a) by changing the price adjustment applicable to Zone 2 from $1.50 to $1.40.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 15

In § 1065.2 (a) and (c) revise the defined areas of Zones 1 and 3 to include in Zone 1 the following Nebraska counties now included in Zone 3; Adams, Buffalo, Custer, Dawson, Franklin, Frontier, Furnas, Gosper, Greeley, Hall, Harlan, Howard, Kearney, Keith, Lincoln, Phelps, Red Willow, Sherman, Valley and Webster.

PROPOSED BY LAND O'LAKES, INC.

PROPOSAL NO. 16

Revise § 1065.52 (a), *Plant location adjustments for handlers,* by deleting the words "more than 100 miles".

PROPOSED BY KRAFT, INC.

PROPOSAL NO. 17

Amend § 1065.73 by revising paragraph (b)(2) to read as follows:

§ 1065.73 Payments to producers and cooperative associations.

* * * * *

(b) * * *

(2) Who had not discontinued shipping milk to such handler, a partial payment with respect to milk received from such producer during the first 15 days of the month an amount per hundredweight not to be less than the uniform price for the preceding month for milk of 3.5 percent butterfat, less proper deductions authorized by such producer.

PROPOSED BY MID-AMERICA DAIRYMEN, INC.

PROPOSAL NO. 18

Amend §§ 1065.71, 1065.72, 1065.73, and 1065.85 to extend the due dates for handler payments as follows:

a. In § 1065.71(a), change "13th" to "15th";

b. In § 1065.72, change "14th" to "16th";

c. In § 1065.73(a), change "15th" to "17th"; and where it appears elsewhere in § 1065.73, change "14th" to the "16th"; and

d. In § 1065.85, change "14th" to "15th".

PROPOSAL NO. 19

Add the provisions of a new section to the order to read as follows:

§ 1065.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to §§ 1065.71, 1065.76, 1065.77(a), 1065.85, and 1065.86, for which remittance has not been made (or, if mailed, postmarked) by the date specified for such payment, shall be increased three-fourths of 1 percent, and any remaining amount due shall be increased at a similar rate on the corresponding day of each month thereafter until paid. The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include unpaid charges previously made pursuant to this section; and for the purpose of this section any obligation that was determined at a date later than prescribed by the order because of a handler's failure to submit a report to the market administrator when due shall be considered to have been payable by the date it would have been due if the report had been filed when due.

PROPOSED BY THE DAIRY DIVISION, AGRICULTURAL MARKETING SERVICE

PROPOSAL NO. 20

Make such changes as may be necessary to make the entire marketing agreement and the order confirm with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the market administrator, U. Grant Grayson, P.O. Box 4606, Overland Park, Kansas 66204; or from the Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D.C. 20250 or may be there inspected.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture.
Office of the Administrator, Agricultural Marketing Service.
Office of General Counsel.
Dairy Division, Agricultural Marketing Service (Washington office only).
Office of the Market Administrator, Nebraska-Western Iowa marketing area.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Signed at Washington, D.C., on: September 29, 1978.

JAMES E. SPRINGFIELD,
Acting deputy Administrator, Marketing Program Operations.

[Amdt. 8]

POTATO RESEARCH AND PROMOTION PLAN

Proposed Amendment Regarding Designated Handler

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites comments on an amendment proposed by the Potato Board to clarify the responsibilities of seed potato handlers regarding assessments. Under the proposed amendment, the seed potato producer would be the handler required to pay assessments unless he can show that the first person who obtained potatoes from him disposed of them other than by planting.

DATE: Comments due by October 19, 1978.

ADDRESSES: Comments may be addressed to the Hearing Clerk, Room 1077-S, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written comments shall be submitted and they will be made available for inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, phone 202-447-6393.

SUPPLEMENTARY INFORMATION: The Potato Board is the administrative agency established by the Potato Research and Promotion Plan (7 CFR Part 1207). The Plan is effective under the Potato Research and Promotion Act (7 U.S.C. 2611-2627).

The proposal is as follows:

In § 1207.512 revise paragraph (a)(8) by adding the following:

§ 1207.512 Designated handler

(8) * * *

However, the seed producer will be the designated handler responsible for filing reports and making payments, unless he can show that the first person who obtained the potatoes from him disposed of them other than by planting. To show this the seed producer must submit to the Potato Board the name and address of the first person who obtained the potatoes from him and an invoice of sale or settlement sheet on which it is indicated that such person will be the designated handler and therefore will be responsible for the payment of the assessments. Only by showing this is the seed producer no longer considered the designated handler and therefore not liable for the assessments.

* * * * *

Dated: September 29, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 146]

FOREIGN-TRADE ZONES

Advance Notice of Proposed Rulemaking Relating to Processing Costs Incurred in Foreign Trade Zones

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Customs includes the cost of processing "nonprivileged" merchandise in a foreign trade zone, and profit realized, in the dutiable value of that merchandise when it enters the Customs territory of the United States. The present policy results in Customs assessing duty on the costs of American labor, overhead and facilities, and profit. This document requests the public to comment on the advisability of a change in appraisement practice so as to exclude the cost of processing and profit realized in a foreign trade zone when determining the dutiable value of articles produced entirely from nonprivileged merchandise (whether foreign or domestic), or from a combination of nonprivileged and privileged merchandise (whether foreign or domestic).

DATE: Comments must be received on or before December 4, 1978.

ADDRESS: Written comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT

R. Keith Thomas, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-2938.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Foreign trade zones ("zone") are established under the Foreign Trade Zones Act (19 U.S.C. 81a-81u) and the general regulations and rules of procedure of the Foreign Trade Zones Board contained in 15 CFR Part 400. Part 146 of the Customs Regulations (19 CFR Part 146) governs the admission of merchandise into a zone; manipulation, manufacture, or exhibition of merchandise in a zone; exportation of merchandise from a zone; and transfer of merchandise from a zone into the Customs territory of the United States ("Customs territory").

Foreign or domestic merchandise may be admitted into a zone for, among other things, manipulation, manufacture, assembly, or other processing, or for storage or exhibition, provided these operations are not otherwise prohibited by law. Normal Customs entry procedures and payment of duty are not required for merchandise located in a zone unless and until the merchandise enters the Customs territory.

Upon approval of the required application filed with the District Director of Customs (19 CFR Part 146 Subpart C), foreign or domestic merchandise may attain "privileged" status. Privileged foreign merchandise is subject to appraisement and tariff classification according to its condition and quantity, and to the rates of duty and tax in force, on the date the application is filed with the district director, regardless of when the merchandise actually leaves the zone and enters the Customs territory. Privileged domestic merchandise may be returned to the Customs territory free of quota, duty or tax. A component of foreign privileged merchandise would be appraised and dutiable in its character and condition on the date the application is filed for privileged status. A component of domestic privileged merchandise would not be included in the dutiable value of the article.

Merchandise admitted to a zone which is not accorded "privileged" status or "zone-restricted" status (as set forth in § 146.25, Customs Regulations (19 CFR 146.25)) is "nonprivileged." Section 146.48(e) of the Customs Regulations (19 CFR 146.48(e)) sets forth the appraisement and tariff classification treatment of articles composed solely of nonprivileged merchandise (whether foreign or domestic) and articles composed both of privileged and nonprivileged merchandise (whether foreign or domestic). Under § 146.48(e), an article composed in whole or in part of nonprivileged merchandise is subject to appraisement and tariff classification according to its character and condition at the time of its "constructive transfer" to the Customs territory. A "constructive transfer" means that the merchandise is considered to have been transferred to the Customs territory without physical removal from the zone, and takes place upon approval of the required application by the district director of Customs.

DISCUSSION

Section 146.48(e) of the Customs Regulations requires the dutiable value of nonprivileged merchandise to be determined under section 402 or 402a of the Tariff Act of 1930, as amended (19 U.S.C. 1401a, 1402). Labor and overhead costs incurred, and profit realized, in the zone are included in the dutiable value of articles composed entirely of, or derived entirely from, foreign or domestic nonprivileged merchandise, and articles composed in part of, or derived in part from, foreign or domestic nonprivileged merchandise and in part of or from foreign or domestic privileged merchandise.

Processing costs and profit attributable to nonprivileged merchandise or nonprivileged components are included in the dutiable value of the article when it subsequently enters the Customs territory. Since 1954 (Treasury Decision 53493(2)) when privileged and nonprivileged components (foreign or domestic) are combined in a zone to produce an article, the processing costs incurred have been distributed between the privileged and nonprivileged components according to their relative values.

For example, if nonprivileged merchandise valued at $200 and privileged merchandise valued at $100 are combined in a zone to manufacture an article, the total value of the components is $300 and the relative value of the nonprivileged merchandise ($200) would be twice the value of the privileged merchandise ($100), or two third the value of all components ($300). If processing costs and profit are $150, the processing costs and profit allocable to be nonprivileged components would be two third of $150, or $100, and would be included in the dutiable value of the article. Therefore, the dutiable value of the article would equal the value of the nonprivileged component ($200) plus the value of the processing cost allocable to the nonprivileged component ($100), or a total of $300. Neither the value of the privileged component ($100) nor the value of the processing cost and profit allocable to the privileged component ($50) is included in the dutiable value. Consequently, the effect of § 146.48(e) is to assess duty on the use of Ameri-

V 4 3 / 1 9 3

can labor and facilities, overhead expenses, and profits, thus increasing the cost of utilizing a zone.

COMMENTS

The Customs Service invites written comments (preferably in quadruplicate) from all interested parties on the advisability of changing its appraisement practice so as to exclude the cost of processing and profit when determining the dutiable value of articles produced entirely or in part from nonprivileged components in foreign trade zones.

Commenters should address themselves to the economic consequences of such a change, as well as to legal and other relevant considerations. (For example, the following questions are relevant: Will a change in appraisement practice encourage foreign investment in the United States, encourage the use of U.S. labor, and encourage exporting from the United States? Will such a change adversely affect U.S. parts manufacturers? Will such a change disadvantage U.S. manufacturers of products which, when imported are dutiable at a lower rate than their constituent parts (e.g., automobiles)?

Comments submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Room 2335, Headquarters, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this document was Todd J. Schneider, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices and the Treasury Department participated in its development.

AUTHORITY

This document is issued under authority of R.S. 251, as amended, (19 U.S.C. 66), and section 8, 48 Stat. 1000 (19 U.S.C. 81h).

R. E. CHASEN,
Commissioner of Customs.

Approved: September 27, 1978.

RICHARD J. DAVIS,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[30 CFR Chapter VII]

[INT DES 78-42]

PERMANENT REGULATORY PROGRAM

Availability of the Draft Environmental Impact Statement

AGENCY: Office of Surface Mining Reclamation and Enforcement, (OSM), U.S. Department of the Interior.

ACTION: Notice of availability of draft programmatic Environmental Impact Statement (DES) analyzing the environmental consequences of the proposed permanent program regulations.

SUMMARY: The Office has prepared a DES in connection with its proposed rulemaking for permanent program regulations under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Copies of this DES are being made available today. Public hearings will be held to receive comments on this DES.

DATES: All comments on the DES must be received by 5 p.m. on November 17, 1978. Public hearings on the DES will occur between October 31, 1978 and November 2, 1978, in Washington, D.C., Denver, Colo., and Indianapolis, Ind.

ADDRESSES: Copies of the DES are available for inspection and copies may be obtained at the following OSM offices:

OSM Headquarters, Department of the Interior, Room 120, 1951 Constitution Ave. NW., Washington, D.C. 20240.
OSM Region I, First Floor—Thomas Hill Building, 950 Kanawha Boulevard, East Charleston, W. Va. 25301, 304-342-8125.
OSM Region II, 530 Gay Street SW., Suite 500, Knoxville, Tenn. 37902, 615-637-8060.
OSM Region III, Federal Building, U.S. Courthouse, 46 East Ohio Street, Indianapolis, Ind. 46205, 317-269-2609.
OSM Region IV, 601 East 12th Street, Room 1768, Kansas City, Mo., 64116, 816-374-5162.
OSM Region V, Room 270—Post Office Building, 1823 Stout Street, Denver, Colo. 80205, 303-837-5511.

Written comments on the DES must be mailed only to the following address: The Office of Surface Mining, U.S. Department of the Interior, P.O. Box 682, Benjamin Franklin Station, Washington, D.C. 20044. Comments may be hand-delivered only to OSM Headquarters, Room 120, at the address given above.

Public comments received on the draft Environmental Impact Statement will be on file and available for inspection at the OSM Headquarters location given above.

FOR FURTHER INFORMATION CONTACT:

Frank Anderson, Chief, Branch of Environmental Analysis, Office of Surface Mining, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-5287.

SUPPLEMENTARY INFORMATION: Pursuant to the National Environmental Policy Act and section 702 of SMCRA, OSM has prepared a draft programmatic Environmental Impact Statement (DES).

OSM has considered the analysis in the DES in the development of the proposed rules published in the FEDERAL REGISTER on September 18, 1978.

The DES evaluates the adverse and beneficial environmental impacts of those regulations issued under section 501(b) of SMCRA. The three major components of the regulations issued under section 501(b) include:

(1) Regulations concerning environmental performance standards, and permit application and bonding requirements;

(2) Regulations covering the procedures for preparaion and submission of State programs for the Secretary's approval and for the substantive review criteria used for approval; and

(3) Regulations governing the development and implementation of a Federal program for a State.

OSM encourages the public to comment on the content and organization of the DES. In particular, OSM solicits comments which point out errors, omissions, and alternatives not yet considered, as well as suggestions as to the titles and locations of recent technical literature or other sources which appear to have not been considered in preparation of the DES. Whenever possible, public comments should be supported by reference to statutes, regulations, legislative history, technical literature, or other source materials.

All comments from the public on the DES will be considered and responses to timely comments prepared for inclusion in the final Environmental Impact Statement expected to be available on or about December 15, 1978.

PUBLIC HEARINGS

Public hearings on the DES will occur between October 31, 1978, and November 2, 1978. The hearings will be located in Washington, D.C., Denver, Colo., and Indianapolis, Ind., at the following locations and on the dates noted:

WASHINGTON, D.C. HEARING

October 31, 1978, Main Auditorium, Department of Interior, 18th and C Streets NW., Washington, D.C.

INDIANAPOLIS, INDIANA HEARING

November 1, 1978, Indiana World War Memorial Auditorium, 431 North Meridian Street, Indianapolis, Ind.

DENVER, COLO. HEARING

November 2, 1978, Room 269, Post Office Building, 1823 Stout Street, Denver, Colo.

Those who desire to speak at any of the public hearings may be scheduled on the programs in advance by telephoning Frank Anderson in Washington, D.C., 202-343-5287. Individual testimony at these hearings will be limited to 15 minutes. The hearings will be transcribed. Filing of a written statement at the time of giving oral testimony will be helpful and will facilitate the job of the court reporter.

The public hearings will commence at 9 local time on the days identified above and will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and who wish to do so will be heard at the end of the scheduled speakers. Persons not scheduled to testify, but wishing to do so, assume the risk of having the public hearing adjourned on any given day unless they are present in the audience at the time all scheduled speakers have been heard.

WRITTEN COMMENTS

Written and oral comments should be as specific as possible. OSM will appreciate any and all comments on the draft programmatic statement, but those most helpful will be comments which include references to source material, including legislative history, technical data and research, and other material which provides a basis for any given recommendation.

An explanation of the rationale for each recommendation should also be given. The final Environmental Impact Statement will respond specifically to all reasonable and substantive comments.

The close of the public comment period on the draft Environmental Impact Statement will coincide with the close of the comment period on the proposed permanent program rulemaking. Therefore, the formal comment period on this draft Environmental Impact Statement will end on November 17, 1978. Comments must be received by 5 p.m. on that date, at the address specified above. Comments received after that time will not be responded to in the final Environmental Impact Statement. OSM cannot insure that comments on the draft Environmental Impact Statement received at or delivered to any other location than specified above during the comment period will be responded to in the final Environmental Impact Statement.

Dated: October 2, 1978.

HOPE M. BABCOCK,
Deputy Assistant Secretary, Energy and Minerals.

Approved:

LARRY E. MEIEROTTO,
Deputy Assistant Secretary for Policy, Budget and Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social and Rehabilitation Service

[45 CFR Parts 206 and 233]

APPLICATION, DETERMINATION OF ELIGIBILITY AND FURNISHING OF ASSISTANCE—PUBLIC ASSISTANCE PROGRAMS

Prior Month Budgeting and Monthly Reporting

COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

Income Averaging

AGENCY: Social Security Administration, HEW.

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: The purpose of this notice is to withdraw notice of proposed rulemaking published in the FEDERAL REGISTER, August 19, 1975 (40 FR 36141), in which it was proposed to require States to utilize a prior month budgeting system and to average income received under contract in calculating AFDC benefits. The regulations also would have required individuals receiving AFDC to make monthly reports about their current income, resources and circumstances to the IV-A Agency.

The proposal is hereby withdrawn. The comments received from States administering the programs and the Department's further study of the proposed regulations revealed that there would be an increase in cost to States, undue hardship on the recipients, difficult administrative problems, and States would have no flexibility in their methods of administration.

FOR FURTHER INFORMATION CONTACT:

Miss Carolyn Peiper, Social Security Administration, Office of Family Assistance, 330 C Street SW., Washington, D.C. 20201, telephone 202-245-0982.

EFFECTIVE DATE: This notice is effective October 4, 1978.

SUPPLEMENTARY INFORMATION:

BACKGROUND

A notice of proposed rulemaking was published in the FEDERAL REGISTER on August 19, 1975 (40 FR 36141). One hundred comments were received from Governors and State agencies, city and county welfare agencies, legal aid groups, Congressmen, other agencies and organizations, and individuals.

Approximately one-third of the comments expressed some support for the proposal—the remainder were opposed. The proposed regulations would have required:

1. That the State plan specify a 30-day budget period and a corresponding payment month.

2. That eligibility and the amount of assistance be established on the basis of circumstances during a fixed budget period. However, this would not preclude a State from promptly terminating or adjusting the assistance payment when it has knowledge of changes in circumstances, other than income changes, subsequent to the budget period and prior to the payment month.

3. That for applicants, the budget period would be the 30-day period immediately prior to the date of application.

4. That the payment month would begin no later than 34 days after the end of the corresponding prior month budget period.

5. That an individual employed under a contract would have the income from such contract apportioned equally over the full period of the contract, even though the income from such contract is received in fewer months than are covered by the contract.

6. That recipients of AFDC must make timely and accurate monthly reports of their current income, resources, and circumstances on forms provided by the State agency.

The Department has reevaluated these provisions in part and has published today proposed regulations which immediately follow this document (FR Doc. 78-27795) and which would provide allowable budgeting methods which States may use to determine financial eligibility and the amount of an assistance payment.

Hence, the withdrawal of the August 19, 1975 notice is considered appropriate at this time.

RESPONDENTS REASONS FOR OPPOSING THE PROPOSED REGULATIONS

The regulation would:

1. Violate section 402(a)(10) of the Social Security Act. This provision of the Act specifies that aid be furnished with reasonable promptness to all eligible individuals.

2. Conflict with the "available income" rule in 45 CFR 233.20.

OCT 4 1978

V 4 3 / 1 9 3

3. Increase general assistance costs.

4. Have the effect of denying aid up to 30 days. Some States do not have an emergency assistance program; even in EA States, the program was not designated to fill the gap.

5. Cause administrative problems in having to figure the budget period for food stamps.

6. Restrict States' flexibility.

7. Result in harassment of recipients and would seem to be another administrative barrier created to prevent giving assistance to eligible individuals.

The proposed regulations are hereby withdrawn.

(Sec. 1102, 49 Stat. 647, 42 U.S.C. 1302).)

(Catalog of Federal Domestic Assistance Program No. 13.761, Public Assistance—Maintenance Assistance (State Aid).)

Dated: June 2, 1978.

Social Security Administration

[45 CFR Part 233]

AID TO FAMILIES WITH DEPENDENT CHILDREN

Need and Amount of Assistant; Methods for Budgeting Income

AGENCY: Social Security Administration, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed amendments to the regulation provide that a State may opt for a prospective (estimated income) or retrospective (actual reported income) budgeting method to determine a recipient's financial eligibility for AFDC and the amount of the assistance payment. States choosing a retrospective method will be required to provide for: (1) supplemental payments in hardship situations if they are unable to disburse the monthly assistance payment with 25 days of the end of the budget month, and (2) monthly income reporting for recipients who have earned income. The method selected by each State will be identified in the State plan. The methods are discussed below.

The proposed amendments would affect recipients of AFDC and the adult assistance titles of the Social Security Act (I, X, XIV, and XVI (AABD)) administered in Guam, Puerto Rico, and the Virgin Islands.

DATE: Comment must be received by December 4, 1978.

ADDRESSES: Prior to final adoption of the proposed amendments to the regulation, consideration will be given to any data, views, or arguments which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Mrs. Constance Katz, 330 C Street SW., Washington, D.C. 20201, telephone 202-245-0982.

SUPPLEMENTARY INFORMATION:

BACKGROUND

The proposed amendments specify the budgeting methods which States are permitted to use in determining financial eligibility for and the amount of the assistance payments under titles I, IV-A, X, XIV, and XVI (AABD) of the Social Security Act. These proposed amendments implement sections 402(a)(5), 402(a)(7), and 402(a)(10) of the Social Security Act covering the title IV-A program (AFDC), and parallel provisions for the other titles. Section 402(a)(5) requires a State plan to "provide such methods of administration • • • as are found by the Secretary to be necessary for the proper and efficient operation of the plan." Section 402(a)(7) requires that a State plan must "provide that the State agency shall, in determining need, take into consideration any other income and resources" of any person claiming AFDC benefits. Section 402(a)(10) requires a State plan to provide that AFDC "shall • • • be furnished with reasonable promptness to all eligible individuals."

PROVISIONS OF THE PROPOSED AMENDMENTS

The proposed amendments require the States to select one of two budgeting methods and to identify that method in the State plan. The first method is a prospective (estimated income) budgeting method. Under this method, the AFDC assistance payment for a particular month is based on an estimate of income the assistance until will receive during that month. The prospective budgeting method has been the most widely used method to measure income under title IV-A.

The second method is a retrospective (actual reported income) budgeting method. Under this method, States have two options. Under the first option the payment for the first 2 months will be based on the prospective budgeting method. Thereafter, the payment for a given month (the payment month) depends directly on the recipient's report of the actual income received in a previous month (the budget month). (For example, a State could examine income in May based upon a report of the recipient in early June, and use that income as the basis for the assistance payment that must be dispensed within 45 days of the end of May.) For purposes of this option, States must disburse the assistance payment within 45 days of the end of the budget month to recipients who have filed on time a completed monthly income report and to those who are not required to file such a report. States selecting this option must also provide supplemental payments within 3 working days upon the request of a recipient, when a significant reduction of income in a payment month results in hardship to the assistance unit.

The second option under retrospective budgeting requires that the payment for the first month is based on a prospective budgeting method. Thereafter, a recipient's assistance payment will be computed under a retrospective budgeting method, based on the recipient's report of actual income received in the budget month. Supplemental payments are not mandatory under this option. To select this option, the State must be able to disburse the assistance payment within 25 days of the end of the budget month to recipients who have filed on time a completed monthly income report and to those who are not required to file such a report.

Under both options of retrospective budgeting, States may limit the monthly reporting requirements to recipients with earned income.

As noted above, the proposed amendments specify the budgeting methods a State may use to measure income and compute the amount of AFDC assistance payments. This clarification is needed because the statute does not speak to the frequency with which income should be measured and reported or the proper correlation between an income measurement period and the date of the corresponding assistance payment. Similarly, regulations to date contain no periodic income reporting rules and no requirement that the amount of AFDC benefits be calculated by reference to income received during a particular interval.

The lack of clarification has resulted in substantial variation among the income reporting and budgeting methods adopted by the States. (See Congressional Research Service, U.S. Library of Congress, Administration of the AFDC program—A Report to the House Committee on Government Operations (1977).) The divergent approaches manifest the considerable independence retained by the States in their administration of the AFDC program. While the budgeting systems adopted by the States have generally been accepted by the Secretary, the absence of specific Federal guidelines has led to uncertainty as to the parameters of Federal law. The proposed amendments are designed to clear up this uncertainty.

The Department published an earlier notice of proposed rulemaking on August 19, 1975 (40 FR 36141), which would have required States to adopt a retrospective, "prior month budgeting system." This NPRM supersedes that notice. The withdrawal notice is published elsewhere in this issue of the FEDERAL REGISTER. The amendments proposed here have been drafted with the benefit of extensive comments on the earlier NPRM received from Governors, State agencies, city and county welfare agencies, legal aid groups, Congressmen, and other organizations and individuals. Provisions that respond to many of the concerns raised by those comments have been incorporated in these proposed amendments. In addition, recent research and demonstration projects conducted by the Department and further State experience with diffrent budgeting methods have provided new evidence on the feasibility of the proposed retrospective budgeting method.

METHODS FOR BUDGETING INCOME

The following paragraphs provide details regarding the proposed amendments, indicate how these amendments respond to some of the concerns raised by the comments with respect to the 1975 notice of proposed rulemaking, and discuss the evidence considered in developing this proposed regulation.

I. PROSPECTIVE BUDGETING

Under this method, financial eligibility for and the amount of the AFDC assistance payment for a month is based on the best estimate of the income to be received by the applicant and recipient during that month. This method codifies into Federal regulations the most widely used method by which States have measured income under the AFDC program. Ideally, a prospective budgeting system would allow adjustments in AFDC assistance to be made immediately after a change in income has occurred or as soon as a change is anticipated. As a practical matter, however, most States are not able to respond immediately to an AFDC recipient's change in income. Income changes may not be discovered for several months, and even if a change is reported promptly, States with prospective budgeting systems normally do not adjust assistance payments until the following month, or later. Thus States have historically been allowed a grace period of at least 60 days within to make adjustements in AFDC assistance payments after a change in income has come to the attention of the State. Moreover, a prospective budgeting system is necessarily imprecise because it is based on estimates of income rather than actual income. When a change in income occurs and an adjustment in the amount of the assistance payment is not made in a timely fashion, an underpayment or overpayment may result.

II. RETROSPECTIVE BUDGETING

The proposed retrospective budgeting method, which bases assistance payments on acutal rather than estimate measures of income, has been recommended as a means by which program error rates can be reduced and changes in recipient's income can be more rapidly and more accurately addressed. Under this method, financial eligibility for and the amount of the assistance payment is based on actual income and resources of the AFDC assistance unit. The assistance unit is required to report on a monthly basis the income it has received in a "budget month." The amount of income and resources reported is then used to compute the amount of the assistance payment in the corresponding payment month. The payment thus computed is considered to be the correct payment for the payment month. States at their discretion may limit the monthly reporting requirement to AFDC assistance units with earned income.

As noted above, States may select one of two options under retrospective budgeting. Under the first retrospective budgeting option, income will be measured using the prospective budgeting method for the initial 2 months of eligibility. This is a departure from the 1975 NPRM, which mandated use of the 30-day period to application as the budget month. Many of the comments on the NPRM viewed the 30-day period as imposing a waiting period for assistance in violation of section 402(a)(10) of the Social Security Act, 42 U.S.C. 602(a)(10), as well as increasing the use of State funded general assistance programs. In response to these concerns, this retrospective budgeting method adopts the suggestions of several commentors that income be measured prospectively for at least the first month of eligibility. For months subsequent to the initial 2 months, assistance payments are computed under a retrospective budgeting method in which States are required to disburse assistance payments within 45 days after the end of the budget month to recipients who file on time a completed monthly income report and to those who are required to file such a report.

This option also recognizes that the 45-day period between the budget month and the payment month may result in hardship to recipients who suffer a sudden and significant loss of income. To cushion this hardship, States adopting the first option under retrospective budgeting must provide, if requested by the beneficiary, supplemental payments in all instances where a significant reduction in income, which is not reflected in the corresponding budget month, results in a situation in which the recipient has insufficient funds to meet his or her needs at least for housing, utilities, or food under the State's standard of need. The supplemental payment is not considered to be part of the State standard of need as determined under section 233.20(a)(2) (i) and (v). The supplemental payment must equal at least the difference between 75 percent of the amount of a State's payments for a like family with no income and the total income and liquid resources available to the assistance unit during the payment month.

For the purpose of these supplemental payments, total income and liquid resources include the monthly assistance payment and any income or liquid resources received by or available to the unit. The State, at its option, may include any amounts disregarded in determining need and the amount of the assistance payment, unless that income or liquid resource is set aside for a specific purpose under section 233.20(a)(4)(ii).

The Department does not believe that it should require supplemental payments equal to the difference between the full amount of a State's payment for a like family with no income and the total income and liquid resources available to the assistance unit. Such an approach would be inconsistent with the concept of the supplemental payment as minimal assistance necessary for an assistance unit to maintain itself, if a drop in income occurs, until the budgeting method compensates for that drop. For similar reasons the Department believes that a State should be allowed to include sums disregarded in computing monthly entitlements when the State computes the amount of the supplemental payment; these sums are in fact available to the family in the

OCT 4 1978

V 43 / 193

situation which gives rise to the supplemental payment. Yet, the Department feels obligated to establish some minimum supplemental payment so that assistance units which experience a loss of income that leads to hardship will have available some meaningful level of temporary aid. Setting the minimum at 75 percent of the payment standard, the Department feels, can yield a sufficient supplemental payment to tide a family over a hardship period caused by loss of income while, at the same time, reinforcing the concept that the supplemental payment should be used only where there is significant need. In addition, we believe the 75 percent minimum strikes a balance between the need to provide hardship aid in a retrospective system and significant fiscal pressures which exist both at the Federal level and in the States. The Department specifically solicits comment on the 75 percent minimum.

Under the second retrospective budgeting option, the assistance payment for the first month is computed using a prospective budgeting method. As in the first option, this responds to the comments on the 1975 NPRM regarding the determination of assistance in the month of application. Thereafter, assistance payments are computed under a retrospective system in which States are required to disburse assistance payments within 25 days of the end of the budget month to recipients who timely file a completed monthly income report and to those who need not file a report. By meeting this requirement, the potential hardship caused by a reduction of income will be mitigated. This requirement will insure that adjustments in the amount of the assistance payment will, in most cases, be effected at least as rapidly as similar adjustments under a prospective budgeting system and with greater accuracy.

Under the prospective budgeting method, if an adjustment to benefit levels is not made in the month that the change occurred, an underpayment or overpayment may result because the estimated income and resources do not match reality. Under a retrospective system, the assistance payment is correct in the payment month because it is based on actual income. Thus, States that disburse assistance payments withing 25 days of the end of the budget month are not required to adopt a system of mandatory supplemental payments. However, States may elect to make supplemental payments under the proposed section 233.20(a)(2)(ix)(*a*)(*2*). Since such payments are at State option, the Department does not believe that it should require a minimum payment standard.

State experience with retrospective budgeting and monthly reporting systems. Retrospective budgeting systems are not new. Their feasibility is demonstrated by the fact that in recent years a number of States have adopted such systems. While these systems vary somewhat in the reporting requirements they place on recipients, and the speed with which the reports are processed and payment made, they have three principal features in common: (1) There is a mandatory reporting requirement for at least some portion of the caseload; (2) benefits for ongoing cases are based on actual income reported for a prior month; and (3) the system is supported by an automated data processing capability. The States' experience to date with monthly retrospective budgeting systems indicates: (a) Such systems are administratively feasible; (b) recipients can master the reporting requirements; (c) the systems are responsive to changes in recipients' circumstances; and (d) the systems can contribute to lower error rates by basing payments on actual rather than estimated income, by clarifying reporting requirements for recipients and by organizing the flow of information important to the administering agency.

The evidence on actual income budgeting systems derives from the experience of several States including California, Michigan, and Oregon; and from an HEW supported experimental pilot project in Denver and Boulder, Colo. In the latter project 10 percent of the Denver County AFDC caseload was randomly assigned to an automated monthly reporting system. A comparable number of AFDC cases were randomly assigned to control status with the existing Denver County AFDC system. This procedure permitted evaluators to develop statistically reliable measures of the impact on total grant payments, average grant sizes, turnovers, discontinuance, and other items of interest. At the same time, the entire AFDC caseload of Boulder County, Colo., was converted to a retrospective budgeting system with a monthly reporting requirement. This test enabled evaluators to assess the impact on administrative functioning, performance, and cost.

(a) *Administrative feasibility.* Several States have now amassed considerable experience in the administration of retrospective budgeting systems with monthly reporting requirements. California adopted the system in 1973, and has demonstrated that regular reporting is feasible in large urban areas, such as Los Angeles County, with dense and mobile caseloads. Michigan has successfully administered a retrospective budgeting system with a monthly reporting requirement statewide for recipients with earned income and for all recipients in two counties. The State of Colorado has successfully administered a pilot monthly reporting project in two counties. Oregon has administered a retrospective budgeting system with a monthly reporting requirement for AFDC cased identified as regular earners.

Collectively, these State experiences demonstrate that monthly actual income reporting systems can be operated in a variety of settings, with regular income maintenance staff, and with varying degrees of data processing suport. Administrators, associated with these systems report an improved ability to track, process, and manage assistance cases. They are also of the opinion that these systems contribute to an improved ability to organize workload and staff, and identify areas where greater administrative effort is required.

(b) *The reporting requirement.* The breadth of State experience with mandatory reporting requirements in retrospective budgeting systems indicates that recipients can manage the requirements of periodic reporting. The Department is in the process of completing an indepth study of the nature of the reporting burden on recipients within the Colorado project. Preliminary results from this study indicate that on the basis of objective measures of burden (e.g., amount of time spent completing reports), the time and effort that recipients must devote to a monthly reporting requirement is comparable to the reporting burden imposed by prospective AFDC systems.

Moreover, administrative data from Denver County indicate that between 80 and 90 percent of all reports are filed within 5 days after close of the budget month. Approximately 50 percent of all reports are processed without further action by either recipients or caseworkers.

The Department recognizes that a periodic reporting requirement shifts somewhat the traditional allocation of responsibilities under the AFDC program by asking recipients to play a greater role in the regular provision of information to the administering agency. The Department believes, however, that such a shift can contribute to improved program administration without imposing an unwarranted burden on recipients. Moreover, permitting some State discretion in the imposition of reporting requirements will encourage the development of further refinements in repoeting procedures that can reduce the burden on recipients.

(c) *Responsiveness.* Responsiveness is a measure of the extent to which the assistance payment is adjusted to reflect changes in recipient circumstance. Data drawn from the Colorado project indicate that retrospective budgeting with monthly reporting identifies 2½ times as many status and income changes that affect the assistance payment than the more commonly used prospective budgeting systems which only require a report upon a change in circumstances or at the time of a regularly scheduled redetermination. The assistance payments, therefore, change more rapidly as recipients' circumstances change.

The Colorado project also provides evidence that the retrospective budgeting system reduces total outlays for assistance payments by approximately 5 percent. This outcome results primarily from the rapid identification of terminating cases. There is no evidence that the system is terminating otherwise eligible cases. The department is concerned, of course, that this should not occur.

Data drawn from Boulder County also indicate that a monthly retrospective budgeting system with a monthly reporting rrequirement reduces the incidence of payment reconciliations, recoupments, and stopped checks. Such actions can be burdensome to administrators and recipients. Moreover, such adjustments are often unresponsive to recipient needs in that they take time to process and may become effective well after the change in income has occurred.

(d) *Error rates.* Quality control payment error rates in California declined from over 12 percent to less than 5 percent between 1973 and 1977 after the introduction of its retrospective budgeting system. About one-half of this reduction was attributable to lower client reporting error. Although California's administering agencies have instituted a number of management reforms that may have been responsible for the decline in agency errors, monthly reporting was the main initiative that affected the manner in which client information reaches the agency. Thus, a substantial portion of the reduction in client-related errors appears to be related to monthly reporting. The Department believes that States which adopt a retrospective budgeting method with its monthly reporting requirement will add further evidence on the impact of this method on error rates. The Department does not assume that a retrospective budgeting method is the only way to reduce eligibility and payment errors, merely that it is a promising approach to this desirable goal.

Based on the evidence to date, the Department believes that retrospective budgeting will contribute to the proper and efficient administration of title IV-A. Because assistance payments will be based on known circumstances rather than future estimates of income; the accuracy and responsiveness of the system can be improved. At the same time, through the provision of supplementary payments, States will have the flexibility to assist recipients who suffer hardship due to a significant change in income.

The retrospective budgeting method with its monthly reporting requirement generates information on a regular basis which the administering agency must act upon, and thus requires a higher level of data processing capability than is needed in the prospective budgeting method. The Department is concerned that all States act to improve their data processing capability in a manner that is commensurate with their needs. A retrospective budgeting system places an obligation on States, however, to provide an adequate data processing support system as the agency must be able to respond to recipient generated changes within the next payment cycle. While the Department believes that all States should process recipient reported changes promptly and adjust future payments accordingly, States electing to use a retrospective budgeting method have a special duty to perform this task rapidly so that the information on which benefits are to be based is as current as possible.

Under the Colorado project, the administering agency is able to process income reports and pay most recipients (80 to 90 percent), 16 days after the close of the reporting period, although 23 days is allowed for this process. The Department recognizes that not all States currently have the capability to meet this standard. It is desirable, nevertheless, to propose a processing standard that will encourage States to respond rapidly to meet the needs of recipients who have fulfilled their obligation to report in a timely manner. Such a standard conforms with the traditional 60-day grace period within which States have been allowed to make adjustments to assistance payments after a change in income has been brought to their attention. A 25-day processing and payment standard will permit States to respond to new information and provide recipients whose income changes with adequate and timely assistance. A 25-day period is consistent with the data processing capability that is now available to administering agencies.

Despite the advantages that can result from retrospective budgeting, the Department does not believe that it is desirable to mandate such a system on all States at this time. A retrospective system may not make sense in all States. Many States do not possess the data processing capability to meet the timeliness requirements and information volume of a mandatory reporting system. Moreover, some States are not convinced that the additional investment in data processing capability is cost efficient. Finally despite the growing body of experience with retrospective budgeting systems, a number of questions remain open concerning the frequency with which different recipients should report, the kind of information that should be elicited, and the range of policies that should be developed to deal with special cases and unusual circumstances. For these reasons, the Department believes that an optional approach to the adoption of retrospective budgeting system will: (1) Facilitate the proper degree of further refinement that is desirable, and (2) permit States to reach their own conclusions with respect to the feasibility and desirability of introducing this budgeting method. Such an approach is consistent with the grant-in-aid nature of the title IV-A program.

Dated: June 28, 1978.

DON WORTMAN,
Acting Commissioner of Social Security.

Approved: September 26, 1978.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

Part 233 of chapter II, title 45 of the Code of Federal Regulations is amended as follows:

In § 233.20, new paragraphs (a)(2)(ix), (a)(2)(x), and (b)(4) are added to read as follows:

§ 233.20 Need and amount of assistance.

(a) *Requirements for State plans.* A State plan for OAA, AFDC, AB, APTD, or AABD must, as specified below: • • •

(2) *Standards of assistance.* • • •

(ix) Specify whether the amount of the assistance payment will be computed by determining income using prospective budgeting for all months or retrospective budgeting. States electing retrospective budgeting must provide that: *(a)(1)* Income will be determined under a prospective budgeting method for the first 2 months and under a respective budgeting method thereafter with provision for supplemental payments if requested by the recipient when a significant reduction in income results in hardship to the assistance unit. Under this option, the State agency must disburse the monthly assistance payment within 45 days of the end of the budget month to recipients who have filed on time a completed monthly income report and to those who are not required to file such a report. The plan must define the circumstances under which a sup-

OCT 4 1978

V 43 / 193

plemental payment will be granted and include the method for computing the amount of that payment; or

(2) Income will be determined under a prospective budgeting method for the first month and under a retrospective budgeting method thereafter. Under this option States must disburse the monthly assistance payment within 25 days of the end of the budget month to recipients who have timely filed a completed income report and to those who are not required to file such a report. The State plan must provide whether supplemental payments shall be made.

(b) States electing retrospective budgeting must require recipients with earned income to report income on a monthly basis.

(x) For purposes of paragraph (a)(2)(ix):

(a) "Prospective budgeting" means that the monthly assistance payment is computed by estimating expected income for the payment month on the basis of the best information available. Such information may be obtained from knowledge of current or past circumstances which are reasonably expected to continue or from future circumstances which are reasonably expected to occur. For States using prospective budgeting for all months, payments would be based on this estimate until the 6-month redetermination (or a shorter period if a State requires more frequent redeterminations), or a report of change in income is received.

(b) "Retrospective budgeting" means that the amount of the monthly assistance payment is computed on the basis of actual income reported for a previous month.

(c) "Budget month" means a fiscal or calendar month established by the State agency. The income of the assistance unit during that period provides the basis for the amount of assistance for the corresponding payment month.

(d) "Payment month" means the fiscal or calendar month for which a particular assistance payment (or two successive payments, if the State pays on a semimonthly basis) is received by the assistance unit.

(e) "Supplemental payment" means a payment which is equal to the difference between at least 75 percent of the amount a State pays for a like family with no income and the total income and liquid resources available to the assistance unit during the payment month. For the purpose of these supplemental payments, total income and liquid resources include the monthly assistance payment and any income received by or available to the assistance unit. The State, at its option, may include any amounts disregarded in determining need and in determining the amount of the monthly assistance payment, unless that income or liquid resource is set aside for a specific purpose under § 233.20(a)(4)(ii). States that elect to make supplemental payments under option 233.20(a)(2)(ix)(a)(2) may compute that payment without regard to the 75-percent minimum but must specify the percentage in the plan. Supplemental payments meeting this definition are not considered to be part of the State standard of need as determined under § 233.20(a)(2) (i) and (v).

(f) "Hardship" exists if the recipient does not have income and liquid resources in an amount sufficient to meet his/her needs at a minimum for housing, utilities or food under the State's standard of need.

* * * * *

(b) *Federal financial participation; general.* * * *

(4) Federal financial participation is available in supplemental payments for purposes of retrospective budgeting when the amount of that payment, together with the monthly assistance payment and any income and liquid resources specified by the State under § 233.20(a)(2)(x)(e), do not exceed the amount a State pays for a like family with no income.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR PARTS 42 and 43]

[CC Docket No. 78-302; FCC 78-659]

TELEPHONE COMMON CARRIERS

Reporting of Detailed Traffic Statistics

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission institutes a rulemaking to amend its rules to require telephone companies which maintain records of detailed traffic data to submit magnetic tapes of such information. The proposed rules also require tariff rate information be submitted on magnetic tape. Detailed traffic information is now prepared and submitted on magnetic tape by certain carriers. The rulemaking proposes to finalize this submission format and extend it to the tariff rate submissions.

DATES: Comments to be filed on or before October 30, 1978, and responses no later than December 1, 1978.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Boyd L. Nelson, room 530, 202-623-7084.

Adopted: September 19, 1978.

Released: September 28, 1978.

By the Commission: Commissioner Quello absent.

In the matter of changes in parts 42 and 43 of the Commission's rules so as to provide for the reporting of detailed traffic statistics of telephone common carriers, CC Docket No. 78-302.

1. Notice is hereby given of proposed rulemaking in the above entitled matter.

2. In connection with its regulatory responsibilities the Federal Communications Commission has been involved in traffic and demand studies for interstate message toll telephone service (MTS). To assist the Commission's efforts, A. T. & T., on behalf of the Bell System, has voluntarily submitted certain traffic data. These data presently arrive on magnetic computer tape. In the past, they have come in the form of punched cards, or computer printout. The Commission will have continuing need for these data in the future, so it is essential that it receive them in standardized compatible format. It is the purpose of this rulemaking procedure to develop such a format, which will be responsive to the present and anticipated future needs of the Commission, yet be compatible with the data collection procedures used by the industry.

3. Since the early 1970's the American Telephone & Telegraph Co., as part of an industrywide project, has been developing a system for the automated exchange of toll billing information, and the collection of samples of toll calls which serve as the basis for various studies, many of which are of interest to this Commission. For example, the system in question, the centralized message data system (CMDS), provides the basic toll traffic statistics used in toll separations and division of revenue studies. Other data subfiles are produced by the CMDS for developing and applying the MTS and WATS demand models on which Bell has relied in rate cases before this Commission. Still other data files generated by CMDS are used to study the design and utilization of toll plant.

4. Since CMDS is an industrywide project, although implemented and managed by A.T. & T., it includes a very large fraction on non-Bell traffic: All traffic transiting Bell facilities, and also traffic from non-Bell operating companies that have voluntarily chosen to have their data processed by A.T. & T. These data are of importance to the Commission in the study of demand for toll services and for developing accurate estimates of effects of proposed rate changes on carrier revenue requirements.

5. Accordingly, we propose to modify parts 42 and 43 of the rules to provide for the timely submission of these traffic data in the manner that will be most useful to the Commission as follows.

6. We propose that § 42.9 of the Commission's rules be modified by the insertion in item 103 of new sections (d) and (e), to read:

Item No.	Description of records	Period to be retained (years)
103.....	d. Computer format traffic and tariff reports to Commission.	20
	e. Computer format facilities reports to Commission.	

7. We propose that a new § 43.32 be inserted to read:

§ 43.32 Traffic Reports of Telephone Common Carriers.

(a) Each telephone common carrier or company controlling or controlled by a common carrier that manages or operates on behalf of itself and other carriers a centralized message data system or which directs, supervises or causes to be performed the operation of such a system, wherein traffic data from telephone common carriers are collected, sorted, compiled, summarized or otherwise handled, shall file periodic reports of such data, in computer readable form, as specified by the Commission. Reports shall be due 60 days after the close of the reporting period specified by the Commission. Technical requirements, computer formats and codes will be specified by the Commission. Proposed formats are stated in appendix A below.

(b) Data to be reported include a sample of not more than 5 percent (1 in 20) of all international (including transiting), interstate and intrastate message telephone messages or messages made using wide area telecommunication service. The sample shall be drawn from all messages using the common switched network, and charged under any message toll or WATS tariff or which would have been so charged except that they are franked, official, or otherwise free of all charge. The instructions for taking the sample and the precise sample proportion, if less than 5 percent, will be specified by the Commission. Proposed instructions are stated in appendix A.

(c) If the precise sample proportion as specified by the Commission is less than 5 percent for any class of traffic, the Commission may at any time require the submission of a full 5 percent sample for the future, retroactive for any period in the preceding 60 months (60).

(d) The reporting company will maintain a copy of the traffic data report, in computer format, and will supply a copy on request to any of the telephone common carriers whose traffic it is reporting.

(e) The report as filed will be considered business sales statistics and customer lists, since large customers can be readily identified. As such, it will not be routinely available for public inspection under § 0.457 (c) and (d) of the Commission's rules. Publicly released summary data and results of studies based on the information contained in those reports will be so formatted as to prevent the identification of particular customers.

(f) Paper copies of the traffic data report (printed or typewritten) need not be maintained. Each monthly report in computer format shall contain all the information called for therein as prescribed by the Commission.

(g) Nothing in this section shall be construed as in any way modifying the requirements of any uniform system of accounts prescribed by the Commission, or of any other periodic or special reports.

(h) Reports filed under this section shall be preserved as provided in § 42.9, item 103d.

8. We propose that part 43 of the Commission's rules be modified by the addition of a new section, § 43.33.

§ 43.33 Special Rules, Computer Format Tariff Reports.

(a) All companies filing domestic or international traffic reports in computer format under § 43.32 shall file a semiannual report in computer readable form which will show all tariff rates which have been in effect in the previous 6 months for any of the reported traffic. The reports will be due on September 1 and March 1 for the immediately preceding periods of January 1 to June 30, and July 1 to December 31, respectively. The format of these reports will be as prescribed by the Commission. Proposed formats are stated in appendix B.

(b) The report called for will not be considered a tariff filing, but as a supplemental traffic report. Accordingly, none of the provisions of these rules relating to format, posting, or retention of tariffs will apply. The report will be preserved as provided in § 42.9, item 103(d).

9. We propose that Part 43 of the Commission's Rules be modified by the addition of a new section, § 43.34, to read as follows:

§ 43.34 Reports of Facilities in Place.

(a) All companies filing domestic or international traffic reports in computer format under § 43.32 will file a periodic report of plant and facilities in place in computer readable form which will show all toll plant and facilities, whether transmission, switching, or other, which have been traversed by the traffic reported, and shall be in such detail as to permit the determination of the standard or most probable routing of each call.

(b) The report will be filed at such times, and in such formats as may be prescribed by the Commission, but will not in any case be filed more frequently than twice each year. Proposed formats are stated in appendix C.

(c) The report called for will not be considered an application under section 214 of the Communications Act.

(d) The report will be preserved as provided in § 42.9, item 103(e).

10. Comments are solicited regarding the proposed rules and regarding appropriate formats for submission of tariff rates and facilities data. Such formats will be contained in appendices B and C, respectively.

11. Authority for the rulemaking proposed herein is contained in sections 4(i), 219, and 220 of the Communications Act of 1934, as amended.

Accordingly, it is ordered, That any interested person participating in the proceeding herein shall file comments and responses in accordance with the following schedule:

(a) Comments shall be filed on or before October 30, 1978;

(b) Responses to those comments may be filed on or before December 1, 1978; and

It is further ordered, In accordance with the provisions of § 1.419 of the Commission's rules and regulations, that all participants in the proceeding ordered herein shall file with the Commission an original and eleven (11) copies of all comments, responses, replies or other pleadings provided for herein. In addition to the material filed in response to this notice, the Commission may consider any other relevant material before it. Copies of responses filed in this proceeding shall be available for public inspection during regular business hours in the Commission's reference room at its headquarters at 1919 M Street NW., Washington, D.C.

FEDERAL COMMICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

OCT 4 1978

V 43 / 193 OCT 4 1978

APPENDIX A.—Formats Proposed by the Commission for the Submission of Traffic Information

1. The samples of traffic submitted will be based on monthly systematic samples with a pseudo-random start. The samples will include 5 percent (0.005) of all international traffic (sampling every twentieth (1/20) call, after the first drawn), one-tenth (1/10) percent (0.001) of all domestic intrastate and two-tenths (2/10) percent (0.002) of all interstate toll calls (sampling every one-thousandth (1/1000) and five hundreth (1/500), after the first drawn, or alternatively, sampling every fiftieth (1/50) and every twenty-fifth (1/25) call respectively of previously drawn samples of every twentieth (1/20) call.

2. The calls will be reported in files as follows:

a. International and overseas calls, with subfiles;

b. Interstate domestic calls with subfiles;

c. Intrastate domestic calls with subfiles.

3. The subfiles to be used are:

a. Direct dialed sent paid traffic;

b. Operator handled sent paid traffic;

c. Operator handled received collect traffic;

d. Operator handled sent collect traffic. (The calls reported herein need not be rearranged or sorting of the previous file, but may be a fresh sample.)

4. Where some or all calls in a class must be "generated" in the sampling process, or must have characteristics inputted to them which could not be derived from the source of the data, such calls will be clearly distinguished, as provided below.

5. Each selected sampling unit is to be observed so as to provide the information in the attached format sheet, encoded on magnetic tape, 9 track, 1600 characters per inch, phase encoded. EBCDIC letters and numerals, with minus signs punched in the leading position, and decimal points omitted, shall be encoded so as to be readily useable by computer programs written in the FORTRAN computer language. No special character other than the minus sign shall be used. Other special characters will be replaced with blanks. The tape shall be one-half (1/2) inch, 9 track, 2,400 ft., certified.

See USA standard X3.39-1973 for complete technical specifications. (Available from American National Standards Institute, 1430 Broadway, New York, N.Y. 10018.) The blocking factor shall be twelve thousand (12,000) character per block.

[47 CFR Part 73]

[BC Docket No. 78-309; FCC 78-682]

NETWORK REPRESENTATION OF TV STATIONS IN NATIONAL SPOT SALES; REQUEST OF SPANISH NATIONAL NETWORK (SIN)

Proposed Rulemaking

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FCC proposes to consider changes in the rule (§ 73.658(i)) barring TV stations from using as a national spot representative an organization owned by the network with which the station is affiliated. Changes may include limiting the prohibition to representative firms associated with the three national networks, and providing that it does not apply to stations having some but less than total, common ownership with the network. The proceeding is designed to consider whether the regulation should apply to representative firms connected with all network companies or just those connected with the three national networks, (ABC, CBS, and NBC).

DATES: Initial comments must be received on or before November 20, 1978, and reply comments on or before December 11, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John H. Bass, Jr., Office of Network Study—(Broadcast Bureau), 202-632-6339.

MEMORANDUM OPINION AND ORDER AND NOTICE OF PROPOSED RULEMAKING

Adopted: September 22, 1978.

Released: September 29, 1978.

By the Commission: Commissioners Lee and Fogarty absent.

In the matter of amendment of § 73.658(i) of the Commission's rules, concerning network representation of

V 43/193
OCT 4 1978

TV stations in national spot sales; request of Spanish International Network (SIN), for waiver of § 73.658(i), BC Docket No. 78-309.

1. This document, and the rulemaking proceeding begun herein, relate to the rule barring television stations from using as their national sales representative (in nonnetwork sales) an organization connected with or owned by the network with which they are affiliated—§ 73.658(i), a rule adopted in 1959.[1] The matter arises from a letter request by Spanish International Network (SIN) seeking waiver of the rule as to it and eight stations that it serves as "national rep" as well as supplier of programs by interconnection.

2. For reasons discussed below, we believe that the complete waiver for 5 years sought by SIN is by no means necessarily warranted, but that the public interest, overall, would be served by maintaining the status quo for a 1-year period; and that during that time, comments in a rulemaking proceeding should be invited, with respect to some questions raised by the SIN request. While these questions apply particularly to SIN and its situation, since that is where they arise, they have potentially wider significance, perhaps especially because the availability of communication satellites for program distribution appears likely to result in a larger number of interconnected networks, e.g., those distributing religious programing. If the information developed in this proceeding appears pertinent only with respect to SIN and its affiliated stations, action on an individual basis will be taken and the rulemaking proceeding terminated.

3. The three questions involved, discussed more fully below, are:

(a) Should the rule's prohibition, on use of representative firms owned by or with networks, extend only to firms associated with the three national networks (ABC, CBS, NBC), or to all firms which are associated with any entity falling within the definition of "network"?

(b) Should the exemption from the rule, for stations which are licensed to the network organization or a subsidiary of it, apply also to stations with a substantial degree of, although not complete, common ownership, such as the interests of Mr. Reynold Anselmo in SIN and in six of the stations involved here?

(c) Whether the rule, to the extent it applies to stations, should apply the same to stations served by the network entity via interconnection, and stations provided with the same material by the network entity via physical delivery (mail, express, etc.) and thus, arguably, not part of a "network", such as two stations in Chicago and Albuquerque so served by SIN (and not included in the eight stations referred to above). We are presently of the view that the rule should apply in both situations.

Spanish-Language TV Operations

4. As of spring 1978 there are in the 50 States of the United States about a dozen TV stations (all UHF) which devote a substantial portion of their time-from about 35 percent to all or almost all—to Spanish-Language material.[2] These include six stations having an ownership connection with SIN and using its network programing and national representative services; two stations using the SIN network programing and national representative service but without any ownership connection; two stations (not connected ownershipwise) receiving the same kind of material from SIN but not on an interconnected basis, the Chicago station (WCIU) but not the Albuquerque station (KMXN-TV) using SIN as a national rep; and two stations having no connection with SIN or Mr. Anselmo. The six stations first mentioned include outlets in the New York area (WXTV, Paterson, N.J.), Miami (WLTV), San Antonio (KWEX-TV), Los Angeles (KMEX-TV), Hanford, Calif. (KFTV), and San Francisco (KDTV).[3] The two stations receiving interconnected SIN service and national rep service but without any ownership connection are KLOC-TV, Modesto, Calif. and KORO, Corpous Christi, Tex. The two stations having no connection with SIN are KEMO-TV, San Francisco, and WNJU-TV, Linden, N.J. (near New York City).

5. Spanish International Network (SIN) is a U.S. corporation, 25 percent owned by Mr. Anselmo and 75 percent by Televisa, a Mexican television network and program production enterprise. For a number of years SIN has been supplying Spanish-language programs to several U.S. television stations specializing in this type of material, but only recently has it been using electronic interconnection and thus has come to be a "network" as that term is generally used in its strict sense. The SIN network affiliation agreement guarantees the stations a minimum of 42 hours of programs per week; in practice, we are told, the material per week varies from 45 to 55 hours.[4] It includes entertainment programs, sports, a long Sunday news and commentary program, etc., and much of it (including the news program) originates in Mexico City. It comes by terrestrial microwave to San Antonio, Tex., where it is fed to the Western Union satellite and distributed to earth stations at New York, Miami and Los Angeles, and is distributed by terrestrial interconnection from there. With respect to the 9 stations which it serves as "national rep", SIN serves as their agent in the sale of the station's non-network time on a national or regional basis. Of the three Spanish-language stations not represented by SIN, one is represented by Caballero Spanish Media, Inc., a firm which also represents some Spanish-language radio stations; it is not known who represents the other two.[5]

The Background of the Rule

6. One of the recommendations of the 1957 "Barrow Report", issued following a network investigation by a special staff, was that the three national TV networks be barred from acting as national representatives for stations other than those they own (*Network Broadcasting*, H. Rept. No. 1297, 85th Cong., 2d Sess., January 1958, pp. 528-540). A rulemaking proceeding looking toward such a rule was begun in January 1959 (docket 12746), and ended in October 1959 with the decision adopting a rule essentially as proposed except that it would bar net-

[1] § 73.658(i): "No license shall be granted to a television broadcast station which is represented for the sale of nonnetwork time by a network organization or by an organization directly or indirectly controlled by or under common control with a network organization, if the station has any contract, arrangement, or understanding, express or implied, which provides for the affiliation of the station with such network organization: *Provided, however,* That this rule shall not be applicable to stations licensed to a network organization or to a subsidary of a network organization." See "Network Representation of Stations in National Spot Sales," 27 FCC 697 (October 1959).

[2] In addition to the 12 mentioned, 2 other stations—KMUV, Sacramento, Calif. and WKID, Fort Lauderdale, Fla.—devote considerable time to such material though apparently less than the proportion mentioned. They have no connection with SIN or its principals. Some other stations devote smaller amounts of time to Spanish programs. Three additional stations are listed in the 1978 "Broadcasting Yearbook" as Spanish-language stations; but two of these (in Fontana, Calif. and Phoenix, Ariz.) are now primarily religious outlets and the third (Houston, Tex.) is now owned by Metromedia, Inc.

This summary does not include the numerous stations in Puerto Rico which are entirely or very largely Spanish-language, nor several Mexican border stations.

[3] The first five of these are licensed to Spanish International Communications Corp., of which Reynold Anselmo is president and about a 15 percent stockholder (there are two larger stockholders). The San Francisco station is licensed to another corporation of which he is president and the largest shareholder (about 44 percent).

[4] This is roughly half of the amount of programming which the three national commercial networks feed their affiliates (according to the rulemaking petition filed by Westinghouse Broadcasting Co., Inc. in 1976, CBS and NBC were then feeding 179.5 half-hours weekly).

[5] SIN served a copy of its waiver petition on Caballero; no responsive material has been filed.

work rep organizations only from representing stations affiliated with the network, and not other stations. It was decided not to adopt a similar rule for radio. See footnote 1, above; 27 FCC 697, 720, 725-726.

7. The decision to bar TV networks from serving as national reps for their affiliates reflected two general areas of concern, in which such a role served to inhibit competition. The first was the competition among national rep firms for station clients, where a station might choose the network's representative service in order to improve its chances of getting or retaining a network affiliation (even though this was recognized as a potential rather than an actual evil). The second was the competition between networks and national spot as the channels of television advertising, so that a network organization serving as a national rep for affiliates represents a basic conflict of interest.[6] For example, a national rep firm often advises its client stations as to the appropriate level of their national spot rates; if the rep firm is owned by a network it will tend to take into accout the network's interest (in reasonably high spot rates so as to reduce competition with network rates) in rendering such advice. Also, although perhaps to a lesser extent, network-associated rep firms could tend to unduly influence station programming decisions, in favor of the network's program rather than a national spot program. In sum, network involvement in national spot representation of affiliates "involves interference with the licensee's independent duty to operate his station in the public interest." (27 FCC 720). However, it was concluded that this is true only where the affiliation relationship is present for use as a lever and therefore the rule should be limited so as to bar only representation of the network's affiliates. The decision with respect to radio reflected the conclusion that the degree of network importance in radio was much less than in television (and the CBS and NBC role in radio spot representation was less than in TV spot representation despite the vastly greater number of stations), so that a rule appeared unwarranted at that time. (27 FCC 725-726).

Arguments of Petitioner

8. In support of its waiver request, SIN argues, essentially, that the rule in question was adopted as a restriction on stations vis-a-vis the three national networks—ABC, CBS and NBC—and was not really intended to, and should not apply to, stations in relation to other network entities such as SIN. Rather, it is claimed that the Commission should in effect do here what it did in 1970 with respect to the prime time access and financial interest-syndication rules, in effect expressly limiting them to the three national entities. By way of specific points, SIN advances the following:

(a) The rule was adopted principally to avoid restraint on competition among spot representatives for stations, which the networks could unduly influence if permitted to represent their affiliates. That does not apply here.

(b) SIN is much less of a powerful force than the three national networks; one difference is that it expects to sell in 1978 no more than one-third of the inventory of its network program time to national and regional advertisers, and never more than two-thirds, thus leaving substantial amounts for local sale and avoiding an unduly anticompetitive situation.

(c) One of the points noted in the 1959 decision adopting the rule was that there are numerous large and qualified rep firms available to stations besides those connected with the networks. It is asserted that, by contrast, here there is only one other rep firm selling Spanish-language advertising for mainland U.S. stations. SIN itself does not have enough people, and, with total national and regional revenues for its stations amounting to no more than $10 million for 1978, there is not enough economic support, to permit it to set up separate national spot and network sales organizations. Thus, denial of waiver would leave many Spanish-language stations with no choice of a representative.

(d) Waiver here would further the same objectives as the other network rules, in increasing the opportunity for the development of other networks and increased competition and diversity. It will encourage minority-format stations. Denial of waiver, assertedly, would force SIN, and other newly emerging network organizations, to "reconsider the extent to which programming is provided on an interconnected basis."

Discussion and Questions Presented

9. As indicated in par. 3, above, the SIN request raises the question of how far, beyond the three national networks and representative entities affiliated with them, the rule and its prohibition should go; and whether it should apply where the station in question is partly, even though not entirely, owned in common with the network organization.

10. As to the first question, the Commission is simply not in a position to say, at this point, whether application of the rule is or is not warranted in the case of SIN and other existing or potential new network operations such as those in the religious program field. Unquestionably, § 73.658(i), like the Commission's TV and radio "network rules" generally, was adopted with the major national networks (three in television) primarily in mind, and therefore there may well be a question as to whether its application in other situations is appropriate. It appears likely that there is one important factual difference: the 1959 decision adopting the rule noted that there are numerous qualified television national reps, but here there is said to be only one other rep firm in the Spanish-language advertising area. This might be an afirmative reason not to apply the rule in these cases, since it would tend to cut down an already narrow area of choice for the stations affected;[7] it also means that one of the reasons for adopting the rule for the national networks in 1959—to prevent restraints on competition among representatives for client stations—may be of less significance.

11. The other area of concern leading to the 1959 decision was possible network-owned rep influence over station operating policies, including the level of nonnetwork rates and, possibly, network or nonnetwork program selection. It does not appear to what extent these are pertinent considerations in the present situation. To the extent that there is competition between the sale of the station's time on a network basis in a SIN program, and on a nonnetwork basis, there may well exist the same inherent conflict of interest as that noted in the 1959 decision (par. 7, above). On the other hand, bearing in mind the fact that SIN now sells only about one-third of the commercial time in its programs on a network basis, giving the rest to the station to sell locally, this may be a matter of less significance. Comments are invited on this point—whether there is any significant difference in this respect between the national network-affiliate relationship and that of SIN, and other new network entities, with their affiliates.[8]

[6] "... we are convinced that the conduct, by a network, of two operations so inherently competitive with each other unavoidably creates incentive to moderate or regulate the conduct of the less significant operation in such a manner as to maximize the network's revenues and profits." (27 FCC 715)

[7] If the rule were to apply in the case of SIN's San Francisco outlet, KDTV, it might mean that the other Spanish-language rep firm (Caballero) would, of necessity, represent both of the two Spanish-language stations in the market, which is hardly a desirable situation.

[8] Comments are also invited on whether there is any difference flowing from the form of the compensation specified in the SIN agreement compared to those of the national networks. The national network agreements specify a fixed percentage of a "network rate" figure specified in dollars; the SIN agreement simply specifies a fixed percentage of "the gross SIN advertising sales (before agency commissions) attributa-

Footnotes continued on next page

V 43 / 193 OCT 4 78

12. There are, of course, other points to be considered. One is the tremendous difference in the amounts of revenue involved: the 12 stations mentioned had in 1977 total network and national-regional spot revenues of some $9,600,000 compared to revenues of $2.6 billion for the three national networks and nearly $2 billion in national and regional spot revenue for the industry.* This is also the fact that the three national networks, and in general their affiliates, are well established and quite successful economically, whereas SIN and some of its client stations are new and in a sense just getting started. Arguably, it may not be appropriate to apply the same regulatory restrictions to these "fledgling" entities and risk hindering their development. On the other hand, there is one other aspect of the matter to be considered: to the extent the Spanish-speaking populaion forms a distinct audience or "market", it is apparent that there is a high degree of control of the TV stations serving it, with SIN's principals involved in six of the 12 or 14 stations, 10 of them presenting SIN programs, and SIN serving as national rep for 9 of them. It may be that we should not consider any change in the rule, or waiver, which would tend to increase or even to continue this degree of concentration of control. Comments on this point, and similar circumstances in other situations, are invited.

13. *Application to stations under partial common ownership.*—As mentioned, SIN and six of the stations which it serves have a substantial degree of common ownership, on the part of Mr. Reynold Anselmo and some other individuals; Mr. Anselmo is also president of the two companies which are licensees of these stations. It appears quite likely, therefore, that there will always be a considerable degree of common viewpoint and action between SIN and these stations, no matter what the identity of the representative is. To this extent, application of the rule would be meaningless. Comments are invited on the extent to which the rule in these circumstances serves any real purpose.

14. Comments are also invited on whether, if this concept is to be made part of any general regulation, some standards should be specified. Should the rule not apply only where there is 10 percent or more common ownership between network and station licensee, or where a principal officer is involved? Or, should the concept be put generally, such as "substantial comon ownership resulting in a substantial degree of common control"?

Footnotes continued from last page

ble to affiliate in all programs offered • • • and broadcast by affiliate."

*For the 12 stations as a group, a much higher percentage of their revenue is local than for TV stations generally.

15. *Applicability to noninterconnected stations.*—As mentioned earlier, there appears no reason why the rule should not apply to the two stations served by SIN on a noninterconnected basis, those in Albuquerque and Chicago, just as much as it does to the stations in the interconnected network. The same appears to be true in other situations which might be affected by the regulation here under consideraion. We do not intend to adopt a rule which would bar a station from using as a national rep any firm associated with any entity which is a program source. But, on the other hand, nothing should turn on the fact that some stations receive the material electronically while others receive it by mail or express. See par. 16, below, for the formulation proposed.

RULEMAKING PROPOSALS

16. In view of the matters discussed above, the following changes in § 73.658(i) are advanced for comment:

(a) Limiting its application to representative firms owned by or commonly with the three national networks. This would be done by adding to this paragraph (or incorporating by reference) the definition now contained in § 73.658(j):

The term network means any person, entity or corporation which offers an interconnected program service on a regular basis for 15 or more hours per week to at least 25 affiliated television licensees in 10 or more states.

(b) Exempting from the rule stations which have a substantial and significant degree of common ownership with the network company. This would be done by adding, following the phrase "network organization" at the end of the present paragraph (i), the language "or to stations where there is substantial common ownership between the station licensee and the network organization resulting in a significant degree of common control." Comments are invited on whether more specific standards should be set forth.

(c) Applying the rule to stations provided by the network organization with substantial amounts of programming on a regular basis, even though they do not receive it by wire or radio interconnection. This would be done by adding to present § 73.658(i) the following language after "affiliation of the station with such network organization": "Or which receives on a regular basis substantial amounts of programming from such network organization." Comments are invited on whether a fixed minimum amount of programming, per day or per week, should be specified as necessary to bring this rule into operation as to noninterconnection stations.

INTERIM ACTION

17. As discussed above, there appears some doubt as to whether the provisions of § 73.658(i) should apply to Spanish International Network and stations served by it, because of the basic differences between this situation and those of the national networks and their affiliates which were the subject of the consideration leading to the rule. As to six of the ten stations, there is the additional point that, because of the degree of common ownership of the licensees and SIN, they perhaps should be exempted from the rule just as the national networks' owned stations are exempt. Accordingly, it does not seem appropriate to take action at this time to require SIN to cease serving as national representative for any of the 9 stations it now serves in this capacity. Accordingly, the status quo is being maintained for 1 year from now, or until 60 days after final decsion in this proceeding, whichever is later.

18. In view of the foregoing;

(a) Comments are invited on the matters mentioned above, and summarized in paragraph 16;

(b) Notwithstanding the provisions of § 73.658(i) of the Commission's Rules, Spanish International Network may continue to serve as national representative, until October 1, 1979, or 60 days after final decision in this proceeding, whichever is later, for the following stations: KDTV, San Francisco, Calif.; KFTV, Hanford, Calif.; KLOC-TV, Modesto, Calif.; KMEX-TV, Los Angeles, Calif.; KORO, Corpus Christi, Tex.; KWEX-TV, San Antonio, Tex.; WCIU, Chicago, Ill.; WLTV, Miami, Fla.; and WXTV, Paterson, N.J.

(c) In all other respects, the letter request for waiver of § 73.658(i) of the Commission's rules, filed by Spanish International Network on March 9, 1978, is denied.

19. Pursuant to applicable procedures set forth in §§ 1.415 and 1.46 of the Commission's rules, interested parties may file comments on or before November 20, 1978 and reply comments on or before December 11, 1978. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding.

20. In accordance with the provision of § 1.419 of the Commission's rules, an original and five copies of all comments, replies, pleadings, briefs, and other documents shall be furnished the Commission. Members of the general public who wish to participate informally in the proceeding may submit one copy of their comments, specifying the docket number, including the entire designation (BC docket No. 78-309) in the heading. All filings made in this proceeding will be made available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

AMENDING RULES REGARDING PERSONAL ATTACKS, AND APPLICABILITY OF THE FAIRNESS DOCTRINE TO SECTION 315 "USES"

Notice of Proposed Rulemaking and Notice of Inquiry

PREAMBLE

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking and Notice of Inquiry.

SUMMARY: The Federal Communications Commission is proposing to amend its regulations relating to the personal attack rule which provides that broadcast licensees must afford reasonable opportunity for response to persons who are personally attacked under circumstances set forth in the rule. The amendment would exempt from the rule those situations which are covered by section 315 of the Communications Act which provides that licensees must afford equal opportunities to legally qualified candidates for public office. The intended effect is to make the personal attack rule consistent with the Commission's policy that the fairness doctrine does not apply to uses of broadcast facilities by legally qualified candidates. Comments are also invited on this present policy.

DATE: Interested parties may file comments on or before December 15, 1978; reply comments are due on or before January 16, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Milton O. Gross, Chief, Fairness Political Broadcasting Branch, Broadcast Bureau (202-632-7586).

SUPPLEMENTARY INFORMATION:

In the matters of amendment of part 73 of the rules regarding personal attacks, and applicability of the Fairness Doctrine to section 315 "uses."

Adopted: September 14, 1978.

Released: September 28, 1978.

By the Commission: Commissioners Lee, Fogarty, concurring in the result.

1. The Commission has before it a request by the National Broadcasting Co., Inc. (NBC), for a declaratory ruling that the personal attack rule [1] is not applicable to broadcast uses covered by section 315 of the Communications Act.[2] NBC urges the Commission to accept the position that the Fairness Doctrine and the equal opportunities requirement of section (315a) are mutually exclusive, thus, overruling *Capital Cities Broadcasting Corp.*, 13 FCC 2d 869 (1968). For the reasons set forth below we believe there is merit to NBC's request regarding the personal attack rule in light of prior Commission decisions. Therefore we are instituting this Notice of Proposed Rulemaking and seek comments from the public on this matter. We also believe it appropriate to invite comments from the public on the Commission's present policy that the Fairness Doctrine does not apply to broadcasts which constitute uses of stations by legally qualified candidates for public office.

2. NBC's request arises from the following factual situation, according to NBC: In his 1977 campaign for President of New York City's Manhattan Borough, Andrew Stein emphasized his record as a State legislator, especially his participation in public investigation into nursing homes. Through public hearings on this subject, various abuses were discovered. Bernard Bergman, who held some financial interests in such homes, apparently refused to testify at the public hearings and left the country until their conclusion. Subsequently, Bergman was indicted, convicted, and sentenced in both State and Federal Courts on fraud and corruption charges. Stein's campaign dealt with his role in this matter, as compared to that of other politicians. In the audio portion of one videao tape advertisement, Stein, in his criticism of nursing home conditions, attacked Bergman by name.[3] This was part of a paid political advertisement that was broadcast on NBC's WNBC-TV, New York, N.Y. According to NBC, Bergman was not an opposing candidate, an associate of an opposing candidate, or an authorized spokesman of an opposing candidate, and thus did not fall within any of the specific exemptions cited in the personal attack rule. The tape in question was broadcast 16 times during the period September 1 through September 8, 1977. NBC notified Bergman of the attack and offered him an opportunity to respond, as required by *Capital Cities, supra.*

3. Although NBC adhered to the *Capital Cities* ruling in its treatment of the advertisement at issue, NBC questions the applicability of that ruling to this situation. In the *Capital Cities* case, the personal attack rule was held not to exempt a personal attack on a private individual by a candidate during a political broadcast. NBC submits that *Capital Cities* conflicts with the 1974 *Fairness Report*, 48 FCC 2d 1 (1974), in its interpretation of the Fairness Doctrine in regard to this situation. Citing the *Fairness Report, supra*, and *Gloria Sage (WHEN-TV)*, 62 FCC 2d 135 (1976), Application for Review denied, 63 FCC 2d 148 (1977), NBC's complaint states, at page 3, "Thus, a broadcast may be subject to equal opportunities; or it may be subject to the Fairness Doctrine. But it may not be subject to both." Further, NBC argues that since the Fairness Doctrine is not applicable to section 315 uses, the personal attack rule does not apply. In support of this, NBC maintains that the 1974 Fairness Report treats the Fairness Doctrine and the equal opportunities provisions as mutually exclusive. It cites the *First Fairness Report and Order*, 36FCC 2d 40 (1972),[4] which in paragraph 27, at page 47, states the following:

> In section 315(a), Congress has specified that equal opportunities shall be applicable to appearances of legally qualified candidates and that in *other instances* "fairness" be applicable—that is, that there be affored "• • • reasonable opportunity for the discussion of conflicting viewpoints on issues of public importance."(Emphasis added.)

NBC also cites *Sage, supra*, which stated that "• • • the Commission has not held that the fairness doctrine is applicable to uses by candidates for public office." *Id.* at 136. The *Sage* ruling cites the 1974 Fairness Report, as quoted in the preceding paragraph, and then adds, "Therefore, it appears that the fairness doctrine is not applicable to 'uses' by a candidate." *Id.*

4. In *Capital Cities, supra*, the Commission held the personal attack rule applicable to a personal attack, made during a section 315 use, against a private citizen who did not fall within the exceptions set forth in subsection (b) of the personal attack rule. At issue

[1] *See* Appendix I for text of the present personal attack rule.

[2] *See* Appendix II for text of section 315(a) of the Communications Act.

[3] NBC considers the following language to contain a personal attack:

Andrew Stein: "This is Bernard Bergman. His nursing homes treated sick people like animals. And nobody stopped him because he had a lot of political connections.

"I'm Assemblyman Andrew Stein. A lot of important politicians tried to stop my nursing home investigation. But I knew the corruption and mistreatment had to be stopped so I fought Bergman and I fought his political friends, and I won.

"That's the kind of job I did as an assemblyman and that's the kind of job I'll do as Manhattan Borough President.

[4] Also found as Appendix A to the 1974 Fairness Report.

V 4 3 / 1 9 3

O C 4 7 8

were remarks made by a legally qualified candidate during a televised broadcast in which he commented on the indictments of the complainants for sedition, along with mention of their alleged communist involvements and subversive activities. The complainants charged that the station would sell but not give time for them to respond to the alleged attack. In the ruling, the Commission defined the question presented as "* * * whether there should be an exemption or waiver in the case of an attack by a candidate on a person not a candidate or associated with a candidate." *Id.* at 870. In deciding not to create such an exemption, the Commission focused primarily on practical considerations. The Commission felt that a new exemption would be unnecessary in light of the infrequency of such fact patterns. Also, the ruling continued, "* * * the obligation to notify a person that he has been attacked and to send him a copy of the attack and an offer of an opportunity to reply is not comparable to the possible liability for large sums of money in damages which may result from civil action based on the broadcast of defamatory remarks." *Id.* at 870. No actual consideration was given to the applicability of the Fairness Doctrine to a section 315 use.

5. The scope and applicability of section 315, including its no censorship provision, have been the subject of various Commission and judicial decisions. In *Farmers Educational & Coopperative Union of America, North Dakota Division* v. *WDAY, INC.*, 360 U.S. 525 (1959) (hereinafter cited as *WDAY*), the United States Supreme Court interpreted the censorship prohibition in relation to station liability for certain libelous statements made by legally qualified candidates during political broadcasts. The case arose after a legally qualified Senatorial candidate, in an uncensored speech broadcast by WDAY in compliance with section 315 "* * * accused his opponents, together with petitioner, Farmers Educational and Cooperative Union of America, of conspiring to 'establish a Communist Farmers Union Soviet right here in North Dakota.' " *WDAY, supra*, at 526-7. discussing the argument that section 315 provided immunity to licensees in such situations, the court stated;

> The term censorship, however, as commonly understood, connotes *any* examination of thought or expression in order to prevent publication of "objectionable" material. We find no clear expression of legislative intent, nor any other convincing reason to indicate Congress meant to give "censorship" a narrower meaning in section 315. *Id.* at 527.

The Court concluded "* * * that section 315 grants a licensee an immunity from liability for libelous material it broadcasts * * *." *Id.* at 535.

6. The no-censorship provision of section 315 has become a primary basis for distinguishing section 315 uses from those broadcasts to which the fairness Doctrine is applicable. *See Fairness Report, supra; Gloria Sage, supra.* A licensee has no control whatsoever over the content of a use by a candidate. However, it not only has control over other broadcasts, but is responsible for the content of them. It follows, therefore, that there should be a distinction between (1) the equal opportunities requirements of section 315 and (2) the Fairness Doctrine which governs controversial issues of public importance.

7. The 1974 *Fairness Report, supra* at 7, ascribes a two-fold duty to broadcasters under the Fairness Doctrine:

> * * * (1) the broadcaster must devote a reasonable percentage of this broascast time to the coverage of public issues; and (2) his coverage of these issues must be fair in the sense that it provides an opportunity for the presentation of contrasting points of view.

The very concept of the Fairness Doctrine is based upon a presumption of licensee discretion in dealing with controversial issues of public importance. The personal attack rule is one aspect of the Fairness Doctrine.* Generally, when a personal attack is made on an individual or group during the discussion of a controversial issue of public importance, an adequate opportunty to respond must be offered by the licensee, with three exceptions as set out in section 73.1920 (See Appendix I). In our Report and Order adopting the personal attack rule we stated, "This duty devolves upon the licensee, because other than in the case of a broadcast by political candidates, the licensee is responsible for all material broadcast over his facilities." *Amendment to Part 73 of the Rules to Provide Procedures in the Event of a Personal Attack or Where a station Editorializes as to Political Candidates*, 8FCC 2d 721, 723 (1967). Thus, when we adopted the personal attack rule we recognized that licensees had no responsibility for the material broadcast during section 315 "uses."

8. In view of the foregoing, we believe that all "uses" by a legally qualified candidate should be exempt from the personal attack rule. Accordingly, we propose to amend subparagraph (b) of the personal attack rule to read as follows:

> (b) The provisions of paragraph (a) of this section shall not be applicable (i) to attacks on foreign groups or foreign public figures (ii) to personal attacks which are made by legally qualified candidates; (iii) to personal attacks made by the authorized spokespersons of legally qualified candidates or those associated with such candidates in the campaign on other such candidates their authorized spokespersons, or persons associated with the candidates in the campaging and (iv) to bona fide newscasts, bona fide news interviews, and on on-the-spot coverage of a bona fide news event (including commentary or analysis contained in the foregoing programs, but the provisions of paragraph (a) shall be applicable to editorials of the licensee).

9. In light of the *Fairness Report* and *Gloria Sage, supra*, the proposed rule change would eliminate all applicability of the Fairness Doctrine to section 315 "uses." We invite comments from the public regarding this policy of the Commission. In particular, we would welcome comments on whether the public's right to be informed about contrasting views on controversial issues of public importance should take precedence over our policy that since licensees have no control over material broadcast during section 315 "uses," they should have no oligations based upon such broadcasts. In commenting on this, the public should take into consideration the fact that the Fairness Doctrine applies to a licensee's *overall* programming. Thus, if the Fairness Doctrine were to apply to a controversial issue of public importance broadcast during a section 315 "use," additional programming might not be necessary since a licensee may be able to show that contrasting views were broadcast in its other programming. Since the section 315 uses may involve paid programming, the applicability of our "Cullman" principle (*Cullman broadcasting Co.*, 40 FCC 576 (1963)) may be pertinent. *Cullman held that:*

> Where the licensee has chosen to broadcast a sponsored program which for the first time presents one side of a controversial issue, has not presented (or does not plan to present) contrasting view points in other programming, and has been unable to obtain paid sponsorship for the appropriate presentation of the opposing viewpoint or viewpoints, he cannot reject a presentation otherwise suitable to the licensee—and *thus leave the public uninformed*—on the ground that he cannot obtain paid sponsorship for that presentation. (Emphasis in original.)

. In *Nicholas Zapple*, 23 FCC 2d 707 (1970), we held that *Cullman* does not apply to the "political supporters" policy set forth in *Zapple*. Thus, if the Fairness Doctrine were to apply to section 315 uses, should *Cullman* also apply? The foregoing are suggested areas of inquiry which interested persons may wish to address. We will of course give careful consideration to all comments regarding the matters raised herein.

* In the 1974 *Fairness Report*, it was stated that "* * * the personal attack and political editorializing rules are a particularization of what fairness requires in those situations." (citations omitted) 1974 *Fairness Report, supra* at 43, n. 8.

10. Pursuant to applicable procedures set out in §§ 1.4, 1.415, 1.419 and 1.430 of the Commission's Rules and Regulations, interested parties may file comments on or before December 15, 1978 and reply comments on or before January 16, 1979. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such reply comments shall be accompanied by a certificate of service (See § 1.420(a), (b) and (c) of the Commissions's Rules).

11. In accordance with the provisions of § 1.419 of the Commission's Rules and Regulations, an original and 5 copies of all comments, reply comments, pleadings, briefs or other documents shall be furnshed the Commission. Members of the general public who wish to participate informally in the proceeding may submit one copy of their comments, specifying the docket number in the hearing. All filings in this proceeding will be available for public inspection by interested persons during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW. Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

APPENDIX I

The personal attack rule presently states:

Section 73.1920 [formerly 73.123 ect.] Personal attacks.

(a) When, during the presentation of views on a controversial issue of public importance, an attack is made upon the honesty, character, integrity or like personal qualities of an identified person or group, the licensee shall, within a reasonable time and in no event later than 1 week after the attack, transmit to the person or group attacked (1) notification of the date, time, and identification of the broascast; (2) a script or tape (or an accurate summary if a script or tape is not available) of the attack; and (3) an offer of a reasonable opportunity to respond over the licensee's facilities.

(b) The provisions of paragraph (a) of this section shall not be applicable (1) to attacks on foreign groups or foreign public figures; (2) to personal attacks which are made by legally qualified candidates, their authorized spokesmen, or those associated with them in the campaign, on other such candidates, their authorized spokesmen, or persons associated with the candidates in the campaign; and (3) to bona fide newscasts, bona fide news interviews, and on-the-spot coverage of a bona fide news event (including commentary or analysis contained in the foregoing programs, but the provisions of paragraph (a) of this section shall be applicable to editorials of the licensee).

NOTE.—The fairness doctrine is applicable to situations coming within (b)(3), above, and, in a specific factual sitution, may be applicable in the general area of political broadcasts (b)(2), above. See, section 315(a) of the act; 47 U.S.C. 315(a); Public Notice: Applicability of the Fairness Doctrine in the Handling of Controversial Issues of Public Importance, 29 FR 10415. The categories listed in (b)(3) are the same as those specified in section 315(a) of the act.

APPENDIX II

Section 315(a). If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broascasting station: *Provided*, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed *under this subsection* upon any licensee to allow the use of its station by any such candidate. Appearance by a legally qualified candidate on any—

(1) Bona fide newscast;

(2) Bona fide news interview;

(3) Bona fide news documentary (if the appearance of the candidate is incidential to the presentation of the subject or subjects covered by the news documentary); or

(4) On-the-spot coverage of bona fide news events (included but not limited to political conventions and activities incidental thereto).

shall not be deemed to be use of a broascasting station within the meaning of this subsection. Nothing in the foregoing sentence shall be construed as relieving broadcasters, in connection with the presentation of newscasts, news interviews, news documentaries, and on-the-spot coverage of news events, from the obligation imposed upon them under this Act to operate in the public interest and to afford reasonable opportunity for the discussion of conflicting views on issues of public importance.

[47 CFR Part 83]

[Gen. Docket No. 78-310; FCC 78-687]

SOUTHERN LOUISIANA SECTION OF MISSISSIPPI RIVER SYSTEM

Proposed Designation of a Second Frequency for Bridge-to-Bridge Operations

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: This action proposes to amend the rules to designate a second frequency for bridge-to-bridge communications. This second frequency (156.375 MHz) will replace the use of Channel 13 (156.65 MHz) in the southern Louisiana section of the Mississippi River system. This action is taken at the request of the United States Coast Guard to provide for more effective bridge-to-bridge operation in this area.

DATES: Comments must be received on or before November 9, 1978, and reply comments must be received on or before November 20, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Bruce A. Franca, Safety and Special Radio Services, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: September 25, 1978.

Released: September 29, 1978.

Amendment of Part 83 of the Commission's rules to designate a second frequency for bridge-to-bridge operations in the southern Louisiana section of the Mississippi River System, Gen Docket No. 78-310.

1. Notice of Proposed Rule Making is hereby given.

2. The Vessel Bridge-to-Bridge Radiotelephone Act (33 U.S.C. 1201 et seq. (Supp. I, 1971)) was enacted "to provide a positive means whereby the operators of approaching vessels can communicate their intentions to one another through voice radio, located convenient to the operator's navigation station." The Act also called for the "need for a specific frequency *or frequencies* dedicated to the exchange of navigational information" (emphasis added). The Commission in Docket No. 19343 (37 FR 11245) set aside Channel 13 (156.65 MHz) for this purpose. While the bridge-to-bridge radiotelephone system has generally proven very effective in most areas of the country, this has not been the case in the southern Louisiana section of the Mississippi and the Gulf Intracoastal Waterway (ICW). According to the Coast Guard this results from the following factors:

(a) The large user population of the several waterways within VHF communications range of one another.

(b) The flat terrain of the area which permits communication ranges longer than would normally be expected. This causes confusion as to the location of signals being exchanged at critical navigational and meeting situations.

(c) The use of the high transmitter power mode rather than the one watt mode when users judge the situation demands higher power to avoid receiver capture under critical situations.

3. Section 8A of the Vessel Bridge-to-Bridge Radiotelephone Act (33 U.S.C. 1207) tasks this Commission after consultation with other cognizant agencies to specify, among other things, "operating and technical conditions and characteristics including frequencies * * *." The U.S. Coast Guard as the agency primarily responsible for the safety of ship navigation in the United States has, accordingly, requested the Commission's "immediate

V 43 / 193

assistance" in initiating action leading to the designation of a second frequency for bridge-to-bridge operations. This second frequency will replace the use of Channel 13 in the Mississippi River from South Pass Lighted Whistle Buoy "2" and Southwest Pass Entrance Midchannel Light Whistle Buoy to mile 242.4 AHP (above head of Passes) near Baton Rouge. In addition, this channel will be used in the Mississippi River-Gulf Outlet, the Mississippi River-Gulf Outlet Canal, and the Inner Harbor Navigational Canal. These areas are included to facilitate the frequency configuration of the portable transceivers used by pilots on the river system.

4. The Coast Guard noted that the operational requirement for designation of a second bridge-to-bridge frequency is also based on the recommendations of the Industry Ad Hoc Committee for Ports and Waterways. The Coast Guard did indicate that several other groups had recommended that Channel 13 remain the bridge-to-bridge channel on the Mississippi River and that the new or second bridge-to-bridge frequency be established for use on the parallel waterways. However, in recommending that the new channel be used on the river system, the Coast Guard indicated that this would provide "geographical boundaries readily recognized by a vessel operator as he crosses them." We believe the Coast Guard's approach is valid both from a user and an enforcement standpoint. Further, in the Report and Order in Docket No. 19343 implementing the provisions of the Bridge-to-Bridge Radiotelephone Act, the Commission, at paragraph 4, specifically addressed the question of sectorization as follows:

> There is no doubt that throughout the long legislative process culminating in the Bridge-to-Bridge Radiotelephone Act, the predominant theme and understanding was that bridge-to-bridge communications were to be accomplished on a single channel, dedicated frequency, party-line system. The possibility of having the sectorize some of the more congested port and harbor areas and use a different frequency in each sector was recognized but this was not considered to be a departure from the basis single, exclusively navigation, channel concept.

Accordingly, we propose to amend the rules as requested. We will, however, take into consideration any comments regarding where the new frequency should be used.

5. After reviewing the frequencies available, it appears that Channel 67 (156.375 MHz) is the most suitable choice for use as a second bridge-to-bridge frequency. It was felt that it would be impractical and not in the public interest to choose one of the ship-to-shore commercial frequencies because of the large number of limited coast stations authorized on these frequencies in the New Orleans area. This situation has been further aggravated due to the loss of certain frequencies for use in the Coast Guard's Vessel Traffic Service (VTS) system. It is felt, therefore, that the choice of an intership frequency would be the least disruptive of present operations in this area. Channel 67 is also designated for ship movement activities by the International Radio Regulations, which would be consistent with the general purposes of the bridge-to-bridge operations. It is also proposed that other use of Channel 67 be prohibited in the New Orleans VTS radio protection area[1] to prevent harmful inteference to bridge-to-bridge operations on the river system.

6. The proposed amendments to the rules, as set forth in the attached Appendix, are issued under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and Section 8(a) of the Vessel Bridge-to-Bridge Radiotelephone Act.

7. Under the applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before November 9, 1978, and reply comments on or before November 20, 1978. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commision may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

8. In accordance with § 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to this Notice of Proposed Rule Making, will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C.

9. Regarding questions on matters covered by this document contact Bruce A. Franca (202) 632-7197.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 83 of chapter I of title 47 of the Code of Federal Regulations is amended as follows:

In part 83 Stations on Shipboard in the Maritime Services:

1. Section 83.351 is amended to read as follows:

§ 83.351 Frequencies available.

(a) • • •

Carrier frequency (MHz)	Conditions of use	
	Section	Limitations
•	•	•
156.350	83.359	40, 41, 49
156.375	83.359	40, 49, 64, 65, 76
156.400	83.359	40, 49, 76
•	•	•
156.625156	83.359	40, 50, 52, 76
156.650	83.359	40, 41, 46, 53, 59
156.675	83.359	40, 41, 45
•	•	•

(b) • • •

(53) Not available for use in the Mississippi River from South Pass Lighted Whistle Buoy "2" and Southwest Pass entrance entrance Midchannel Lighted Whistle Buoy to mile 242.4 AHP (above head of passes) near Baton Rouge; and in addition, the Mississippi River-Gulf Outlet, the Mississippi River-Gulf Outlet Canal, and the Inner Harbor Navigational Canal.

(64) The frequency 156.375 MHz is available for navigational communications only in the Mississippi River from South Pass lighted buoy "2" and Southwest Pass entrance midchannel lighted whistle buoy to mile 242.4 AHP near Baton Rouge; and, in addition, over the full length of the Mississippi River-Gulf Outlet, Canal from entrance to its junction with the inner harbor navigational canal, and over the full length of the inner harbor navigation canal from its junction with the Mississippi River to its entry to Lake Pontchartrain at the New Seabrook vehicular bridge.

(65) Use of the frequency 156.375 MHz for intership commercial communications is not permitted in the New Orleans VTS radio protection area specified in § 83.361.

• • • • •

2. Section 83.359 is amended to read as follows:

§ 83.359 Frequencies in the band 156–162 MHz available for assignment.

(a) The frequencies in the following table are available for assignment to stations as indicated.

Channel designator	Frequency (MHz)		Points of communication
	Ship	Cost	
•	•	•	•
NAVIGATIONAL			
67	156.375	156.375	Intership and ship to coast.
13		156.650	Do.
•	•	•	•

(b) • • •

(6) Use of the frequency 156.375 MHz by aircraft is not permitted in the New Orleans VTS radio protection area specifed in § 83.361.

[FR Doc. 78-27863 Filed 10-3-78; 8:45 am]

[1] The New Orleans VTS radio protection area is specified as: The rectangle between north latitudes 27°30' and 31° 30' and west longitudes 87° 30' and 92°.

[49 CFR Ch. II]

[Docket No. RSGC-1; Notice 2]

STANDARDS FOR THE MAINTENANCE, INSPECTION, AND TESTING OF HIGHWAY GRADE CROSSING WARNING DEVICES

Termination of Rulemaking Proceeding

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Termination of rulemaking proceeding.

SUMMARY: The purpose of this notice is to terminate a rulemaking proceeding initiated by FRA to determine the need for mandatory Federal standards governing the installation, maintenance, operation, inspection, and testing of highway grade crossing warning devices. This action is prompted by a recent review of accident statistics by FRA which indicated that the adoption of mandatory Federal standards cannot be justified at the present time.

FOR FURTHER INFORMATION CONTACT:

PRINCIPAL AUTHORS

Principal Program Person: William R. Paxton, Office of Safety, 202-426-0912.

Principal Attorney: Danvers E. Long, Office of the Chief Counsel, 202-426-8836.

SUPPLEMENTARY INFORMATION:

BACKGROUND

FRA responded to an independent initiative of a joint railroad labor-management committee composed of representatives of the Brotherhood of Railroad Signalmen (BRS) and the Communication and Signal Section (C&S Section) of the Association of American Railroads (AAR), by publishing in the FEDERAL REGISTER (41 FR 26580) on June 28, 1976, an advance notice of proposed rulemaking (ANPRM). That notice stated that FRA was studying the need for Federal regulations governing the maintenance and testing of railroad-highway grade crossing warning devices.

The ANPRM published, as an appendix, the proposal developed by the BRS-C&S Section committee. Interested persons were encouraged to submit comments both on the particular provisions presented in the BRS-C&S Section proposal as well as the perceived need for regulation in this area.

At the time the ANPRM was published, FRA stated that additional information and opportunity for public comment were required before a decision could be made regarding the need for Federal regulations governing the maintenance and testing of grade crossing warning devices. Comments as to the necessity for, the cost of, and the benefits to be derived from such regulations were submitted by 9 States agencies, 11 railroads, 1 city government, 1 manufacturer of railway equipment, AAR, BRS, Railway Progress Institute (RPI), Federal Highway Administration (FHWA), American Association of State Highway and Transportation Officials (AASHTO), and 1 individual.

The ANPRM presented 13 questions which the commenters were requested to address. The bulk of these questions focused upon issues raised by specific provisions of the BRS-C&S Section proposal. Therefore, responses to these questions were technical in nature.

Since Federal standards governing the maintenance and testing of railroad-highway grade crossing warning devices cannot be justified at the present time, FRA has decided to terminate this rulemaking proceeding. Therefore, a discussion of comments regarding the technical merits of the BRS-C&S Section proposal is not considered necessary. However, all comments will be retained and fully considered in the event that a similar proceeding is intiated in the future. The comments addressing the accident statistics set forth in the ANPRM are summarized and discussed below.

DISCUSSION OF COMMENTS RECEIVED

In the ANPRM, FRA stated that its preliminary analysis of the accident/incident reports submitted by carriers indicated that there were 12,130 accidents at grade crossings during 1975. Of this total, 6,863 occurred at grade crossings where warning devices were installed. The following table, which was included in the ANPRM, indicated that 192 warning devices were not operating when accidents occurred:

Type	Number of accidents	Not operating when accident occurred
Gates with flashing light signal	976	41
Cantilever with flashing light signals	428	11
Standard flashing light signals	3,771	99
Wig-wag signals	318	11
Audible devices	1,368	30
Total	6,863	192

A number of commenters challenged the accuracy of the statistics presented in the ANPRM table. For example, the AAR concluded that, if its research were accurate, the percentage of grade crossing accidents involving nonoperating protective devices may be as low as two-tenths of 1 percent (.2 percent) of the total number of accidents occurring at protected grade crossings. AAR contends that this percentage "approaches the limit of what can realistically be expected of men and machines."

The Southern Railway System (Southern) indicated that 3 of the 192 failures reported in the table occurred on its lines, but that only 1 of the failures resulted in an accident. Southern maintains that a history of only one accident (which involved no personal injury) on its 10,500 miles of line during 1975 does not indicate the existence of a safety problem of such magnitude as to require Federal regulation.

Several other commenters also complained that no cause and effect relationship was demonstrated between the accidents and the malfunctioning devices. For example, the Pennsylvania Public Utilities Commission submitted the following comment:

> Under the breakdown of accidents, in relation to the type of warning devices and the warning devices not operating when the accident occurred, the Commission has no positive evidence that any crossing accidents were caused by nonoperating warning devices.

FRA REVIEW OF STATISTICS

The table published in the ANPRM was compiled from the accident/incident reports filed with the FRA by the railroads pursuant to 49 CFR Part 225. Under that part, each railroad is required to "submit to FRA a monthly report of all railroad accidents/incidents • • • within 30 days after expi-

OCT 4 1978 UMI

V 43 / 193

cation of the month during which the accidents/incidents occurred * * *."

Shortly after the ANPRM was published, FRA reviewed the 1975 statistics presented in the ANPRM and similar statistics for 1976. As a result of this review, FRA discovered that some of those statistics were incomplete. For example, the table published in the ANPRM indicated that, in 1975, 192 warning devices were not operating when accidents occurred. However, the table did not indicate how many accidents occurred at the time the 192 devices were not operating. The review indicated that 137 accidents occurred at grade crossings with nonoperational warning devices and, at the time of those accidents, 192 warning devices were not operating. In other words, some accidents occurred at grade crossings which had two or more active warning devices that were not operating.

Furthermore, the review indicated that only 37 of the 137 accidents were attributable to failures of warning devices. Seventeen of these failures were caused by equipment failure, 15 were attributed to human error, and 4 were attributed to vandalism. Even if the 17 equipment failures could be eliminated by the adoption of maintenance and testing standards, only 17 of the total of 6,863 accidents at grade crossings in 1975, or less than three-tenths of 1 percent (.3%), could be eliminated.

In 1976, 5,434 accidents occurred at grade crossings. Forty-one of these accidents were attributable to the failure of grade crossing warning devices. Twenty of these failures were caused by equipment failure, 18 by human error, and 3 by vandalism. If all of the 20 equipment failures could be eliminated by maintenance and testing standards, the total number of accidents would be reduced by 20, or less than four-tenths of 1 percent (.4%).

The following table reflects the findings of the FRA review for 1975 and 1976 and indicates that a number of the accident/incident reports submitted by carriers for those years were miscoded and did not involve the failure of active grade crossing warning devices:

Year	Miscoded reports		Unintended nonoperational					
	Working[1]	Passive[2]	Equipment insulated[3]	Equipment failure	Human error	Vandalized	Unknown	Total
1975	44	27	24	17	15	4	6	137
1976	29	16	33	20	18	3	6	125
Total	73	43	57	37	33	7	12	262

[1] "Working" means the protective devices were in fact operating when the accident occurred.
[2] "Passive" means the protective devices were passive rather than nonoperating active devices.
[3] "Equipment insulated" means the rail rolling equipment involved in the accident was insulated to preclude its activating of protective grade crossing devices.

In sum, FRA's review of accident/incident statistics indicates that Federal standards governing the maintenance and testing of warning devices might reduce accidents at grade crossings by approximately three-tenths of 1 percent (0.3%). However, this reduction is based on the presumption that Federal standards would prevent all grade crossing accidents caused by equipment failure.

While statistics indicate that Federal maintenance and testing standards might reduce accidents at grade crossings by three-tenths of 1 percent (0.3%), FRA believes that even this small reduction is unrealistic in view of other factors. For example, maintenance and testing standards, no matter how comprehensive, cannot be expected to eliminate all equipment failures. In addition, FRA cannot be certain that the 37 equipment failures were in fact the sole cause of 37 grade crossing accidents in 1975 and 1976. Driver recklessness or inattentiveness and other factors may also have been significant causal factors in many of these accidents. Accordingly, FRA believes that Federal standards would reduce railroad-highway grade crossing accidents by substantially less than three-tenths of 1 percent (0.3%).

Finally, it should be noted that most of the Nation's railroad-highway grade crossings are now protected by passive warning signs only. Active warning devices provide considerably more protection at grade crossings than do the more prevalent passive warning signs. Since active warning devices are designed to "fail safe," they very rarely experience mechanical failure in other than a "fail-safe" mode. Therefore, FRA believes that installation of more active protective devices would be much more beneficial from the standpoint of safety than a Federal regulation requiring expenditure of additional resources to maintain and test those devices.

Economic Impact

FRA has determined that this notice does not contain significant regulations. Therefore, a regulatory analysis under Executive Order 12044 is not required (E.O. 12044, 43 FR 12661, March 24, 1978).

In addition, FRA has evaluated this notice in accordance with DOT's existing and proposed policies for the evalutation of regulatory impacts. Since the notice would not impose a burden on any person, FRA concludes that it would have no measurable regulatory impact and that a detailed evaluation is not warranted. (Policies and Procedures for Simplification, Analysis, and Review of Regulations, 43 FR 9582, Mar. 8, 1978; Proposed Regulatory Policies and Procedures, 43 FR 23925, June 1, 1978).

Conclusion and Action

While FRA remains concerned about the hazards presented by highway-railroad grade crossings, it believes that Federal standards for maintenance, inspection, and testing of highway-railroad grade crossing warning devices should not be adopted unless a need for those standards can be demonstrated. In this connection, it should be noted that Executive Order 12044 directs Federal agencies to clearly establish the need for and purposes of their regulations. In addition, in the absence of a clear need for Federal standards for maintenance and testing of grade crossing warning devices, FRA believes that the allocation of Federal safety resources for this purpose, and Federal preemption of State authority, cannot be justified.

In consideration of the foregoing, FRA has determined that the issuance of a rule requiring standards for the maintenance, inspection, and testing of highway grade crossing warning devices cannot be justified. Accordingly, the proceeding initiated on June 28, 1976 (41 FR 26580) is hereby terminated.

Authority

(Secs. 202, 204, and 208, Federal Railroad Safety Act of 1970, as amended (45 U.S.C. 431, 433, and 437); sec. 6(e) and (f), Department of Transportation Act (49 U.S.C. 1655 (e) and (f).)

Issued in Washington, D.C., on September 29, 1978.

JOHN M. SULLIVAN,
Administrator.

[49 CFR Chapter II]

[Docket No. RSSI 78-5, Notice No. 5]

GENERAL SAFETY INQUIRY

Hearing

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of Change of Hearing Dates.

SUMMARY: The purpose of this notice is to reschedule the fourth and fifth 2-day public hearings that FRA will conduct to evaluate and improve the effectiveness of its safety regulatory program. The effect of this action will be to postpone the fourth hearing on FRA track safety standards from October 18 and 19 to November 15 and 16, 1978. The fifth hearing concerning signal and communications systems, which was scheduled to take place on November 15 and 16, has been rescheduled for January 17, and 18, 1979. This action is taken in response to numerous requests received from persons and organizations desiring to participate in these public hearings.

DATES: (1) The fourth 2-day public hearing will begin at 10 a.m. on November 15, 1978. The fifth 2-day hearing will be held on January 17, and 18, 1979.

(2) Prepared written statements for the November hearing should be submitted by November 3, 1978, in triplicate to the Docket Clerk, Office of the Chief Counsel (RCC-1), Federal Railroad Administration, Room 4406, 2100 Second Street, SW., Washington, D.C. 20590.

(3) Persons desiring to participate in the November hearing should notify the principal program person by November 3, 1978, and indicate the amount of time they need to present their views.

ADDRESS: Hearing location: Trans Point Building, Room 3201, 2100 Second Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Rolf Mowatt-Larssen, Office of Safety (RRS-20), FRA, Room 4414N, 2100 Second Street, SW., Washington, D.C. 20590, phone 202-426-0924.

Principal Attorney: Edward F. Conway, Jr., Office of the Chief Counsel (RCC-30), FRA Room 4406, 2100 Second Street SW., Washington, D.C. 20590, phone 202-426-8836.

SUPPLEMENTARY INFORMATION: On September 25, 1978, FRA published in the Federal Register a notice of public hearing (43 FR 43339). That notice announced that the fourth 2-day public hearing concerning FRA track safety standards would be held on October 18, and 19, 1978. The notice also announced that the fifth 2-day hearing concerning signal and communications systems would be held on November 15 and 16, 1978.

FRA has recently received communications from numerous interested persons and organizations requesting that these hearings be postponed to facilitate their participation. FRA wishes to encourage the participation of all interested persons and organizations in the hearings being held to improve its safety regulatory program. Therefore, the fourth and fifth 2-day public hearings have been rescheduled at a later date as indicated in this notice.

Although the hearings have been postponed, it should be noted that the issues to be addressed are in no way affected by this postponement. Accordingly, interested persons should refer to the notice published in the Federal Register on September 25, 1978 (43 FR 43339), for a summary of the issues that will be addressed at the fourth hearing.

Public Participation

FRA requests that the Association of American Railroads, the American Short Line Railroad Association, individual railroads, track material suppliers, the National Transportation Safety Board, railroad employee organizations, and other interested persons participate actively in the fourth 2-day hearing. Specifically, FRA requests that these persons and organizations provide knowledgeable spokespersons and pertinent technical, manufacturing, service, and cost data. These spokespersons should present detailed information to justify their positions.

Drafting Information

The principal author of this document is Danvers E. Long, Office of the Chief Counsel.

(Secs. 202 and 208, Federal Railroad Safety Act of 1970 (45 U.S.C. 431 and 437); § 1.49(n), Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49 (n).)

Issued in Washington, D.C. on October 2, 1978.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 226]

CRITICAL HABITAT OF ENDANGERED AND THREATENED FISH AND WILDLIFE

Porposed Determination of Critical Habitat for Kemp's Ridley and Loggerhead Sea Turtles

AGENCY: National Marine Fisheries Service.

ACTION: Proposed Designation of Critical Habitat.

SUMMARY: The National Marine Fisheries Service (NMFS) hereby proposes to designate Critical Habitat for the Kemp's ridley, *Lepidochelys kempii*, and loggerhead, *Caretta caretta*, sea turtles in the Port Canaveral navigation channel, Cape Canaveral, Fla. The proposed action is being taken under section 7 of the Endangered Species Act of 1973 (the Act) to provide protection to hibernating sea turtles. This proposal would establish a new Part 226 in Title 50 of the Code of Federal Regulations for designating Critical Habitat for endangered and threatened species under the jurisdiction of NMFS.

DATES: Comments must be received on or before December 4, 1978. Requests for a public hearing and justification for such a request must be received by November 20, 1978.

ADDRESSES: Submit comments to the Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard B. Roe, Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Washington, D.C. 20235, 202-634-7287.

SUPPLEMENTARY INFORMATION:

Background

Mature Kemp's ridley sea turtles are found within the Gulf of Mexico and immature Kemp's ridleys range from central Florida as far north as Massachusetts, and across the Gulf Stream to Europe. The only remaining established nesting beach for Kemp's ridleys is at Rancho Nuevo, Mexico.

The loggerhead sea turtle occurs in tropical and temperate regions of the World and has been recorded from Chile to California and from Rio de la Plata to Nova Scotia. In the western

V 43 / 193

Atlantic, the major loggerhead nesting region is from North Carolina to Florida, and to a lesser extent along the gulf coast of the United States. Significant nesting occurs on the Yucatan Peninsula and in Cuba, but is either sparse or absent farther south in Central America and the West Indies. Other places where loggerhead sea turtles have been found include Africa and the western Pacific.

The Kemp's ridley sea turtle was listed as endangered on December 2, 1970 (35 FR 18320) and the loggerhead sea turtle recently was listed as threatened (43 FR 32800). This latter listing took effect on September 6, 1978.

In accordance with a July 18, 1977, Memorandum of Understanding between the NMFS and the Fish and Wildlife Service (FWS), the NMFS was given the responsibility for sea turtles while in the marine environment and the FWS was given the responsibility for sea turtles while on land.

A definition of the term "Critical Habitat" was published by the FWS and the NMFS in the FEDERAL REGISTER on January 4, 1978 (43 FR 870) (hereinafter referred to as Regulations) and is reprinted below:

> "Critical Habitat" means any air, land, or water area (exclusive of those existing man-made structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of Critical Habitat include, but are not limited to: physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas for reasonable population expansion.

As specified in the Regulations, the Director (Assistant Administrator for Fisheries) will consider the psysiological, behavioral, ecological, and evolutionary requirements for survival and recovery of listed species in determining what areas or parts of habitat are critical. These requirements include, but are not limited to:

(1) Space for individual and population growth and for normal behavior;

(2) Food, water, air, light, minerals, or other nutritional or physiological requirements;

(3) Cover or shelter;

(4) Sites for breeding, reproduction, or rearing of offspring; and generally,

(5) Habitats that are protected from disturbances or are representative of the geographical distribution of listed species.

The continued survival and recovery of the Kemp's ridley and loggerhead sea turtle species depends in part on the maintenance of suitable and undistributed hibernation areas. The NMFS believes that such hibernation areas qualify for designation as Critical Habitat as referred to in section 7 of the Act and defined in the Regulations.

In early 1978, the NMFS received reports that shrimp vessels had incidentally captured large numbers of loggerhead sea turtles while trawling late November 1977, in the Port Canaveral ship channel, Brevard County, Fla. One shrimp vessel caught 15 turtles during a 20 minute tow, and another vessel caught 66 turtles in 60 minutes. The turtles were reported to be listless and their shells showed clearly demarked bare areas and muddy, barnacle encrusted zones. The appearance and behavior of the turtles led the fishermen to believe that the turtles had been buried in the sediment.

These observations, in addition to other reports of high incidental turtle capture by shrimp vessels, prompted NMFS to conduct trawl surveys of the middle and outer reach of the Port Canaveral ship channel on February 14-15 and March 15-17, 1978. Results from these trawl surveys corroborated the earlier reports.

Results from the February survey indicated that the turtles were hibernating in the mud. Their bodies were stained black from long-term contact with these sediments. The captured animals were torpid and appeared to experience difficulty in diving when released. Turtles captured during the March survey appeared to be emerging from hibernation, being more active, and diving quickly upon release. During the 2 surveys a total of 271 loggerhead, mostly subadult, and 3 immature Kemp's ridley turtles were captured; 98 percent of these turtles were taken in the navigation channel, although only 64 percent of the sampling effort was conducted in the channel. Turtles captured during the surveys exhibited shell damage which may have been caused by contact with trawl doors or vessels.

Although only three Kemp's ridleys were captured during the trawl surveys, the status of this species is so fragile that the habitat and animals found therein must be protected.

Based on the trawl surveys and other observations, NMFS investigators believe that: (1) Some unknown number of loggerhead and Kemp's ridley sea turtles hibernate in the Port Canaveral ship channel from at least November to March; (2) turtles dislodged from their hibernaculum may not successfully reenter their muddy retreats, especially if the water temperature is so low that normal swimming and reburrowing activity is inhibited; and (3) the dislodged turtles may be further weakened by exposure to the lower ambient seawater temperature and possible shell passively at the surface.

The Assistant Administrator has concluded that designating the Port Canaveral navigation channel as Critical Habitat is necessary for the continued survival and recovery of Kemp's ridley and loggerhead sea turtles which hibernate there. Activities of Federal agencies including but not limited to maintenance dredging of the channel and passage of variable draft vessels (submarines) at other than minimum draft conditions at certain times of the year should be reviewed under section 7 of the act.

Consultation with representatives of the State of Florida on the designation of the Cape Canaveral ship channel as Critical Habitat has been conducted by the NMFS.

As information becomes available, additional areas may be proposed as Critical Habitat for these species.

EFFECT OF THE RULEMAKING

Section 7 of the Endangered Species Act states:

> The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to Section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as apropriate with the affected States, to be critical.

Critical Habitat designation affects only the actions of Federal agencies, and essentially is an official notification to these agencies that their responsibilities pursuant to section 7 of the Act are applicable in a certain area.

Questions of whether, and to what extent, certain kinds of actions would adversely affect listed species are not relevant to the biological basis of Critical Habitat delineations. Such questions are properly dealt with after Critical Habitat has been designated. In this respect, the NMFS and FWS, in cooperation with other agencies, have draown up a set of regulations which, in part, establish a consultation and assistance process for helping to evaluate the possible effects of action on Critical Habitat. The Regulations were published to assist Federal agencies in complying with section 7 of the Act.

PUBLIC COMMENTS SOLICITED

The Assistant Administrator desires to obtain the comments and suggestions of the public, other concerned governmental agencies, the scientific community, or any other interested person on these proposed rules. Any final promulgation of Critical Habitat regulations will take into consideration the comments received by the Assistant Administrator. Such statements and any additional information received may lead the Assistant Administrator to adopt final regulations that differ from this proposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the NMFS Office of Marine Mammals and Endangered Species, Page Building No. 2, 3300 Whitehaven Street NW., Washington, D.C., and may be examined during regular business hours or can be obtained by mail.

The primary author of this proposed rule is Mr. Richard B. Roe, Office of Marine Mammals and Endangered Species, 202-634-7287.

REGULATIONS PROMULGATION

Accordingly, NMFS proposes to add a new Part 226 to read as follows:

PART 226—DESIGNATED CRITICAL HABITAT

Subpart A—Introduction

Sec.
226.1 Purpose of regulations.
226.1 Scope of regulations.

Subpart B—Critical Habitat for Marine Mammals

226.11-.30 [Reserved].

Subpart C—Critical Habitat for Marine Fish

226.31-.70 [Reserved].

Subpart D—Critical Habitat for Marine Reptiles

226.71 Port Canaveral Navigation Channel, Cape Canaveral, Florida.
226.72-.99 [Reserved].

AUTHORITY: Endangered Species Act of 1973, section 7, Pub. L. 93-205, 16 U.S.C. § 1536, 87 Stat. 884.

Subpart A—Introduction

§ 226.1 Purpose of regulations.

The regulations contained in this Part identify those habitats designated as critical under section 7 of the Endangered Species Act by the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, for those endangered and threatened species under his jurisdiction. The list of these species is found in 50 CFR § 222.23(a) for endangered species and 50 CFR § 227.4 for threatened species.

§ 226.2 Scope of regulations.

(a) The critical habitat designations contained in this Part apply only to the endangered and threatened species listed in this Part.

(b) Regulations implementing section 7 of the Endangered Species Act are found in 50 CFR Part 402.

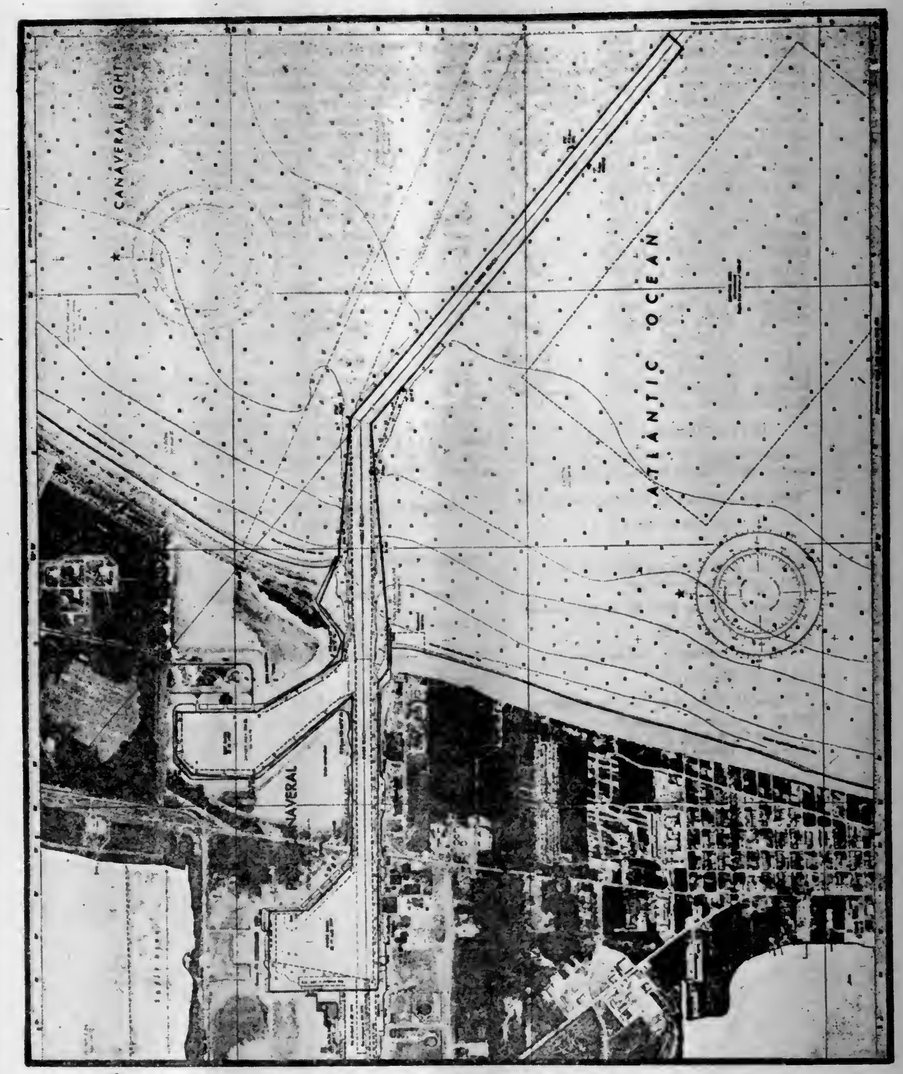
(c) the provisions in this Part are in addition to, and not in lieu of other regulations of Parts 217-227 and 402 of this Chapter.

Subpart B—Critical Habitat for Marine Mammals

§ 226.11-226.30 [Reserved]

Subpart C—Critical Habitat for Marine Fish

§§ 226.31-226.70 [Reserved]



Subpart D—Critical Habitat for Marine Reptiles

§ 226.71 Port Canaveral Navigation Channel, Cape Canaveral, Florida.

Kemp's Ridley (*Lepidochelys kempii*) and Loggerhead (*Caretta caretta*) Sea Turtles.

ADVISORY COMMITTEE ON STATE AND PRIVATE FORESTRY

Meeting

The Advisory Committee on State and Private Forestry will meet in Monterey, Calif., November 7-9, 1978. The meeting will convene at 9 a.m. at the Doubletree Inn of Monterey.

This Committee, comprised of 15 members from a broad spectrum of geographic and interest areas, advises the Secretary of Agriculture and various agencies of the Department on the protection, management and development of the Nation's non-Federal forest land and resources. Dr. M. Rupert Cutler, Assistant Secretary for Conservation, Research and Education, will chair the meeting. He and representatives of the Forest Service, Farmers Home Administration, Science and Education Administration, Soil Conservation Service, and the Agricultural Stabilization and Conservation Service will attend from the Department of Agriculture.

The discussion will center on interagency coordination in California forestry and a number of other topics suggested by the committee including the public involvement process, tax legislation, and urban and community forestry activities. The meeting is structured to provide members of the Committee ample time for participation.

The meeting will be open to the public. Persons who wish to attend, should notify the Committee's Executive Secretary, Dr. Charles F. Krebs, USDA-Forest Service, P.O. Box 2417, Washington, D.C. 20013, telephone 202-447-8921. Written statements may be filed with the Committee before or after the meeting.

DOUGLAS LEISZ,
Acting Chief, Forest Service.

AUTHORIZATION FOR WATERSHED PLANNING

Concerned State Conservationists of the Soil Conservation Service have been authorized to porvide planning assistance to local organizations for the indicated watersheds. The State Conservationists may proceed with investigations and surveys as necessary to develop watershed plans under authority of the Watershed Protection and Flood Prevention Act, Public Law 83-666, and in accordance with requirements of the National Environmental Policy Act of 1969, Pub. L. 91-190.

Persons interested in these projects may contact the State Conservationists listed below:

Dry Gulch Area Watersheds, Duchesne County, Utah State Conservationist, George D. McMillan, Soil Conservation Service, 4012 Federal Building, 125 South State Street, Salt Lake City, Utah 84138; 801-524-5051.

LaPlatte River Watershed, Chittenden County, Vt. State Conservationist Robert R. Shaw, Soil Conservation Service, 1 Burlington Square, Suite 205, Burlington, Vt. 05401; 802-862-6501 ext. 6261.

North Hocking River Watershed, Fairfield County, Ohio State Conservationist, Robert E. Quilliam, Soil Conservation Service, Federal Building, Room 522, 200 North High Street, Columbus, Ohio 43215; 614-469-6962.

Dated: September 26, 1978.

REGIONAL FISHERY MANAGEMENT COUNCIL CHAIRMEN

Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of Public Meeting.

SUMMARY: The Assistant Adminstrator for Fisheries will meet with the Chairman of each of the eight Regional Fishery Management Councils created under the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

DATES: The meeting will convene at 8:30 a.m. on Tuesday, October 24, 1978, and recess at 5 p.m. On Wednesday, October 25, 1978, the meeting will convene at 8:30 a.m. and adjourn at approximately noon.

ADDRESS: The meeting will be held at the Kona Hilton Hotel, in Kailua-Kona, Hawaii.

FOR FURTHER INFORMATION CONTACT: Wilvan C. Van Campen, Executive Director, Western Pacific Regional Fishery Management Council, Room 1506, 1164 Bishop Street, Honolulu, Hawaii 96813, telephone: 808-523-1368

SUPPLEMENTARY: INFORMATION: This meeting will be open to the public on a first-come first-served basis, with seating available for about 75 members of the public. Public participation in discussion will be permitted to the extent time permits. For information on seating arrangements, changes to the agenda and/or written comments, contact the Executive Director.

PROPOSED AGENDA

OCTOBER 24-25, 1978.

(1) Fishery Management Plan review procedures; (2) Organization of Fishery Management Plan development and the roles of advisory bodies in the process; (3) Role of the Council in regard to fishery development; (4) Council involvement in international fishery management and research; (5) Report of the DOC audit of Council operations; (6) Other appropriate issues.

Dated: September 29, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[3510-22]

RECEIPT OF APPLICATION FOR PERMIT

Notice is hereby given that an Applicant has applied in due form for a permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: George B. Rabb, Director, Chicago Zoological Park.

b. Address; Brookfield, Ill. 60513.

2. Type of permit: Public display.

3. Name and number of animals: Atlantic bottlenose dolphins (*Tursiops truncatus*) 2.

4. Type of take: To capture and maintain permanently in a facility.

5. Location of activity: Melbourne, Fl.

6. Period of activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientic Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before November 3, 1978. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930; and

Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Fl. 33702.

Dated: September 28, 1978.

R.V. MILLER,
Acting Director, Office of Marine Mammal and Endangered Species, National Marine Fisheries Service.

[3510-22]

RECEIPT OF APPLICATION FOR PERMIT

Notice is hereby given that an Applicant has applied in due form for a permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Mr. A. van den Oever, Dolfirodam B.V.

b. Address: Gebouw de Hoffdpoort, Blaak 101, 3011 GB Rotterdam, Netherlands.

2. Type of permit: Public display.

3. Name and number of animals: Atlantic bottlenose dolphins (*Tursiops truncatus*) 2.

4. Type of take: To capture and maintain permanently in a facility.

5. Location of activity: Rockport, Tex.

6. Period of activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammals Commission and the Committee of Scientific Advisors.

Written data or veiws, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before November 3, 1978. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All Statements and opinions contained in ths application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

As a request for a permit to take living marine mammals to be maintained in areas outside the jurisdiction of the United States, this application has been submitted in accordance with National Marine Fisheries Service policy concerning such applications (40 F.R. 11614, March 12, 1975). In this regard, the application:

(*a*) Was submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, through the Ministerie Van Cultuur, Recreatie en Maatschappelijk Werk, that Department being responsible, among other things, for ensuring the suitable care of animals in captivity:

(*b*) Includes:

i. A verification from the Ministerie Van Cultuur of the Netherlands of the

V 43/193
OCT 4 78
LIM

information set forth in the application:

ii. A certification from the Ministerie Van Cultuur that the Government of the Netherlands is perpared to monitor compliance with the terms and conditions of the permit, and will do so, if and when necessary; and

iii. A statement that the Ministerie Van Cultuur will have no objection to a NMFS decision to amend, suspend, or revoke a permit.

In accordance with the above cited policy, the certification and statements of the Ministerie Van Cultuur, Recreatie en Maatschappelijk Werk have been found appropriate and sufficient to allow consideration of this permit application.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Fla. 33702.

Dated: September 29, 1978.

R. V. MILLER,
Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

[FR Doc. 78-28037 Filed 10-3-78; 8.45 am]

[3510-22]

ISSUANCE OF PERMIT FOR MARINE MAMMALS

On August 9, 1978, notice was published in the FEDERAL REGISTER (43 FR 35874) that an application had been filed with the National Marine Fisheries Service by Quinlan Marine Attractions, Route 3, Box 540, Lincolnton, N.C. 28092, to take six (6) Atlantic bottlenose dolphins (*Tursiops truncatus*) for the purpose of public display.

Notice is hereby given that on September 29, 1978, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries service issued a Permit to Quinlan Marine Attractions subject to certain conditions set forth therein. The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Fla. 33702;

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Gloucester, Mass. 01930.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

SEPTEMBER 29, 1978.

[3510-22]

MARINE FISHERIES ADVISORY COMMITTEE

Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., Appendix I, notice is hereby given of a meeting of the Marine Fisheries Advisory Committee (MAFAC). The meeting (MAFAC XXI) will be held on Thursday and Friday, October 26 and 27, 1978, at the Kona Hilton Hotel, in Kailua-Kona, Hawaii. The meeting will convene at 8 a.m. on October 26, 1978, and recess at 5:30 p.m. On October 27, 1978, the meeting will convene at 8:30 a.m. and adjourn at approximately 12:30 p.m.

Agenda items include: current DOC/NOAA/NMFS activities in fisheries development; budget process in Federal Government; discussion of 1979, 1980, and 1981 NMFS budget; discussion of 1981 draft NMFS program emphasis document; Scientific and Statistical Committees interface with and service to Regional Fishery Management Councils in fulfillment of responsibilities under Fishery Conservation and Management Act; issues and items of interest coming out of meeting of Regional Fishery Management Council Chairmen on October 24-25, 1978; status of Inter-American Tropical Tuna Commission negotiations; current status and future development of fisheries associated with the Western Pacific Islands; Department of Commerce policy on tradeoffs with foreign countries, i.e., foreign vessel access to U.S. fishery conservation zone in exchange for preferential U.S. access to foreign markets; meeting environmental assessment and monitoring responsibilities in the Coastal Zone; and other miscellaneous items.

The committee meeting is open to the public and there will be seating for approximately 75 members of the puolic available on a first come, first served basis. Members of the public having an interest in specific items for discussion are advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact:

Ms. Phyllis Bentz, Marine Fisheries Advisory Committee, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Washington, D.C. 20235; 202-634-7355.

At the discretion of the chairman, interested members of the public may be permitted to speak at times which allow an orderly conduct of committee business, and a reasonable time relationship between the committee's discussion of a given subject, and comments to that same subject by a member of the public.

Interested members of the public who wish to submit written comments should do so at the address noted above. To receive due consideration and fallitate their inclusion in the record of the meeting, written statements should be received within 10 days after the close of the committee meeting.

Dated: September 29, 1978.

JACK W. GEHRINGER,
Acting Assistant Administrator for Fisheries.

[6740-02]

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL78-43]

BOUNTIFUL, UTAH

Petitions for Declaratory Orders and Notice of Consolidation

SEPTEMBER 27, 1978.

In the matter of City of Bountiful, Utah, Utah Power and Light Co., City of Santa Clara, Calif., and Pacific Gas and Electric Co.

Take notice that two petitions have been filed under the Federal Power Act [Act], 16 U.S.C. §§ 791a-825r, for declaratory orders determining that a "municipality" within the meaning of Section 3(7) the Act [16 U.S.C. § 796(7)], as an applicant for a new license under Section 15(a) [16 U.S.C. § 808(a)], is entitled to a preference under Section 7(a) [16 U.S.C. § 808(a)].

The City of Bountiful, Utah [Bountiful] filed its petition on July 21, 1978. Bountiful has applied for a new license for the existing Weber River Project, designated FERC Project No. 2747 in reference to Bountiful's application. The Weber River Project was designated Project No. 1744 when the original long-term license was issued to the Utah Power and Light Co. [UP&L]. The original license has expired, and UP&L has filed an application for a new license.

Bountiful states that it is a municipality and requests the Federal Energy Regulatory Commission to order that Bountiful is entitled to preference within the meaning of Section 7(a) in the issuance of a new license for the Weber River Project. Bountiful also states that the question of whether a municipality is entitled to preference in this situation is entirely one of law and is thus suitable for resolution by declaratory order. Bountiful asserts that resolution of the question of the applicability of the preference provisions of the Act in the issuance of a new license upon expiration of an original license is a matter of interest not only to Bountiful but to other similarly situated municipal corporations, and would reduce uncertainty in this and other similar proceedings involving competing applications by municipalities for new licenses.

The City of Santa Clara, Calif. [Santa Clara] filed a similar petition on August 15, 1978. Santa Clara has applied for a new license for the existing Mokelumne River Project, now licensed to the Pacific Gas and Electric Company [PG&E] as FERC Project No. 137.[1] The original license for this project has also expired, and PG&E has filed an application for a new license. The Mokelumne River Project is designated FERC Project No. 2745 in reference to Santa Clara's application.

Santa Clara also states that it is a municipality and requests the Commission to order that Santa Clara is therefore entitled to preference within the meaning of Section 7(a) in the relicensing of the Mokelumne River Project. Santa Clara states that a decision by the Commission on this question in advance of any hearing in the matter of the competing application for a new license for the Mokelumne River Project would narrow the issues in such a hearing and reduce litigation expenses. Santa Clara also asserts that such a decision would reduce uncertainty in this and other proceedings involving competing municipal applications for new licenses after expiration of existing licenses.

Because both petitions present similar or perhaps the same questions of law regarding the applicability of municipal preference in relicensing proceedings, the petitions are consolidated under a single docket number. This will eliminate unnecessary duplicative effort and expense for all parties who may have an interest in the ultimate question presented in both petitions and who want the opportunity to express their views.

Anyone desiring to be heard or to make any protest about the petitions should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party and participate fully in any hearing or briefing in the proceeding, a person must file a petition to intervene in accordance with the Commission's Rules (18 CFR § 1.8). This requirement applies as well to anyone who is now on the official service list for any of the relevant individual project applications (*i.e.*, FERC Nos. 137, 1744, 2745, and 2747), because this docket constitutes a separate proceeding. Any protest or petition to intervene must be filed on or before November 6, 1978. The Commission's address is: 825 N. Capitol Street NE., Washington, D.C. 20426.

The applications are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-27946 Filed 10-3-78; 8:45 am]

[6740-02]

[Docket Nos. CI77-701, CI77-799]

CITY OF PERRYTON, TEX., et al.

Certification of Stipulation and Agreement

SEPTEMBER 26, 1978.

In the matter of City of Perryton, Tex., Falcon Petroleum Co., Amoco Production Co., and Northern Natural Gas Co.

Take notice that on September 12, 1978, Presiding Administrative Law Judge Stephen L. Grossman certified a proposed stipulation and settlement agreement and certain motions and responses to the Commission for its consideration.

On December 28, 1977, the Commission issued an order in which it set for hearing the following questions: whether the applications for abandonment filed by the City of Perryton, Tex. (City) and Falcon Petroleum Co. (Falcon) should be approved; whether Amoco Production Co. (Amoco) had ceased deliveries to Northern Natural Gas Co. (Northern) from the Purdum No. 1 Well, located in Lipsomb County, Tex., Section 901, H. and T.C. Railway Survey, without authorization pursuant to Section 7(b) of the Natural Gas Act; and whether, by reason of any unauthorized cessation of deliveries, Amoco or Northern acted in violation of the Natural Gas Act.

The proposed Stipulation and Agreement submitted by Falcon, *et al.*,[1]

[1] Project No. 137 was originally licensed to J. W. Preston, Jr. The license was later transferred to PG&E. 6th Annual Report of the Federal Power Commission at 97 (1926).

[1] Parties joining in this motion were City, Northern, Transwestern Pipeline Co. and High Plains Natural Gas Co.

V 43 / 193

would, if approved, resolve the issues posed by Falcon's and City's abandonment application. The Agreement states that Falcon and City would withdraw their pending application for abandonment authorization. Furthermore, Falcon would sell all gas production from the Purdum Well to Northern and Transwestern Pipeline Co. (Transwestern) at whatever price the Commission determines is just and reasonable. In addition, Falcon submitted a separate statement in support of its eligibility to collect the national rate set in Opinion No. 770-A for the Purdum gas.

Northern's Motion to Dismiss would, if granted, dispose of all questions concerning violations of the Natural Gas Act posed by the Commission's December 28 order. Northern states in its Motion to Dismiss that the proposed settlement agreement in this case would result in the Purdum Unit gas being sold to the same two pipelines who had received the gas before the alleged violative activities occurred and that deliveries would be made in the same proportions as each had previously received the gas. Northern states that in view of the fact that there is no longer any dispute concerning the disposition of the gas, and in view of the fact that the gas will be delivered to the same pipelines which had previously taken deliveries, "no useful purpose would be served in continuing the show cause aspect of the proceeding."

The Presiding Administrative Law Judge also submitted to the Commission the Commission Staff's response to the above-referenced motions, a motion of the Commission Staff to Add Parties Respondent, and responsive pleadings thereto.

Comments with respect to the proposed settlement may be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before October 10, 1978. Such comments will be considered in determining appropriate action, but those filing comments will not as a result of such action become parties to this proceeding.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-65 (PGA78-4) (AP78-1)]

COLUMBIA GAS TRANSMISSION CORP.

Deferring Procedural Dates and Scheduling Prehearing Conference

SEPTEMBER 25, 1978.

On September 18, 1978, Counsel for Columbia Gas Transmission Corp. (Columbia) filed a motion to defer procedural dates and schedule a prehearing conference for the above captioned proceeding in compliance with the Commission order issued August 31, 1978. The motion stated that Staff Counsel is agreeable to the procedures requested therein.

Upon consideration, notice is hereby given that a prehearing conference is scheduled in this proceeding for November 28, 1978, provided that Columbia furnish (at Staff's request) any additional documentation that Columbia may have to support its July 31, 1978, revised tariff sheet filing. Notice is also given that the filing of Columbia's case-in-chief and of Staff's statement of position are deferred until dates to be determined by the Presiding Administrative Law Judge after the prehearing conference.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-66 (PGA No. 78-4) (AP No. 78-1)

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 26, 1978.

Take notice that Columbia Gas Transmission Corp. (Columbia) on September 12, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. Columbia states that this filing amends its filing of July 31, 1978, and proposes an effective date of September 2, 1978. Columbia states that the proposed changes are the result of the revised rates of Texas Eastern Transmission Corp., at Docket No. RP74-41, et al., filed September 7, 1978, to become effective August 9, 1978. As a result of this revision, Columbia's revised rates herein proposed to become effective September 2, 1978 reflect a Purchased Gas Cost Adjustment which is $2,075,276 less than that approved, subject to refund, by Commission Order issued August 31, 1978.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, N. E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for pubic inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI78-88]

JOSEPH P. MUELLER

Petition for Special Relief

SEPTEMBER 26, 1978.

Take notice that on August 15, 1978, Joseph P. Mueller (Petitioner), 1010 Wilson Building, Corpus Christi, Tex. 78476, filed a petition for special relief in Docket No. RI78-88 pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 C.F.R. 2.76).

Petitioner seeks a rate increase from 60¢ per Mcf to $1.26 per Mcf for the sale of gas from the Ramirena, North (Pettus) field, Live Oak County, Tex. to United Gas Pipeline Co. Petitioner states that this rate will be required to meet the costs associated with a proposed installation of equipment for removal of excessive water interfering with increased gas production.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and procedure (18 C.F.R. 1.8 or 1.10). All such petitions or protests should be filed on or before October 17, 1978. Protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

MICHIGAN WISCONSIN PIPE LINE CO.

[Docket No. RP73-14 (PGA78-3) (DCA78-2)]

PGA Rate Increase

SEPTEMBER 25, 1978.

Take notice that on September 15, 1978, Michigan Wisconsin Pipe Line Co. (Michigan Wisconsin) tendered for filing Twenty-first Revised Sheet No. 27F to its F.E.R.C. Gas Tariff, Second Revised Volume No. 1. Michigan Wisconsin proposed an effective date of November 1, 1978 for said revised sheet.

The foregoing tariff sheet reflects in the two-part rates a commodity increase of 8.56¢ per Mcf and a demand charge decrease of $0.31 occasioned by (1) a Purchase Gas Adjustment of 15.61¢ per Mcf, together with the demand charge decrease of $0.31, which reflects principally the combined effect of (a) the replacement of old sources of gas supply with higher priced new gas, (b) contractual increases and escalations due to producers under Opinion Nos. 699, 749 and 770, and (c) rate changes by pipeline suppliers; (2) a decrease of 6.17¢ per Mcf in the surcharge level to 5.92¢; and (3) a reduction of .88¢ per Mcf in the Demand Charge Adjustment to .39¢. One-part rates have been increased 7.88¢ to reflect the Purchase Gas Adjustment and the surcharge adjustment referred to in (1) and (2) above.

Michigan Wisconsin further states that it requests a waiver of the requirements of Part 154 of the Commission's Regulations under the Natural Gas Act to the extent that such waiver may be necessary to permit this filing of Twenty-first Revised Sheet No. 27F to be made and to become effective November 1, 1978. However, in the event the Commission does not accept Twenty-first Revised Sheet No. 27F to become effective November 1, 1978, Michigan Wisconsin requests that Alternate Twenty-first Revised Sheet No. 27F, which excludes one-hundreth of a cent (.01¢) from the surcharge adjustment representing the cost of emergency purchases above rates prescribed by Opinion No. 770-A, be accepted and Twenty-first Revised Sheet No. 27F be suspended for 1 day to become effective November 2, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-519]

NATURAL GAS PIPELINE CO. OF AMERICA

Notice of Application

SEPTEMBER 26, 1978.

Take notice that on September 14, 1978, Natural Gas Pipeline Co. of America (Applicant), 122 South Michigan Avenue, Chicago, Ill. 60603, filed in Docket No. CP78-519 and application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to divert and transport up to 500 Mcf of gas per day for delivery to Amoco Production Co. (Amoco) for use as field compressor fuel, and to construct and operate facilities necessary to make such delivery, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant states that Applicant purchases natural gas produced by seven producers from the Campbell Reservoir, Old Ocean Field, Brazoria and Matagorda Counties, Tex., pursuant to seven separate gas purchase contracts designating Amoco as operator in the field, and that Amoco processes such gas in Amoco's Old Ocean Gasoline Plant. Applicant purchases the gas at the interconnection between Applicant's facilities and those of Amoco, located near the outlet of the gasoline plant. Applicant asserts that due to substantial decline in the pressure of the gas produced in the Campbell Reservoir compression is necessary for the maintenance of deliveries on a full time basis.

It is indicated that pursuant to a letter agreement dated April 1, 1978, Amoco has agreed to acquire, construct and operate the required compression facilities at Amoco's expense. Applicant proposes to provide fuel gas for such compression facility, up to a maximum of 500 Mcf per day. Applicant further proposes to construct and operate at Applicant's expense, 3,300 feet of two inch lateral pipeline extending from a point of Applicant's existing pipeline facilities to the site of said compression equipment, along with measuring and related facilities needed to effectuate the delivery of the fuel gas. Applicant asserts that the estimated cost of the facilities proposed to be installed by it is $43,000, and that such cost would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to interfere is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. SP78-6]

SINCLAIR OIL CORP.

Order Granting Special Permission Request

SEPTEMBER 25, 1978.

On January 31, 1978, Sinclair Oil Corp. (Sinclair Oil) requested that the Commission grant its wholly-owned subsidiary, Sinclair Pipeline Co. (Sinclair Pipeline) exemptions from the tariff filing requirements of Section 6 of the Interstate Commerce Act (Act); the valuation reporting requirements of Section 19a and maintenance of a uniform system of accounts required by Section 20. (49 USC Sections 6, 19a, 20).[1]

Sinclair Oil based its requests on the assertion that Sinclair Pipeline[2] is a private carrier rather than a common carrier and thus not subject to Section 6 and the other provisions of the Act.[3]

Nevertheless, we find that Sinclair Pipeline is a "common carrier" as that term is defined under the Act (49 USC Section 1 et seq.)[4] "Common Carrier" for the purposes of the Act is not limited only to common carrier for hire but rather encompasses all pipeline carriers.[5] This interpretation is consistent with legislative history and case law. *Champlin Refining Co.* v. *United States*, 329 U.S. 29 (1946). *United States* v. *Champlin Rfg. Co.*, 341 U.S. 290 (1950); *Valvoline Oil Co.* v. *U.S.* 308 U.S. 141 (1939) ("* * * the fact that the oils transported belonged to the owner of the pipeline is not conclusive against the transportation being such commerce.")[6]

However, we believe that Sinclair Pipeline should be granted a temporary waiver of the filing and reporting requirements of Section 6, 19a and 20 of the Act. This finding is based in part, on the Commission's authority to exempt a common carrier from the tariff filings requirements of Section 6 of the Act when good cause is shown, as is the case here.[7] Further, the discretionary language of Sections 19a and 20 of the Act provides the statutory predicate for our decision to exempt Sinclair Pipeline from the reporting requirements thereunder.

Sinclair Pipeline is a common carrier subject to all of the provisions of the Act, however, we hold that present circumstances warrant the requested exemptions. Any change in the carrier's situation, as defined in ordering paragraph C, shall be reported immediately to this Commission.

The Board orders:

(A) Sinclair Oil Corp.'s request to exempt its subsidiary, Sinclair Pipeline Co., from certain reporting and filing requirements is hereby granted on a temporary basis.

(B) Until further ordered, Sinclair Pipeline Co. shall not be required to comply with Sections 6, 19a, and 20 of the Interstate Commerce Act (49 U.S.C. §§ 6, 19a, 20), except as indicated in paragraph "(D)" below.

(C) Sinclair Pipeline Co. shall promptly report to this Commission any change in its operational status including but not limited to: (1) Increased accessibility of other pipelines or refiners to its pipeline system; (2) changes in its competitive position in the Denver, Colo. area; (3) changes in the ownership of the pipeline facilities; (4) changes in ownership of oil and petroleum by-products in transit; and (5) shipment tenders or the demand for services made by any person.

(D) Sinclair Pipeline Co. shall maintain all books and records in a manner consistent with recognized accounting principles in accordance with the Uniform System of Accounts for Oil Pipelines 49 CFR 1204 and shall make such books and records accessible to the Commission or its duly authorized agents on request.

(E) Sinclair Pipeline Co. shall keep in readiness information needed to update its most recent valuation report on file with this Commission.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Oil Pipeline Board.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-27954 Filed 10-3-78; 8:45 am]

[6740-02]

[Docket No. RP72-121; PGA 78-3a]

SOUTHWEST GAS CORP.

Change in Rates Pursuant to Purchased Gas Cost Adjustment

SEPTEMBER 26, 1978.

Take notice that on September 19, 1978, Southwest Gas Corp. ("Southwest") tendered for filing Substitute First Revised Sheet No. 10, constituting the Statement of Rates of its FERC Gas Tariff, Original Volume No. 1. According to Southwest, the purpose of this filing is to adjust rates of Southwest under its Purchased Gas Adjustment Clause in Section 9 of the General Terms and Conditions contained in said tariff, as a result of changes in rates from its supplier, Northwest Pipeline Corp. ("Northwest"), effective October 1, 1978. The proposed effective date for Southwest's proposed change in rates is October 1, 1978.

Southwest states that copies of the filing have been mailed to the Nevada Public Service Commission, the California Public Utilities Commission, Sierra Pacific Power Co., and CP National (formerly California-Pacific Utilities Co.).

Any person desiring to be heard, or to protest said filing, should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-27955 Filed 10-3-78; 8:45 am]

[1] On April 11, 1978 a Notice of Request for Change in Carrier Status was issued. Petitions and protests were directed to be filed on or before April 24, 1978. None have been filed.

[2] Sinclair pipeline consists of three wholly-owned pipeline systems, one of which crosses state boundaries. Sinclair Pipeline consists of a "Gathering System" originating at Sand Draw Station, Wyoming and extending to Rasvoil Station, Wyoming where it connects with a segment of the "Crude Trunk System". The Crude Trunk System terminates at Sinclair Oil's refinery in Sinclair, Wyo. The crude oil is refined into petroleum products and then transported via the Medicine Bow System to Sinclair Oil's terminal facility in Denver, Colo. Title to the crude oil and the petroleum products transported within the Sinclair Pipeline System is in Sinclair Marketing, Inc., a sister subsidiary of Sinclair Pipeline. Sinclair Oil maintains that no other refiner or pipeline company has connections with the Medicine Bow System.

[3] Sinclair primarily bases its request as to Sections 19 and 20 of the Act on the discretionary language found in these statutes.

[4] Section 1(1) states: "The provisions of this chapter shall apply to common carriers engaged—* * * (b) the transportation of oil or other commodity, except water and except natural or artificial gas, by pipe line * * * From one State * * * to any other State * * * Section 1(3)(a) explains "The term 'common carrier' as used in this chapter shall include all pipe-line companies * * * engaged in such transportation * * * as common carriers for hire."

[5] See footnote 2 describing the salient characteristics of the Sinclair Pipeline System.

[6] The Supreme Court, after reviewing the legislative background of Section (1)(b)(3) determined that all pipeline companies engaged in the transportation of oil or other commodities in interstate commerce are "common carriers" subject to the Act.

[7] Sinclair asserts that all systems are 100 percent owned by Sinclair. Title to all commodities transported in the systems is held by Sinclair Marketing, Inc., a sister subsidiary of Sinclair Pipeline. Sinclair further asserts that no other refinery is so situated geographically as to request use of its Pipeline System.

[6740-02]

[Docket No. RP73-114]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Tariff Filing

SEPTEMBER 25, 1978.

Take notice that on September 12, 1978, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), tendered for filing proposed tariff sheets to its FERC Gas Tariff, Ninth Revised Volume No. 1, consisting of the following: First Revised Sheet Nos. 213A and 213B; and Second Revised Sheet Nos. 213 and 213C.

Tennesse states that the sole purpose of these revised tariff sheets, which are to be effective on October 13, 1978, is to make certain minor changes in the PGA provision in Article XXIII of the General Terms and Conditions in its Ninth Revised Volume No.1

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-27956 Filed 10-3-78; 8:45 am]

[6740-02]

[Docket No. CP71-304]

UNION LIGHT, HEAT AND POWER CO AND COLUMBIA GAS TRANSMISSION CORP.

Petition to Amend

SEPTEMBER 26, 1978.

Take notice that on August 28, 1978,[1] The Union Light, Heat and Power Co. (Union), 107 Brent-Spence Square, Covington, Ky. 41012, and Columbia Gas Transmission Corp. (Columbia) 1700 MacCorkle Avenue SE., Charleston, W. Va. 25314, filed in Docket No. CP71-304 a joint petition to amend the order issued by the Federal Power Commission on February 14, 1972 (47 FPC 325)[2], in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize an increase in the rate of return component included in the cost of service tariff approved therein, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Union states that pursuant to the order issued February 14, 1972, it was authorized to receive at the southern termini of its jurisdictional feeder lines natural gas which it transports and delivers, for the account of Columbia, to points of intersection between the facilities of Union and The Cincinnati Gas and Electric Co. (Cincinnati) at the Kentucky-Ohio state line. Union further states that the gas delivered to Cincinnati for the account of Columbia represents such quantities of natural gas as Cincinnati is entitled to receive from Columbia at the subject delivery points. It is asserted that for such transportation service, Columbia pays Union an allocated portion of Union's annual costs pertaining to the facilities used in the service, and Cincinnati reimburses Columbia for all payments made by Columbia to Union for the Transportation.

It is stated that the rate of return component in the cost of service formula utilized to calculate Union's monthly transportation charge is determined as an amount equal to 6¼ percent per annum of its rate base as of November 30 of each year.

Union states that this rate of return is no longer adequate and requests that the order be amended to allow a rate of return which more adequately reflects current capital costs. Union further states that since it is primarily an electric company with a capital structure and capital costs not closely attuned to its jurisdictional gas transmission operations which account for less than 1.2 percent of its gross gas revenues, it proposes to adopt in the costs of service formula prescribed under its Rate Schedule X-4, the rate of return ultimately allowed by the Commission for Union's affiliated gas transmission company, Lawrenceburg Gas Transmission Corp. (Lawrenceburg) in Lawrenceburg's pending rate case in Docket No. RP78-37. Union asserts that there is currently a settlement agreement in that proceeding before the Commission which allows a 9.87 percent overall rate of return for Lawrenceburg.

Columbia requests amendment of the certificate issued in Docket No. CP71-304 to the extent necessary to permit Columbia simultaneously to track in its Rate Schedule X-33 the increase in Union's rate of return thus permitting Columbia to be reimbursed by Cincinnati for any increased payments made to Union as a result of the change in rate of return.

Petitioners submit that this petition to amend the existing certificate is warranted in lieu of a rate filing pursuant to Section 4 of the Natural Gas Act since Union's rate schedule is a cost of service formula whose other cost elements will be unchanged by the rate of reutrn increase requested by Union.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determing the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a a party in any hearing therein must file a petition to in-

[1] The application was initially tendered for filing on August 28, 1978, however, the fee required by Section 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until September 18, 1978; thus, the filing was not completed until the latter date.

[2] This proceeding was commenced before the FPC. By the joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC. The term "Commission", when used in the context of action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[Docket Nos. RP 73-3 (PGA 78-3) et al.]

TRANSCONTINENTAL GAS PIPE LINE CO.

Granting Extension of Time

SEPTEMBER 25, 1978.

On September 14, 1978, Transcontinental Gas Pipe Line Corp. (Transco) filed a letter requesting an extension of time for the filing of Tenth Revised Tariff Sheet No. 12 and Ninth Revised Tariff Sheet No. 15 in the above captional proceeding as instructed in the Commission order of August 31, 1978. The letter stated that Transco intends to petition for rehearing in this case and that the extension of time is required to preserve Transco's right to rehearing.

Upon consideration, notice is hereby given that the time period in Ordering Paragraph (C) of the Commission order of August 31, 1978, with respect to the filing of Tenth Revised Tariff Sheet No. 12 and Ninth Revised Tariff Sheet No. 15 is extended to and including October 13, 1978.

TRANSCONTINENTAL GAS PIPE LINE CORP.

Filing of Stipulation and Agreement

SEPTEMBER 26, 1978.

Take notice that on September 25, 1978, Transcontinental Gas Pipe Line Corp. (Transco) tendered for filing and "Agreement as to Rates" in this docket. Transco states that this agreement, if approved by the Commission, would resolve most of the issues in this proceeding. Specifically reserved for hearing in this docket are two issues, rate of return and the proper depreciation rates.

Any person desiring to be heard or to protest said Stipulation and Agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before October 17, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

UNITED GAS PIPE LINE CO.

Notice Granting Extension of Time

SEPTEMBER 25, 1978.

On September 14, 1978, Commission Staff Counsel filed a motion for extension of time to file top sheets in the above captioned proceeding. The motion states that Staff received an incomplete response from United on its data requests and must make a further data request of United before top sheets can be prepared.

Upon consideration, notice is hereby given that an extension of time is granted to and including November 15, 1978, for Staff's filing of top sheets in this proceeding.

KENNETH F. PLUMB
Secretary.

Office of Assistant Secretary for International Affairs

UNITED STATES AND JAPAN

Proposed Subsequent Arrangement

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the United States and Japan (Atomic Energy, Cooperation for Civil Uses), and the additional Agreement for Cooperation between the United States and the European Atomic Energy Community (Atomic Energy, Cooperation for Peaceful Uses).

The subsequent arrangement to be carried out under the above mentioned agreements involves approval of a transfer of 65 spent fuel assemblies containing 190 kilograms of plutonium and 29,000 kilograms or uranium containing 274 kilograms of U-235 from the Kansai Electric Power Co., Japan, to the Euratom Supply Agency for Compagnie Generale des Matieres Nucleaires, LaHague, France for the purpose of reprocessing.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than October 19, 1978.

For the Department of Energy.

Dated: October 2, 1978.

HAROLD D. BENGELSDORF,
Director for Nuclear Affairs International Programs.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 981-8; OPP—30154]

PESTICIDE PROGRAMS

Receipt of Applications To Register Pesticide Products Containing New Active Ingredient

ICI Americas, Inc., Concord Pike and New Murphy Road, Wilmington, DE 19897, has submitted to the Environmental Protection Agency (EPA) applications to register the following pesticide products each containing 0.005 percent of the active ingredient 3-[3-(4'-bromo[1,1'-biphenyl]-4-yl)-1,2,3,4-tetrahydro-1-naphthalenyl]-4-hydroxy-2*H*-1-benzopyran-2-one which has not been included in any previously registered pesticide products. The applications propose that the products all be classified for general use for the control of the Norway and roof rats and house mice in homes, industrial, and agricultural buildings.

EPA file symbol	*Product name*
10182-EA	Talon Rodenticide Pellets.
10182-ER	Talon Rodenticide Bait Pack (mini pellets).
10182-EL	Talon Rodenticide (mini pellets) in mouse box.
10182-EU	Talon Rodenticide Bait Pack (pellets).
10182-EG	Talon Rodenticide Bait Bits in Trays.
10182-EE	Talon Rodenticide Pellets in Trays.
10182-EN	Talon Rodenticide Mini Pellets.

Notice of receipt of these applications does not indicate a decision by this Agency on the applications. Interested persons are invited to submit written comments on these applications to the Federal Register section, Program Support Division (TS-757), Office of Pesticide Programs, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. The comments must be received on or before November 3, 1978, and should bear a notation indicating the EPA File Symbol to which the comments pertain. Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying

processing of the application. Specific questions concerning these applications should be directed to Product Manager (PM) 16, Registration Division (TS-767), Office of Pesticide Programs, at the above address or by telephone at 202-755-9315. The labels furnished by ICI Americas, Inc., as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register section from 8:30 a.m. to 4 p.m. Monday through Friday.

Notice of approval or denial of the applications to register pesticide products will be announced in the FEDERAL REGISTER. Except for such material protected by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: September 26, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

UNDERGROUND INJECTION CONTROL

List of States Requiring Program; Correction

On September 25, 1978, EPA published a Notice which lists States needing underground injection programs under the Safe Drinking Water Act. (FR Doc. 78-26715, 43 FR 43420.) The following corrections should be made to the Notice.

1. On page 43420, left column, add the following immediately after the "FOR FURTHER INFORMATION CONTACT" paragraph:

"SUPPLEMENTARY INFORMATION: Section 1421 of the Safe Drinking Water Act (Pub. L. 93-523, as amended by Pub. L. 95-190) requires the Administrator of the Environmental Protection Agency (EPA) to publish regulations which set forth minimum requirements for State underground injection control programs to protect drinking water sources."

2. On page 43420, right column, last paragraph, change "H.R. Report No. 93-11895" to "H.R. Report No. 93-1185."

Dated: September 28, 1978.

FEDERAL DEPOSIT INSURANCE CORP.

INTERNATIONAL BANKING ACT OF 1978

Order Extending Federal Deposit Insurance Coverage to Branches of Insured Puerto Rico Banks Located in the United States

The Board of Directors of the FDIC has reviewed the International Banking Act of 1978 (the "IB Act") which provides for the first time that a branch of a foreign bank located in the United States is eligible for Federal deposit insurance. The Board of Directors has also considered the provision of the IB Act which denotes a branch of a bank organized under the laws of Puerto Rico as a branch of a foreign bank when the branch is located in the United States. The Board concludes that these provisions of the IB Act render doubtful the continued insured status of domestic branches of insured Puerto Rico banks even though the branches were insured prior to enactment of the IB Act and even though the banks themselves remain insured. In order to resolve any questions regarding the insured status of these branches and in order to avoid undue hardship to any branch or depositor that might otherwise be adversely affected by the sudden loss of deposit insurance coverage: *It is hereby ordered,* That any branch of an insured Puerto Rico bank that is located in any State will continue to be insured beginning with the date of enactment of the IB Act.

By order of the Board of Directors.

Dated at Washington, D.C., this 28th day of September 1978.

FEDERAL DEPOSIT INSURANCE CORP.,
ALAN R. MILLER,
Executive Secretary.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10218; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, La.; San Francisco, Calif.; Chicago, Ill.; and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 16, 1978 in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: T-3688-1.

Filing party: Mr. D. W. Gwin, L. A. Parish, Inc., 61 Saint Joseph Street, Mobile, Ala. 36601.

Summary: Agreement No. T-3688-1, between the Lake Providence Port Commission (Port) and Lake Providence Terminal Co., Inc., (LPTC), modifies the parties' basic agreement providing for the Port's lease to LPTC of certain premises at Lake Providence, East Carroll Parish, La. to be

V 43 / 193

OCT 4 1978

operated as a marine terminal facility. The purpose of the modification is to define the term "wharfage;" provide for additional insurance; provide that LPTC shall pay all taxes on the facilities; provide additional default conditions; change the term "terminal use charge" to "wharfage charge;" and provide for LPTC's retention of three percent of such wharfage use charges as a collection and handling charge.

Agreement No.: T-3688-A.

Filing party: Mr. D. W. Gwin, L. A. Parish, Inc., 61 Saint Joseph Street, Mobile, Ala. 36601.

Summary: Agreement No. T-3688-A, between the Lake Providence Port Commission (Port) and Lake Providence Terminal Co., Inc., (LPTC), provides for the Port's three-year (with renewal options) lease to LPTC of a pneumatic tire crane and a clam shell bucket, to be used at certain facilities leased to LPTC under FMC Agreement No. T-3688, at Lake Providence, East Carroll Parish, La. As compensation, LPTC shall pay Port those tonnage rental amounts stipulated in Agreement No. T-3688, together with wharfage charges, less a three percent collection and handling charge, and thirty percent of the gross earnings and revenues of LPTC from any work performed outside of the port area utilizing said crane. The terms of Agreement No. T-3688 are incorporated in and made a part of T-3688-A for all purposes by reference.

By order of the Federal Maritime Commission.

Dated: September 29, 1978.

JOSEPH C. POLKING,
Assistant Secretary.

FEDERAL RESERVE SYSTEM

WEST GEORGIA FINANCIAL CORP.

Formation of Bank Holding Company

West Georgia Financial Corp., Tallapoosa, Ga., has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of West Georgia Bank of Tallapoosa, Tallapoosa, Ga. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

West Georgia Financial Corp., Tallapoosa, Ga., has also applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to engage in the activities of acting as insurance agent or broker for the sale of credit life and accident and health insurance that is directly related to the extension of credit by a bank or bank-related firm. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Notice of the application was published on September 13, 1978, in the *Tallapoosa Journal-Beacon*, a newspaper circulated in Tallapooosa, Ga.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 23, 1978.

Board of Governors of the Federal Reserve System, September 26, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

MODEL ADOPTION LEGISLATION AND PROCEDURES ADVISORY PANEL

Meeting

The Model Adoption Legislation and Procedures Advisory Panel was established by the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978 (Pub. L. 95-266, Title II, section 202) to advise and assist the Secretary of HEW in the review of current conditions, practices, and laws relating to adoption, with special reference to their effect on facilities or impending the location of suitable adoptive homes for children who would benefit by adoption and the completion of suitable adoptions for such children. The Panel will propose to the Secretary model adoption legislation and procedures not later than 12 months after its appointment.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. app. 1, sec. 10, 1976) that the Panel will hold a meeting October 16 through 19, 1978. The meeting will be held at the following times and locations:

October 16, 9 a.m.-5 p.m., Room 529A, Hubert H. Humphrey Building, 200 Independent Avenue SW., Washington, D.C.

October 17 and 18, 9 a.m.-5:30 p.m., Room 5549, Donohoe Building, 400 Sixth Street SW., Washington, D.C.

October 19, 9 a.m.-4:40 p.m., Room 339A, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C.

On October 16, the Panel will establish rules for decisionmaking and will consider and approve an agenda for the remainder of the meeting. The Panel's agenda will address the basic specifications for the model adoption legislation in response to a number of adoption issues identified in Pub. L. 95-266 and elsewhere. The Panel will meet in both plenary and task force sessions during the 4-day meeting.

Further information on the Panel may be obtained from Ms. Susan Weber, Acting Chief, Training and Technical Assistance Division, Children's Bureau, P.O. Box 1182, Washington, D.C. 20013, telephone 202-755-7820. Model Adoption Legislation and Procedures Advisory Panel meetings are open for public observations.

Dated: September 29, 1978.

ARNOLD SAMPSON,
HDS Committee Management Officer.

Social Security Administration

ADVISORY COUNCIL ON SOCIAL SECURITY

Public Meeting

AGENCY: Advisory Council on Social Security, HEW.

ACTION: Notice is hereby given of public meetings of the Advisory Council on Social Security and the Panel of Actuaries and Economists.

SUMMARY: Notice is hereby given pursuant to Pub. L. 92-463, that the Advisory Council on Social Security, established pursuant to Section 706 of the Social Security Act, as amended, will meet on Monday, October 16, 1978 from 9 a.m. to 5 p.m. in Room 800 of the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. The meeting will be devoted to the topic of social security financing.

There will be a meeting of the Advisory Council's panel of actuaries and economists on Tuesday, October 17, 1978 from 9 a.m. to 12 p.m. in Room 503A, Hubert H. Humphrey Building. The panel will continue its review of the economic and actuarial assumptions used in social security cost projections.

These meetings are open to the public.

Individuals and groups who wish to have their interest in the social security program taken into account by the Council may submit written comments, views, or suggestions to Mr. Lawrence H. Thompson.

FOR FURTHER INFORMATION, CONTACT:

Mr. Lawrence H. Thompson, Executive Director of the Advisory Council, P.O. Box 17054, Baltimore, Md. 21235. Telephone inquiries should be directed to Mr. John T. Sabo, telephone number 301-594-3171.

(Catalog of Federal Domestic Assistance Program Numbers 13.800-13.807 Social Security Program)

LAWRENCE H. THOMPSON,
Executive Director, Advisory Council on Social Security.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[INT DES 78-41]

NEW MEXICO

Availability of Draft Star Lake-Bisti Regional Coal Environmental Statement and Holding of Public Hearings

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement on possible development of coal resources in the Star Lake-Bisti Region of northwestern New Mexico.

The draft statement analyzes the environmental impacts that would result from the rights-of-way for the proposed Star Lake Railroad and the Fruitland Coal Load Transmission Line which would service coal mines in the region, and examines the cumulative impacts of potential coal development through 1990 in McKinley, Rio Arriba, Sandoval, and San Juan Counties in northwestern New Mexico.

Single copies of the draft statement can be obtained from the:

BLM District Manager, Albuquerque District Office, 3550 Pan American Freeway NE., P.O. Box 6770, Albuquerque, N. Mex. 87107.

BLM State Director, New Mexico State Office, Post Office Building, P.O. Box 1449, Santa Fe, N. Mex. 87501.

BLM Area Manager, Farmington Resource Area Headquarters, 900 La Plata Road, P.O. Box 568, Farmington, N. Mex. 87401.

Copies of the draft statement are also available for inspection at the following locations:

Washington Office of Public Affairs, Bureau of Land Management, Room 5627, 18th and C Streets NW., Washington, D.C. 20240.

Albuquerque City Library, 501 Copper Avenue NW., Albuquerque N. Mex. 87107.

Farmington City Library, 302 North Orchard Avenue, Farmington, N. Mex. 87401.

Gallup Public Library, 115 West Hill Avenue, Gallup, N. Mex. 87301.

Santa Fe Public Library, 121 Washington Avenue, Santa Fe, N. Mex. 87501.

Grants Public Library, 525 West High, Grants, N. Mex. 87020.

Written comments on the draft environmental statement should be submitted by December 4, 1978, to the District Manager, Albuquerque District Office, Bureau of Land Management, 3550 Pan American Freeway NE., P.O. Box 6770, Albuquerque, N. Mex. 87107.

Oral and written comments will also be received at public hearings to be held:

November 14, 1978 at the San Juan College Theatre, San Juan College, 4601 College Boulevard, Farmington, N. Mex.

November 16, 1978, at the Holiday Inn, 2020 Menaul Boulevard NE., Albuquerque, N. Mex.

The hearings will be held at 2 p.m. and 7 p.m. at each location.

Oral testimony of 10 minutes maximum length will be accepted from each witness at the hearing in lieu of written comments or in addition to any written comments submitted by each witness. The 10-minute time limitation will be strictly enforced. The complete text of prepared testimony may be filed with the presiding officer at the hearing whether or not the speaker has been able to finish with oral delivery in the allotted 10 minutes.

Speakers will be heard, if present, in their established order on the witness list. After the last listed witness has been heard the presiding officer will consider the request of any other person present and wishing to testify. Only one witness will be allowed to present the viewpoints of a single organization. However, any witness will be permitted to give germane testimony if offered as the views or opinions of a private citizen.

Written requests to testify orally should be received at the Albuquerque District Office at the above address prior to close of business on November 9, 1978. Requests should identify the organization represented and should be signed by the prospective witness.

Written and oral comments on the draft statement will receive equal consideration in preparation of the final environmental statement scheduled for publication in February 1979.

Approved: September 29, 1978.

ARNOLD E. PETTY,
Acting Associate Director, Bureau of Land Management.

[Colorado 27134]

WESTERN SLOPE GAS CO.

Pipeline Application

SEPTEMBER 26, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Western Slope Gas Co., P.O. Box 840, Denver, Col. 80201, has applied for a right-of-way for 3.5-inch o.d. natural gas distribution pipeline totaling approximately 7 linear miles across the following public lands:

SIXTH PRINCIPAL MERIDIAN, COLORADO

T. 1 S., R. 99 W., Section 34; T 2 S., R. 99 W., Sections 2, 3, 11, 12, 13, 24, 25, and 36; T. 2 S., R. 98 W., Sections 19 and 30; T 3 S., R. 99 W., Section 1, all in Rio Blanco County.

The primary purpose for construction of the proposed pipeline is to enable the applicant to convey natural gas from the West Douglas Natural Gas Field by way of the West Douglas to Black Sulphur Natural Gas Transmission Line to an industrial customer.

The purposes of this notice are: To inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental other analyses necessary for determining whether the application should be approved and, if so, under what terms and conditions; to allow interested parties to comment on the application; and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Col. 80202, as

V 43 / 193

T. 3 S., R. 104 W.,
Sec. 13: E½
Sec. 24: SE¼SE¼
Sec. 25: N½
T. 4 S., R. 103 W.,
Sec. 15: SW¼NW¼
Sec. 16: All
Sec. 17: S½
Sec. 18: S½
Sec. 19: E½NW¼, NE¼SW¼, W½SE¼
Sec. 20: E½NW¼, NE¼SW¼, NW¼SE¼
Sec. 30: NW¼NE¼, SW¼SE¼
Sec. 31: NW¼NE¼
T. 4 S., R. 104 W.,
Sec. 2: Lot 1
Sec. 11: NE¼, E½SE¼
Sec. 12: SW¼, SW¼
Sec. 13: N½
Sec. 25: NW¼NW¼

The above-named gathering system will enable the applicant to collect natural gas and to convey it to its customers. The purposes for this notice are: (1) To inform the public that the Bureau of Land Management is proceeding with the preparation of environmental and other analytic reports, necessary for determining whether or not the applicantion should be approved and if approved, under what terms and conditions; (2) to give all interested parties the opportunity to comment on the applicantion; (3) to allow any party asserting a claim to the lands involved or having bona fide objections to the proposed natural gas gathering system to file its claim or objections in the Colorado State Office. Any party so filing must include evidence that a copy thereof has been served on Northwest Pipeline Corp.

Any comment, claim, or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, as promptly as possible after publication of this notice.

ENDANGERED SPECIES PERMIT

Receipt of Application

Applicant: Regional Director, Regional VI, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Lakewood, Colo. 80225.

The Applicant requests a permit to take (capture) and relocate wolves (*Canis lupus*) that have been identified as being a threat to human safety or livestock, in order to enhance the survival of the species. Humane care and treatment during transport has been indicated by the applicant.

Documents and other information submitted with this application are available to the public during normal business hours in Room 534, 1717 H Street NW., Washington, D.C., or by writing to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240.

This application has been assigned file number PRT 2-3276. Interested persons may comment on this application by submitting written data, views, or arguments to the Director at the above address on or before November 3, 1978. Please refer to the file number when submitting comments.

Dated: September 29, 1978.

FRED L. BOLWAHNN,
Acting Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

ENDANGERED SPECIES PERMIT

Receipt of Application

Applicant: James C. McMurry, Route V, Box 98, Tulia, Tex. 79088.

The applicant requests a permit to import two hite-eared pheasants (*Crossoptilon crossoptilon*) and eight brown-eared pheasants (*C. mantchurium*) from Mr. Jack Schuiteman of Devlin, Ontario for enhancement of propagation. Humane care and treatment during transport has been indicated by the applicant.

Documents and other information submitted with this application are available to the public during normal business hours in Room 534, 1717 H. Street NW., Washington, D.C., or by writing to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240.

This application has been assigned file number PRT 2-3305. Interested persons may comment on this application by submitting written data, views, or arguments to the Director at the above address on or before November 3, 1978. Please refer to the file number when submitting comments.

Dated: September 29, 1978.,

FRED L. BOLWAHNN,
Acting Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

PROPOSED LIVESTOCK GRAZING IN THE TULE-DAD-HOME CAMP AREAS OF LASSEN AND MODOC COUNTIES, CALIF., AND WASHOE COUNTY, NEV.

Availability of final environmental statement pursuant to the section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared the final environmental statement for proposed livestock grazing in Modoc and Lassen Counties, Calif. and Washoe County. Nev.

V 43 / 193

The proposal involves construction of fences and facilities to implement livestock grazing systems, providing adequate forage and habitats for wildlife species, and consideration of other public uses on approximately 600,000 acres of public lands.

Copies are available for inspection at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building 18th and C Streets, NW., Washington, D.C. 20240, telephone 202-343-5717.
California State Office, Bureau of Land Management, Federal Building, 2800 Cottage Way, Sacramento, Calif. 95825, telephone 916-484-4541.
Susanville District Office, Bureau of Land Management, 705 Hall Street, P.O. Box 1090, Susanville, Calif. 96103, telephone 916-257-5385.

A limited number of single copies may be obtained from the Office of Public Affairs, Bureau of Land Management (Washington, D.C. 20240) and the Bureau of Land Management, P.O. Box 1090, Susanville, Calif. 96103.

Dated: September 29, 1978.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

PROPOSED UPPER GILA-SAN SIMON ENVIRONMENTAL STATEMENT AREA LIVESTOCK GRAZING MANAGEMENT PROGRAM

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for a proposed livestock grazing management program in the Upper Gila-San Simon Environmental Statement Area, Ariz. The proposal involves intensive management of grazing on 1,040,329 acres of public lands; custodial management of grazing on 38,161 acres of public lands; ephemeral management of grazing on 250,155 acres of public lands; deferment of grazing on 14,050 acres of public lands, and 4,014 acres of public lands unallotted for grazing. In addition, the proposal calls for the construction of range improvements to facilitate grazing management, including three detention dams for erosion control and sediment retention.

A limited number of copies are available upon request to the Arizona State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Ariz. 85073.

Public reading copies will be available for review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets NW., Washington, D.C. 20240, telephone 202-343-5717.
Arizona State Office, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Ariz. 85073, telephone 602-261-3706.
Safford District Office, Bureau of Land Management, 425 E. Fourth Street, Safford, Ariz. 85546, telephone 602-428-4040.

Dated: September 29, 1978.

DEPARTMENT OF LABOR

Office of the Secretary

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Competition

AGENCY: Employment and Training Administration.

ACTION: Announcement of additional jurisdictions to be open for competition and grantees to be funded without competition.

SUMMARY: This notice announces additional areas to be open for competition as outlined in the FEDERAL REGISTER of July 14, 1978, "Change of Funding Cycle and Related Changes." Also announced are grantees that will be funded without competition.

EFFECTIVE DATE: September 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Harry Kranz, Acting Director, Office of Farmworker Programs, U.S. Department of Labor, 601 D Street NW., Washington, D.C. 20213, 202-376-6128.

ADDITIONAL AREAS OPEN FOR COMPETITION

On July 14, 1978, the following areas were announced as open for competition: Alabama; county of Los Angeles, Calif.; Iowa; Louisiana; Massachusetts; Michigan; Minnesota; New Jersey; New Mexico; Tennessee; Texas (all counties); and Wisconsin. The purpose of this notice is to announce additional jurisdictions open for competition pursuant to section 97.204(c)(4), title 29, subtitle A, for migrant and other seasonally employed farmworker programs operated under title III, section 303, of the Comprehensive Employment and Training Act. These additional areas are Pennsylvania, Nebraska, Oregon, and Idaho.

Preapplications for Federal assistance, standard form 424, must be submitted no later than October 10, 1978, to serve the four new States. Grant applications from potential grantees seeking to serve migrant and seasonal farmworkers in jurisdictions subject to competition must be submitted no later than November 1, 1978. Funding requests will be prepared in accordance with CFR, January 7, 1977, sections 97-212 through 97-218.

GRANTEES TO BE EXTENDED WITHOUT COMPETITION

Noncompetitive grantees will be extended by the major modification process for the period January 1, 1979, through September 30, 1979. Modifications for existing section 303 grants for continuing grantees must be submitted no later than October 23, 1978. These grantees, by State, are listed below:

ARIZONA

Migrant Opportunity Programs, Phoenix, Ariz.

ARKANSAS

Arkansas Council for Farmworkers, Inc., Little Rock, Ark.

CALIFORNIA

Center for Employment Training of the Central Coast Counties, San Jose, Calif.
Proteus Adult Training, Inc., Visalia, Calif.
Campesinos Unidos, Brawley, Calif.
California Human Development Corp., Santa Rosa, Calif.
Central Coast Counties Development Corp., Aptos, Calif.
City of Stockton, Stockton, Calif.

COLORADO

Colorado Council on Migrant and Seasonal Agricultural Workers and Families, Wheat Ridge, Colo.

CONNECTICUT

New England Farmworkers Council, Inc., Hartford, Conn.

DELAWARE

Migrant and Seasonal Farmworkers Association, Inc., Dover, Del.

FLORIDA

Florida State Department of Education, Tampa, Fla.

GEORGIA

Migrant and Seasonal Farmworkers Association, Inc., Atlanta, Ga.

HAWAII

Office of the Governor, Department of Labor and Industrial Relations, Honolulu, Hawaii.

ILLINOIS

Illinois Migrant Council, Chicago, Ill.

INDIANA

Indiana Office of Manpower Development, Indianapolis, Ind.

KANSAS

ORO Development Corp., Wichita, Kans.

KENTUCKY

Tennessee Opportunity Programs, Bowling Green, Ky.

MAINE

Penobscot County Manpower Administration, Bangor, Maine.

MARYLAND

Migrant and Seasonal Farmworkers Association, Inc., Princess Anne, Md.

MISSISSIPPI

Mississippi Delta Council for Farmworker Opportunities, Clarksdale, Miss.

MISSOURI

Rural Missouri, Inc., Jefferson City, Mo.

MONTANA

Human Resources Division, State of Montana, Helena, Mont.

NEVADA

CET-State of Nevada, Carson City, Nev.

NEW YORK

Program Funding, Inc., Rochester, N.Y.

NORTH CAROLINA

Migrant and Seasonal Farmworkers Association, Inc., Raleigh, N.C.

NORTH DAKOTA

North Dakota Migrant Council, Grand Forks, N. Dak.

OKLAHOMA

ORO Development Corp., Oklahoma City, Okla.

PUERTO RICO

Commonwealth of Puerto Rico, Department of Labor, San Juan, P.R.

RHODE ISLAND

New England Farmworkers Council, Inc., Pawtucket, R.I.

SOUTH CAROLINA

South Carolina Office of the Governor, Columbia, S.C.

SOUTH DAKOTA

Minnesota Migrant Council, St. Cloud, Minn.

UTAH

Utah Migrant Council, Midvale, Utah.

VERMONT

Orleans County Council of Social Agencies, Inc., Newport, Vt.

VIRGINIA

Migrant and Seasonal Farmworker Association, Inc., Richmond, Va.

WASHINGTON

Northwest Rural Opportunities, Grandview, Wash.

WEST VIRGINIA

Governor's Manpower Office, Charleston, W. Va.

WYOMING

Northwestern Community Action Programs of Wyoming, Inc., Worland, Wyo.

Grantees should consult title 29, CFR, section 97.220.

Special instructions concerning grants and modifications will be issued in accordance with § 97.217, "Negotiations of Final Grant." All applicants should obtain these special instructions for the preparation of the grant applications from the Office of Farmworker Programs.

Signed at Washington, D.C., this 26th day of September 1978.

LAMOND GODWIN,
Administrator, Office of National Programs.

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

Meeting

SEPTEMBER 29, 1978.

Pursuant to section 10(a)(2), of the Federal Advisory Committee Act, 5 U.S.C. (App. 1976), notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a 2-day meeting on Thursday and Friday, October 19-20, 1978. The sessions will be open to the public and will be held in the Penthouse of Page Building No. I, 2001 Wisconsin Avenue NW., Washington, D.C. The Thursday session will begin at 9 a.m.; the session on Friday at 8 a.m.

The Committee, consisting of 18 non-Federal members, appointed by the President from State and local governments, industry, science, and other appropriate areas, was established by the Congress by Public Law 95-63, on July 5, 1977. Its duties are to: (1) Undertake a continuing review, on a selective basis, of national ocean policy, coastal zone management, and the status of the marine and atmospheric science and service programs of the United States; (2) advise the Secretary of Commerce with respect to the carrying out of the programs administered by the National Oceanic and Atmospheric Administration; and (3) submit an annual report to the President and to the Congress setting forth an assessment, on a selective basis, of the status of the Nation's marine and atmospheric activities, and submit such other reports as may from time to time be requested by the President or the Congress.

The tentative meeting schedule follows:

October 19, 1978—Page Building I, 2001 Wisconsin Avenue NW.

9 a.m. Plenary session (Penthouse)—Plans for meeting, Chairman.
9:30 a.m. Working group sessions:
Transportation workshop (Penthouse), Mr. Michael Naess, NACOA:
Ocean Use panel (room 416)—Coastal Zone Management issues and legislative options, Dr. E. Murphy, NACOA.
12 m. Lunch.
1 p.m. Working group sessions (continued from a.m.).
5 p.m. Adjourn.

October 20, 1978—Page Building I, 2001 Wisconsin Avenue NW.

8 a.m. Plenary session (Penthouse)—Coastal Zone Management issues and legislative options (continued), Dr. E. Murphy, NACOA.
10 a.m. NACOA position on Federal organization, Mr. M. Dubs, NACOA.
12:30 p.m. Working lunch.
3 p.m. Adjourn.

Persons desiring to attend will be admitted to the extent seating is available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, 3300 Whitehaven Street NW. (Room 434, Page Building I), Washington, D.C. 20235. The telephone number is 254-8414.

DOUGLAS L. BROOKS,
Executive Director.

[4510-23]

NATIONAL COMMISSION ON EMPLOYMENT AND UNEMPLOYMENT STATISTICS

PUBLIC MEETING

Notice is hereby given that the National Commission on Employment and Unemployment Statistics will hold a public meeting on October 27, 1978, in room 6510, 2020 K Street, NW., Washington, D.C. 20006.

The National Commission on Employment and Unemployment Statistics was established under section 13 of the Emergency Jobs Program Extension Act of 1975, Pub. L. 94-444. Its purpose is to advise the President and the Congress on reliable and comprehensive measurements of employment and unemployment by examining the

OCT 4 1978

V 43/193

procedures, concepts, and methodology involved in employment and unemployment statistics, and suggesting ways and means of improving them.

The meeting will begin at 9:30 a.m. to discuss state and local labor force statistics. The public is invited to attend. Official records of the meetings will be available for public inspection by contacting:

Mr. Wesley H. Lacey, Administrative Officer, National Commission on Employment and Unemployment Statistics, Suite 550, 2000 K Street, NW., Washington, D.C. 20006.

Signed at Washington, D.C., this 28th day of September, 1978.

SAR A. LEVITAN,
Chairman.

NUCLEAR REGULATORY COMMISSION

ABNORMAL OCCURRENCE REPORT

13th Report Submitted to the Congress

Notice is hereby given that pursuant to the requirements of section 208 of the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission has published and issued the 13th periodic report to Congress on abnormal occurrences (NUREG-0090, Vol. 1, No. 2). The release date is September 29, 1978.

Under the Energy Reorganization Act of 1974, which created the NRC, an abnormal occurrence is defined as "an unscheduled incident or event which the Commission (NRC) determines is significant from the standpoint of public health or safety." The NRC has made a determination, based on criteria published in the FEDERAL REGISTER (42 FR 10950) on February 24, 1977, that events involving an actual loss or significant reduction in the degree of protection against radioactive properties of source, special nuclear, and byproduct materials are abnormal occurrences.

The 13th report to Congress is for the second quarter of 1978. The report identifies the occurrances or events that the Commission determined were significant and the remedial action that was undertaken. The report indicates that the following incidents or events were determined by the Commission to be significant and reportable:

(a) There were two abnormal occurrences at the 69 nuclear power plants licensed to operate. One involved a generic concern pertaining to fuel assembly control rod guide tube integrity. The second involved an overexposure of two radiation protection technicians.

(b) There were no abnormal occurrences at fuel cycle facilities (other than nuclear power plants).

(c) There were no abnormal occurrences at other licensee facilities.

(d) There was one abnormal occurrence reported by an agreement State. The event involved willful violations of regulations and subsequent termination of a license.

The incidents involved temporary reductions in margins of safety normally provided.

The 13th report to the Congress also contains updating information on abnormal occurrences reported in previous reports.

Interested persons may review the report at the NRC's Public Document Room, 1717 H Street NW., Washington, D.C., or at any of the 130 local Public Document Rooms throughout the country. The report, designated NUREG-0090, Vol. 1, No. 2, may be purchased from the National Technical Information Service, Springfield, Va. 22161, at $4.50 a copy on or about October 13, 1978.

Dated at Washington, D.C., this 28th day of September, 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc. 78-28005 Filed 10-3-78; 8:45 am]

[7590-01]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Procedures for Meetings

BACKGROUND

Procedures to be followed with respect to meetings conducted by the Nuclear Regulatory Commission's Advisory Committee on Reactor Safeguards, which were published October 31, 1977 (42 FR 56972) are renewed by this notice. No changes have been made, and they are reprinted for the information and convenience of interested persons. These procedures are set forth in order that they may be incorporated by reference in future individual meeting notices.

The Advisory Committee on Reactor Safegards (ACRS) is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements from members of the public to be considered as a part of the Committee's information gathering procedure, they are not adjudicatory hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS reviews do not normally encompass matters pertaining to environmental impacts other than those pertaining to radiological safety. ACRS full Committee, Subcommittee, and Working Group meetings are conducted in accordance with sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.).

GENERAL RULES REGARDING ACRS MEETINGS

An agenda is published in the FEDERAL REGISTER for each meeting. Practical considerations may dictate some alterations in the agenda. The Chairman of the Committee, Subcommittee or Working Group which is meeting is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incomplete session from one day to the next.

With respect to public participation in ACRS meetings, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy at the beginning of the meeting. When meetings are held at locations other than Washington, D.C., reproduction facilities are usually not available. Accordingly, 15 additional copies should be provided for use at such meetings. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy addressed to the designated Federal employee specified in the FEDERAL REGISTER notice for the individual meeting in care of the ACRS, NRC, Washington, D.C. 20555. Comments postmarked no later than 1 calendar week prior to a meeting will normally be received in time for reproduction, distribution and consideration at the meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the beginning of the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee, Subcommittee or Working Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether a meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor

OCT 4 1978

can be obtained by a prepaid telephone call, on the working day prior to the meeting, to the Office of the Executive Director of the Committee (telephone 202-634-3265, attention: the designated Federal employee specified in the FEDERAL REGISTER Notice for the meeting) between 8:15 a.m. and 5 p.m., Washington, D.C. time.

(d) Questions may be asked only by ACRS members, consultants and staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc., being used during the meeting. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) A copy of the transcript of the open portions of the meeting where factual information is presented will be available at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, for inspection within 1 week following the meeting. A copy of the minutes of the meeting will be available at the same location on or before 3 months following the meeting. Copies may be obtained upon payment of appropriate charges.

Copies of the above-mentioned minutes and transcript will also be placed in the NRC Local Public Document Room, when appropriate, on the same time schedule. The location of the Public Document Room will be indicated in these cases in the individual FEDERAL REGISTER notice for the meeting.

SPECIAL PROVISIONS WHEN PROPRIETARY SESSIONS ARE TO BE HELD

If it is necessary to hold closed sessions for the purpose of discussing matters involving proprietary information, persons with agreements or orders permitting access to such information may attend those portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and related to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. The minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Designated Federal Employee prior to the beginning to the meeting.

Dated: September 27, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[7590-01]

[Docket No. 50-368]

ARKANSAS POWER AND LIGHT CO., ARKANSAS NUCLEAR ONE, UNIT 2

Issuance of Amendment to Facility Operating License and Granting of Exemptions from Certain Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Facility Operating License No. NPF-6 to Arkansas Power and Light Co. for operation of Arkansas Nuclear One, Unit 2 (the facility) at steady state reactor core power levels not in excess of 2815 megawatts thermal, in accordance with the provisions of the amended license and the Technical Specifications. However, the facility is temporarily restricted from operating at full rated power until certain tests and other items noted in license conditions are completed to the written satisfaction of the Commission. The facility is located at the licensee's site in Pope County, Arkansas. The amended license is effective as of its date of issuance and shall expire at midnight on December 6, 2012.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter I, which are set forth in the amended license. The application for the license complies with the standards and requirements of the act and the Commission's regulations.

This action is in furtherance of the licensing action encompassed in the combined Notice of Receipt of Application for Facility Operating License; Notice of Availability of Applicant's Environmental Report; and Notice of Opportunity for Hearing published in the FEDERAL REGISTER on April 23, 1974 (39 FR 14371).

The Commission has determined that the facility requires exemptions from certain requirements of (1) § 50.55a of 10 CFR Part 50, (2) Appendices G and H to 10 CFR Part 50, and (3) Appendix J to 10 CFR Part 50 for a period of 3 years. These exemptions are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. In making this determination, the Commission has given due consideration to the burden that could result if these requirements were imposed on the facility.

The exemption from certain requirements of § 50.55a of 10 CFR Part 50 relates to the preservice and inservice examination requirements of section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (the ASME Code) for pump scroll welds, nozzle welds, longitudinal and circumferential vessel welds, integrally welded supports, pump studs, vessel cladding, valve bodies, circumferential and longitudinal piping welds, calibration blocks and testing requirements.

The Commission has evaluated the preservice examination program for Arkansas Nuclear One, Unit 2 and has determined that a large portion of the ASME Code required preservice examinations were performed, and has concluded that failure to perform 100 percent preservice examination of the welds identified in the exemption will not significantly affect of assurance of the initial system integrity or the ability to subsequently detect and correct service-induced defects.

The exemptions from certain requirements of Appendices G and H to 10 CFR Part 50 relates to the fracture toughness requirements for the ferritic materials of the pressure-retaining components of the reactor coolant pressure boundary and the reactor vessel material surveillance program.

Although the Arkansas Nuclear One, Unit 2 reactor vessel was ordered and fabricated and its testing program was developed well before the requirements of Appendices G and H to 10 CFR Part 50 became effective, alternative methods for providing adequate margins of safety against brittle fracture and an alternative material surveillance program were proposed.

The Commission has evaluated the alternative methods for providing adequate margins of safety against brittle fracture and the alternative material surveillance program and has concluded that they are acceptable.

The exemption, which shall be granted for a period of three years, from certain requirements of Appendix J to 10 CFR Part 50 relates to the leakage testing requirements for the containment airlocks. Implementation of the specific Appendix J require-

V 4 3 / 1 9 3

ments would result in the testing of the entire containment airlock volume after each entry. The Commission has determined that the testing of the airlock door seals at least once each 22 hours for multiple entries occurring during that interval will provide adequate assurance of the leak tightness of the containment airlock including the containment airlock door seals.

The Commission has determined that the granting of these exemptions and the issuance of this amendment will not result in any significant environmental impact and that pursuant to § 51.5(d)(4) of 10 CFR Part 51, and environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared.

For further details with respect to this action, see (1) Amendment No. 1 to Facility Operating License No. NPF-6 complete with Preoperational Tests and Other Items Which Must Be Completed Prior to Loading Fuel (Attachment 1); and (2) the Commission's related Safety Evaluation supporting Amendment No. 1 to License No. NPF-6; and (3) the Office of Nuclear Reactor Regulation's Safety Evaluation Report (NUREG-0308) Supplement No. 2 dated September 1978. All of these items are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555 and the Arkansas Polytechnic College, Russellville, Ark. 72801.

A copy of Items (1) and (2) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Project Management. Copies of the Safety Evaluation Report Supplement No. 2 (NUREG-0308) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22151.

Dated at Bethesda, Md., this 1st day of September 1978.

[Docket No. 50-368]

ARKANSAS POWER & LIGHT CO., ARKANSAS NUCLEAR ONE, UNIT 2

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 2 to Facility Operating License No. NPF-6 to Arkansas Power & Light Co. for operation of Arkansas Nuclear One, Unit 2 (the facility) located at the licensee's site in Pope County, Arkansas. The amendment is effective as of the date of its issuance.

The amendment temporarily suspends the Technical Specification 3.4.1 which allows for only 1 hour operation without core flow in Operational Modes 3, 4, and 5. The temporary suspension is granted for one 96-hour period valid through October 9, 1978, to allow repairs to be completed on a decay heat suction valve prior to initial reactor criticallity.

The amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action see (1) the licensee's application for amendment dated September 18, 1978 (2) Amendment No. 2 to License No. NPF-6, and (3) the Commission's related Safety Evaluation supporting Amendment No. 2 to License No. NPF-6. All of these items are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555 and the Arkansas Polytechnic College, Russellville, Ark. 72801.

Dated at Bethesda, Md., this 22d day of September 1978.

[Docket No. 50-255]

CONSUMERS POWER CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Provisional Operating License No. DPR-20, issued to Consumers Power Co. (the licensee), which revised the technical specifications for operation of the Palisades plant (the facility) located in Covert Township, Van Buren County, Mich. The amendment is effective as of its date of issuance.

The amendment changes the Palisades technical specifications relating to the limits on axial power distribution.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of this action was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated June 15, 1978, and supplements thereto dated August 15, 21, and 25, 1978, (2) amendment No. 43 to License No. DPR-20, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Mich. 49006. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 8th day of September, 1978.

[Docket No. 50-416]

ILLINOIS POWER CO., ET AL.

Issuance of Amendment to Construction Permit

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Construction Permit No. CPPR-137 issued to the Illinois Power Co. on February 24, 1976. The amendment reflects a change in the ownership of the Clinton Power Station, Unit 1 (the facility) located in DeWitt County, Ill. The amendment is effective as of its date of issuance.

The amendment provides for the addition of Soyland Power Cooperative, Inc., and Western Illinois Power Cooperative, Inc., as co-owners for all licenses previously requested for the facility and the transfer of 10.5 percent ownership interest to Soyland Power Cooperative, Inc., and 9.5 percent ownership interest to Western Illinois Power Cooperative, Inc., of the 100 percent ownership interest held by Illinois Power Co. in the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the amendment.

Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment contained in a letter dated January 31, 1978, (2) Amendment No. 1 to CPPR-137, and (3) the Commission's related Safety Evaluation supporting Amendment No. 1 to CPPR-137. All of these items and other related material are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Local Public Document Room located in the Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Ill. 61727.

A copy of items (2) and (3) may be obtained upon written request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN.: Director, Division of Project Management, Office of Nuclear Reactor Regulation.

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO., ET AL

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 43 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Co., The Connecticut Light and Power Co., The Hartford Electric Light Co., and Western Massachusetts Electric Co., which amended the license and its appended Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2, located in the Town of Waterford, Conn. The amendment is effective as of its date of issuance.

This amendment adds a license condition relating to the completion of facility modifications and the implementation and maintenance of administrative controls for fire protection and modifies the Technical Specifications to require three operable fire pumps and additional spray and/or sprinkler systems and fire hose stations to be operable in the turbine building.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 2, 1978, (2) the licensee's submittals dated June 2, 1978, February 28, 1977, April 12, July 11 and 14, August 2 and 17, 1978, (3) Amendment No. 43 to License No. DPR-65, and (4) The Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. A copy of items (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

[Docket No. 50-346]

TOLEDO EDISON CO. AND CLEVELAND ELECTRIC ILLUMINATING CO., DAVIS-BESSE NUCLEAR POWER STATION, UNIT NO. 1

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Facility Operating License No. NPF-3, issued to the Toledo Edison Co. and the Cleveland Electric Illuminating Co., for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective 20 days after its date of issuance, unless the applicant informs the Commission in writing prior to that time that he disagrees with this course of action.

The amendment revises the requirements for nonroutine environmental operating reports to make them agree with Regulatory Guide 4.8.

The amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the

V 43 / 193
OCT 4 78

license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see Amendment No. 13 to License No. NPF-3. This item is available for public inspection at the Commission's Public Document Room, 1717, H Street, N.W., Washington, D.C. 20555 and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452. A copy of Amendment 13 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Bethesda, Md., this 29th day of September 1978.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 27, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503; 202-395-4529; or from the reviewer listed.

NEW FORMS

DEPARTMENT OF COMMERCE

Bureau of East-West Trade, exception to requirement of order party signature, EAR 372.6(d), on occasion, commercial exporters, 12 responses, 3 hours, Kincannon, C. Louis, 395-3211.

DEPARTMENT OF DEFENSE

Departmental and other program information—institutional providers, CHAMPUS 200, A, B, C, D, annually, nursing facilities, handicapped and psychiatric facilities, 2,500 responses, 1,250 hours, Richard Eisinger, 395-3214.

Departmental and other, determination of eligibility/civilian health and medical program of the uniformed services, CHAMPUS 88, other (see SF-83), military personnel, 250,000 responses, 250,000 hours, Richard Eisinger, 395-3214.

Departmental and other, report of mental health evaluation team, CHAMPUS 345B, weekly, mental health professionals, 480 responses, 1,440 hours, Richard Eisinger, 395-3214.

Departmental and other, medical records request, CHAMPUS 345, other (SF-83), psychiatric residential treatment CTRS for children and adolescents, 2,400 responses, 2,400 hours, Richard Eisinger, 395-3214.

Departmental and other, treatment plan RTC, CHAMPUS 345A, weekly, civilian health providers, 1,500 responses, 3,000 hours, Richard Eisinger, 395-3214.

Departmental and other, OCHAMPUS record information from residential treatment centers, CHAMPUS 296, weekly, CHAMPUS approved residential treatment centers, 1,500 responses, 3,000 hours, Richard Eisinger, 395-3214.

Departmental and other, diagnostic evaluation, program for the handicapped CHAMPUS 141, weekly, CHAMPUS approved institutional providers, 3,500 responses, 7,000 hours, Richard Eisinger, 395-3214.

Departmental and other, application for preauthorization or recertification of CHAMPUS/CHAMPVA benefits, CHAMPUS 190, other (see SF-83), health care providers, 7,000 responses, 7,000 hours, Richard Eisinger, 395-3214.

DEPARTMENT OF LABOR

Employment and Training Administration, study of special incentive work experience program, MT-295, single time, AFDC-WIN registrants; WEP work sponsors; WEP officials, 1,602 responses, 802 hours, Arnold Strasser, 395-6132.

REVISIONS

DEPARTMENT OF AGRICULTURE

Economics, Statistics and Cooperatives Service, fruit tree surveys, annually, fruit growers, 10,000 responses, 2,625 hours, Ellett, Charles A., 395-6132.

Science and Education Administration, 1977-78 nationwide food consumption survey and food intake of individuals, single-time, households, interviewers in United States and Puerto Rico, 3,900 responses, 2,480 hours. Office of Federal Statistical Policy and Standards, Ellett, Charles A., 673-7977.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Economics, Statistics and Cooperatives Service, Kentucky Burley Tobacco objective yield survey, other (see SF-83), tobacco growers, 460 responses, 35 hours, Ellett, Charles A., 395-6132.

Economics, Statistics and Cooperatives Service, popcorn processor survey—June and December, semi-annually, popcorn processors, 100 responses, 33 hours, Ellett, Charles A., 395-6132.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing production and mortgage credit, application for project mortgage insurance (rehabilitation), FHA 2013R, apartment owners, builders, 600 responses, 3,600 hours, Caywood, David P., 395-3443.

NATIONAL SCIENCE FOUNDATION

Applicant information form, NSF-54, teachers, 11,000 responses, 2,250 hours, Warren Topelius, 395-6134.

DAVID R. LEUTHOLD,
Budget and Management Officer.

OHIO RIVER BASIN COMMISSION

REGIONAL WATER AND LAND RESOURCES PLAN AND DRAFT ENVIRONMENTAL IMPACT STATEMENT

Available for Review

Pursuant to section 204(3) of the Water Resources Planning Act of 1965 (Pub. L. 89-80), the Ohio River Basin Commission has prepared a document summarizing the Comprehensive, Coordinated Joint Plan for the Ohio River Basin entitled, The Ohio River Basin—The Regional Water and Land Resources Plan and Draft Environmental, Economic, and Social Impact Statements. The Ohio River Basin Plan and Draft EIS, as presented in this summary, are being reviewed by the Governors and the heads of each Federal and Interstate Agency from which a member of the Commission has been appointed.

Views, comments and recommendations on the Ohio River Basin Plan summary and Draft EIS, are requested by December 22, 1978. Copies are available on request from the Ohio River Basin Commission, 36 East Fourth Street, Cincinnati, Ohio 45202.

FRED E. MORR,
Chairman.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice No. CM-8/113]

OCEAN AFFAIRS ADVISORY COMMITTEE, ANTARCTIC SECTION

Partially Closed Meeting

The Ocean Affairs Advisory Committee, Antarctic Section will meet at 2 p.m. on November 8, 1978, in conference room 6320 of the Department of State, Washington, D.C.

At this meeting, officers responsible for Antarctic matters in the Department of State, will discuss key issues and problems involving the Antarctic in the context of current domestic and international developments. This session will be open to the public. The public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairperson.

The Ocean Affairs Advisory Committee will continue its work on November 9, and 10, 1978, at 10 a.m. in room 7835, in sessions which will not be open to the public. These sessions will be devoted to the discussion of classified material under 5 U.S.C. 552 b(c)1 and 5 U.S.C. 552 b(c)(9)(B). The disclosure of classified material and revelation and considerations which go into policy development, would substantially undermine and frustrate the U.S. position in future negotiations. The purpose of these discussions will be to elicit views concerning the further development of United States policies on Antarctic marine living resources and on Antarctic mineral resources. Other matters and issues relating to the Antarctic, which may be considered at the Tenth Antarctic Treaty Consultative Meeting will also be reviewed. This portion of the meeting will include classified briefings and examination and discussion of classified documents pursuant to Executive Order 11652.

Requests for further information on the meetings should be directed to Lisle Rose, OES/OFA/OCA, Room 5216, Department of State. He may be reached by telephone on 202-632-3262.

Dated: September 18, 1978.

BENOIT BROOKENS, II,
Special Assistant to the Deputy Assistant Secretary for Oceans and Fisheries Affairs.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA Waiver Petition Docket RSOR-78-3]

SEABOARD COAST LINE RAILROAD

Petition for Waiver of Railroad Radio Standards

As required by 45 U.S.C. 431(c) and in accordance with 49 CFR 211.41 and 211.9, notice is hereby given that the Seaboard Coast Line Railroad (SCL) has submitted a waiver petition to the Federal Railroad Administration (FRA). The petition requests that the SCL be granted a permanent waiver of compliance with 49 CFR Part 220 (Radio Standards and Procedures). That part requires railroads to have certain carrier operating rules governing the use of radios during train operations.

Part 220 was published in the FEDERAL REGISTER on January 27, 1977 (42 FR 5065). Compliance with the provisions of that part became mandatory on August 1, 1977.

SCL notes that it has attempted to fully comply with the regulation but has now ascertained that considerable delays to its train operations are being caused by this regulation. These delays are resulting in increased costs and wasted energy. Consequently, SCL seeks a limited waiver of compliance.

The waiver of compliance sought by SCL involves the provisions of § 220.61(b). This section prescribes the procedures which a dispatcher or operator and a crew of a train must adhere to when communications, identified as train orders for the purpose of this regulation, are being transmitted by radio.

The SCL seeks a waiver of compliance with these procedures for several types of radio communications that are used during train operations and which were not previously considered to be train orders by the SCL or the railroad industry. The types of radio communications identified by SCL include verbal permission to proceed through an interlocking; verbal advice to trains that are operating under the authority for train movement that is conveyed by a signal system; and verbal instructions authorizing occupancy of a track or compliance by maintenance of way personnel and trains crews with certain train orders.

The SCL indicates that it has conducted train operations safely for in excess of ten years by utilizing these types of verbal communications and believes that granting this waiver would be consistent with railroad safety.

Interested persons are invited to participate in this proceeding by submitting written comments or views. The FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. However, the FRA will provide an opportunity for oral comment if requested to do so by any interested party. Such requests must be in writing and must be submitted to the FRA before October 20, 1978.

All communications concerning this proceeding should identify the Docket Number, Waiver Petition Docket Number RSOR-78-3, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Trans Point Building, 2100 Second Street SW., Washington, D.C. 20590. Communications received before November 10, 1978, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination, both before and after the closing date for comments, during regular business hours in room 4406, Trans Point Building, 2100 Second Street SW., Washington, D.C. 20590.

(Section 202 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431), 1.49(n) of the regulations of the Office of the Secretary, 49 CFR 1.49(n).)

Issued in Washington, D.C. on September 27, 1978.

ROBERT H. WRIGHT,
Acting Chairman, Railroad Safety Board.

[4810-22]

DEPARTMENT OF THE TREASURY

Customs Service

MICROFICHE OF TEXT OF ADMINISTRATIVE DECISIONS

Availability

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of availability of new service.

SUMMARY: The text of administrative decisions issued by the Office of Regulations and Rulings, U.S. Customs Service, including those contained in the list of unpublished administrative decisions which is published biweekly in the Customs Bulletin, as well as those published as Treasury Decisions, is now available in microfiche format. In addition, a cumulative list of the decisions contained in the biweekly Customs Bulletin listings will appear in the annual bound volume of the Customs Bulletin.

V 43/193
OCT 4 78

EFFECTIVE DATE: The first set of microfiche is now available. Supplements will be issued periodically covering those decisions which are subsequently issued

FOR ADDITIONAL INFORMATION CONTACT:

Sandra J. Reese, Legal Reference Area, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229; 202-566-5095.

SUPPLEMENTARY INFORMATION: The Office of Regulations and Rulings at Customs Service Headquarters issues thousands of administrative decisions (rulings) each year applying the Customs laws and regulations to specific factual situations. Many of these decisions are issued to importers and other interested parties who have written to Customs Service headquarters requesting an administrative ruling under the provisions of Part 177 of the Customs Regulations (19 CFR Part 177). Other decisions are issued to Customs Service field offices under the Customs Service's internal advice program or under other Headquarters review procedures provided for in the Customs Regulations (protest review decisions, for example).

The effective administration of the Customs laws and regulations requires that significant administrative decisions be brought to the attention of Customs officers and the importing community. To this end, the Customs Service has substantially increased the number of decisions published in the Customs Bulletin as Treasury Decisions and, on June 21, 1978, began to publish in the Customs Bulletin a biweekly list of other decisions which have been determined to be significant, but not of sufficient general interest to warrant publication as Treasury Decisions. The biweekly lists are not cumulative, but the will be reproduced in the annual bound volume of the Customs Bulletin.

The decisions included in the biweekly listings are identified by the date of the decision, the six-digit control number assigned to the decision by the Office of Regulations and Rulings, and a brief statement of the issue involved. Copies of these decisions, in a form appropriate for public distribution, may be obtained upon written request to the Legal Reference Area, room 2404, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, at a cost of $0.10 per page (the Customs Service will waive this charge if the total number of pages copied is 10 or less). In addition, the text of these decisions, as well as those published in the Customs Bulletin of Treasury Decisions, is also available in microfiche format through subscription. The cost of the first set of microfiche, which includes a numerical index and covers those decisions contained in the biweekly lists published through September 27, 1978, and those issued after May 1, 1978, which have been published as Treasury Decisions, is $2.55 ($0.15 per sheet of fiche). It is anticipated that supplementary sets of microfiche, covering the decisions set forth in lists and Treasury Decisions, contained in future issues of the Customs Bulletin, will be made available quarterly. Requests for the first set of microfiche and for subcriptions should be directed to the Legal Reference Area at the above address. Subscribers will automatically receive supplementary sets of microfiche as they are issued and will be billed accordingly.

The Customs Bulletin is published each week by the Customs Service and is offered for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current single copy price of the Customs Bulletin is $0.85, with yearly subscriptions available for $43.70 ($10.95 additional for foreign mailing).

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

Office of the Secretary

AUTOMOTIVE AND MOTORCYCLE REPAIR MANUALS FROM UNITED KINGDOM

Termination of Antidumping Investigation

AGENCY: U.S. Treasury Department.

ACTION: Termination of Antidumping Investigation.

SUMMARY: This notice is to advise the public that the antidumping investigation of automotive and motorcycle repair manuals from the United Kingdom is being terminated. The termination is based on a determination that in this case antidumping duties should not be assessed upon the importation of the repair manuals in question in the light of the provision in the "Florence Agreement" that such merchandise shall be imported free of any "customs duties or other charges."

EFFECTIVE DATE: October 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Lublinski, Office of the Chief Counsel, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-2938.

SUPPLEMENTARY INFORMATION: On June 30, 1978, a petition in proper form was received pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from Counsel on behalf of Clymer Publications, Los Angeles, Calif., alleging that automotive and motorcycle repair manuals from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as the "Act"). This information was the subject of an antidumping proceeding notice published in the FEDERAL REGISTER of August 8, 1978 (43 FR 35139).

On the basis of the evidence submitted, it was concluded that there was substantial doubt of injury or liklihood of injury to an industry in the United States by virtue of such imports. Accordingly, the U.S. International Trade Commission was advised of such doubt pursuant to section 201(c)(2) of the Act (19 U.S.C. 160(c)(2)). On September 6, 1978, the Commission advised that there was insufficient basis to terminate the investigation (43 FR 40935).

However, subsequent to the initiation of this investigation, a question was raised whether dumping duties should not be imposed on the subject merchandise in the light of the "Florence Agreement," the Agreement on the Importation of Educational, Scientific, and Cultural Material, dated June 24, 1959, T.I.A.S. No. 6129, 17 U.S.T. 1835; as implemented pursuant to the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651), 80 Stat. 897.

It has been the uniform practice of the Customs Service, under the Act and judicial interpretations thereof, to treat antidumping duties the same as ordinary customs duties. Section 211 of the Act also provides that dumping duties "shall be treated as regular customs duties within the meaning of all laws relating to the drawback of customs duties" (19 U.S.C. 170). In construing this language, the Court of Customs and Patent Appeals has concluded that "• • • Congress desired and intended that the additional duties provided for in this act should be considered as duties for all purposes." *C. J. Tower & Sons* v. *United States*, 71 F. 2d 438, 445, 21 C.C.P.A. 417, 434 (1934). Also, in *Imbert Imports, Inc.* v. *United States*, 331, F. Supp. 1400 (Cust. Ct. App. Term 1971), the court held that dumping duties are "duties" within the meaning of article I, section 8 of the U.S. Constitution.

The agreement provides that certain specified articles, which include the subject manuals, shall upon importation be free of "any customs duties or other charges." In the instant case, in which "substantial doubt" of injury has already been expressed, there appears to be no reason to exclude antidumping duties from the term "any customs duties or other charges," as used in the Florence Agreement. Accordingly, I hereby terminate this investigation.

The United States became a party to the Florence Agreement subject to a reservation permitting suspension of any obligation under the agreement with respect to any covered product which, as a result of obligations incurred under the agreement, is imported in such relatively increased quantities and under such conditions as to cause or threaten serious injury to the domestic industry producing like or directly competitive products. This reservation was given effect in section 9 of the implementing legislation (Pub. L. 89-651, 80 Stat. 897), and can presently be invoked through the procedure of section 201(b) of the Trade Act of 1974 (19 U.S.C. 2251(b)). Accordingly, if pursuant to that procedure, it were determined that the subject merchandise is being imported in such increased quantities as to be a substantial cause of serious injury, or threat thereof, to the domestic industry; duty-free treatment could then be suspended with respect to the subject merchandise. This would eliminate the preclusion against imposing dumping duties, and as a result a dumping investigation could be reinitiated upon receipt of a petition in proper form.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

INTERSTATE COMMERCE COMMISSION

[Notice 722]

ASSIGNMENT OF HEARINGS

SEPTEMBER 29, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 133689 (Sub-187), Overland Express, Inc., now being assigned for Pre-hearing Conference November 27, 1978, at, Chicago, IL, in a hearing room to be later designated.

MC 139577 (Sub-12F), Adams Transit, Inc., now being assigned November 28, 1978 (1 day), at Chicago, IL, in a hearing room to be later designated.

MC 113678 (Sub-740F), Curtis, Inc., now being assigned November 29, 1978 (3 days), at Chicago, IL, in a hearing room to be later designated.

MC 102616 (Sub-948F), Coastal Tank Lines, Inc., now being assigned December 4, 1978 (2 days), at Chicago, IL, in a hearing room to be later designated.

MC C 9859, John Septon Produce Co., Inc.—Revocation of Certificates, No. MC F 12793, B. J. McAdams, Inc.—Control and Merger—John Sephton Produce Co, Inc., and No. MC F 13350, Bob McAdams, B. J. McAdams, Inc., Wiley A. Sanders, Wiley A. Sanders, Inc., E. W. McKean, Jr., Clairborne W. Patty, Jr.—Investigation of Control—John Sephton Produce Co., Inc., now being assigned for continued hearing on November 14, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 139495 (Sub-310), National Carriers, Inc., now being assigned November 28, 1978, at Dallas, Tex (1 day), in a hearing room to be later designated.

MC 133233 (Sub-58F), Clarence L. Werner DBA Werner Enterprises, now being assigned for hearing on November 29, 1978, at Dallas, TX (1 day), in a hearing room to be later designated.

MC 115841 (Sub-589), Colonial Refrigerated Transportation, Inc., now being assigned for hearing on November 30, 1978 (2 days); at Dallas, TX in a hearing room to be later designated.

MC 100666 (Sub-389F), Melton Truck Lines, Inc., now being assigned for hearing on December 4, 1978 (1 week), at Dallas, TX in a hearing room to be later designated.

H. G. HOMME, Jr.,
Acting Secretary.

[Revised Service Order No. 1332]

CAR SERVICE

Railroad Operating Regulations for Freight Car Movement

Decided: September 27, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Revised Service Order No. 1332.

SUMMARY: There are severe shortages of freight cars throughout the country. Revised Service Order No. 1332 requires all railroads to place, remove, foward, weigh, clean or repair cars within 60 hours in order to expedite the handling of freight cars and to increase their availability for reloading. Gondola cars, flat cars and boxcars with mechanical designations LC and LU are removed from the order.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: In a petition filed September 1, 1978, the Association of American Railroads (ARR) seeks various revisions of Service Order No. 1332.

Revised Service Order No. 1332 was issued on Augus 31, 1978, (43 FR 39883, Sept. 7, 1978) in accordance with our findings on August 29, 1978, that an acute shortage of boxcars, gondola cars, hopper cars, flat cars and covered hopper cars exists throughout the country.

The AAR now contends that although shortages of boxcars, gondola cars and flat cars still exist, the magnitude of these shortages does not justify the continued subjection of these cars to the requirements of the order.

Service Order No. 1332 was issued on August 7, 1978, in accordance with a decision of the Commission dated August 4, 1978, that an acute shortage of freight cars including boxcars, gondola cars and flat cars exists throughout the country. In a subsequent decision on August 29, 1978, the Commission repeated its finding that acute shortages of these cars exist.

Prior to the issuance of Service Order No. 1332, the Commission had issued a similar order, Service Order No. 1309, on March 9, 1978, applicable to boxcars, covered hopper cars and flat cars used for Trailer-on-Flat Car traffic. Effective April 15, 1978, this order was revised to include gondola cars, hopper cars, all flat cars and two minor car types. This order and its various revisions were also issued because of an acute shortage of these various car types.

Cars subject to Service Order No. 1309 were required to be placed, removed, forwarded, weighed, cleaned, or given light repairs within 24 hours. This order was permitted to expire on July 31, 1978, In its place the Commission issued Service Order No. 1332 which allows the carriers 60 hours to perform all of these car movement functions except that the 24-hour time limitation continues to apply to the giving of required notices and to placement on hold or inspection tracks.

The AAR argues that the reported levels of car shortages have declined and, as to boxcars, gondola cars and flat cars, these shortages are below the levels which the AAR considers critical. Consequently, it believes that these cars should no longer be subject to the order. We do not entirely agree. In its petition the AAR stated that the average daily shortages of all cars had declined to approximately 20,000 cars as of September 1, 1978. However, the actual level of shortages reported by the carriers did not reach the 20,000 car level until September 9. During this period the average daily shortages of boxcars increased from a low level of 3,997 cars for the week ending August 12 to 4,735 cars for the week ending September 2, then declined to 4,420 cars on September 9. The average daily shortage of gondola cars during this period ranged between a high of 1,778 cars on August 12 and a low of 1,478 cars on September 2. It stood at 1,623 cars on September 9. The average daily shortage of flat cars reported by the carriers during this time approximated 250 cars. It was 252 cars on September 9.

Recently, weekly loadings of boxcars have increased slightly from 88,733 cars during the week ending August 12 to 95,755 cars during the week ending September 2. Similarly, the weekly loadings of gondola cars increased by slightly more than 4,500 cars and the weekly loadings of flat cars slightly less than 4,500 cars during this same period.

In summary, although the reported levels of shortages of these cars has remained relatively stable, weekly car loadings have increased throughout the period that Service Order No. 1332 has been in effect. Further, we are now entering that time of year when railroad carloads normally reach their peak. Crop forecasts recently released by the United States Department of Agriculture indicate that record crops of corn and soybeans will be harvested during the next few weeks. These harvests will result in sharp increases in the demand for boxcars, which the AAR asks we eliminated from the order as well as increased demands for covered hopper cars which are also subject to this order.

We do not consider the 60-hour time limits imposed upon the carriers by Service Order No. 1332 to be unduly burdensome or harsh particularly during a period when the railroads are failing to fill orders for boxcars by several thousand cars per day. Neither do we subscribe to the idea, as expressed by the AAR in its petition, that a requirement to move cars within two and one half days (60 hours) after they become available for movement can be categorized as "special handling."

We do agree that gondola and flat car shortages have diminished sufficiently to justify the removal of these cars from the order.

It is ordered. Revised Service Order No. 1332 shall be revised as provided herein. The petition of the AAR in all other respects is denied.

By the Commission. Commissioners O'Neal, Christian Brown, Stafford, Gresham, and Clapp.

NANCY L. WILSON,
Acting Secretary.

[Notice No. 181]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 25, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is publishd in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

OCT 4 1978

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 1450 (Sub-95TA), filed August 2, 1978. Applicant: POWER FUELS, INC., Highway No. 2 and No. 52 West, Box 969, Minot, ND 58701. Representative: F. J. Smith, Suite 307, 420 North Fourth Street, Bismarck, ND 58501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid molten sulfur* between points in Billings, Dunn, Stark and McKenzie Counties, ND, restricted to traffic having a subsequent movement by rail, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Warren Petroleum Co., a Division of Gulf Oil Corp., P.O. Box 1589, Tulsa, OK 74102. Send protests to: Ronald R. Mau, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 268 Federal Building and U.S. Post Office, 657 2nd Avenue North, Fargo, ND 58102.

MC 74416 (Sub-17TA), filed August 2, 1978. Applicant: LESTER M. PRANGE, INC., Box 1, Kirkwood, PA 17536. Representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street NW., Washington, DC 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Concrete products*, on vehicles equipped with mechanical unloading devices, from Eddystone, PA to points in NJ; DE; MD and DC, for 180 days. Supporting shipper(s): Concrete Products, Eddystone Industrial Park, Eddystone, PA 19013. Send protests to: Charles F. Myers, District Supervisor, Interstate Commerce Commission, P.O. Box 869 Federal Square Station, Harrisburg, PA 17108.

MC 78400 (Sub-61TA), filed August 2, 1978. Applicant: BEAUFORT TRANSFER CO., P.O. Box 151, Gerald, MO 63037. Representative: Ernest A. Brooks, II, 1301 Ambassador Building, St. Louis, MO 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Steel coils*, from the facilities of Steelabrade Corp. at Granite City, IL to Sedalia, MO, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Steelabrade Corp., 1603 Cleveland, Branite City, IL 62040. Send protests to: Peter E. Binder, Acting District Supervisor, Interstate Commerce Commission, 210 North 12th Street, Room 1465, St. Louis, MO 63101.

MC 111729 (Sub-741TA), filed July 20, 1978. Applicant: PUROLATOR COURIER CORP., (a New York corporation), 3333 New Hyde Park Road, New Hyde Park, NY 11040. Representative: Elizabeth L. Henoch (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Business papers, records, and audit and accounting medial of all kinds*, between Ashland, VA, on the one hand, and, on the other, Deptford and Maple Shade, NJ, for 90 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Best Products Co., Inc., P.O. Box 26303, Richmond, VA 23260. Send protests to: Maria B. Kejss, Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, NY 10007.

MC 114273 (Sub-415TA), filed July 17, 1978. Applicant: CRST, INC., 3930 16th Avenue SW., P.O. Box 68, Cedar Rapids, IA 52406. Representative: Kenneth L. Core, Commerce Attorney (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Toilet preparation and washing and cleaning compounds* (except in bulk, in tank vehicles) from Houloke, MA to Chicago, IL; (2) *black protective coatings and cleaners and metal cleaners* (except in bulk, in tank vehicles) from Milford, CT to Chicago; (3) *paints, varnishes, preservatives and fillers* (except in bulk, in tank vehicles), from Avon, CT to Nevada, IA; (4) *drugs, medicines, chemicals, and toilet preparations* (except in bulk, in tank vehicles), from Brooklyn, NY; Groton, CT, and Parsippany, NJ to points in IL; (5) *toilet preparations, cleaning compounds, shampoos and equipment, materials and supplies* used in the manufacture and distribution thereof, from West Springfield, MA to Fort Madison, IA; (6) *paper and paper articles*, from Warwick, NY to Chicago, IL. The purpose of this filing is to substitute single-line service for existing joint-line service. Supporting shipper(s): There are approximately 6 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the filed office named below. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines. IA 50309.

NOTE.—Common control may be involved.

MC 116763 (Sub-423TA), filed July 20, 1978. Applicant: CARL SUBLER TRUCKING, INC. (a FL Corporation), North West Street, Versailles, OH 45380. Representative: H. M. Richters (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from the facilities of Bowater Southern Paper Corp., at or near Calhoun, TN, to points in MN, for 180 days. Supporting shipper: Bowater Southern Paper Corp., George C. Lessig, Assistant Transportation and Distribution Manager, Calhoun, TN 37309. Send protests to: Paul J. Lowry, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 5514-B Federal Building, 550 Main Street, Cincinnati, OH 45202.

MC 118560 (Sub-6TA), filed August 2, 1978. Applicant: GENERAL TRUCKING CO., INC., a TN corporation, 1100 School Street, P.O. Box 269, Columbia, TN 38401. Representative: Edward C. Blank II, P.O. Box 1004, Middle Tennessee Bank Building, Columbia, TN 38401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Crushed limestone*, from the plantsite of Southern Stone Co., Inc., Cherokee, AL, to the Tennessee Valley Authority Nuclear Plant, Yellow Creek, MS, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Southern Stone Co., Inc., 2111 Eighth Avenue South, Birmingham, AL 35233. Send protests to: Glenda Kuss, Transportation Assistant, Suite A-422, U.S. Court House, 801 Broadway, Nashville, TN 37203.

MC 119489 (Sub-51TA), filed August 2, 1978. Applicant: PAUL ABLER, d.b.a. CENTRAL TRANSPORT CO., 2500 North 13th Street, P.O. Box 249, Norfolk, NE 68701. Representative: A. J. Sindelar, 2500 North 13th Street, P.O. Box 249, Norfolk, NE 68701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes; transporting: *Asphalt*, from Cheyenne and Casper, WY, to points in NE, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Dave Rau, Equipment Superintendent, Western Engineering, Inc., Box 350, Harlan, IA; Bud Knight, President, Knight Bros., Chapman, NE; Harry R. Duryea, Highway Superintendent, Custer County, Broken Bow, NE. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, NE 68102.

[Notice No. 180]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 25, 1978.

The following are notices of filing of applications for temporary under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 47171 (Sub-113TA), filed August 1, 1978. Applicant: COOPER MOTOR LINES, INC., a South Carolina corporation, P.O. Box 4259, Greenville, SC 29608. Representative: Harris G. Andrews, P.O. PRIVACY ACT OF 1974

Systems of Records; Annual Publication

V 43/193
OCT 4 78

[6310-02]

CENTRAL INTELLIGENCE AGENCY
PRIVACY ACT ISSUANCES
Notice of Incorporation by Reference

Agency: Central Intelligence Agency.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this Agency has amended since publication of the 1977 Compilation.

Dates. This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Mr George W Owens,
Information and Privacy Coordinator,
Central Intelligence Agency,
Washington, D.C. 20505.

Approval of the Director

The notices of systems of records of this Agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on 13 July 1978.

1977 Compilation Up-To-Date

Information about this Agency's systems of records that appears in "Privacy Act Issuances—1977 Compilation" is complete and up-to-date. Since publication of the 1977 Compilation, this Agency has made no changes to its systems of records

Availability of 1977 Compilation

"Privacy Act Issuance—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be obtained from this Agency free of charge by writing to the Information and Privacy Coordinator or by calling (703) 351-7486. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this Agency's systems of records appear in Volume I of the 1977 Compilation at page 48050 (Vol. 42, No. 184, pp. 48050-48074, 22 September 1977). The price of this Volume is six dollars and fifty cents.

John F. Blake,
Deputy Director for Administration.

DEPARTMENT OF STATE
(Public Notice 628)
PRIVACY ACT ISSUANCES
Notice of Incorporation by Reference

Agency: Department of State.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference th notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this agency has amended since publication of the 1977 Compilation.

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Ms. Sharon Kotok,
Chief, Privacy Staff,
Room 1239,
Department of State,
Washington, D.C. 20520, 202-632-1267.

Approval of the Director, Federal Register: The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval on July 13, 1978 to incorporate these Privacy Act Issuances by reference. Published below is the full text of systems of records that this agency has amended since publication of the 1977 Compilation.

Availability of 1977 compilation: "Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of notices in 1977 compilation: Notices of this agency's systems of records appear in Volume II of the Privacy Act Issuances—1977 Compilation page 49699 (42 FR 49699) September 27, 1977. The price of this Volume is six dollars and seventy-five cents.

Dated: September 13, 1978.

For the Secretary of State. Ben H. Read,
Deputy Under Secretary for Management.

State—36

System name: Security Records.

System location: Department of State, 2201 C Street NW., Washington, D.C. 20520.

Categories of individuals covered by the system: Employees and former employees of the Department of State; applicants for Departmental employment who have been or are presently being investigated; contractors working for the Department; recipients of Cultural Grants; individuals requiring access to the official Department of State premises who have undergone or are undergoing security clearance; individuals involved in matters of passport and visa fraud, munitions control, unauthorized access to classified information, and alien prospective spouses of American personell of the Department of State; individuals whose activities have a potential bearing on the security of Departmental or Foreign Service Operations. In addition, security files contain information needed to provide protective services for the Secretary of State and visiting foreign dignitaries and heads of state, and to protect the Department's official premises. There are also information copies of investigations of individuals conducted abroad at the request of Federal agencies. Finally, security files contain documents and reports furnished to the Department by other agencies concerning individuals whose activities the other agencies believe may have a bearing on U.S. foreign policy interests.

Categories of individuals covered by the system: Investigatory material relating to any category of individual described above; applications for employment; intelligence reports; fingerprints; photographs; internal memoranda; security violations records.

Authority for maintenance of the system: 5 U.S.C. 7311 and 7531-33; 8 U.S.C. 1104; 18 U.S.C. 111, 112, 201, 202, 1114, 1116, 1117, 1541, 1542, 1543, 1544, 1545, 1546; 22 U.S.C. 211a, 846, 911, 2454, and 2667; Executive Order 10450; Executive Order 11652; Executive Order 10865; 22 CFR Subchapter M.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The principal users of this information outside the Department of State are: Department of Treasury; Civil Service Commission; Agency for International Development; U.S. Information Agency; Arms Control and Disarmament Agency; U.S. Secret Service; Immigration and Naturalization Service; Department of Defense; Central Intelligence Agency; Department of Justice; National Security Agency; Drug Enforcement Administration; any other Federal agency inquiring pursuant to law or Executive Order in order to make a determination of general suitability for employment or retention in employment, to grant a contract or issue a license, grant, or security clearance; any other Federal, State, or municipal law enforcement agency for law enforcement purposes; any other agency or Department of the Federal Government pursuant to statutory intelligence responsibilities or other lawful purposes, any other agency or Department of the Executive Branch having oversight or review authority with regard to its investigative responsibilities; to the extent necessary to identify the individual adequately, to any other record custodian in order to obtain information relevant to a legitimate investigative or intelligence interest of the Department of State. The information may also be released to other Government agencies who have statutory or other lawful authority to maintain such information. Also see 'Routine Uses' of Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy; microfilm; microfiche; computer media.

Retrievability: By individual name.

Safeguards: All employees of the Department of State have undergone a thorough security investigation. Access to the Department of State building and its annexes is controlled by security guards, and is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restricted areas, access to which is limited to authorized personnel.

Retention and disposal: Retention of these records varies, depending upon the specific kind of record involved. They are retired or destroyed in accordance with published schedules of the Department of State. More specific information may be obtained by writing to the Director, Foreign Affairs Document and Reference Center, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520.

System manager(s) and address: Deputy Assistant Secretary for Security, Room 2513, Department of State, 2201 C Street NW., Washington, D.C. 20520.

Notification procedure: Individuals who wish to find out if the Office of Security has records pertaining to them should write to the Director, Foreign Affairs Document and Reference Center, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520. At a minimum, the individual must include: Name; date and place of birth; current mailing address and ZIP code; signature.

Record access procedures: Individuals who wish to gain access to or amend records pertaining to themselves should write to the Director, Foreign Affairs Document and Reference Center (address above).

Contesting record procedures: (See above).

Record source categories: The individual; persons having knowledge of the individual; persons having knowledge of incidents or other matters of investigative interest to the Department; pertinent records of other Federal, State, or local agencies or foreign governments; pertinent records of private firms or organizations; public sources.

Systems exempted from certain provisions of the act: Certain records contained within this system of records are exempted from 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4) (G), and (H), and (I), and (f). See 22 CFR 6a.6. Pursuant to Section (j)(2) of the Act, records compiled by the Passport and Visa Fraud Branch of the Office of Security may be exempted from the requirements of any part of the Act except subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) to the extent necessary to assure the effective completion of the investigative and judicial processes.

State—49

System name: Skills Catalogue Records.

System location: Department of State, 2201 C Street NW., Washington, D.C. 20520.

Categories of individuals covered by the system: Family members of U.S. Government employees (specifically family members of Department of State, Agency for International Development, and International Communications Agency personnel).

Categories of records in the system: Biographic data, including educational background, language skills, special skills, work experience, availability for employment.

V 4 3 / 1 9 3

Authority for maintenance of the system: 22 U.S.C. 2693.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The Family Liaison Office will use this record system to assist family members of U.S. Government employees in acquiring employment and other services. Information from this system will be made available to personnel offices of other Government agencies having employment opportunities. Information may also be disclosed to multinational corporations, international organizations, business firms, foundations, foreign governments, and families at overseas posts who are interested in hiring Foreign Service family members to perform a task commensurate with their work experience or to utilize their services in performing voluntary work.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy, computer media.

Retrievability: By individual name, education, work experience, language facility, overseas experience, current address, Foreign Service post, country, regional bureau.

Safeguards: All employees of the Department of State have undergone a thorough background investigation. Access to the Department of State building and its annexes is controlled by security guards, and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restricted areas, access to which is limited to authorized personnel.

Retention and disposal: These records will be maintained for two years and then retired or destroyed in accordance with published schedules of the Department of State. More specific information may be obtained by writing to Director of Foreign Affairs Document and Reference Center, Room 1239, Department of State, 2201 C Street NW., Washington, 20520.

System manager(s) and address: Director, Family Liaison Office, Department of State, 2201 C Street NW., Washington, D.C. 20520.

Notification procedure: Individuals who have reason to believe that the Skills Catalogue Records might have records pertaining to them should write to the Chief of the Privacy Staff, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520. The individual must specifically request that the Skills Catalogue Records be checked. At a minimum, the individual must include name, date and place of birth, current mailing address and ZIP code, and signature.

Record access procedures: Individuals who wish to gain access to or amend records pertaining to them should write to the Chief of the Privacy Staff (address above).

Contesting record procedures: (see above).

Record source categories: The individual; Who's Who and other such reference publications; newspapers and periodicals; testimony and comments from other persons having knowledge of the individual; pertinent records of other Federal, State, or local agencies and foreign governments; pertinent records of private firms or organizations; other public sources.

State—50

System name: Family Liaison Office Records.

System location: Department of State, 2201 C Street NW., Washington, D.C. 20520.

Categories of individuals covered by the system: Foreign Service employees (primarily State, AID, ICA) and their dependents who have asked the Department of State to provide information regarding governmental and community services available to them.

Categories of records in the system: Name, address, phone number and description of the service requested by the individual; description of steps taken to meet the needs of the individual, i.e. persons/agencies contacted and the results of these contacts.

Authority for maintenance of the system: 22 U.S.C. 811a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information from this record system will be used to assist Foreign Service employees and their dependents in acquiring governmental and community services available to them. Personal information (name, address, phone number and a brief description of the service requested) may be made available to persons or agencies who can perform the requested service, i.e. information may be disclosed to schools to register dependents; to marriage counselors to solve marital grievances; to hospitals to find out services offered.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy.

Retrievability: By individual name.

Safeguards: All employees of the Department of State have undergone a thorough background investigation. Access to the Department of State building and its annexes is controlled by security guards, and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restricted areas, access to which is limited to authorized personnel.

Retention and disposal: These records will be maintained for two years and then retired or destroyed in accordance with published schedules of the Department of State. More specific information may be obtained by writing to Director of Foreign Affairs Document and Reference Center, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520.

System manager(s) and address: Director, Family Liaison Office, Department of State, 2201 C Street NW., Washington, D.C. 20520.

Notification procedure: Individuals who have reason to believe that the Family Liaison Office Records might have records pertaining to them should write to the Chief of the Privacy Staff, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520. The individual must specifically request that the Family Liaison Office Records be checked. At a minimum, the individual must include name, date and place of birth, current mailing address and ZIP code, and signature.

Record access procedures: Individuals who wish to gain access to or amend records pertaining to them should write to the chief of the Privacy Staff (address above).

Contesting record procedures: (see above).

Record source categories: The individual, personnel of the Family Liaison Office, employee supervisors, employee counselor, personnel, security, and medical offices, grievance and appeals board.

State—43

System name: Congressional Correspondence and Voting Records.

System location: Department of State, 2201 C Street, NW., Washington, D.C. 20520.

Categories of individuals covered by the system: Members of Congress and their constituents who request Congressional assistance in obtaining information or services from the Department of State.

Categories of records in the system: Copies of correspondence to and from Members of Congress, which may include inquiries on behalf of constituents and letters to Congressional committees; Congressional voting records on matters pertaining to international relations.

Authority for maintenance of the system: 22 U.S.C. 811a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The principal user of this information outside the Department of State is the Member of Congress. See also "Routine Uses" paragraphs of Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy and computer media.

Retrievability: By name of Member of Congress and constituent; by foreign policy issue.

Safeguards: All employees of the Department of State have undergone a thorough background security investigation. Access to the Department of State and its annexes is controlled by security guards, and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restrictive areas, access to which is limited to authorized employees.

Retention and disposal: The Congressional Correspondence information will be retained for one year; the Congressional Voting Records will be retained for six years.

System manager(s) and address: Assistant Secretary of State for Congressional Relations, Department of State, 2201 C Street NW., Washington, D.C. 20520.

Notification procedure: Individuals who have reason to believe that the Congressional Correspondence and Voting Records might have information pertaining to them should write to the Director, Foreign Affairs Document and reference Center, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520. The individual must specify that he/she wishes the Congressional Correspondence and Voting records to be checked. At a minimum, the individual should include: name, date and place of birth, current mailing address and ZIP code; signature.

Record access procedures: Individuals who wish to gain access to or amend records pertaining to themselves should write to the Director, Foreign Affairs Document and Reference Center (address above).

Contesting record procedures: (See above).

Record source categories: The Member of Congress, constituent, the Office of the Department which drafted the reply to the Congressional inquiry, the Congressional Record, Congressional Quarterly, Congressional Directory.

IBWC/US SEC.-1

System name: Attendance, Leave, and Payroll records of employees.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records in the system: Name, Social Security Number and employee number, grade, step, and salary; organization (code), retirement or FICA data as applicable; Federal, State and local tax deductions, as appropriate; Internal Revenue Service tax lien data; savings bond and charitable deductions; regular and optional government life insurance deduction(s), health insurance deduction and plan or code; cash award data; jury duty data; military leave data; pay differentials; union dues deductions; allotments, by type and amount; financial institution code and employee account number; leave status and leave data of all types (including annual, compensatory, jury duty, maternity, military, retirement disability, sick, transferred, and without pay); time and attendance records, including number of regular, overtime, holiday, Sunday, and other hours worked; pay period number and ending date; cost-of-living allowances; mailing address; co-owner and/or beneficiary of bonds, marital status and number of dependents; and "Notification of Personnel Action". The individual records listed herein are included only as pertinent or applicable to the individual employee.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 665.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Transmittal of data to United States Treasury to effect issuance of paychecks to employees and distribution of pay according to employee directions for savings bonds, allotments, financial institutions, and other authorized purposes.

Reporting: Tax withholding to Internal Revenue Service and appropriate State and local authorities; FICA deductions to the Social Security Administration; dues deductions to labor unions; withholdings for health insurance to the insurance carriers and the United States Civil Service Commission; charity contribution deductions to agents of charitable institutions; annual W-2 statements to taxing authorities and the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Manual and machine-readable copy.

Retrievability: By name and/or employee number.

Safeguards: Physical, technical, and administrative security is maintained, with all storage equipment and/or rooms locked when not in use. Admittance when open is restricted to authorized personnel only. All payroll personnel and computer operators and programmers are instructed and cautioned on the confidentiality of the records.

Retention and disposal: Cut off at the end of a calendar year; retained for 3 years or until after General Accounting Office audit, whichever is earlier; and then destroyed in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Request from individuals should be addressed to the FOIA Administrator, same address as stated in the notification Section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individuals concerned appear in the Section's rules and published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Subject individuals, supervisors, timekeepers, official personnel records, and Internal Revenue Service.

IBWC/US SEC.-2

System name: Accounts Receivable.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Persons owing money to the United States Section, including employees, former employees, business firms, general public, and institutions.

Categories of records in the system: Names and addresses; amounts owed and services performed, overpayment or other accounting therefor; invoice numbers, if any; and United States Treasury certificates of deposit numbers.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 665.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For billing purposes to obtain funds due the Section.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Manual and machine-readable copy.

Retrievability: By name and invoice number, as appropriate.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Retained until payment is received and account audited, then disposed of in accordance with standard procedures.

System manager(s) and address: Chief Financial Services, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79002.

V 43 / 193

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Subject individual; Procurement Section; and accounting records.

IBWC/US SEC.-3

System name: Confidential statements of employment and financial interests.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Employees paid at a level of the Executive Schedule in subchapter II of 5 U.S.C. 53, and Section employees who are required by Executive Order 11222 to file such statements, including former employees.

Categories of records in the system: Statements of personal and family holdings and other interests in business enterprises; listing of creditors, outside employment and opinion of reviewing official; and any confirmation material.

Authority for maintenance of the system: Executive Order 11222.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To comply with United States Civil Service Commission Regulations (Federal Personnel Manual Chapter 735). Records form an effective system of review for disclosing conflicts or apparent conflicts of interest on the part of employees. Records from this system may be forwarded to the United States Civil Service Commission when requested. Information may not be disclosed from a statement other than to designated employees who have an official need, except as the Chairman of the United States Civil Service Commission, or the Commissioner of the Section, may determine for a good cause shown.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in sealed envelopes.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in a locked box in a combination safe-metal file cabinet in a secured room, with access limited under very controlled conditions to those individuals whose official duties require access.

Retention and disposal: The records are disposed of 2 years after separation of the employee, in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Employees on whom records are required to be maintained:

IBWC/US SEC.-4

System name: Individual identification cards.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Key employees of the two Sections of the International Boundary and Water Commission, whose duties necessitate travel across the border between the two countries in conduct of the Sections' business affairs.

Categories of records in the system: Names, titles, nationalities, places of birth, physical descriptions (color of hair, eyes, and height, etc.), and photographs.

Authority for maintenance of the system: 1944 Water Treaty; 5 U.S.C. 301, and 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For the identification of key employees of the two Sections of the International Boundary and Water Commission, whose duties necessitate travel across the border between the two countries in conduct of the Sections' business affairs.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Index card records.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in metal card-file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Retained for 6 years after cancellation, and then destroyed in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Individuals to whom identification cards pertain.

IBWC/US SEC.-5

System name: Certificates of Medical Examination.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records in the system: Medical certificates (SF-78* or equivalent) and any other medical records of examinations used to determine and employee's fitness for the job, and may include employee's name, date of birth, and Social Security Number. (* Parts D, E, and F of SF-78 are not considered a medical record, and are filed in the Official Personnel Folder.)

Authority for maintenance of the system: 5 U.S.C. 3301, 3302; and Executive Order 10577.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To determine medical elegibility for appointment, and for changes in assignment within the Section.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in lockable metal file cabinets in secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Upon employee's transfer to another agency or separation from Federal service, the sealed envelope with medical records attached on the right side of the Official Personnel Folder will be forwarded to National Personnel Records Center (Civilian), 111 Winnebago Street, St. Louis, Missouri 63118, within thirty (30) days after separation from Federal service, or to the agency to which the employee is transferring within thirty (30) days from such transfer. In the case of disability retirements, medical information is obtained and forwarded to the United States Civil Service Commission's Medical Officer in the El Paso, Texas area.

OCT 4 1978

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above. Information may be released upon receipt of a subpoena, or to a nonfederal entity or person, upon written authorization from employee, and the extent of the information will be in accordance with United States Civil Service Commission Regulations (Federal Personnel Manual Chapter 339).

Contesting record procedures: Rules for access to records for contesting contends and appealing initial determinations by the individual concerned, as published in the Section's rules in the Federal Register (42 FR-48291), are in accordance with United States Civil Service Commission Regulations (Federal Personnel Manual Chapter 339).

Record source categories: Individual's physician or Section's designated physician covering individuals to whom the records pertain.

Systems exempted from certain provisions of the act: Subject system from Pub. L. 93-579, 552a, Sec. 3.(k)(6), unless approved for release by the Regional Medical Officer of the United States Civil Service Commission. Information will be given to the employee if determined by the Regional Medical Officer that the material is not considered detrimental to the employee's well-being. Medical information may also be released to a licensed physician designated in writing for that purpose by the individual to whom the information pertains, or to his or her designated representative.

IBWC/US SEC.-6

System name: Equal Employment Opportunity

System location: Room 227, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Employees or applicants for employment who have filed complaints of discrimination against the Section.

Categories of records in the system: Affidavits concerning the complaint; correspondence and written documentation related to the complaint; and copies of personnel records and information covering how the complaint was resolved.

Authority for maintenance of the system: Executive Order 11478; Pub. L. 92-261; and Pub. L. 93-259.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To maintain records of discrimination complaints filed by employees or applicants for employment with the Section, and all documentation and information pertaining thereto.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Records are retained for 7 years after close of the matter, and then destroyed in accordance with standard procedures.

System manager(s) and address: Director, Equal Employment Opportunity, United States Section, International Boundary and Water Commission, Room 227, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Bulding, 4110 Rio Bravo El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: From employees of, or applicants for employment with, the Section involved as complainants, witnesses, etc., in discrimination complaints; reports of investigations, and other materials prepared by the Equal Employment Opportunity Director, Equal Employment Opportunity Assistant, counselors, coordinators, and investigators; copies of Section documents relevant to any Equal Employment Opportunity investigations; and records of hearings on complaints.

IBWC/US SEC.-7

System name: Occupatinal Health and Injury Files

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section who have sustained injuries or have other occupational health problems.

Categories of records in the system: Accident reports (CA-1 and CA-2); claims for compensation for injury or occupational disease (CA-4); claims for continuance of compensation on account of disability (CA-8); logs of employees receiving medical services or who have sustained a work-related injury or disease; health and medical records, including medical reports on the compensation forms or in response to medical treatment and examination; and related correspondence.

Authority for maintenance of the system: 5 U.S.C. 81; 5 U.S.C. 7153; 5 U.S.C. 7901; The Occupational Safety and Health Act of 1970; and Executive Order 11807.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To provide information, including statistical data, required by the Occupational Safety and Health Administration, Department of Labor, and Office of Worker's Compensation Programs, Department of Labor.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in a lockable metal file cabinet in a secured area, with access limited to those individuals whose official duties require access.

Retention and disposal: Files are maintained indefinitely while individual is in employ of the Section. Upon separation, records are retained for 5 years and then destroyed in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United states Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Official records are maintained by the Office of Workers' Compensation Programs (OWCP), New Orleans, Louisiana, or other district offices of the OWCP, and records contested must be filed with that agency under its contesting procedures. Information and address may be obtained from the Comptroller, address as noted under notification section above.

Record source categories: From employees who have suffered a work-related illness or injury; Section supervisory personnel; medical authorities treating or examining employee; and witnesses to an accident or occurrence giving rise to a claim.

Systems exempted from certain provisions of the act: Pub. L. 93-579, 552a, Sec. 3.(k) (1) and (4). Records maintained under this system are unofficial copies of OWCP records and are maintained to assist in processing compensation claims. Persons seeking information under this system should follow the directions given in the notification procedure above. Information will be given to supervisors and to the employee covered by the record if the material is not considered detrimental to the employee's well-being. Requests for information which appear detrimental will be referred to the OWCP for opinion prior to release.

IBWC/US SEC.-8

System name: Motor Vehicle Operator Records.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section who are seeking or holding a United States Government Motor Vehicle Operator's Identification Card.

Categories of records in the system: Applications for Government driver's licenses, Social Security Numbers, physical fitness statements, driving violation records, road test results, and pertinent correspondence.

Authority for maintenance of the system: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, et. seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To provide the Section with information necessary and relevant to the accomplishment of its functions covering motor vehicle operators; and to request information from State and local police departments to determine an employee's eligibility for a Government license.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by name alphabetically.

Safeguards: Records are located in lockable metal file cabinets or in secured rooms or secured premises with access limited to those individuals whose official duties require access.

Retention and disposal: Retained 3 years after separation of employee or 3 years after rescission of authorization to operate a government-owned vehicle, whichever occurs earlier; then destroyed in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Individuals to whom records pertain, witnesses to driving violations, police and court records, and road test examiners.

IBWC/US SEC.-9

System name: Employees' travel records—initial appointment and/or change of duty stations.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Employees and applicants selected for appointment in shortage category occupations.

Categories of records in the system: Names, addresses, estimated travel expenses, modes of travel, employment service agreements, and travel orders.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Accounting and Auditing Act of 1950; and Federal Claims Collection Act of 1966.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To document authority for change of duty station travel and the payment of authorized travel expenses.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Manual and machine-readable paper copy.

Retrievability: Filed in chronological order.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured premises with access limited to those individuals whose official duties require access.

Retention and disposal: Retained according to General Services Administration Federal Travel Regulations, and then disposed of and destroyed in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Subject individual, supervisors, and Finance Office standard references.

IBWC/US SEC.-10

System name: Freedom of Information Act requests for records.

System location: Room 212, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Persons requesting copies of records from the United States Section under the provisions of the Freedom of Information Act, as amended.

Categories of records in the system: Names, addresses and telephone numbers of requesters; description or identification of records requested, furnished, and/or denied; dates of request and response; amount of fees paid, reduced, or waived, if any; payment delinquencies, if any; petitions of indigency; appeals of denials; final determinations; and names and titles of denying officials and determining officials.

Authority for maintenance of the system: Freedom of Information Act, as amended (Pub L. 93-502).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For Annual Report to the Congress under section (d) of the Freedom of Information Act, as amended; and available for public inspection at all times.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Indexed chronologically by date received.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Approved requests and denied requests which do not result in appeals or litigation: completed actions cut off at close of fiscal year and destroyed two years after cutoff in accordance with standard procedures. Denied requests resulting in appeals or litigation: cut off at close of fiscal year in which final determination is made. Transferred to Federal Archives Records Center, Fort Worth, Texas, two years after cut off, and destroyed ten years after cutoff in accordance with standard procedures.

System manager(s) and address: FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Subject individuals, Section officers, and employees engaged in processing or making determinations with respect to Freedom of Information Act requests.

IBWC/US SEC.-11

System name: General Personnel Records.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902, or Field Office where individual is employed.

Categories of individuals covered by the system: Current employees of the United States Section.

Categories of records in the system: General correspondence and files relating to employment or conditions of employment; promotion, Notification of Personnel Action (SF-50), and Request for Personnel Action (SF-52) files; leave and training records; Central Personnel Data File (CPDF), and retirement records relating to personnel actions and determinations concerning an individual while employed. These records may contain information about an individual relating to name; date of birth; home address; telephone number; emergency addresses; Social Security Number; Veteran's Preference; tenure; work connected injuries; handicap code; employment history; qualification background; past and present salaries; grades and position titles; training; awards and other recognition; counseling; performance appraisal; conduct; pay and leave; and data documenting reasons for personnel actions; decisions or recommendations concerning an employee; and background data and documentation leading to an adverse action being taken against an employee.

Authority for maintenance of the system: 5 U.S.C. 1302, 2951, 4118, 4308, 4506, 7501, 7511, 7521; and Executive Order 10561.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used:

A) By an agency of the Federal government having oversight or review authority, such as the United States Civil Service Commission.

B) In the event an appeal is made outside the Section, records which are relevant may be referred to the appropriate agency charged with rendering a decision on the appeal.

C) Information, without prior employee consent, can be disclosed as follows:

1. To the Public: Employee name; position title/grade (past/present); salary (past/present); and duty station (past/present—as specific as building/room number).

2. To a prospective Federal employer: All items on Request for Preliminary Employment Data (SF-75).

3. To a prospective nonfederal employer: Employee name; position title/grade (past/present); salary (past/present); duty station (past/present); tenure of employment; Civil Service status; length of service (Section/Federal government); and date/reason for separation (from Notification of Personnel Action SF-50).

4. To a police department/court: Any information requested for law enforcement purposes.

5 To a credit firm:

a) May be provided: Employee name; position title/grade (past/present); salary (past/present); duty station (past/present).

b) May only be verified (the firm may be advised if its information is correct; if not correct, it is not permitted to disclose the "right answer"): Tenure of employment; Civil Service status; and length of service (Section/Federal government).

Any other disclosure requires prior written consent.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, index cards, and computer printouts.

Retrievability: Records are indexed by any combination of name, date of birth, Social Security Number, or employee identification number.

Safeguards: Records are located in locked metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Retained during the period of individual's employment with the Section; transferred to individual's Official Personnel Folder upon resignation, transfer or separation from Section service.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned, appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: From information supplied by applicable individuals, or as provided by applicable Section supervisors.

IBWC/US SEC.-12

System name: Investigative records.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Current employees of the United States Section.

Categories of records in the system: Name, address, date and place of birth; citizenship status; physical characteristics; employment and military service history; arrest records; Federally-employed relatives; dates and purposes of visits to foreign countries; passport numbers; names of spouses, relatives, references, and personal associates; activities; and conflicts of interest, security, and suitability material.

Authority for maintenance of the system: Executive Orders 10450 and 11652.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To determine suitability for Federal employment.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by employee name alphabetically.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: The records consist of confidential background investigations for Section employees; and are filed in manila envelopes attached on the outside of the Official Personnel Folder, the envelopes bearing employee name and Social Security Number. When the employee transfers or separates, these records are placed in the Official Personnel Folder and disposed of as part of such Official Personnel Folder.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Applications and other personnel and security forms furnished by the individual; investigative and other record material furnished by other Federal agencies; notices of personnel actions furnished by other Federal agencies; personal investigations or written inquiries from sources such as employers, educational institutions, references, neighbors, associates, police departments, courts, credit bureaus, medical records, probation officials, prison officials, newspapers, magazines, periodicals, and other publications; and published hearings of Congressional Committees.

Systems exempted from certain provisions of the act: Certain records contained within this system of records are exempt from 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4) (G), (H), (I), and (f). Reference Section's rules published in the FEDERAL REGISTER (42 FR-48291).

IBWC/US SEC.-13

System name: Employee's vehicle accident reports.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

V 4 3 / 1 9 3

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records covered by the system: Full names and addresses of persons involved and their individual statements; vehicle tag number; service and repairs required; invoice number; cost code; and applicable appropriation symbol.

Authority for maintenance of the system: Federal Property and Administrative Services Act of 1941, as amended (40 U.S.C. 471, et seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For Finance Section employees to complete billing procedures.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: By employee name, date of accident, and invoice number.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Retain on hand 3 fiscal years, and then dispose of and destroy in accordance with standard procedures.

System manager(s) and address: FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: From subject individual, supervisors and/or Finance Section's standard references.

IBWC/US SEC.-14

System name: Records of cash receipts.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Individuals and companies making payments to cover goods acquired and services rendered; reimbursements for overpayments; and miscellaneous monies received by the Section.

Categories of records in the system: Names of individuals or companies; goods acquired or services rendered; amounts, dates; check numbers; locations; bank deposit information; and United States Treasury deposit numbers.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 665.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Accounting for all monies received by the Section.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Manual and machine-readable paper copy.

Retrievability: By name and/or account or invoice number.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Retained for one year following the end of the fiscal year; then transferred to Federal Archives Records Center, Fort Worth, Texas.

System manager(s) and address: Chief Financial Services, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Subject individual and/or company.

IBWC/US SEC.-15

System name: Disciplinary Action, Appeal, and Grievance Files; and Unfair Labor Practice Charges/Complaints.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Section employees who have had disciplinary actions taken against them, and who have filed appeals or grievances.

Categories of records in the system: Warning letters and official reprimand files; grievance files (Section or negotiated); adverse action decision letters; disciplinary action files; appeals hearing transcripts (if held); background information in support of disciplinary and adverse actions; and unfair labor practice charges/complaints.

Authority for maintenance of the system: Executive Orders 10987, 11491, 11787; and 5 U.S.C. 77.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

a) To the United States Civil Service Commission upon request in conjunction with any appeal or in conjunction with its official duties pertaining to personnel matters and investigations regarding complaints of Federal employees or applicants for employment.

b) To designated officers and employees of other Federal agencies conducting investigations of an individual for the purpose of granting security clearance or access determination, and having a need to evaluate qualifications, suitability and loyalty to the United States Government in connection with employment.

c) In the event of any indication of violation or potential violation of the law, to the appropriate Federal agency charged with the responsibility of investigating or prosecuting such violation, or charged with enforcement or implementation of the statute, rule, regulation or order issued pursuant thereto.

d) To respond to a court subpoena or response to a district court in connection with a civil suit.

e) To designated hearing examiners, arbitrators, and third-party appellate authorities involved in the hearing or appeal processes.

f) To investigative officials of the Department of Labor and Federal Labor Relations Council for settlement of a complaint or appeal.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: By employee name, filed alphabetically.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises, with access limited to individuals whose official duties require access.

Retention and disposal: Records involving court actions are retained permanently; all others retained 7 years after completion of action, and then disposed of in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

0 C 4 7 8

Record source categories: Individuals to whom records pertain; Section officials; affidavits or statements from employees; testimony of witnesses; official documents relating to appeals, grievances, or complaints; and correspondence from specific organizations or individuals.

IBWC/US SEC.-16

System name: Official Personnel Folders

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records in the system: Official Personnel Folders containing name, Social Security Number; date of birth; employment history; education; job and pay data; performance reviews; letters of commendation; reprimands; training certificates; salary and benefits information, to include allowance and insurance data; travel orders and general correspondence; other personnel data such as security clearance, loyalty, military service evidence, injury reports, suggestions, health qualification records, etc.

Authority for maintenance of the system: Executive Order 10561; and United States Civil Service Commission Regulations (Federal Personnel Manual Chapters 293 and 294).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

(A) To provide hard-copy documentation on employees' current job and pay data, past job history, career progression, etc. Used to determine qualifications and to provide information for processing personnel actions.

(B) Information, without prior employee consent, can be disclosed as follows:

1. To the public: Employee name; position title/grade (past/present); salary (past/present); and duty station (past/present—as specific as building/room number).

2. To a prospective Federal employer: All items on Request for Preliminary Employment Data (SF-75).

3 To a prospective nonfederal employer: Employee name; position title/grade (past/present); salary (past/present); duty station (past/present); tenure of employment; Civil Service status; length of service (Section/Federal Government); and date/reason for separation (from notification of Personnel Action SF-50).

4. To a police department/court: Any information requested for law enforcement purposes.

5. To a credit firm:

(a) May be provided: Employee name; position title/grade (past/present); salary (past/present); duty station (past/present).

(b) May only be verified (the firm may be advised if its information is correct; if not, it is not permitted to disclose the "right answer"): Tenure of employment; Civil Service status; and length of service (Section/Federal Government).

Any other disclosure requires prior written consent.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by employee name—alphabetically.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises, with access limited to individuals whose official duties require access.

Retention and disposal: Retained for duration of employment, and then folders are transmitted to the Personnel Records Center (Civilian) at 111 Winnebago Street, St. Louis, Missouri 63118, within 30 days after separation—except for those employees leaving on military furlough, or with retirement applications pending, or compensation cases which are pending and which have not been adjudicated.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (41 FR-19625).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Applications for employment; applications for fidelity bonds; college transcripts; personnel actions; performance reviews and/or personnel evaluation reports; letters of commendation or reprimand; training certificates; travel orders; employee insurance data; certificates of clearance; and loyalty affidavits.

IBWC/US SEC.-17

System name: Service records.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records in the system: Official summary of employment history to include name, Social Security Number, date of birth, service computation date, Veteran's Preferance, life insurance enrollment, retirement data, handicap code, performance reviews (date and type), service award data, and employment record to include date, type, job, pay, and separation data.

Authority for maintenance of the system: United States Civil Service Commission Regulations (Federal Personnel Manual Chapter 293-31).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To have a ready reference to official summary of employment histories, chronology of personal and service data of employees, and provide information for processing personnel actions.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records filed in Kardex or file box.

Retrievability: Arranged by (a) budgeted position in organization sequence; (b) pay plan; and (c) descending grade level within each pay plan.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those individuals whose official duties require access.

Retention and disposal: Retain 3 years after employee's separation from the Section, then dispose of in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned, appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Personnel actions, performance reviews and/or personnel evaluation reports; application forms, and training and service award certificates.

IBWC/US SEC.-18

System name: Employment resources files.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Applicants for employment with the United States Section.

Categories of records in the system: Applications for employment; personal qualifications statement (SF-171); and other pertinent employment data.

Authority for maintenance of the system: 5 U.S.C. 301; 15 U.S.C. 634(b)(6); and 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To maintain a source of qualified applicants for the purpose of filing vacancies.

V 4 3 / 1 9 3

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records files in file folders.

Retrievability: Grouped by positions for which applicants appear qualified; arranged by name within position groupings.

Safeguards: Records are located in lockable metal file cabinets or metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Applications considered active for 2 years; then destroyed after 2 years from date signed, in accordance with standard procedures—except upon written request that they be returned to individuals.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned, appear in the Section's rules published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Applicants; previous employers.

IBWC/US SEC.-19

System name: Incentive Awards files.

System location: Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section, or non-employees who submit suggestions.

Categories of records in the system: Award certificates; letters of commendation, citation, and awards; letters of non-adoption of suggestions.

Authority for maintenance of the system: 5 U.S.C. 45.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To document staff or other agency comments in support of justification for, or disapproval of, award nominations in order to present findings to Incentive Awards Committee or other Section officials or, at its request, to the United States Civil Service Commission.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Suggestions—by number; performance nominations—chronologically by type of award.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured room or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Cut off at end of calendar year, retained for 2 years, and then disposed of in accordance with standard procedures.

System manager(s) and address: Director of Personnel, United States Section, International Boundary and Water Commission, Room 223, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the Federal Register (42 FR-48291).

Record source categories: Employees, supervisors, management officials, Incentive Awards Committee, officials of other agencies, and members of the public, if appropriate.

IBWC/US SEC.-20

System name: Travel advance information files.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section who are required to travel.

Categories of records in the system: Employees' names, areas of assignment, and dollar amounts advanced.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 665.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: By the Finance Section to monitor travel advance expenditures.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Index card records.

Retrievability: Filed by employee name, alphabetically.

Safeguards: Records are located in metal card file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Cut off at end of fiscal year; retained for 3 years, and then destroyed in accordance with standard procedures.

System manager(s) and address: Chief Financial Services, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned, appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: From Imprest fund receipts signed by employee-traveler when amount is under $150.00, and from Bureau schedules for checks issued by the United States Treasury to employee-traveler when the amount is above $150.00.

IBWC/US SEC.-21

System name: Employer's tax return files.

System location: Room 229, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: All employees of the United States Section.

Categories of records in the system: Federal and State Monthly and/or quarterly employee withholding tax form information; computer printouts, magnetic tapes and related documents showing reports of Federal and State taxes withheld from employees, and the banking and payment thereof.

Authority for maintenance of the system: Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 665.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: For reconciliation and payment of taxes withheld from employees and employer's share; to provide Internal Revenue Service with record representing wages covered by Social Security.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Manual and machine-readable copy.

Retrievability: By name and/or employee number.

OCT 4 1978

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Cut off at the close of fiscal year, retained for 2 years, and then destroyed in accordance with standard procedures.

System manager(s) and address: Chief Financial Services, United States Section International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned, appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Data stored in payroll master file.

IBWC/US SEC.-22

System name: Privacy Act request file.

System location: IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Categories of individuals covered by the system: Individuals requesting information on records concerning them or someone on whose behalf the individual is authorized to act which are in the custody of the United States Section, or individuals requesting access or amendment to such records under the provisions of The Privacy Act of 1974, 5 U.S.C. 552a.

Categories of records in the system: Copies of correspondence between individuals and Section custodian official; written summaries of conversations with individuals; coordination documents between the Section and other Federal, State, and local government agencies when records which are the subject of an individual inquiry were originated by another agency; and copies of documents which are the subject of an individual inquiry. Originals of amendment requests, refusals, and appeals accumulated by the custodian of the records concerned are included in the file containing those records.

Authority for maintenance of the system: The Privacy Act of 1974, 5 U.S.C. 552a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To process and coordinate requests for information, access, and amendment of personal records; to process and record appeals by individuals against Section rulings; and to assure timely response to requesters.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by requester's name.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

Retention and disposal: Approved and/or denied requests not resulting in appeals or litigation—completed actions cut off at close of fiscal year and destroyed 2 years after cutoff in accordance with standard procedures. Denied requests resulting in appeals or litigation—cut off at close of fiscal year in which final determination is made; transferred to Federal Archives Record Center, Fort Worth, Texas, 2 years after cutoff; destroyed 10 years after cutoff in accordance with standard procedures.

System manager(s) and address: FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Notification procedure: Information may be obtained from the FOIA Administrator, United States Section, International Boundary and Water Commission, IBWC Building, 4110 Rio Bravo, El Paso, Texas 79902.

Record access procedures: Requests from individuals should be addressed to the FOIA Administrator, same address as stated in the notification section above, and conform to the inquiry provisions of the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Contesting record procedures: Rules for access for contesting contents and appealing initial determinations by the individual concerned appear in the Section's rules as published in the FEDERAL REGISTER (42 FR-48291).

Record source categories: Individual requesters, and agencies of the Federal, State, and local governments.

SMALL BUSINESS ADMINISTRATION
PRIVACY ACT ISSUANCES
Notice of Incorporation by Reference

Agency: Small Business Administration

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this Agency has amended since publication of the 1977 Compilation.

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact: Nicholas Kalcounos, Freedom of Information Act and Privacy Act Officer.

Approval of the Director

The notices of systems of records of this Agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 13, 1978. Published below is the full text of systems of records that this Agency has amended since publication of the 1977 Compilation.

SBA285

System name: Official Travel Files—SBA285.

System location: Central Office, at address listed in Appendix A, Federal Records Centers, at addresses listed in Appendix B.[1]

Categories of individuals covered by the system: SBA employees.

Categories of records in the system: Files include Travel Voucher and Applications for Advance of Funds submitted by each employee.

Authority for maintenance of the system: 5 U.S.C. 301.44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Records are reviewed by the General Accounting Office in the course of an audit of the Agency.

In the event that a system of records maintained by this Agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulatory rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as routine use, to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigation or prosecution of such violation or charged with enforcement of implementing the statute, rule, regulation or order issued pursuant thereto.

Storage: Records are kept in file folders.

Retrievability: Records are indexed by employee name and Social Security Number.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is utilized to prevent unauthorized disclosure.

Retention and disposal: Records are maintained for 2 years after the end of a fiscal year, or until a GAO audit. Records are then transferred to the Federal Records Center, where they will be disposed of 10 years after the end of the fiscal year in which the records were compiled.

System manager(s) and address: Privacy Act Officer. See Appendix A for address.

Notification procedure: An individual may inquire as to whether the system contains a record pertaining to him or her by addressing a request in person or in writing to the Privacy Act Officer, at the address contained in Appendix A.

Record access procedures: In response to a request by an individual to determine whether the system contains a record pertaining to him or her, the Privacy Act Officer will set forth the procedures for gaining access to these records. If there is no record of the individual, he or she will be so advised.

Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

Contesting record procedures: Individuals desiring to contest or amend information maintained in the system should direct their request to the official listed in the above paragraph, stating the reasons for contesting it and the proposed amendment to the information sought.

Record source categories: Travel Vouchers and Applications for Advance of Funds sumbmitted by employees.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this Agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this Agency's systems of records appear in Volume 11, of the 1977 Compilation at page 48785 (42 FR 48785, September 23, 1977). The price of this Volume is six dollars and seventy-five cents.

Dated: September 15, 1978.

Patricia M. Cloherty,
Acting Administrator.

OFFICE OF MANAGEMENT AND BUDGET

Department of Labor

PROPOSED RESCISSION IN EMPLOYMENT AND TRAINING FUNDS

V 43 / 193

[3110-01]

OFFICE OF MANAGEMENT AND BUDGET

DEPARTMENT OF LABOR

Proposed Rescission in Employment and Training Funds

TO THE CONGRESS OF THE UNITED STATES:

In accordance with the Impoundment Control Act of 1974, I herewith propose rescission of $10.8 million in employment and training funds appropriated to the Department of Labor.

The details of the proposed rescission are contained in the attached report.

JIMMY CARTER.

THE WHITE HOUSE, September 28, 1978.

CONTENTS OF SPECIAL MESSAGE
(in thousands of dollars)

Rescission No.	Item	Budget Authority
	Department of Labor:	
	Employment and Training Administration	
R78-8	Community Service Employment for Older Americans	10,800

* *

SUMMARY OF SPECIAL MESSAGES
FOR FY 1978
(in thousands of dollars)

	Rescissions	Deferrals
Eleventh special message:		
New items	10,800	---
Effect of eleventh special message	10,800	---
Previous special messages	635,923	4,966,813
Total amount proposed in special messages	646,723 (in 8 rescissions)	4,966,813 1/ (in 66 deferrals)

1/ This amount represents budget authority except for $14,573,000 consisting of four Department of the Treasury deferrals of outlays only (D78-28B, D78-50, D78-58, D78-66).

[illegible] proposal No.: R78-8

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Labor	New budget authority (P.L. 95-205; 95-355): $211,700,000
Bureau: Employment and Training Administration	Other budgetary resources:
Appropriation title & symbol: Community Service Employment for Older Americans 1680175	Total budgetary resources: 211,700,000
	Amount proposed for rescission: $10,800,000
OMB identification code: 16-0175-0-1-504	Legal authority (in addition to sec. 1012): ☒ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Community Service Employment for Older Americans (CSEOA) program provides part-time work opportunities, generally at the minimum wage, for low-income persons over age 55. The 1978 appropriation, which funds the program for the period from July 1, 1978, to June 30, 1979, did not take into account the statutory increases in the minimum wage effective January 1, 1978, and January 1, 1979. The President requested 1978 supplemental funds to finance the minimum wage increases for the 47,500 recipient level provided for by the 1978 appropriation.

The Congress reduced the request to $21.3 million. The reports of the House and Senate Appropriations Committees discussing this appropriation state:

> "The funds in this bill will provide for the cost of these [minimum wage] increases for the 47,500 enrollees from enactment of this supplemental bill to June 30, 1979. The Committee has reduced the budget request to reflect the fact that a portion of the time period covered by the request will have elapsed by the enactment date of this supplemental." (House Rep. No. 93-1350)

OCT 4 1978

V 43/193 OCT 4 78 UMI

"The additional funds are necessary to sustain the current level of 47,500 enrollees at the new minimum wage...The reduction from the budget request takes into account the fact that less funds are needed to cover the remaining time period subsequent to enactment of this supplemental." (Senate Rep. No. 95-1061)

Final calculation of the amount needed to fulfill the intent of financing the minimum wage increases for 47,500 enrollees through June 30, 1979, indicates an actual need of $10.5 million. Since the only purpose for which the funds were appropriated can be accomplished at this level, the remaining $10.8 million is not required. Therefore, a rescission of $10.8 million is proposed.

Estimated Effect: This rescission proposal has no programmatic effect since the planned level of the program can be achieved without these funds.

Outlay Effect: This rescission proposal will have no outlay effect since it is consistent with the planned, congressionally-appproved enrollment level.

TITLE I - DEPARTMENT OF LABOR

Employment and Training Administration

Community Service Employment for Older Americans

Of the funds appropriated under this head in the Second Supplemental Appropriations Act, 1978, $10,800,000 are rescinded.

DEPARTMENT OF ENERGY

Office of the Secretary

NATIONAL ENERGY TRANSPORTATION STUDY

Announcement of Public Hearings

AGENCIES: Department of Transportation (DOT) and Department of Energy (DOE).

ACTION: Announcement of public hearings.

SUMMARY: In conjunction with the President's national energy plan, DOT and DOE are conducting a joint study to determine if the Nation's transportation system is adequate to meet the future energy demands of the United States. A series of three public hearings has been scheduled to receive oral presentation of information and comment from interested individuals and groups concerning the issues involved and regional and local impacts of anticipated changes in the energy transportation system. These hearings are in addition to the open file announced in the FEDERAL REGISTER of August 30, 1978, to which the public is invited to submit information.

ADDRESS: Address requests to speak to: National Energy Transportation Study Public Hearings, Office of Intermodal Transportation, P-10, room 9217, Department of Transportation, Washington, D.C. 20590.

DATES: Hearing dates: 9 a.m. e.s.t., Monday, October 30, 1978, Sheraton Biltmore Hotel (Georgia Ballroom), 817 West Peachtree Street NE., Atlanta, Ga.; 9 a.m. m.s.t., Friday, November 3, 1978, Executive Tower Inn (Beethoven Room), 1405 Curtis Street, Denver, Colo.; 9 a.m. p.s.t., Monday, November 6, 1978, Holiday Inn-Downtown (Crown Room), 750 Garland Avenue, Los Angeles, Calif.

FOR FURTHER INFORMATION CONTACT:

Nancy MacRae, Staff Member, National Energy Transportation Study (NETS), Office of Intermodal Transportation, DOT, 202-426-4203, or Diana Diamond, Office of Policy and Evaluation, DOE, 202-566-9037.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

By 1985 and beyond it appears likely that the Nation will experience numerous changes in the historical patterns of energy supply and demand which in turn will require changes in the way energy is transported. The changing energy patterns include dwindling domestic oil and natural gas production, regional shifts in supply and demand, and shifts in national and regional fuel use, including new energy sources. The Nation's transportation system established during the last 50 years must adjust to accommodate new markets and new energy sources. These adjustments may have broad social, economic, and environmental impacts.

The joint DOT-DOE study team will look at important aspects of the movement of coal, crude oil and petroleum products, natural gas, nuclear fuel, and electrical power to 1985 and beyond. This will be done to determine what adjustments are needed in the present transportation network. While the major emphasis of the study is the transportation needs to 1985, the study team will also look at 1990 and 2000.

The final report is expected to identify constraints on the efficient transportation of energy and to recommend any Federal actions that may be necessary.

II. SCOPE OF STUDY

The study is intended to be an overview of energy transportation needs, based on various scenarios of energy use in 1985 and beyond, and of the adaptation that will be necessary in present energy production and transportation patterns. This will be done by computer-based analysis of transportation network flows by mode of various energy materials. These include crude oil, syncrude, petroleum products, natural gas, electricity transmission, and nuclar materials. The modes included in the network are pipelines, inland and intracoastal waterways, highways, railroads, and tankers; terminals and ports are also included. The study will attempt to identify future shortfalls in transportation capacity, recognizing the limitations of this type of analysis.

In addition, major issues affecting efficient energy distribution will be considered. Examples are: The ability of railroads to invest for required capacity; impact of unit trains on rail/highway crossings; capacity and investment requirements of water transportation; coal slurry pipelines (constraints and competition); highway requirements for coal movement; oil distribution; natural gas distribution (including LNG and LPG); electric power transmission; safety requirements for the movement of nuclear waste; new fuel sources; and major regional shifts. The study team will review alternatives for action and conclude with recommendations for Federal action, if appropriate.

III. TOPICS FOR PUBLIC HEARING

DOT and DOE are interested in receiving information on constraints which would affect the ability and capacity of the transportation system to carry future energy commodities. These potential constraints can be divided into four categories:

- *Financial,* such as investment requirements to handle increased capacity (terminals, locks, highways, port facilities);
- *Technological,* such as future availability of advanced techniques for transporting energy materials;
- *Environmental/social,* such as impacts of increased coal unit train movement, long-range health effects of high-voltage electrical transmission, impacts of coal slurry pipelines, and disposal of scrubber sludge;
- *Institutional,* for example, constraints of economic regulation and the need for safeguards to the movement of potentially hazardous materials such as liquified natural gas (LNG), liquified petroleum gas (LPG), or spent nuclear fuel.

Interested persons are invited to make oral presentations on these four or any related topics. DOT and DOE are particularly interested to learn about regional or local constraints or problems which might otherwise be overlooked.

IV. HEARING PROCEDURES

1. *Request procedure.* Public hearings to receive oral presentation of data, views, and arguments from interested persons will be held at the times and places indicated earlier in this notice. Any person who has an interest in the subject matter of this notice, or who is a representative of a group or class or persons which has such an interest, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Office of Intermodal Transportation, P-10, Room 9217, Department of Transportation, 400 Seventh, Street SW., Washington, D.C. 20590. Requests must be received before 4:30 PM E.T.D. on October 20, 1978, for the Atlanta hearing and October 24, 1978, for the other two hearings. A request should be labled, both on the document and on the envelope, "National Energy Transportation Study Public Hearings."

The person making the request should be prepared to describe the interest concerned, to state why he or she is a proper representative of a group or class or persons which has such an interest, and to give a concise summary of the proposed statement and a telephone number where he or she may be reached through October 28, 1978, for the Atlanta hearing and November 1, 1978, for the other two hearings.

Each person selected to be heard will be notified by DOT before 4:30 PM, October 25, 1978, for the Atlanta hearing and October 31, 1978 for the Denver or Los Angeles hearing, and must submit 10 copies of his or her statement to the registration desk at the hearing at which he or she is to speak.

2. *Conduct of hearing.* DOT and DOE reserve the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The time allotted to each presentation may be limited, depending on the number of persons requesting to be heard. Each person testifying should be prepared to submit his or her statement and attachments for the record and to make a summary oral presentation. DOT and DOE officials will preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings.

If time permits at the end of a hearing, any person who makes an oral statement may ask a question of any other person making a statement, but questions must be submitted in writing to the presiding officer, who determines whether the question is relevant and whether time limits permit it to be presented for answer. Any further procedural rules needed for the proper conduct of this hearing are announced by the presiding officer.

A transcript of each hearing will be made and the entire record of the hearing, including the transcript, will be retained by DOT and DOE and made available for inspection in the DOE Freedom of Information Offices, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, between the hours of 8 a.m. and 4:30 p.m. Monday through Friday; and the DOT/DOE Open File in the Office of the Assistant General Counsel for Regulation and Enforcement, Room 10421, Nassif (DOT Headquarters) Building, Washington, D.C., between 9 a.m. and 5:30 p.m. local time, Monday through Friday except holidays.

Issued in Washington, D.C., on September 29, 1978.

CHESTER DAVENPORT,
Chairman, NETS, Assistant Secretary for Policy and International Affairs. Department of Transportation.

ALVIN L. ALM,
Vice Chairman, NETS, Assistant Secretary for Policy and Evaluation, Department of Energy.

V 43 / 194 OCT 5 1978

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Proclamation 4604 • **October 2, 1978**

Termination of Increased Rates of Duty on Certain Ceramic Tableware

By the President of the United States of America

A Proclamation

1. By Proclamation No. 4125 of April 22, 1972, the President proclaimed increased duties on certain types of ceramic tableware that are defined in items 923.01 through 923.15 of the Tariff Schedules of the United States (TSUS). These increased duties were to be effective from May 1, 1972, through April 30, 1976, unless modified or terminated earlier. This action was taken under the following legal provisions: section 350(a)(1)(B) of the Tariff Act of 1930, as amended (19 U.S.C. 1351(a)(1)(B)); and sections 201(a)(2), 302(a)(2) and (3), and 351(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1821(a)(2), 19 U.S.C. 1902(a)(2) and (3), and 19 U.S.C. 1981(a)).

2. By Proclamation No. 4436 of April 30, 1976, the President proclaimed the extension and modification of the increased rates of duty then in effect on imports of some of the articles of ceramic tableware provided for in items 923.01, 923.07, 923.13, and 923.15 of the TSUS. This was done under section 203(h)(3) of the Trade Act of 1974 (19 U.S.C. 2253(h)(3)).

3. I have determined, pursuant to section 203(h)(4) of the Trade Act of 1974 (19 U.S.C. 2253(h)(4)) and section 351(c)(1)(A) of the Trade Expansion Act of 1962 (19 U.S.C. 1981(c)(1)(A)), after taking into account the advice of the U.S. International Trade Commission and after seeking the advice of the Secretaries of Commerce and Labor as required by those sections, that it is in the national interest to terminate the increased rates of duty currently in effect on imports of the articles of ceramic tableware now provided for in items 923.01, 923.07, 923.13 and 923.15 of the TSUS.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes, including section 203(h)(4) of the Trade Act of 1974 (19 U.S.C. 2253(h)(4)) and section 351(c)(1)(A) of the Trade Expansion Act of 1962 (19 U.S.C. 1981(c)(1)(A)), and in accordance with Article XIX of the General Agreement on Tariffs and Trade (GATT), do proclaim that—

(1) The modifications of tariff concessions on ceramic tableware provided for in items 533.28, 533.38, 533.73, and 533.75 in Part I of Schedule XX to the GATT made by Proclamations Nos. 4125 and 4436 are terminated;

(2) Subpart A, part 2 of the Appendix to the TSUS is modified by deleting items 923.01, 923.07, 923.13, and 923.15, including the superior headings thereto;

(3) The modifications of Part I of Schedule XX to the GATT and of the Appendix to the TSUS made by paragraphs (1) and (2) hereof shall be effective as to articles entered, or withdrawn from warehouse, for consumption on or after the date of publication of this Proclamation in the FEDERAL REGISTER.

V 43/194 OCT 78

IN WITNESS WHEREOF, I have hereunto set my hand this second day of October in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[3410-02]

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (GRADING, CERTIFICATION, AND STANDARDS), DEPARTMENT OF AGRICULTURE

SUBCHAPTER—REGULATIONS AND STANDARDS UNDER THE AGRICULTURAL MARKETING ACT OF 1946

PART 53—LIVESTOCK (GRADING, CERTIFICATION, AND STANDARDS)

Subpart A—Regulations

FEES

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: These regulations are being changed to reflect an increase in fees for the grading and certification of livestock accepted for futures trading and Commodity Credit Corporation deliveries. The Agricultural Marketing Act of 1946 provides for the collection of fees approximately equal to the cost of livestock grading services rendered under its provisions. Salaries paid to Federal employees have been increased under the provisions of Pub. L. 92-210. Therefore, it has been determined that the hourly fee must be adjusted as provided herein because of the increased costs that will be incurred.

EFFECTIVE DATE: October 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Paul M. Fuller, U.S. Department of Agriculture, Agricultural Marketing Service, Livestock, Poultry, Grain, and Seed Division, Livestock Market News Branch, 202-447-2222.

SUPPLEMENTARY INFORMATION: The need for the increase and the amount thereby are dependent upon facts within the knowledge of the Agricultural Marketing Service. Therefore, under the provisions of 5 U.S.C. 553, it is found that notice and other public procedures with respect to this amendment are impractical and unnecessary and good cause is found to make the amendment effective less than 30 days after publication in the FEDERAL REGISTER. Accordingly, the provisions of 7 CFR 53.18(a) prescribing fees for Federal livestock grading services are hereby amended by changing the phrases "$19.00 per hour," "$23.00 per hour," and "$38.00 per hour" to "$20.00 per hour," "$23.00 per hour," and "$40.00 per hour," respectively.

(Agricultural Marketing Act of 1946, sec. 203, 205, 60 Stat. 1087, 1090 (7 U.S.C. 1622, 1624).)

Done at Washington, D.C., on this 22d day of September 1978.

WILLIAM T. MANLEY,
Deputy Administrator,
Marketing Program Operations.

[FR Doc. 78-28102 Filed 10-4-78; 8:45 am]

[3410-02]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Amdt. 1]

PART 948—IRISH POTATOES GROWN IN COLORADO

Handling Regulation; Area No. 2

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment 1 to the handling regulation requires fresh market shipments of potatoes grown in Colorado, area No. 2 to be inspected and meet minimum grade, size, and maturity requirements. The regulation will promote orderly marketing of such potatoes and keep less desirable qualities and sizes from being shipped to consumers.

EFFECTIVE DATE: October 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-6393.

SUPPLEMENTARY INFORMATION: Marketing agreement No. 97 and order No. 948, both as amended, regulate the handling of potatoes grown in designated counties of Colorado area No. 2. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The Colorado area No. 2 potato committee, established under the order, is responsible for its local administration.

Notice of proposed rulemaking was published in the September 8, 1978, FEDERAL REGISTER (43 FR 40027) inviting comments by September 23, 1978. None was received.

This amendment is based upon recommendations made by the committee at its public meeting held in Monte Vista, Colo., on August 17 to review the marketing situation and make handling recommendations for the remainder of the 1978-79 season through October 31, 1979.

Acreage in the production area is 1,000 acres larger this year than last, with prospects of increased supplies of round potatoes and of long varieties other than Russet Burbanks. In addition, total fall crop acreage is up slightly and growing conditions generally have been favorable, pointing to a relatively large total U.S. supply. This will tend to preclude orderly potato marketing. Therefore, the committee recommended increasing the minimum size of round varieties by ⅛ inch to 2⅛ inches in diameter. The committee also recommended an increase in the minimum size of long varieties except Russet Burbanks to 2 inches or 4 ounces. Maturity requirements would be tightened to call for "slightly skinned" in U.S. No. 1 grade lots of all varieties. For lower grades, the maturity requirement would remain "moderately skinned."

Potato prices this fall and coming winter are expected to average close to those of a year earlier and be well below parity. The proposed quality standards for production area potatoes would enable Colorado growers to compete more effectively in the market, thereby improving returns to producers. At the same time, consumers would be assured of an adequate supply of good quality potatoes of proper maturity, consistent with the overall quality of the large crop.

Findings. After consideration of all relevant matter presented, including

V 43 / 194
OCT 5 1978

the proposal set forth in the notice which was recommended by the Colorado area No. 2 potato committee, established pursuant to said marketing agreement and order, it is hereby found that the amendment No. 1 to the handling regulation, as hereinafter set forth, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after its publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of potatoes grown in the production area have already begun, (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the remainder of the marketing season, and (3) compliance with this regulation, which is similar to that in effect during previous marketing seasons, will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective date hereof.

The amendment is as follows:

In § 948.380 (43 FR 37982) the introductory paragraph and paragraphs (a), (b), and (h) are amended to read as follows:

§ 948.380 Handling regulation.

During the effective period herein through October 31, 1979, no person shall handle any lot of potatoes grown in area No. 2 unless such potatoes meet the requirements of paragraphs (a), (b), and (c) of this section, or unless such potatoes are handled in accordance with paragraphs (d) and (e), or (f) of this section.

(a) *Minimum grade and size requirements.*

(1) *Round varieties.* U.S. No. 2, or better grade, 2⅛ inches minimum diameter.

(2) *Russet Burbank.* U.S. No. 2, or better grade, 1⅞ inches minimum diameter.

(3) *All other long varieties except Russet Burbank.* U.S. No. 2, or better grade, 2 inches minimum diameter or 4 ounces minimum weight.

(4) *All varieties.* Size B, if U.S. No. 1, or better grade.

(5) *All varieties for export.* 1½ inches minimum diameter.

(b) *Maturity (skinning) requirements.* During September and October minimum maturity requirements shall be:

(1) *For U.S. No. 2 grade.* Not more than "moderately skinned."

(2) *All other grades.* Not more than "slightly skinned."

* * * * *

(h) *Applicability to imports.* Pursuant to section 8e of the act and § 980.1 Import regulations (7 CFR 980.1), Irish potatoes of the red skinned round type, except certified seed potatoes, imported into the United States during the period October 6, 1978, through June 30, 1979; and September 1, 1979, through October 31, 1979, shall meet the minimum grade, size, quality and maturity requirements specified in paragraphs (a) and (b) of this section.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674).)

Dated: October 2, 1978 to become effective October 6, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[3410-07]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 444.1]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

DETERMINING ELIGIBILITY OF RH APPLICANTS

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Section 502 Rural Housing Loan regulations to more clearly define eligibility standards for Section 502 Rural Housing Loans. This rule change is being issued in compliance with a consent order in the U.S. District Court for the District of Columbia. (*Vickers* v. *Bergland*, C.A. 77-0355). It is the policy of FmHA to make loans to applicants with incomes as low as possible and FmHA personnel will work closely with applicants so as to better understand all sources of income and cash substitutes. The purpose of this amendment is to provide more guidance to FmHA personnel in determining eligibility.

EFFECTIVE DATE: October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerry B. Ireton, 202-447-4295.

SUPPLEMENTARY INFORMATION: On pages 34489-34490 of the FEDERAL REGISTER, dated August 4, 1978, there was published a notice of proposed rulemaking amending § 1822.11(b) to subpart A of part 1822, subchapter B of chapter XVIII, title 7 in the Code of Federal Regulations. Advance notice of the proposed rule was published April 5, 1978. Interested persons were given the opportunity to submit not later than September 5, 1978, comments and suggestions or objections regarding the proposed revision. Several comments were received and given due consideration. Certain comments received concerning the determination of what constitutes good credit history will be incorporated into part 1910, subpart A to subchapter B to chapter XVIII. Comments were incorporated herein to more clearly show how the consideration of the payment of previous housing cost will be considered, and to indicate that repayment ability will be based on the fact that planned income is equal to or greater than planned expenses. The Farmers Home Administration will determine the eligibility of applicants based on these criteria and other provisions of section 502 of title V of the Housing Act of 1949.

Accordingly, § 1822.11(b) reads as follows:

§ 1822.11 Processing applications and county committee certification.

* * * * *

(b) *Determining eligibility of RH applicants.* The county committee will determine eligibility of RH applicants who are also applying for a farmer program loan, or who are already indebted for a farmer program loan. The county supervisor will determine eligibility for all other RH applicants

(1) County supervisors will work closely with applicants so as to better understand all sources of income and cash substitutes. Determination of repayment ability will be based on the following:

(i) If the applicant can verify payment of a comparable or greater amount for housing cost for the previous 12 months, the applicant will be presumed to have repayment ability for the requested loan unless:

(A) Projected annual income is less than current or past income,

(B) Planned expenses are greater than current expenses, or

(C) The applicant has increased debts, or failed to pay existing debts in order to maintain the present standard of living.

(ii) The short budget on form FmHA 410-4 will be used to determine obvious eligibility. Ineligibility can be determined from this form in cases where projected income is clearly not sufficient to pay annual payment on debts including the requested loan, living expenses, real estate taxes, property insurance, utilities, and maintenance.

(iii) Form FmHA 431-3, "Family Budget," will be completed by the applicant and county supervisor if eligibility cannot be determined from the short budget. In preparing form FmHA 431-3 the following will be considered.

(A) Noncash items (e.g. food stamps, scholarships, free clothing, or transportation which help reduce the applicant's budgeted expenses) will be properly documented and budgeted expenses will be reduced accordingly.

(B) Income from all sources not used to determine adjusted annual income, such as earnings from employment of minors or full-time students, foster care payments, and similar income items, will be considered to the extent it is used to offset budgeted expenses even though such income will not be included in "annual income."

(2) Eligibility will be based on the circumstances surrounding the individual case, and under no condition will arbitrary guidelines or "rules of thumb" be used in determining eligibility. Repayment ability will be based on a determination that planned income is equal to or greater than planned expenses.

(3) When the county supervisor determines that the applicant does not have sufficient income to repay the requested loan, the county supervisor will suggest other alternatives such as reducing the amount of loan needed by making a larger downpayment, reducing amenities in the dwelling, selecting a less expensive dwelling or site, obtaining a cosigner, or when appropriate, building the dwelling by the self-help or borrower method of construction.

* * * * *

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

Dated: September 27, 1978.

JAMES E. THORNTON,
Associate Administrator, Farmers Home Administration.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

Security Personnel Qualification Training and Equipment Requirements

ACTION: U.S. Nuclear Regulatory Commission.

ACTION: Approval of reporting and recordkeeping requirements by Comptroller General.

SUMMARY: On August 23, 1978, the Nuclear Regulatory Commission published in the FEDERAL REGISTER a notice of rulemaking, effective October 23, 1978, amending its regulation "Physical Protection of Plants and Materials" to impose upgraded guard qualification, training and equipment requirements for security personnel protecting against theft of special nuclear materials and industrial sabotage of nuclear facilities or nuclear shipments.

The notice included the following note:

NOTE.—The Nuclear Regulatory Commission has submitted this rule to the Comptroller General for review of its reporting requirements under the Federal Reports Act, as amended, 44 U.S.C. 3512. The date on which the reporting requirement of the rule becomes effective, unless advised to the contrary, includes a 45-day period which that statute allows for Comptroller General review (44 U.S.C. 3512(c)(2).)

Notice is hereby given that the reporting requirements set out in the rule have been approved by the U.S. General Accounting Office.

EFFECTIVE DATE: October 23, 1978.

The reporting requirements set out in the notice of rulemaking amending 10 CFR Part 73 which was published in the FEDERAL REGISTER on August 23, 1978 (43 FR 37421) have been approved by the U.S. General Accounting Office under No. B-180225(R0039).

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: 301-492-7086.

Dated at Bethesda, Md. this 27th day of September 1978.

For the Nuclear Regulatory Commission.

WILLIAM J. DIRCKS,
Deputy Executive Director for Operations.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-GL-6; Amdt. 39-3312]

PART 39—AIRWORTHINESS DIRECTIVES

Firestone Aircraft Tires

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the FEDERAL REGISTER and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all Firestone tires, size 18x5.5, Mach I, 10 ply rating, P/N 00490, serial Nos. having the first four numbers 0677, by airmail letter dated September 6, 1978, The AD requires replacement by Firestone tire part No. 00518, or other approved tire, to prevent tread separation.

DATE: Effective October 5, 1978, except with respect to certain persons specified in the body of the AD. Compliance schedule—as prescribed in the body of the AD.

ADDRESSES: The applicable service letter, dated August 22, 1978, may be obtained from Firestone Tire & Rubber Co., 1200 Firestone Parkway, Akron, Ohio 44317. A copy of the service letter is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Alfred A. Malla, Engineering and Manufacturing Branch, Flight Standards Division, AGL-212, 2300 East Devon Avenue, Des Plaines, Ill. 60018, 312-694-4500, extension 424.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of the Federal Aviation Act of 1958, delegated to me by the Administrator, the following airworthiness directive applicable to all Firestone tires, size 18x5.5, Mach I, 10 ply rating, P/N 00490, serial numbers having the first four numbers 0677, and is effective upon the receipt of this AD.

Tire tread separations have been recently experienced on certain aircraft which could occur in other tires of this same part number and result in loss of hydraulic pressure, brake and flap damage, and faulty steering. FAA has determined that this could occur in similar tires of the same series and date of manufacture (0677). Accord-

V 4 3 / 1 9 4

OCT 5 1978

ingly this airworthiness directive is considered an initial action pending further investigation.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the AD effective immediately as to all known Firestone tires having the first four numbers 0677. These conditions still exist and the AD is hereby published in the FEDERAL REGISTER.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following airworthiness directive:

FIRESTONE AIRCRAFT TIRES. Applies to all Firestone size 18x5.5, Mach I, 10 ply rating part number 00490, serial numbers having the first four numbers 0677, to be replaced on, but not limited to, Lear jet models 23, 24, 25; Beech models 99 series, B100, 200; Swearingen SA 226-TC and Cessna models 336/337 or T-337 series aircraft.

(a) Inspect for serial numbers having the first four numbers 0677 P/N 00490.

(b) Replace with Firestone tires having serial numbers outside of this subject group or with Firestone tire P/N 00518 or with any other tire approved for these aircraft.

Obliterate TSO markings on tires identified in this AD to prevent future use on aircraft.

This amendment is effective October 5, 1978, as to all persons except those persons to whom it was made immediately effective by the airmail letter dated September 6, 1978, which contained this amendment.

(Sec. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89).)

The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Des Plaines, Ill., September 21, 1978.

WAYNE J. BARLOW,
Acting Director,
Great Lakes Region.

[FR Doc. 78-27971 Filed 10-4-78; 8:45 am]

[4910-13]

[Docket No. 78-CE-17-AD; Amdt. 39-3311]

PART 39—AIRWORTHINESS DIRECTIVES

Beech Model 76 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to Beech model 76 airplanes. It requires, prior to further flight, the replacement of the elevator and rudder trim control push rods with new designed push rods and the rebalancing of these control surfaces where necessary. The AD, which is of an emergency nature, is necessary to prevent in-flight push rod failures which may cause the rudder and elevator trim tabs to become disengaged with possible resultant control surface flutter and ensuing hazard to occupants.

EFFECTIVE DATES: October 12, 1978, to all persons except those to whom it has already been made effective by telegram from the FAA dated September 9, 1978. Compliance: As required in the body of the AD.

ADDRESSES: Beechcraft liberal service letter No. 78-4, applicable to this AD, may be obtained from local Beechcraft Aviation and Aero Centers or Beech Aircraft Corp., Commercial Service Department, 9709 East Central, Wichita, Kans. 67201. A copy of the service letter cited above is contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Mo. 64106, and at Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

E. L. Tankesley, Aerospace Engineer, Engineering and Manufacturing Branch, Federal Aviation Administration, Central Region, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3146.

SUPPLEMENTARY INFORMATION: The FAA has determined that the problem described in the summary is an unsafe condition which is likely to exist or develop in other airplanes of the same type design. Since the agency also determined that an emergency situation existed and that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to the public interest. Accordingly, all known registered owners/operators of the affected airplanes were notified of the AD by telegram from the FAA dated September 9, 1978. The AD became effective as to those individuals upon receipt of the notification telegram. Since the unsafe condition described in the summary may still exist on other Beech Model 76 airplanes, the AD is being published in the FEDERAL REGISTER as an amendment to part 39 of the Federal Aviation Regulations (14 CFR Part 39) to make it effective as to all persons who did not receive the telegram notification.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive.

BEECH. Applies to model 76 (serial Nos. ME-1 through ME-62 and ME-66) airplanes.

To preclude failure of the rudder and elevator trim tab push rods, prior to further flight:

(A) If not previously accomplished, replace Beech part No. 105-520024-5 rudder trim tab push rod with new Beech part No. 105-520045-9 rudder trim tab push rod and rebiance the rudder control surface, where necessary, in accordance with Beechcraft liberal service letter No. 78-4, dated September 14, 1978, or later approved revisions.

(B) If not previously accomplished, replace Beech part No. 105-520024-1 elevator trim tab push rod with new Beech part No. 105-520048-1 elevator trim tab push rod and rebalance the elevator control surfaces, where necessary, in accordance with Beechcraft liberal service letter No. 78-4, dated September 14, 1978, or later approved revisions.

(C) Aircraft may not be flown in accordance with FAR 21.197 to a base to accomplish this AD, unless authorized by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

(D) Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Kansas City, Mo., on September 22, 1978.

JOHN E. SHAW,
Acting Director,
Central Region.

[FR Doc. 78-27872 Filed 10-4-78; 8:45 am]

[4910-13]

[Docket No. 78-WE-9-AD; Amdt. 39-3310]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model-DC-10 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires a modification to hydraulic systems 1 and 3, in McDonnell Douglas model DC-10 series airplanes, by installing three check valves and, when applicable, new hydraulic piping. There have been reports of incidents in which tire debris has damaged hydraulic lines in the wheel well area with subsequent complete loss of associated hydraulic systems. This AD is needed to prevent the loss of associated powered flight controls due to loss of fluid, through brake return line failure.

DATE: Effective December 6, 1978. Compliance schedule—as prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from: McDonnell Douglas Corp., 3855 Lakewood Boulevard, Long Beach, Calif. 90846, Attention: Director, Publications and Training, C1-750 (54-60).

Also, a copy of the service information may be reviewed at, or a copy obtained from: Rules Docket, Room 916, FAA, 800 Independence Avenue SW, Washington, D.C. 20591, or Rules Docket, Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Kyle L. Olsen, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive to require installation of three check valves and, when applicable, new hydraulic piping was published in the FEDERAL REGISTER (43 FR 29584). Tire debris from failure of main wheel tires during takeoff has fractured lines in hydraulic systems 1 and 3. Two occurrences resulted in eventual loss of both hydraulic systems 1 and 3. Six occurrances resulted in loss of a single hydraulic system, either 1 or 3.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all comments received in response to the notice of proposed rulemaking.

Only one comment was received. The Air Transport Association of America agrees with the intent of the AD, however, some airlines believe that the proposed 1,800 hour compliance time is too restrictive and request that compliance time be extended to 2,400 hours. The FAA disagrees. In view of the elapsed time required for completion of the modifications, the DC-10 utilization rate and the safety considerations, the 1,800 hour compliance time is not restrictive.

The phrase "or later FAA approved revisions" has not been included in the service bulletin citation in this AD and a note has been added indicating that the cited version of the service bulletin is the only version acceptable for demonstrating compliance with the AD under terms of paragraph a.

After careful review of all available data, including the comments above, the FAA believes that sufficient evidence exists in the public interest in aviation safety to adopt the proposed rule with a clarifying note, as a Final Rule.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

MCDONNELL DOUGLAS. Applies to DC-10-10, -10F, -30, -30F, and -40 airplanes certificated in all categories.

Compliance required within the next 1,800 hours time in service after the effective date of this AD, unless already accomplished.

To prevent the loss of related powered flight controls due to loss of fluid through brake return line failure accomplish the following:

(a) Revise hydraulic systems 1 and 3 by installing three check valves and, when applicable, new hydraulic piping, in accordance with McDonnell Douglas DC-10 Service Bulletin No. A29-113, revision 2, dated April 4, 1978.

NOTE.—Service Bulletin A29-113, revision 2, dated April 4, 1978, is the only version of this service bulletin suitable for compliance with paragraph (a) of this AD.

(b) Equivalent modifications may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspections required by this AD.

This amendment becomes effective December 6, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

Issued in Los Angeles, Calif., on September 22, 1978.

M. C. BEARD,
Acting Director,
FAA Western Region.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Taos, N. Mex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the action being taken is to alter the transition area at Taos, N. Mex. The intended effect of the action is to provide controlled airspace for aircraft executing the newly established instrument approach procedure to the Taos Municipal Airport. The circumstance which created the need for the action was the development of a new nondirectional radio beacon (NDB) instrument approach procedure to the airport.

EFFECTIVE DATE: December 28, 1978.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On August 3, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 34157) stating that the Federal Aviation Administration proposed to alter the Taos, N. Mex., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. We received no objections to the proposal. Except for editorial changes this amendment is that proposed in the notice.

THE RULE

This amendment to subpart G of part 71 of the Federal Aviation Regu-

V 43/194 OCT 5 1978

lations (14 CFR Part 71) alters the Taos, N. Mex., transition area. This action provides additional controlled airspace from 700 feet above the ground for the protection of aircraft executing the newly established instrument approach procedure to the Taos Municipal Airport.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., December 28, 1978, as follows:

In subpart G, § 71.181 (43 FR 440), the following transition area is altered to read:

TAOS, N. MEX.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Taos Municipal Airport (lat. 36°27'33" N., long. 105°40'31" W.); within 9.5 miles on the northwest side and within 4.5 miles on the southeast side of the 203° bearing from the Ski NDB (lat. 36°27'40" N., long. 105°40'10" W.), extending from the NDB to 18.5 miles southwest of the NDB excluding that airspace within the 6.5-mile airport radius area; and that airspace extending upward from 1,200 feet above the surface beginning at latitude 36°07'00" N., longitude 105°50'00" W., thence via a 25-mile arc centered on the Taos Municipal Airport coordinates (lat. 36°27'33" N., long. 105°40'31" W.) clockwise to latitude 36°48'00" N., longitude 105°49'15" W., thence direct to latitude 36°30'00" N., longitude 105°30'00" W., thence direct to point of beginning.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines. (43 FR 9582; Mar. 8, 1978).

Issued in Fort Worth, Tex., on September 22, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 78-27868 Filed 10-4-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-ASW-29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area—Castroville, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the action being taken is to designate a transition area at Castroville, Tex. The intended effect of the action is to provide controlled airspace for aircraft executing instrument approach procedures to the Castroville Municipal Airport. The circumstance which created the need for the action was the establishment of a nondirectional radio beacon (NDB) on the airport to provide capability for flight under instrument flight rules (IFR) procedures to the airport.

EFFECTIVE DATE: December 28, 1978.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On July 27, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 32434), stating that the Federal Aviation Administration proposed to designate the Castroville, Tex., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. We received no objections to the proposal. Except for editorial changes, this amendment is that proposed in the notice.

THE RULE

This amendment to subpart G of part 71 of the Federal Aviation Regulations (14 CFR 71), designates the Castroville, Tex., transition area. This action provides controlled airspace from 700 feet above the ground for the protection of aircraft executing instrument approach procedures to the Castroville Municipal Airport.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., December 28, 1978, as follows:

In subpart G, § 71.181 (43 FR 440), the following transition area is added:

CASTROVILLE, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Castroville Municipal Airport (lat. 29°20'32" N., long. 98°51'03" W.), within 3.5 miles each side of the 170° bearing from the proposed NDB (lat. 29°20'45" N., long. 98°50'56" W.), extending from the 5-mile radius to 11.5 miles northwest of the proposed NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Fort Worth, Tex., on September 22, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 78-27869 Filed 10-4-78; 8:45 am]

[4910-13]

[Airspace Docket Number 78-CE-15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW POINT ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Designation of Transition Area—Warrensburg, Mo.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate a 700-foot transition area at Warrensburg, Mo., to provide controlled airspace for aircraft executing a new instrument approach procedure which is being developed for the Skyhaven Airport, Warrensburg, Mo., based on the Napoleon visual omni range (VOR) navigational aid.

EFFECTIVE DATE: December 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE—537, FAA, Central Region, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: To enhance airport usage, a new instrument approach procedure to the Skyhaven Airport, Warrensburg, Mo., is being established based on the Napoleon VOR, a navigational aid. The establishment of an instrument approach procedure based on this navigational aid entails designation of a transition area at Warrensburg, Mo., at and above 700 feet above the ground (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to insure segregation of aircraft using the new approach procedure under instrument flight rules (IFR) and other aircraft operating under visual flight rules (VFR).

DISCUSSION OF COMMENTS

On pages 28209 and 28210 of the FEDERAL REGISTER dated June 29, 1978, the Federal Aviation Administration published a notice of proposed rulemaking which would amend § 71.181 of part 71 of the Federal Aviation Regulations so as to designate a transition area at Warrensburg, Mo. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the notice of proposed rulemaking.

Accordingly, subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1978 (43 FR 440) is amended effective 0901 GMT December 28, 1978, by adding the following new transition area:

WARRENSBURG, MO.

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the Skyhaven Airport, Warrensburg, Mo. (lat. 38°47' N., long. 93°48' W.); and within 2.5 miles either side of the Napoleon, Mo. VORTAC 140° radial, extending from the 5.5-mile radius to 7 miles northwest of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.61 of the Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Kansas City, Mo., on September 21, 1978.

C. R. MELUGIN, JR.,
Director, Central Region.

[Airspace Docket No. 78-ASW-30]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Beeville, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the action being taken is to alter the transition area at Beeville, Tex. The intended effect of the action is to provide controlled airspace for aircraft executing a new instrument approach procedure to the Beeville Municipal Airport. The circumstance which created the need for the action was the establishment of a navigation facility on the airport to provide additional capability for flight under instrument flight rules (IFR) procedures to the airport.

EFFECTIVE DATE: December 28, 1978.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On July 24, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 31942) stating that the Federal Aviation Administration proposed to alter the Beeville, Tex., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. We received no objections to the proposal. Except for editorial changes, this amendment is that proposed in the notice.

THE RULE

This amendment to subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) alters the Beeville, Tex., transition area. This action provides controlled airspace from 700 feet above the ground for the protection of aircraft executing the newly established instrument procedure to the Beeville Municipal Airport.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., December 28, 1978, as follows:

In subpart G, § 71.181 (43 FR 440), the following transition area is altered to read:

BEEVILLE, TEX.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of NAS Chase Field (lat. 28°21'50" N., long. 97°39'40" W.); within 2 miles each side of the NAS Chase TACAN 129° and 321° radials extending from the 7-mile radius area to 10 miles northwest and southeast of the TACAN; within 2 miles each side of the 339° bearing from the NAS Chase RBN extending from the 7-mile radius area to 12 miles north of the RBN; within a 6.5-mile radius of Beeville Municipal Airport (Lat. 28°22'00" N., long. 97°48'00" W.) within 3.5 miles each side of the 138° bearing from the Beeville NDB (lat. 28°22'03" N., long. 97°47'39" W.) extending from the 6.5-mile radius to 11.5 miles southeast of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 3, 1978).

Issued in Fort Worth, Tex., on September 22, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[Docket No. 18320; Amdt. No. 95-281]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 95—IFR ALTITUDES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum end route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribe new, amended, sus-

V 43 / 194

pended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COP's) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the national airspace system, and are related to published aeronautical charts that are essential to the user and provides for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, or contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly and pursuant to the authority delegated to me by the Administrator, part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective: November 2, 1978.

(Secs. 307 and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 25 FR 6489 and paragraph 802 of order FSP 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this amendment does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 27, 1978.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. FI-56]

PART 200—ORGANIZATION, CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Availability of Records Under the Freedom of Information Act

AGENCY: Securities and Exchange Commission.

ACTION: Final rules and request for comment.

SUMMARY: This amendment revises the Commission's rules which specify the Commission offices at which records may be made available for public inspection.

EFFECTIVE DATE: September 27, 1978. Comments must be received on or before November 27, 1978.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Comment letters should refer to file No. S7-756. All comments received will be available for public inspection and copying in the Commission's public reference room, 1100 L Street NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

Linda A. Schneider, Attorney, Office of the General Counsel, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-1339.

SUPPLEMENTARY INFORMATION: These amendments are intended to correct and clarify the Commission's rules under the Freedom of Information Act as they were last amended in August 1977. Those last amendments inadvertently lent themselves to the interpretation that all Commission records available under the Freedom of Information Act for public examination or copying were to be available in the New York, Chicago, and Los Angeles regional offices, as well as in the public reference room in Washington, D.C. These amendments revise the Commission's rules to specify the Commission offices at which records will be made available for inspection under the Freedom of Information Act. The rule provides that records will be made available at the Commission's public reference room in Washington, D.C. In addition, upon request, and if the records are not needed by the staff in connection with its ongoing work, records will be sent to any of the three Commission offices which have public reference facilities (New York, Chicago, and Los Angeles) for inspection at those offices. Finally, when suitable arrangements can be made with respect to the storage and inspection of records, records may also be sent, upon request, to other Commission offices for inspection at those offices. The requestor must pay the cost of transporting the records in all instances.

Accordingly, part 200, chapter II, title 17 of the Code of Federal Regulations is amended as follows:

Subpart D—Information and Requests

In § 200.80 paragraph (c)(1) is revised by amending subdivision (i) by deleting the word "other" from the first sentence of subdivision (ii), and adding subdivision (iii) as follows:

§ 200.80 Commission records and information.

* * * * *

(c)(1) * * *

(i) The public reference room in Washington has available for public inspection all of the publicly available records of the Commission as described in paragraph (a) of this section. In addition, upon request, such records will be sent to the Commission's regional offices in New York, Chicago, or Los Angeles, for inspection in the public reference facilities at those offices, if the records are not needed by the Commission or the staff in connection with the performance of official duties. Also upon request, and only when suitable arrangements can be made with respect to the transportation, storage, and inspection of records, records may be sent to any other Commission office for inspection at that office, if the records are not needed by the Commission or the staff in connection with the performance of official duties. When records are sent to another office at the request of a member of the public, the requestor shall be charged all costs incurred by the Commission in transporting the records.

(ii) [Amended]

(iii) In the New York, Chicago, and Los Angeles regional offices, microfiche of all recent registration statements filed pursuant to the Securities Act of 1933, registration statements and periodic reports filed pursuant to the Securities Exchange Act of 1934, and periodic reports filed pursuant to the Investment Company Act from 1969 to date are available for inspection and reproduction.

STATUTORY AUTHORITY

The foregoing action is taken pursuant to the authority set forth in the Freedom of Information Act, 5 U.S.C. 552, and is effective upon publication. Because this action relates solely to matters of procedure regarding requests made under the Freedom of Information Act, notice and prior publication for comments under the Administrative Procedure Act is not necessary. See 5 U.S.C. 553(b). However, the Commission will receive comments on this matter for 60 days after the effective date of the amendments. At the end of that period, the Commission will reexamine and reevaluate these amendments, and will determine whether further amendment to its rules is necessary or appropriate.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

SEPTEMBER 27, 1978.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 803-78]

ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Establishment of the Office of Information Law and Policy

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order amends, revises, and redesignates certain Department of Justice regulations pertaining to the Freedom of Information Act (5 U.S.C. 552), and pertaining to the Privacy Act (5 U.S.C. 552a), to establish the Office of Information Law and Policy to be headed by a Director who will report directly to the Associate Attorney General. The purposes of the office will be to advise this Department and other departments and agencies on all questions of policy, interpretation, and application of the Freedom of Information Act and to advise the Department on questions of policy interpretation and application of the Privacy Act; to coordinate Freedom of Information Act policy among the executive agencies; to coordinate the Department's response to requests for information under the Freedom of Information Act and the Privacy Act; and to undertake training, research, and informational programs concerning both acts.

EFFECTIVE DATE: October 1, 1978.

V 43 / 194 OCT 5 1978 UMI

FOR FURTHER INFORMATION CONTACT:

John M. Harmon, Assistant Attorney General, Office of Legal Counsel, Department of Justice, Washington, D.C. 20530, 202-739-2041.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, parts 0, 16 and 50, of chapter I of Title 28, Code of Federal Regulations are amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

§ 0.1 [Amended]

1. Section 0.1 of subpart A is amended by inserting "Office of Information Law and Policy" immediately after "Office of Professional Responsibility."

§ 0.15(b)(2) [Redesignated as § 0.29(a)]

2. Section 0.15(b)(2) of subpart C is revised in part and redesignated as § 0.29(a) of new subpart E-2 as set out below.

§ 0.18 [Redesignated as § 0.19a]

3. Section 0.18 of subpart C is revised in part and redesignated as § 0.19a of subpart C-1 to read as follows:

§ 0.19a Office of Privacy and Information Appeals.

The Office of Privacy and Information Appeals is established in the Office of the Associate Attorney General under the supervision of the Associate Attorney General to assist in acting on Privacy and Freedom of Information appeals under §§ 16.47 and 16.7, respectively, of this chapter, except that in the case of appeals from initial decisions in which the Associate Attorney General participated this assistance shall be provided by the Office of Legal Counsel. The Office of Privacy and Information Appeals shall provide staff support to the Department Review Committee, established by § 17.38 of this chapter.

§ 0.25(i) [Redesignated as § 0.29(b)]

4. Section 0.25(i) of subpart E is revised in part and redesignated as § 0.29(b) of new subpart E-2 as set out below:

Subpart E-2—Office of Information Law and Policy

Sec.
0.28 Organization.
0.29 Functions.
0.29a Freedom of Information Committee.

AUTHORITY: 28 U.S.C. 509, 510 and 5 U.S.C. 301.

Subpart E-2—Office of Information Law and Policy

§ 0.28 Organization.

The Office of Information Law and Policy shall be headed by a Director, appointed by the Attorney General. The Director shall be subject to the general supervision and direction of the Associate Attorney General.

§ 0.29 Functions.

The Director of the Office of Information Law and Policy shall:

(a) Coordinate the Department's response to requests for production or disclosure of information under the Freedom of Information Act (5 U.S.C. 552), see part 16(A) in this chapter, and under the Privacy Act (5 U.S.C. 552a), see part 16(D) in this chapter, and provide assistance in furnishing information to the public under the acts.

(b) Advise executive agencies and organizational units of the Department on questions relating to interpretation and application of the Freedom of Information Act and advise the Department on questions relating to interpretation and application of the Privacy Act.

(c) Coordinate the development and implementation of and compliance with Freedom of Information Act policy within the executive agencies and all organizational units of the Department and Privacy Act policy within all organizational units of the Department.

(d) Undertake, arrange, or support training and informational programs concerning both acts for the executive agencies and the Department.

(e) Undertake such other responsibilities as may be assigned by the Associate Attorney General.

§ 0.29a Freedom of Information Committee.

(a) The Freedom of Information Committee is established within the Office of Information Law and Policy to encourage compliance with the Freedom of Information Act throughout the executive branch. The Committee consists of Justice Department attorneys who were members of the Committee on the effective date of this provision and Justice Department attorneys designated by the Director, Office of Information Law and Policy: *Provided*, That attorneys in other organizational units of the Department shall be so designated only with the consent of the head of the other organizational unit. The Committee through the Office of Information Law and Policy shall provide assistance and encouragement to Federal agencies in complying with the letter and spirit of the Freedom of Information Act through training of Federal personnel and consultation with agencies on particular matters arising under the Freedom of Information Act. In consulting with agencies proposing to issue final denials under the Act, the Committee through the Office of Information Law and Policy shall, in addition to advising the agency with respect to legal issues, invite the attention of the agency to the range of public policies reflected in the Act, including the central policy of fullest responsible disclosure. The Office of Information Law and Policy may also undertake studies and make recommendations to carry out the intent of this subsection.

(b) All Federal agencies which intend to deny requests for records under the Freedom of Information Act should consult with the Freedom of Information Committee through the Director of the Office of Information Law and Policy, to the fullest extent practicable, before litigation ensues. After litigation begins, contacts regarding the matter should be primarily with the Civil Division or other component of the Department of Justice responsible for conducting the defense of the suit.

PART 16—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

Subpart A [Amended]

5. Subpart A of part 16 is amended by substituting "Associate Attorney General" for "Deputy Attorney General" each place where it appears in subpart A.

§ 16.1(b) [Amended]

6. Section 16.1(b) of subpart A, part 16, is amended by substituting "Office of Information Law and Policy" for "Office of Legal Counsel".

Subpart D [Amended]

7. Subpart D of part 16, is amended by substituting "Associate Attorney General" for "Deputy Attorney General" each place where it appears in subpart D.

PART 50—STATEMENTS OF POLICY

§ 50.9 [Redesignated]

8. Section 50.9 of part 50 is revised in part and redesignated as § 0.29a in the new subpart E-2, part 0, as set out above.

Dated: September 27, 1978.

GRIFFIN B. BELL,
Attorney General.

[FR Doc. 78-28105 Filed 10-4-78; 8:45 am]

[4410-01]

[AAG/A Order No. 14-78]

PART 16—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

Subpart E—Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The Department of Justice is amending 28 CFR 16.85 to permit the U.S. Parole Commission to revise its alternate means of access under the Privacy Act of 1974 in order to bring its rules relating to disclosure under the Privacy Act into conformity with the prehearing disclosure provisions of the Parole Commission and Reorganization Act of 1976. The authorization specifically permits the Commission to apply the same substantive exemptions to all disclosure requests by prisoners which will avoid the possibility of inconsistent disclosure decisions relating to the same information.

DATE: This rule will be effective October 5, 1978.

ADDRESS: Legal and Legislative Group, Office of Management and Finance, Department of Justice, 10th and Constitution Avenue NW., Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT:

Bronson E. Clayton, 202-739-4165.

SUPPLEMENTARY INFORMATION: No comments were received regarding the proposed regulations. Pursuant to the authority vested in me by 5 U.S.C. 552a and 553, 28 CFR 16.85(e), is revised as set forth below.

Dated: September 22, 1978.

KEVIN D. ROONEY,
Assistant Attorney General for Administration.

§ 16.85 Exemption of Parole Commission system—limited access.

* * * * *

(c) Consistent with the legislative purpose of the Privacy Act of 1974 the U.S. Parole Commission will initiate a procedure whereby present and former prisoners and parolees may obtain copies of material in files relating to them that are maintained by the U.S. Parole Commission. Disclosure of the contents will be affected by providing copies of documents to requesters through the mails. Disclosure will be made to the same extent as would be made under the substantive exemptions of the Parole Commission and Reorganization Act of 1976 (18 U.S.C. § 4208) and rule 32 of the Federal Rules of Criminal Procedure. The procedure relating to disclosure of documents may be changed generally in the interest of improving the Commission's system of disclosure or when required by pending or future decisions and directions of the Department of Justice.

[FR Doc. 78-28106 Filed 10-4-78; 8:45 am]

[6560-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 972-2]

PART 81—AIR QUALITY CONTROL REGIONS, CRITERIA, AND CONTROL TECHNIQUES

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rulemaking responds to comments and makes necessary amendments to the designations of attainment status relative to the national ambient air quality standards (NAAQS) for Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. This rulemaking supplements the national EPA rulemaking of September 11, 1978 (43 FR 40412), and incorporates by reference EPA's position on certain general issues raised in comments on the designations found in the supplementary information section of that rulemaking.

DATE: Effective date—October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Thomas Mateer, Air Programs Branch, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Ill. 60604, 312-353-2334.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 (the 1977 Amendments), Pub. L. 95-95, added section 107(d) to the Clean Air Act (the Act) which directed each State to submit to the Administrator a list of the NAAQS attainment status of all areas within the State. The Administrator was required under section 107(d)(2) to promulgate the State lists, with any necessary modifications. For each standard, areas are classified as either not meeting the standard (nonattainment areas), meeting the standard (attainment areas), or lacking sufficient data to be classified (unclassifiable areas). The U.S. Environmental Protection Agency (EPA or the Agency) published these lists in the FEDERAL REGISTER on March 3, 1978 (43 FR 8962), and invited the public to submit comments to the Agency by May 2, 1978.

Certain issues raised in these comments were similar to those raised by others throughout the nation. These issues are addressed in the national EPA promulgation. Additional issues which are specific to the States in EPA region V are addressed in this action. Several of the comments have caused EPA to modify earlier designations. In some cases, the designation has been changed by redefining the boundaries of the area; in others, the designation itself has been changed but no new nonattainment areas have been designated in counties which were previously attainment or unclassifiable.

For good cause, the amendments to designations made final today are being made effective immediately. As discussed in the national EPA rulemaking, the only effect of these designations is to identify problem areas for which State planning must be completed by a statutory deadline. These designations impose no obligation on any source. There would therefore be no point in deferring the effective date. The issues raised in the comments are discussed below by State.

ILLINOIS

One commenter stated that no opportunity was provided for public participation in the designation process implemented by the Illinois Environmental Protection Agency (IEPA). While the Clean Air Act does not require the States to provide opportunity for public participation in the designation process, IEPA held two public meetings in November 1977 in order to discuss the criteria to be utilized in the designation process. Written comments were accepted by IEPA until the end of that month.

TOTAL SUSPENDED PARTICULATES (TSP)

One commenter questioned the criteria used by the State of Illinois in determining the nonattainment boundaries, monitor siting, and monitoring data used to support the nonattainment designations for Bremen, Orland, and Palos Townships in AQCR 67 (Cook County). The nonattainment designations for these townships are supported by monitored violations. The State of Illinois chose to designate an area surrounding monitored violations which included the surrounding townships. EPA review of the monitoring data and site locations reaffirms that the TSP primary and secondary nonattainment status of Bremen and Orland Townships is sup-

V 4 3 / 1 9 4

ported by the data. This review also demonstrates the need to redesignate Palos Township from attainment of the primary standard and nonattainment of the secondary standard to nonattainment for both the primary and secondary standards.

One commenter questioned the monitoring data used to support the nonattainment designations for Hyde Park, Hennepin, and Mount Vernon Townships. Upon review of the monitoring data from these townships, EPA reaffirms the nonattainment designations. However, in the case of Hennepin Township, if 1978 monitoring data continues to indicate improved air quality, a redesignation may be justified.

One commenter questioned the siting of a monitoring station and air quality data used to support the nonattainment designation for Capital Township, Sangamon County. The designation of Capital Township was based on air quality data from third quarter 1975 through second quarter 1977. Upon review of monitored data and information regarding site location, EPA reaffirms the nonattainment designation.

One commenter recommended that the geographic areas for the TSP nonattainment designations be made smaller than entire townships within major metropolitan areas such as the city of Chicago. The commenter recommended the utilization of specific street boundaries for smaller areas of nonattainment. The commenter did not provide sufficient support for revising the nonattainment boundaries as suggested. Therefore, EPA reaffirms the nonattainment designations within the city of Chicago.

One commenter noted that seven townships in south Chicago are listed as exceeding the primary TSP standards when there are many monitoring sites located in south Chicago which meet the primary TSP standards. Upon review of the 1977 monitoring data from the monitoring sites mentioned by the commenter, EPA reaffirms the nonattainment designations.

Sulfur Dioxide (SO_2)

One commenter indicated that a copy of a preliminary air quality modeling study was not available for review and that comment on the nonattainment designation for the Peoria major metropolitan area was thereby hindered. The commenter also questioned the modeling results used to support this designation, specifically the emissions inventory used in the modeling. The above-mentioned draft report was made available to the commenter by the State EPA in May. Before that time commenter was afforded information available for commenting on the designation status of Peoria. EPA approved the State's recommended designation after review of the emission inventory used in the modeling which supported the designation. Therefore, the nonattainment designation for the Peoria metropolitan area is supported by the evidence. Upon the finalization of a detailed modeling study for the Peoria area and obtaining additional monitoring results, the State may request a redesignation to attainment status, if justified.

One commenter questioned the unclassifiable designation for Capital Township, Sangamon County, in view of the fact that sulfur dioxide has been monitored for four years without a violation of the NAAQS. The unclassifiable designation for Capital Township is justified in that dispersion modeling shows the potential for violations of the NAAQS in several townships within Sangamon County, while the State of Illinois determined that there was not enough evidence to support a nonattainment designation. Therefore, EPA reaffirms the current unclassifiable designation.

The State of Illinois commented that Leepertown Township, Bureau County, should be designated attainment for primary and secondary SO_2 NAAQS and Shelby Township, Bureau County, should be designated unclassifiable due to error in the location of a monitoring site. EPA supports the State of Illinois designation changes. Therefore, Leepertown Township is designated attainment and Selby Township is designated unclassifiable.

Carbon Monoxide (CO)

One commenter questioned the unclassifiable designation for Capital Township, Sangamon County, in view of the fact that carbon monoxide has been monitored for 4 years without a violation of the NAAQS. The unclassifiable designation for Capital Township is justified since transporation data indicated the potential for violation of the NAAQS within portions of the township, while the State of Illinois determined that there was not enough evidence to support a nonattainment designation. Therefore, EPA reaffirms the current unclassifiable designation.

One commenter questioned the designation of the nonattainment area boundaries within the Chicago major metropolitan area. The commenter recommended specific alternative boundaries, but provided no support for the redesignation. Repeated violations of the NAAQS at several locations within the designated nonattainment area support the current nonattainment designation. Traffic data and dispersion studies support the current nonattainment designations for expresssway areas located within the Chicago major metropolitan area. Therefore, EPA must retain the current nonattainment designations.

Nitrogen Dioxide (NO_2)

One commenter questioned the siting of the continuous air monitoring program (CAMP) monitoring station located in downtown Chicago and recommended specific alternative street boundaries for the nonattainment area. Upon review, EPA determined that the CAMP monitoring station is correctly sited. Further, the commenter did not provide sufficient technical data to support a redesignation. There were two monitoring sites located within the Chicago central business district which recorded violations of the NAAQS in 1977. Therefore, EPA confirms the current designation boundaries.

Photochemical Oxidants (Ozone)

One commenter questioned the location of a monitoring site and air quality data used to support a nonattainment designation for Capital Township. Review of the monitoring site location and air quality data confirmed numerous violations of the NAAQS in 1977 despite a conservative site location. Therefore, EPA reaffirms the current designation.

Indiana

The Agency received a total of 24 comments on designations in the State of Indiana. Also, the State of Indiana on June 12, 1978, petitioned the Agency under section 107(d)(5) of the Clean Air Act to revise the designations for several counties, in some cases revising its previous recommendations. Normally, the Agency's approval or disapproval of such a petition would be proposed as rulemaking and subsequently promulgated; however, since Indiana's petition was submitted in time to be reviewed along with all of the other comments on designations and since there is no prejudice to sources in areas where the designation is revised, the State's recommendations in the petition were reviewed and are discussed below in conjunction with all other comments on the same areas.

Total Suspended Particulates (TSP)

One commenter recommended that Vigo County be designated as an attainment area for suspended particulates. One commenter recommended revision of the geographic size of the TSP nonattainment area in Vigo County to include only the industrialized portions of the county. Similarly the State of Indiana recommended that the primary TSP nonattainment area be restricted to Harrison, Sugar Creek, Fayette, Otter Creek, Lost

Creek, and Honey Creek Townships. Since violations of the TSP NAAQS have been monitored in Vigo County, revision of the designation is not supported. However, the portion of the county recommended for nonattainment designation by the State of Indiana includes all areas of monitored violations as well as all significant point sources of particulate matter. EPA therefore concurs in the Indiana recommendations and has revised the geographic boundary of the TSP nonattainment area in Vigo County accordingly.

Two commenters, as well as the State of Indiana, recommended that the primary TSP nonattainment designation in St. Joseph County be reduced to secondary nonattainment and that the geographic boundary of the nonattainment area be changed to the industrialized portion of the county, including all areas of monitored violations. After reviewing the available technical data, USEPA concurs with these recommendations. The designation for St. Joseph County has been revised to secondary nonattainment for particulate matter for those areas of St. Joseph County east of Pine Road and north of Kern Road.

One commenter stated that fugitive dust may be a significant contributor to secondary particulate nonattainment in and around Kokomo, in Howard County and requested that USEPA reevaluate the area to determine the significance of the contribution of fugitive dust. An examination of the analysis of the high volume filters registering excursions of the secondary standard indicate that nonfugitive dust such as fly ash and carbonaceous material make up a significant portion of the particulate matter. Therefore, a revision of the designation for the secondary standard is not supported.

The State of Indiana recommended revising the boundaries of the secondary TSP nonattainment area in Howard County to Center and Howard Townships only. USEPA concurs and has redefined the boundaries of the nonattainment area accordingly.

Two commenters disputed the designation of Vanderburgh County as a secondary nonattainment area for TSP citing the transport of fugitive dust from outside the county as the primary source of nonattainment. A third commenter supported the nonattainment designation. The State of Indiana recommended revising the geographic boundary of the nonattainment area to Pidgeon Township only. An analysis of high volume filters from monitors in the Evansville area which measured violations of the secondary particulate standard indicated that while fugitive dust was present, a significant portion of the particulate matter was man made in origin. Therefore, a change in the designation is not supported. Since Pidgeon Township contains the city of Evansville's significant industrial point sources of particulate matter, EPA concurs with the State's recommendation and has redefined the boundaries of the nonattainment area accordingly.

One commenter objected to the designation of Floyd County as unclassifiable for TSP and recommended a classification of attainment. Upon review, EPA finds that there is not enough data to support either an attainment or nonattainment classification. Therefore, the TSP designation for Floyd County will remain unclassifiable.

The State of Indiana recommended that the following full county designations of TSP primary nonattainment be changed to subcounty designations: *Clark County* (to Silver Creek, Charlestown, Utica, and Jeffersonville Townships only); *Dearborn County* (to Lawrenceburg, Center, Manchester, and Hogan Townships only); *Lake County* (to the area bounded by a line running east along U.S. 30 between the Illinois State line and I-65, north on I-65 to the intersection of I-94, east along I-94 to Lake-Porter County line, north along the county line to Lake Michigan, and west along the lake shore to the Illinois State line); *Marion County* (to the entire county with the exception of Washington Township east of Fall Creek, and Franklin Township south and east of Five Points Road and Thompson Road); and *Wayne County* (to Webster, Boston, Center, and Wayne Townships only).

The State also recommended that the description of the primary TSP nonattainment designation for Dubois County (an area within a 10-mile radius of the center of Jasper) be changed to Bainbridge, Marion, and Patoka Townships; and that the secondary TSP nonattainment area for La Porte County (as area within a 10-mile radius of the city of La Porte sampling site) be changed to primary nonattainment in Center, Scipco, Kankakee, New Durham, and Pleasant Townships, and the area north and west of Interstate 94. USEPA concurs in these recommendations and has revised the designations accordingly.

Sulfur Dioxide (SO_2)

Ten commenters requested revisions to the size of the sulfur dioxide (SO_2) primary nonattainment area in Lake County. With the exception of the State of Indiana, each commenter recommended that the city where the commenter was located be excluded from the nonattainment area, for the following reasons: Relatively few monitors within the area registered violations of the SO_2 national ambient air quality standards (NAAQS) and most of the heavy industry in the area was not responsible for the violations which were monitored. Commenters generally believed that sources unfairly placed within the nonattainment area would suffer potentially serious adverse impacts due to restrictions on economic growth and unnecessarily restrictive emission limitations.

The northern portion of Lake County, Ind., is heavily industrialized with a significant number of large SO_2 emission sources and relatively few continuous SO_2 monitors in operation. Despite the scarcity of the monitors, violations of the standard have been monitored. For this reason, the area must remain in nonattainment area for SO_2. Also, the impact of the designation need not be adverse to emission sources not causing or contributing to violations of the standard as explained in more detail in the national EPA rulemaking.

The State of Indiana comment recommended redescription of the southern boundary of the Lake County nonattainment area (currently U.S. 30 between the Illinois State line and the Porter County line) to U.S. 30 east from the Illinois State line to the intersection of U.S. 30 and I-65, north along I-65 to the intersection of I-65 and I-94, and east along I-94 to the Porter County line. The area recommended by the State of Indiana encompasses all significant emission sources and is therefore acceptable. The southern boundary of the Lake County nonattainment area for SO_2 is revised as noted above.

Two commentors recommended that the designation for Porter County be changed from partial nonattainment for SO_2 to attainment for the full county. The State of Indiana recommended that the nonattainment area (the area bounded by Lake Michigan on the north, by the Lake-Porter County line on the west, by I-80-90 on the south, and by the La Porte-Porter County line on the east) be redesignated as unclassifiable. On June 12, 1978, the State of Indiana petitioned EPA under 107(d)(5) of the Clean Air Act, to revise the Porter County designation from attainment in part to attainment for the entire county. In all cases commenters noted that the original designation was based on computer dispersion modeling utilizing the urban version of the RAM model, rather than on monitored violations of the SO_2 air quality standards. All commenters indicated that the rural version of the RAM model would be more appropriate for use in Porter County.

Upon evaluation, EPA concurred in that assessment and the Indiana Division of Air Pollution Control remodeled Porter County utilizing the rural

OCT 5 1978

V 43/194 OCT 5 78 UMI

version of RAM. While the results of the rural RAM model showed no predicted violations of the primary or secondary NAAQS for SO_2, EPA noted certain technical deficiencies in the modeling. The modeling performed by Indiana did not utilize maximum allowable emission rates in determining whether there would be attainment of the 3-hour and 24-hour SO_2 standards, and background concentrations of SO_2 were not adequately considered. For the above reasons, we cannot concur that the State's rural RAM modeling of Porter County demonstrates attainment of the SO_2 NAAQS, however, that portion of Porter County designated as nonattainment in the March 3 promulgation will be redesignated as unclassifiable. The remainder of Porter County will remain attainment.

One commenter recommended that the portion of La Porte County designated as primary and secondary nonattainment for sulfur dioxide be reclassified as attainment. The State of Indiana recommended that Center, Scipio, Kankakee, New Durham, and Pleasant Townships and the area north and west of I-94 be redesignated as unclassifiable. On June 12, 1978, the State of Indiana formally petitioned under 107(d)(5) of the Clean Air Act for a redesignation of La Porte County from nonattainment in part to attainment for the entire county. There have been measured violations of the SO_2 NAAQS in the nonattainment portion of La Porte County and additionally, the rural RAM analysis of northern Porter County conducted by the Indiana DAPC predicted nonattainment. For the above reasons revision of the designation is not supported at the present time.

One commenter recommended reclassifying Wayne County from primary nonattainment of the SO_2 standard to unclassifiable stating that during at least one excursion, the company's electrostatic precipitators were out of service. The State of Indiana recommended changing the boundaries of the nonattainment area from the full county, to Webster, Boston, Center, Franklin, and Wayne Townships only. The State's recommendation was formalized in the June 12, 1978, 107(d)(5) petition. Since electrostatic precipitators are control devices used primarily for particulate control, their breakdown would be expected to have a negligible effect on SO_2. Moreover, of the three monitored excursions of the SO_2 standard, only one occurred during a period of precipitator malfunction. Therefore the evidence supports the nonattainment designation for Wayne County, however, the recommendation of the State of Indiana to revise the geographic boundaries of the primary nonattainment area is accepted since all major sources and their areas of major impact are included in the area designated.

Four commenters recommended redesignation of Marion County from nonattainment for primary and secondary SO_2 standards to unclassifiable. Commenters challenged the validity of the monitored data which demonstrated violations of the 24-hour primary SO_2 standard and the accuracy and validity of dispersion models which predicted violations of the annual and short-term primary SO_2 standards. Upon evaluation, EPA finds that the monitored data is valid and the dispersion modeling done for Marion County used an accepted model (CDM), which predicted annual violations of the SO_2 standard. These results have been supplemented by urban RAM runs which predicted short-term violations of the SO_2 standard. The overwhelming weight of evidence supports primary SO_2 nonattainment in Marion County and that designation will remain unchanged. Since secondary violations have been neither monitored nor predicted by dispersion modeling, Marion County is being reclassified as attainment for the secondary SO_2 standard.

One commenter recommended redesignation of Vigo County from primary SO_2 nonattainment to attainment. The commenter submitted a dispersion modeling report as evidence of attainment. The State of Indiana submitted the same report with a recommendation that Vigo County be changed from primary nonattainment to unclassifiable. This recommendation was formalized in the State's June 12, 1978, petition. The modeling report disputed the appropriateness of the urban RAM model in Vigo County, recommending in its place a modified version of rural RAM. The Agency reviewed the modeling report and determined that it does not meet the Agency's modeling standards. Computer dispersion studies using acceptable modeling procedures have predicted primary SO_2 standard violations. Therefore, revision of the designation is not supported at this time.

One commenter recommended that the designation of Gibson County be revised from unclassifiable for SO_2 to attainment. The State of Indiana also requested redesignation of Gibson County from unclassifiable to attainment in its June 12, 1978, petition. The commenter submitted a modeling study of Gibson County, indicating attainment of SO_2 standards. However, a previous USEPA modeling analysis of air quality in Gibson County indicated a potential for violations of the SO_2 NAAQS. Due to the number of unanswered questions concerning air quality in Gibson County, the designation for Gibson County should remain unclassifiable.

On June 12, 1978, the State of Indiana also petitioned that Jefferson County be redesignated from unclassifiable for SO_2 to attainment. A dispersion modeling study was submitted in support of the petition. A dispersion modeling study submitted by the State to region V, USEPA, indicated violations of the secondary standard. Region V is currently preparing an anayisis of Jefferson County to resolve the discrepancies between these two studies. Until that anayisis is completed, the SO_2 designation for Jefferson County will remain unclassifiable for the primary standard, and will be revised to nonattainment for the secondary standard.

Photochemical Oxidants (Ozone)

One commenter stated that the designation of Floyd County as nonattainment for the photochemical oxidant standard was based "solely on its proximity to probable nonattainment areas" and therefore is inappropriate. Since violations of the oxidant standard have been monitored in New Albany (located in Floyd County), this designation is clearly supported by the evidence and will not be revised.

Two commenters stated that designating Vanderburgh County as nonattainment for photochemical oxidants was arbitrary, would serve no practical purpose, was counter to congressional intent, and should not be undertaken until it is determined whether the national ambient air quality standard for oxidants will be revised. Air quality values in excess of the photochemical oxidant standard have been monitored in Vanderburgh County for the past 3 years. Even if USEPA revises the standard as proposed, Vanderburgh County would still experience violations of the standard. The Clean Air Act clearly states that the purpose of the designation process is to identify areas where public health related air pollution standards are being violated. Therefore, the designation of Vanderburgh County will remain as nonattainment for photochemical oxidants.

One commenter recommended that the oxidant nonattainment area designation for St. Joseph County be limited to the urbanized area. The county was classified as nonattainment because the South Bend urbanized area has a population greater than 200,000. Subsequent air quality measurements in South Bend has resulted in the monitoring of numerous violations of the NAAQS for oxidants. Limiting the designation to the urbanized area would not be consistent with the physical nature of oxidant formation and transport. Additionally, a large portion of the South Bend urbanized area is Elkhart County. The omission of Elkhart County from the list of counties not attaining the oxidant standard

in the March 3, 1978, FEDERAL REGISTER (43 FR 8962) was an error which has been corrected in this action. Therefore, St. Joseph and Elkhart Counties are designated as nonattainment for photochemical oxidants.

One commenter stated that designating Porter County as nonattainment for oxidants was a misapplication of USEPA policy. The nonattainment designation of Porter County was based on the fact that portions of Porter County are part of the Chicago-northwest Indiana urbanized area. To declare solely the urbanized area as nonattainment would be inconsistent with the physical nature of ozone formation and transport. Therefore, nonattainment designation of Porter County will remain in effect.

One commenter stated that Marion County should be designated unclassifiable for oxidants until a number of questions concerning control strategies have been answered. The designation of Marion County was based on monitored violations of the air quality standard. Issues relating to the effectiveness of a control strategy are not relevant to the designation which is a description of air quality. Therefore Marion County should remain nonattainment for photochemical oxidants.

Carbon Monoxide (CO)

One commenter recommended that the portion of downtown Indianapolis designated as nonattainment for the carbon monoxide standard should be redesignated unclassifiable since the monitor in question is "unduly influenced" by exhaust from buses. This monitor has been sited according to national monitoring guidelines and has been quality assured. The data is therefore accurate and valid. Furthermore, the influence of the buses in generating high ambient levels of carbon monoxide should be considered in development of a control stategy. Therefore, the designation is supported by the data and is not being revised.

Michigan

The Michigan Department of Natural Resources (MDNR) submitted a list to typographical errors found in the March 3, 1978 publication. These corrections are being made today.

Total Suspended Particulates (TSP)

Branch County

Originally, this area had been erroneously designated "nonattainment" for secondary particulate standards instead of "unclassifiable". MDNR submitted monitoring data which indicates that the particulate standards have been attained in the area. EPA has reviewed this new data and has determined that redesignation to "attainment" for particulate standards is appropriate for Branch County.

Sulfur Dioxide (SO_2)

Ingham County

MDNR suggested that the nonattainment area for SO_2 be the subcounty area defined in the State draft designation document. In view of the State's dispersion modeling and monitoring support, EPA will amend the designation to include only the subcounty area proposed by the State.

Midland County

A subcounty designation by MDNR is being accepted by EPA for the same reason set forth in the Ingham County comment.

L. W. Pribila, on behalf of Dow Chemical U.S.A., objected to designation of any part of Midland County as nonattainment for sulfur dioxide standards primarily because current air monitoring data indicates all SO_2 standards are being achieved. Such achievement is attributed to utilization of a supplemental or intermittent control system (SCS) by Dow Chemical, the principal source of SO_2 in the Midland County area. The air quality report prepared by Michigan in 1974 showed 15 monitored violations of the sulfur dioxide 24-hour primary (health-related) standard at the Abbott Road site in Midland, Mich., near the Dow Chemical plant. The same site also recorded violations of the 3-hour secondary (welfare-related) standard.

In 1975, no violations were recorded at the Abbott Road site according to the air quality report published by Michigan. However, excursions (nonviolation exceedences of standards) of both the 24-hour and 3-hour standards were recorded at the Dow Corning lot site on Saginaw Road and, in 8 months of monitoring, two violations of the 24-hour standard in addition to an excursion of the 3-hour standard were recorded at the Dow Biochem building site on Austin Street.

In 1976, the Michigan air quality report showed an excursion of the 24-hour standard at both the Dow Corning and Abbott Road sites, and an excursion of the 3-hour standard at the Austin Street site. Subsequent air quality data reported to EPA indicate no violations of SO_2 standards occurring in the Midland area.

On May 7, 1974, Dow Chemical and the Michigan Air Pollution Control Commission entered into a consent order (No. 12-73-05) which exempted Dow from meeting SO_2 emission limitations in the applicable Michigan rule provided Dow installed an intermittent control system (ICS), a dispersion technique which limits emissions during times when violations of air quality standards would otherwise occur because of meteorological conditions. Dow's choice of permanent controls was a reliance on a nuclear powerplant to be constructed by the Consumers Power Co. By July 1, 1975, the ICS at Dow was operational (statement of Mr. L. Pribila at EPA sec. 113 Enforcement Conference, Feb. 4, 1977, p. 13 transcript) and, as indicated above, fairly successful in preventing violations of the standards.

The Clean Air Act requires use of continous emission reduction technology to attain and maintain national standards.[1] A dispersion technique may not be used to reduce the amount of constant emission controls required to attain and maintain standards, unless the dispersion technique was implemented prior to December 31, 1970.[2] Accordingly, in view of the air quality violations in 1974 and 1975 and the admission by the principal source of SO_2 in the area (Dow Chemical Co.) that an intermittent control system was being utilized to prevent current violations of air quality standards, EPA concluded that the county of Midland was required to be designated nonattainment for the sulfur dioxide standard.

Neither the comment by Dow nor any of the air quality data analyzed prior to implementation of the Dow ICS indicate that SO_2 standards are being achieved in Midland County solely by constant emission controls. In fact, there is no evidence of any constant SO_2 emission control at the Dow plant. Because no new information has been presented which would provide a basis for changing the nonattainment designation, it is retained for the subcounty area in which Dow is located.

Minnesota

Total Suspended Particulates (TSP)

Mesabi Iron Range—Itasca and St. Louis Counties

Several commenters objected to designation of the 100-mile strip constituting the Mesabi Iron Range (portions of Itasca and St. Louis Counties) as a notattainment area for secondary particulate standards because the monitored air quality data relied on in making the designation represented conditions in a very limited portion of this vast area.

In designating certain townships and ranges nonattainment, Minnesota Pollution Control Agency (MPCA) analyzed data from 8 State monitoring sites and 36 industrial sites. Taking the most conservative position in

[1] Secs. 110(a)(2)(B) and 302(k), 42 U.S.C. 7410(a)(2)(B) and 7602(k).

[2] Sec. 123(a), 42 U.S.C. 7423(a). See discussion in the national rulemaking package of Sept. 11, 1978, 43 FR 40414.

V 43 / 194
OCT 5 78

terms of protecting the welfare of this area, MPCA determined to designate the entire range nonattainment based on available data recognizing that pockets of attainment could exist within the area and that appropriate changes would be made when sufficient data became available. Based on a review of the monitored 24-hour particulate standard violations, EPA concurred in this determination.

Two companies, Erie Mining Co. and Hanna Mining Co. submitted extensive modeling data in support of their requests for redesignation of certain townships in the designated area. Based on an analysis of this data, MPCA has recommended certain changes in the designation of the Mesabi Range. EPA has reviewed these recommendations and concurs as more fully discussed in a background document for section 107 designations in Minnesota which is available in the regional office.

U.S. Steel also objected to designation of the central portion of the Mesabi Iron Range as nonattaainment particularly because they claimed the closest monitor could not accurately represent the air quality surrounding U.S. Steel facilities. However, the commenter failed to specify which particular townships should be redesignated and to submit data in support of any proposed redesignations. Accordingly, EPA and MPCA have no basis for altering the designation.

U.S. Steel also complained about the location of the monitors closest to their facility. The sites in Virginia and Mount Iron were inspected by EPA in 1976 and found to be situated such that they would not be affected by fugitive sources which could lead to exaggerated levels.

Typographical errors in the legal descriptions published on March 3, 1978, are being corrected today. In reassessing available data, EPA determined that the violation at industrial site 07 was not caused by fugitive dust. Therefore, the nonattainment boundary has been extended to include T56N, R18W, the location of this monitor.

As part of its analysis of the air quality problem along the Mesabi Range, MPCA has contracted with Midwest Research Institute for a detailed study which may lead to further redesignations.

Photochemical Oxidants (Ozone)

St. Louis, Sherburne, Carlton, Lake, and Olmstead Counties

Two comments were received with objections to designation of the above counties as nonattainment areas for photochemical oxidants. Concern with imposition of the offset policy over a wide area was expressed.

The nonattainment designations in these counties were based on monitored violations therein. If the State would submit attainment determinations for subcounty areas along with adequate justification, EPA would evaluate such a submission. Until such time, the nonattainment designations are retained. The ramifications of the nonattainment designation are discussed more fully in the supplementary information section of the EPA national promulgation.

Ohio

The Agency received a total of 20 comments on designations in the State of Ohio, most regarding more than one geographic location and pollutant.

Sulfur Dioxide Designations

Some comments requested an attainment designation for SO_2 everywhere in Ohio, despite the fact that the standard is now violated in several areas, because the current EPA-promulgated SIP provides for emission reductions that are projected to result in attainment by the attainment date in the SIP. However, the Act requires a nonattainment designation for all areas that violate a standard, regardless of whether implementation of the existing SIP is projected to result in attainment before the attainment date in the SIP.

As explained more fully in the EPA national promulgation, projected future violations of a standard may provide the basis for a nonattainment designation in currently clean areas. However, the reverse is not true: Projected future attainment may not provide the basis for an attainment designation in currently dirty areas. The reason is that sections 171(2), 172, and 107(d)(1) (A) through (C) establish two alternative criteria for designating an area as nonattainment. Any area that currently violates the standard is to be designated as nonattainment, and any area where in the State's judgment the primary standard for SO_2 or TSP may not be maintained may also be designated as nonattainment. Regardless of whether the standard may be attained in the future, an area that currently violates the standard satisfies the first statutory criterion and must therefore be designated as nonattainment. The attainment designation will continue to apply until the State demonstrates that the air quality standards are no longer violated.

Applying a nonattainment designation regardless of projected future attainment is required by both the legislative history and the purposes of the Act. Both the House and Senate bills considered in 1977 would have applied nonattainment requirements to all areas with violations, regardless of projected future attainment.[3] When the nonattainment provisions of these bills were amalgamated to form the bill eventually enacted, the application of nonattainment designation to all areas that violate the standards was retained.

Furthermore applying a nonattainment designation to dirty areas where future attainment is projected will further the purposes of the Act. Even if emission reductions under the current SIP would be sufficient, if fully implemented, to provide for attainment, a nonattainment designation is essential, to satisfy the requirements in sections 171–173 of the Act insuring that the necessary emission reductions are actually achieved, calling for reasonable further progress prior to attainment, and imposing stringent conditions on new construction. And even aside from these regulatory requirements, a nonattainment designation should apply to identify for the public every area with an existing air quality problem in violation of the standards.

Many comments received questioned the basis for the SO_2 designations in Ohio. The SO_2 designations are supported by available monitoring as well as the modeling analysis performed by EPA in the development of the federally promulgated SO_2 regulations. This modeling analysis has been extensively documented in several support documents and has been upheld as an appropriate tool for setting source specific emission limitations as the result of litigation on the regulations. Section 171 of the Clean Air Act defines nonattainment area as an "• • • area which is shown by monitored data or which is calculated by air quality modeling (or other methods determined by the Administrator to be reliable) to exceed any national ambient air quality standard for such pollutant." Thus air quality modeling is specifically authorized as a basis for determining whether an area is attaining the standards. The Agency has determined that where air quality modeling results are available, such results will be used to determine the designation, taking precedence over air quality monitoring data which is usually not sufficiently comprehensive to cover any given area. Therefore, EPA designated most of the SO_2 nonattainment areas in Ohio based upon its modeling analyses.

Several commenters suggested that the boundaries of the SO_2 nonattainment areas be revised to restrict the nonattainment designation to an area smaller than the entire county. EPA has reviewed the designations and reduced the size of the nonattainment areas where supportable along easily recognizable political and geographical lines.

[3] Proposed sec. 127(c)(2)(A) of the Act, in report to accompany H.R. 6161, H.R. Rept. No 95-294, 95th Cong., 1st Sess. 389 (May 12, 1977); proposed secs. 110(a)(3)(A) and 113(g)(1) of the Act, in report to accompany S. 252, S. Rep. No. 95-127, 95th Cong., 1st Sess. 146, 169 (May 10, 1977).

Comments

One commenter, Cincinnati Gas & Electric Co. (CGE), objected to the SO_2 and TSP nonattainment designations for Clermont and Hamilton Counties. Specifically, CGE commented as follows:

1. Pierce Township, Clermont County, should be designated attainment for the TSP secondary standard.
2. Miami Township, Hamilton County, should be designated attainment for the TSP secondary standard.
3. Clermont and Hamilton Counties should be designated attainment for the SO_2 primary standard.

Clermont County TSP

Based upon monitoring data, EPA must reaffirm its nonattainment designation for Pierce Township, Clermont County, for the TSP secondary standard. Also, based upon the location of the monitor showing violations of the secondary 24-hour TSP standard, EPA must additionally designate Batavia Township as nonattainment for the TSP secondary standard. A monitor site (SAROAD site 007) located at 297 Main Street, Hamilton, Ohio, registered four exceedances of the secondary TSP standard in 1977. This monitor is located near the border of Batavia and Pierce Townships.

Hamilton County TSP

Based upon monitoring data, EPA must reaffirm its secondary TSP nonattainment designation of Miami Township, Hamilton County. The monitoring data submitted by CGE clearly shows violations of the secondary TSP standard at sites C and D and Dugan Gap.

Clermont and Hamilton SO_2

EPA must reaffirm the nonattainment designations for the SO_2 primary standard for Clermont and Hamilton Counties, based on EPA's modeling. However, the boundaries of the nonattainment areas have been revised. Reviewing CGE's own monitoring data for site B, Clermont County, shows one excursion of the short-term standard and violations of the primary SO_2 standard at both sites C and D, Hamilton County, during 1977.

Comment

One commenter, U.S. Steel (USS), made several comments regarding the SO_2 designation for Lorain County. Specifically, USS comments:

1. Lorain County should be designated attainment for SO_2 based upon the monitoring and modeling done by Ohio EPA.
2. Subcounty designations should be made for SO_2.
3. The data base in EPA's SO_2 modeling analysis was in error. USS is remodeling Lorain County and so far it indicates attainment.

The SO_2 nonattainment designation for Lorain County is based upon the modeling analysis performed by EPA in the development of the federally promulgated SO_2 regulations in Ohio. EPA must reaffirm the nonattainment designation for SO_2 in Lorain County but has reduced the size of the nonattainment area. The nonattainment area as listed in the Ohio SO_2 attainment status table below now includes Lorain County north of Route 80 and the city of Elyria.

USS cited several significant errors in EPA's data base which USS alleges caused inaccurate modeling results. EPA has agreed to a procedure to resolve the data questions including the remodeling of Lorain County by USS with an updated data base. However, until USS completes this modeling, there is no evidence to support an attainment status. Once USS submits its modeling results to EPA, a further analysis of the area's designation can be undertaken, and the designation changed if supported at that time.

Comment

One commenter, Dayton Power and Light (DPL), made the following objections to the nonattainment designations promulgated in the March 3, 1978 Federal Register:

1. DPL believes monitoring data indicates Montgomery County is attainment for SO_2 rather than nonattainment as it is designated. DPL objects to the use of "special models such as the RAM model" in the State of Ohio.
2. Subcounty designations for SO_2 should be made.
3. DPL indicates that the use of a double asterisk in the SO_2 designation list is in error.
4. 34 counties were omitted from the list of TSP designations in Ohio.

The nonattainment SO_2 designations for Montgomery County is supported by the modeling analysis performed by EPA in the development of the federally promulgated SO_2 regulations for Ohio. EPA did not single out the State of Ohio for the use of special models such as the RAM model but used modeling results whenever they were available. Therefore, EPA must reaffirm the nonattainment designation for Montgomery County, but has redefined the designation to a subcounty area. The double asterisk notation indicating that the Montgomery County designation was made by EPA because the State failed to submit its own recommendation is an error. The notation should have been one asterisk denoting an EPA change of the State recommendation. This is corrected in this publication. The omission of 34 counties from the TSP attainment status list was an error and is corrected in this publication.

Comment

One commenter, General Motors (GM), objected to the nonattainment designations for TSP in Defiance, Montgomery, Richland, and Erie Counties. Specifically, GM raised the following objections:

1. Defiance County should not have been designated nonattainment for the primary TSP standard because data indicates the excursions were caused by rural fugitive dust and the data from onsite monitors should not have been considered. GM believes the proper designation is nonattainment of the secondary TSP standard.
2. Kettering and Montgomery County should not have been designated nonattainment for the secondary TSP standard. GM believes the proper designation for the area surrounding its plant, Delco Products Division, is attainment.
3. Richland County should not have been designated nonattainment for primary TSP standard. GM believes subcounty designations should be made and that the proper designation for the area surrounding its plant, the Fisher Body—Mansfield plant, is attainment.
4. Erie County should be designated attainment for the primary TSP standard.

Defiance County

Based upon monitoring data, EPA must reaffirm its designation of Defiance County as primary TSP nonattainment area. However, based upon further data submitted by Ohio EPA, the nonattainment area for the primary TSP standard has been redefined as Richland Township not within the city of Defiance and the city of Defiance has been redesignated as nonattainment for the secondary TSP standard only. There is no support to show that violations indicated by onsite monitors are due to nonindustrial fugitive dust. Furthermore, onsite monitoring data is utilized by EPA if the data is quality assured, such as in this case.

Montgomery County

Based upon monitoring data and further information submitted by the Dayton Regional Air Pollution Control Agency, EPA has redefined the boundaries of the nonattainment areas for the TSP primary and secondary standard. The General Motors, Delco Products Division in Kettering is now in an attainment area.

V 43/194 OCT 78 UMI

RICHLAND COUNTY

EPA must reaffirm its nonattainment designation of Richland County for the primary TSP standard. GM submitted monitoring data in support of their contention that the area surrounding their Fisher Body-Mansfield plant is attainment. However, the data submitted is not quality assured and therefore cannot be used in making the designation. Moreover, four of five Mansfield monitoring sites within the period of 1975–1977 showed violations of the primary annual TSP standard. The monitoring network in Richland County is not extensive enough to make subcounty designations.

ERIE COUNTY

EPA designated Erie County as nonattainment for the TSP primary standard. This appears to have been a clerical error. EPA has redesignated Erie County as nonattainment for the TSP secondary standard.

COMMENT

One commenter, Ohio Edison Co. (OEC), objected to the nonattainment designations made for Clark, Columbiana, and Trumbull Counties for TSP and for Columbiana, Lorain, Summit, and Trumbull Counties for SO_2.

Specifically, OEC commented as follows:

1. The secondary TSP nonattainment designation for Clark County, Springfield, west of Limestone Street should be attainment.

2. The secondary TSP nonattainment designation for the unincorporated areas of Weathersfield Township, Trumbull County should be attainment.

3. The primary TSP nonattainment designation for East Palestine, Columbiana County should be nonattainment for the secondary TSP standard only.

4. The primary SO_2 nonattainment designations for East Palestine in Columbiana County; Lorain County north of the Norfolk and Western Railroad tracks; Summit County north of Route 18; and the unincorporated areas of Weathersfield Township in Trumbull County should be attainment.

CLARK COUNTY TSP

Based upon monitoring data, EPA must reaffirm the nonattainment designation for the TSP secondary standard in Clark County. However, the nonattainment area has been redefined and the city of Springfield has been added to the nonattainment area. OEC submitted monitoring data to support their contention that the area west of Limestone Street is attainment. However, the data submitted was unsupported. No information was submitted as to the quality assurance procedures utilized and the data did not cover a full year. Additionally, key sampling days are missing for the Abattoir and Snyder Park sites which would have been likely to predict maximums. Therefore, EPA must reaffirm the nonattainment designation for the secondary TSP standard.

TRUMBULL COUNTY TSP

Based upon monitoring data, EPA must reaffirm the nonattainment designation for Weathersfield Township, Trumbull County for the secondary TSP standard. OEC submitted monitoring data to support their contention that the unincorporated area of Weathersfield Township, Trumbull County is attainment. However, this monitoring data supports the nonattainment designation for the secondary TSP standard. Ohio EPA concurs with this designation.

COLUMBIANA COUNTY TSP

Based upon monitoring data, EPA must reaffirm the nonattainment designation for the primary TSP standard for East Palestine, Columbiana County. The air quality monitor located in East Palestine shows a violation of the annual primary TSP standard in 1976. Therefore, the proper designation for East Palestine, Columbiana County is nonattainment for the primary TSP standard.

COLUMBIANA, LORAIN, SUMMIT, AND TRUMBULL COUNTIES SO_2

Based upon the modeling analysis performed by EPA in the development of the federally promulgated SO_2 regulations in Ohio, EPA must reaffirm the nonattainment designations for the primary SO_2 standard for Columbiana, Lorain, Summit, and Trumbull Counties. However, these nonattainment areas have been redefined on a subcounty basis.

COMMENT

One commenter, Republic Steel, made two separate comments during the public comment period. The first objected to the procedures followed by EPA in the promulgation of the nonattainment designations and the fact that no economic assessment was made. The second objected to the basis for the SO_2 designations, specifically objecting to EPA's overruling of Ohio EPA's recommendations which were based on monitoring data. Republic Steel therefore recommended that Cuyahoga, Stark, and Trumbull Counties be redesignated based upon monitoring data.

As to Republic Steel's comment that EPA failed to perform an environmental or economic assessment of these designations, there is no economic or environmental impact associated with the promulgation of the list of nonattainment areas. Therefore, there is no need at this time to conduct such an assessment. Environmental and economic impact will only result after the State revises its State implementation plan (SIP) to provide for attainment of the standards by December 31, 1982, and sets new emission limitations on sources. Further, EPA must reaffirm the SO_2 nonattainment designations for Cuyahoga and Stark Counties based upon EPA's modeling analysis. The nonattainment area in Trumbull County was based on monitored violations in the Youngstown-Campbell area. EPA has redefined the nonattainment areas on a subcounty basis.

COMMENT

One commenter, the Columbus and Southern Ohio Electric Co. (CSOE), objected to the designation of Coshocton County as nonattainment for the secondary TSP standard and to the designation of Athens, Coshocton, and Pickaway Counties as nonattainment for the primary SO_2 standard.

CSOE recommends that all these counties be designated as attainment based upon the following:

1. Modeling performed by CSOE indicates that the secondary TSP standard is not violated in Coshocton County and monitoring data confirms this finding.

2. Monitoring data collected by CSOE indicates that the primary SO_2 standard has been attained in Athens, Coshocton, and Pickaway Counties; the secondary SO_2 standard has been attained in Coshocton and Pickaway Counties; and the secondary SO_2 standard is exceeded in Athens County but modeling performed after the recent installation of a new 500-foot stack at the Poston Generating Station indicates that no violation of the secondary standard is expected to occur in the future.

Based upon additional monitoring data submitted by the Ohio EPA on April 12, 1978, EPA will reclassify Coshocton County as attainment for the TSP standard. However, based upon EPA's SO_2 modeling analysis, EPA must reaffirm the nonattainment designation of Athens, Coshocton, and Pickaway Counties for the primary SO_2 standard but has redefined the nonattainment areas as including only York Township in Athens County, Franklin Township in Coshocton County and Harrison Township in Pickaway County. CSOE contended that modeling performed since the new 500-foot stack at the Poston Generating Station in Athens County has been operational indicates no violation of the secondary SO_2 standard in the near future, even though previous monitoring results indicated exceedances of the secondary standard. No support was submitted to justify finding that this new stack is consistent with section 123 of the Clean Air Act which prohibits the use of any dispersion enhancement techniques to achieve attainment except in those cases where it can be demonstrated that downwash would occur. Therefore, the previous designation must remain.

COMMENT

Two commenters, the Goodyear Tire & Rubber Co. and the B. F. Goodrich Co., filed comments after the close of the comment period in response to the Agency's request for comments from companies challenging the designations under section 307 of the Clean Air Act.[4] The Agency made the request in order to clarify the issues and assess the potential for administrative resolution prior to continuing litigation. Both commenters challenge the Agency's use of its RAM modeling to support the primary SO_2 nonattainment designation for Summit County, Ohio. Specifically, the commenters contend as follows: (1) That since the Agency is remodeling Summit County, the old modeling results should not have been used to designate the area; (2) that the RAM modeling is not reliable; (3) that monitoring data alone should be used to support an attainment designation; (4) that the RAM modeling does not reflect actual air quality because it uses the maximum operating assumption; (5) that since commenters are participating in studies which evaluate RAM modeling, the use of RAM modeling should await the outcome of the studies.

In Summit County, the Agency's modeling demonstrated that the area was not attaining the primary SO_2 standards. While the Agency has recently remodeled the area in order to correct data base errors, the errors in the data base were not such that a change in attainment status was expected. A new regulation for Summit County will be proposed as rulemaking shortly supported by the remodeling which still shows that the area is not achieving standards and is therefore properly designated nonattainment. Second, the RAM model has been upheld by the U.S. Court of Appeals for the Sixth Circuit as a reasonable tool to use in setting source specific emission limitations. See *Cleveland Electric Illuminating Co.* v. *EPA*, 572 F. 2d 1150 (6th Cir. 1978). Since RAM modeling is a reasonable tool for setting emission limitations which directly impacts sources, it is reasonable to use it in designating nonattainment areas of the State, an action which has no immediate effect on sources, but merely triggers the State's evaluation of the areas for its nonattainment SIP. Third, given the availability of reliable modeling results, the modeling analysis takes precedence over the much less comprehensive monitoring data available. Fourth, as to the maximum operating assumption employed in RAM modeling, the assumption has also been specifically upheld by the sixth circuit as a reasonable input to the RAM modeling used to set emission limitations. It is an easily ascertainable figure which reflects the source's actual operation capability. Since it is reasonable to use the assumption in setting source specific emission limitations, it is also reasonable to employ it in designating nonattainment areas triggering the State's study of those areas.

Finally, because the designation is supported by the RAM modeling and because there is no immediate prejudice to sources stemming from the designation, it is not reasonable to delay designating Summit County as a nonattainment area until the commenters' studies have been completed. The Agency has evaluated the studies to date and will publish its preliminary comments in the technical support document accompanying the Summit County regulation which will be proposed as rulemaking shortly. Upon completion of the studies, further analysis of the designation may be made.

ADDITIONAL COMMENTS ON TOTAL SUSPENDED PARTICULATES (TSP)

One commenter requested the TSP nonattainment designation for Coshocton County be revised to attainment based on air quality data submitted. Based on further information submitted by Ohio EPA, as discussed in EPA's response to the Columbus & Southern Ohio Electric Co. comments above, Coshocton County will be redesignated as attainment.

One commenter stated that the boundary description for the Clark County nonattainment designation for the TSP secondary standard was incorrect. EPA has made these corrections. Additionally, upon further review of air monitoring data, EPA has determined that the nonattainment area for the secondary TSP standard in Clark County must also include the city of Springfield.

Two commenters pointed out that the EPA designation of Darke County as a TSP primary standard nonattainment area was a clerical error and should be secondary standard nonattainment on the same subcounty basis. Upon additional review of the monitoring data, EPA has redesignated Darke County as nonattainment for the TSP secondary standard. Minor wording changes for the purpose of clarification and spelling corrections were also made.

One commenter indicated Erie County should be nonattainment for the secondary TSP standards rather than the primary standard. This issue is addressed above in the discussion of the General Motors public comment. Erie County will be redesignated as nonattainment for the secondary TSP standard.

One commenter requested redefinition of the subcounty boundaries for the Greene County nonattainment designation for the secondary TSP standard. Upon further review, EPA has redefined the boundaries of Greene County nonattainment area.

One commenter objected to the Hamilton County nonattainment designation for TSP primary standard for areas other than Carthage, Corryville, City Center, Fairmount, Lockland, and St. Bernard. Upon further review of air quality data, EPA must reaffirm the primary TSP nonattainment designation for Hamilton County as it appeared in the March 3, 1978, FEDERAL REGISTER.

One commenter indicated certain areas in Lucas County were designated incorrectly for TSP based on air quality data. Specifically, the commenter argues:

1. Ottawa Hills should be designated as attainment for the primary and secondary TSP standards.

2. The city of Oregon should be designated as attainment for the secondary TSP standard.

Upon further review of monitoring data, EPA has redesignated Ottawa Hills and the city of Oregon as attainment for the primary and secondary air quality standards.

One commenter objected to the designation of Madison County as nonattainment for the secondary standards for TSP. Based upon further information submitted by the Ohio EPA, EPA will redesignate Madison County as attainment.

One commenter objected to the designation of Medina County as nonattainment for the TSP primary standards. Based upon air quality data submitted, the commenter believed the county should be nonattainment for secondary standard. The air quality data submitted supports the position that Medina County is nonattainment with respect to secondary TSP standard. Therefore, EPA will redesignate Medina County nonattainment for the secondary TSP standard.

One commenter objected to the city of Piqua in Miami County being designated as nonattainment for the primary TSP standard rather than the sec-

[4] Shell Oil Co., intervenor in the *Goodrich* case, filed a comment on September 1, 1978. Because it was filed so late, this comment has not been fully analyzed; however, it basically makes procedural and SO_2 modeling points treated elsewhere in this package.

V 43 / 194 OCT 5 78

ondary standard. Upon further review, EPA reaffirms that the city of Piqua is nonattainment for the primary TSP standard.

One commenter requested a redefinition of the TSP primary and secondary nonattainment area boundaries for Montgomery County. Upon further review, EPA has redefined the boundaries of the TSP nonattainment areas.

One commenter submitted clarification of the nonattainment area boundaries for the TSP secondary standard in Preble County. EPA has corrected the designation in this publication.

One commenter objected to the Ross County nonattainment designation for the primary TSP standards. Based upon monitoring data, EPA reaffirms the nonattainment designation for the primary TSP standard.

ADDITIONAL COMMENTS ON SULFUR DIOXIDE (SO_2)

Five commenters objected to the manner in which the SO_2 designations were made in Ohio for Greene, Lucas, Mahoning, Montgomery, Stark, Summit, and Trumbull Counties. The support for the SO_2 designations is discussed above. The seven counties mentioned remain nonattainment based on EPA's modeling analysis and any available monitoring data. As a result of the public comments, EPA has redefined the SO_2 nonattainment areas on a subcounty basis.

COMMENTS ON CARBON MONOXIDE (CO)

One commenter indicated that Lucas County should be designated attainment for CO based on monitoring data. EPA reaffirms that the Lucas County area was properly designated as nonattainment with respect to CO, based on monitored violations occurring between October 1975 and January 1977 in Toledo at the 2927 Monroe Street monitoring site.

WISCONSIN

MADISON

John E. Knight of Boardman, Suhr, Curry, and Field, on behalf of Oscar Mayer & Co., Inc. objected to designation of a subcity area of Madison, Wis. as nonattainment for primary sulfur dioxide standards because: (1) The EPA did not follow the Wisconsin Department of Natural Resources' (DNR) determination that the area was unclassifiable; (2) air quality data relied on by EPA in making the designation was incomplete and unreliable; (3) the designation occurred more than 180 days after enactment of the 1977 Clean Air Act Amendments so the area should be unclassified; and (4) notice and opportunity to comment were not available to the public prior to final rulemaking contrary to EPA requirements.

The Administrator has determined that none of the objections presented provide an adequate basis for altering the subject designation because (1) EPA may change State designations; (2) EPA has determined the air quality data used is adequate for classification of the area as nonattainment; (3) the short delay in promulgation does not preclude nonattainment/attainment designations; (4) the public has been adequately involved subsequent to the rulemaking and no one has suffered any harm by the designation. For more complete discussion of this response see background document for Wisconsin Part 107 designations available in the region V office.

Other issues raised by commenters in response to the Madison designation included a concern that additional control needs, if any, be determined in an expeditious fashion. Any necessary new regulations are required to be submitted by January 1, 1979. Another commenter alleged that the SO_2 monitoring instruments were old and worn out so that they produced invalid data. The instruments used meet the minimum requirements of 40 CFR 51.17a, and the State found that the instruments were working properly at the time the two excursions were monitored.

The EPA has determined that the monitored air quality violations are adequate to provide a basis for overriding the State's designation of unclassifiable and designating the subcity of Madison as nonattainment for SO_2 under 107(d) of the Clean Air Act (42 U.S.C. 7407(d)). Accordingly, the designation made on March 3, 1978, is retained.

GREEN BAY

A general comment related to use of more than one year of air quality data in making the designations. Because of meteorological variations from year to year, EPA guidance to the states recommended analysis of two years' data to determine attainment of standards.

Comments received in response to the nonattainment for particulate designation included suggestions that the monitoring network was unreliable, that construction or a drought condition contributed to high TSP concentrations and that the designated area should be expanded to include a major particulate source. An EPA evaluation of the four Green Bay monitoring sites revealed that the sites were acceptable, conformed to siting guidelines and provided valid air quality data. The causes of nonattainment of standards will be appropriately addressed in the revised control strategy by the State agency, regardless of location or duration.

One commenter objected to the unclassifiable designation of the area for SO_2 standards inasmuch as violations of the SO_2 standards were recorded. Subsequent to the recorded violations, a major source of SO_2 emissions substantially reduced same. The unclassifiable designation simply permits the State to continue its monitoring for an additional period of time to determine whether the emission reductions permitted attainment of the standards.

Objection to the nonattainment designation of the area for oxidants was made because the causes of violations are unknown. The causes will be addressed in the revised control strategy.

The EPA has determined that the original designations based on State recommendations were properly made and, therefore, the nonattainment designations for particulate and oxidants and the unclassificable designation for SO_2 made on March 3, 1978, are retained.

NEENAH

Objection to designation of a subcity portion for nonattainment of secondary particulate standards is based on contentions that the violations were caused by fugitive dust rather than point sources. Also, the location of the monitor recording the 1977 violations is questioned.

As discussed above, the causes of nonattainment whether they be fugitive or stationary will be addressed in development of the revised control strategy.

EPA has determined that the original designation of a subcity portion of Neenah as nonattainment for secondary particulate standards based on the State recommendation was properly made and that the designation made March 3, 1978, should be retained.

BIRON

Consolidated Papers, Inc., objected to the unclassfiable designation of this area for primary and secondary standards of SO_2. After the violations were recorded in March of 1976, Consolidated Paper raised its stack height from 170' to 233' and increased the stack exit velocity. Because of these changes, Consolidated contends that the area should be designated attainment.

Section 123 of the Clean Air Act precludes EPA from designating an area as attainment unless no violations of the standards occur because proper control techniques have been used on major point sources which otherwise contribute to a violation. It may be that the stack height increase at Consolidated meets good engineering practice and is an acceptable means of meeting the standard. Until this determination is made, however, EPA must retain the unclassifiable designation made on March 3, 1978.

MANITOWOC

The subcity area should have been designated nonattainment for secondary particulate standards based on the State's recommendation. This is a technical correction to the March 3, 1978, designations.

MILWAUKEE

One commenter objected to designation of the Mitchell Field area as attainment for particulates since there were recorded violations of the secondary standard. EPA is revising the designation to nonattainment for secondary particulate standards for an area defined by the Wisconsin Bureau of Air Management.

The same commenter thought a recorded violation of the primary standard at 5132 West Lincoln should cause a nonattainment designation for primary standards. The State has advised that a major emitting source has ceased operations in the area since the violation was recorded. However, the area remains nonattainment for secondary standards which will insure that an appropriate analysis of the area's problems will be made.

The commenter also complained about the siting of the boundary between primary and secondary particulate nonattainment areas in the Menominee River Valley. Because these designations require further analysis of the problem areas, the exact boundaries are not significant. Present boundaries together with designation of the Mitchell Field area as nonattainment will insure analysis adequate to detect any trouble spots.

WAUWATOSA

One commenter objected to the attainment designation for particulate standards in this area because a monitor had recorded violations of the secondary standard. Because of the monitor's proximity to a now-completed construction project, the State concluded that the violation was a one-time occurrence and thus, the area should be designated attainment. Continued monitoring in this area should reveal whether this analysis is correct. Accordingly, EPA is retaining the attainment designation until further data has been collected.

MARINETTE

A commenter objected to the unclassifiable designation for particulate standards because of monitored violations of the secondary standard in this area. Because the monitor was improperly sited and because construction activities may have contributed to a temporary violation, the State determined that more air quality data was needed before a designation could be made. EPA concurred in this analysis and retains the unclassifiable designation until further data is available.

NOTE.—The Environmental Protection Agency has determined that this document is not a significant regulation and does not require preparation of a regulatory analysis under Executive Order 12044.

(Secs. 107(d), 171(2), 301(a) of the Clean Air Act, as amended (42 U.S.C. 7407(d), 7501(2), 7601(a)).)

Dated: September 26, 1978.

DOUGLAS M. COSTLE,
Administrator.

Part 81 of chapter I, title 40 of the Code of Federal Regulations is amended by revising specific pollutant categories in specific sections of subpart C as follows:

Subpart C—Section 107 Attainment Status Designations

Section	State	Pollutant Category

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 982-7]

PART 422—PHOSPHATE MANUFACTURING POINT SOURCE CATEGORY

Notice of Revocation

AGENCY: Environmental Protection Agency.

ACTION: Revocation.

SUMMARY: EPA is today revoking its new source pretreatment standards for the following subcategories of the phosphate manufacturing point source category: Phosphorus production, phosphorus consuming, and phosphate.

EFFECTIVE DATE: October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Harold Coughlin, Effluent Guidelines Division (WH-552), Office of Water Planning and Standards, 401 M Street SW., Washington, D.C. 20460, 202-426-2560.

SUPPLEMENTARY INFORMATION: On February 20, 1974 (34 FR 6582), EPA Promulgated effluent guidelines and new source performance and new source pretreatment standards for subparts A (phosphorus production), B (phosphorus consuming), and C (phosphate) of the phosphate manufacturing point source category, 40 CFR part 422. The effluent guidelines and new source performance standards were subsequently challenged by industry, and in 1976, the U.S. Court of Appeals for the Second Circuit remanded EPA's definition of "process waste water" and portions of the challenged regulations to EPA for further study and clarification. *Hooker Chemical & Plastics Corp.* v. *Train*, 537 F.2d 620 (2d Cir. 1976); *Hooker Chemical & Plastics Corp.* v. *Train*, 537 F.2d 639 (2d Cir. 1976).

Because the new source pretreatment standards for subparts A, B, and C were based on the new source performance standards or the "process waste water" definition (or both) which were remanded by the Second Circuit, EPA is revoking those standards to avoid confusion concerning their applicability to new sources which discharge into publicly owned treatment works.

Pretreatment standards for new sources covered by subparts A, B, and C are currently being studied as part of EPA's ongoing phosphate manufacturing point source category remand study, and will be repromulgated when that study is completed.

For the foregoing reasons, 40 CFR 422.16 (Pretreatment standards for new sources, phosphorus production subcategory), 40 CFR 422.26 (Pretreatment standards for new sources, phosphorus consuming subcategory), and 40 CFR 422.36 (Pretreatment standards for new sources, phosphate subcategory) are hereby revoked.

Dated: September 29, 1978.

DOUGLAS M. COSTLE,
Administrator.

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 100a—GENERAL PROVISIONS REGULATIONS

Corrections in the Code of Federal Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of corrections.

SUMMARY: In the Code of Federal regulations revised as of October 1, 1977, under § 100a.29 paragraph (b) on page 18, item (c) should be corrected to (3), and § 100a.494, item (c) on page 45 should be corrected to (6) for consistency. These are technical changes only.

FOR FURTHER INFORMATION CONTACT:

Dr. A. Neal Shed, 202-245-7091.

Dated: September 27, 1978.

L. DAVID TAYLOR,
Deputy Assistant Secretary for Management Analysis and Systems.

PART 180—DESEGREGATION OF PUBLIC EDUCATION

Final Rule; Correction

AGENCY: Office of Education, HEW.

ACTION: Correction, final regulations.

SUMMARY: In the regulations published in the FEDERAL REGISTER on July 26, 1978, pages 32372-32387, certain technical corrections need to be made. The document is corrected as follows:

(1) On page 32381, third column, § 180.13(b), the reference to § 180.12(b) should be changed to § 180.12(c).

(2) On page 32384, first column, § 180.33(a)(2), the reference to § 180.32(b) should be changed to § 180.32(c).

(3) On page 32386, second column, § 180.57(a), "ranking" should be changed to "rankings."

FOR FURTHER INFORMATION CONTACT:

Elton Ridge, telephone 202-245-8484.

(Catalog of Federal Domestic Assistance No. 13.405, Desegregation of Public Education.)

Dated: September 27, 1978.

[1505-01]

PART 180—DESEGREGATION OF PUBLIC EDUCATION

Correction

In FR Doc. 78-20565 appearing at page 32372 in the issue for Wednesday, July 26, 1978, make the following corrections:

(1) In § 180.03, at the top of the third column of page 32380, "State role stereotype" should have read "Sex role stereotype".

(2) At the bottom of the third column of page 32380, the section heading now designated "§ 180.6" should have been "§ 180.06".

* * * * *

(3) On page 32383, paragraph (b) of § 180.20 should have read as follows:

(b) *Amount of award.* (1) The Commissioner sets the amount of an award on the basis of the magnitude of the expected needs of responsible governmental agencies for race, sex, or national origin desegregation assistance (as applicable), and the cost of providing assistance to meet those needs, in the State for which an application is approved, compared with the magnitude of the expected needs for that assistance, and the cost of providing it, in all States for which applications are approved. In setting the amount of an award to provide race desegregation assistance, the Commissioner gives the greatest weight to the expected needs of responsible governmental agencies that have recently adopted race desegregation plans.

(2) In assessing the magnitude of expected needs, the Commissioner considers the needs described in the applications submitted under this subpart and such other information concerning those needs as may be relevant.

* * * * *

(4) At the top of the middle column of page 32385, the section heading now reading "§ 180.39 Funding procedures." should have read "§ 180.38 Funding procedures."

(5) On page 32386, the following sentence should be added to the end of the text of § 180.63: "That notice describes the information to be included in the application."

[6050-01]

Title 45—Public Welfare

CHAPTER XII—ACTION

PART 1201—STANDARDS OF CONDUCT

Conflict of Interests; Final Rule

AGENCY: ACTION.

ACTION: Final rule.

SUMMARY: ACTION is revising its standards of conduct to include seven new rules on conflict of interests. These rules were drafted by a special Agency Task Force on Conflict of Interests and on April 4 published for comment in the FEDERAL REGISTER. The final, revised rules are now being incorporated into the Agency standards of conduct and can be found at § 1201.735-101(b), 102, 302-305, and 402. The remaining standards, which contain provisions based on Executive Order 11222, criminal prohibitions found in title 18 of the United States Code, and civil service regulations, have not been substantively changed. The list of employees required to submit statements of employment and financial interests has also been expanded to include certain positions below the GS-13 or FSR 5 level which involve activities which could place employees in possible conflict-of-interest situations.

EFFECTIVE DATE: October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Harry MacLean, General Counsel, ACTION, 806 Connecticut Avenue NW., Washington, D.C. 20525, 202-254-3116.

SUPPLEMENTARY INFORMATION: On April 4, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 14072) proposing to amend ACTION's standards of conduct by the adoption of seven new rules dealing with conflict of interests. Interested persons were given thirty days to submit comments and views on the new rules. The proposed amendments were also submitted for comment to approximately 20 Federal, State, and public interest agencies and organizations.

No comments were received from the public as a result of the FEDERAL REGISTER notice. Approximately 10 responses were received from the Federal, State, and public interest agencies and organizations that had received copies of the new rules with the result that several revisions, discussed below, have been made in the proposed regulations. Following is a summary of the principal comments and the major revisions to the regulation.

1. Several comments questioned the distinction made in rule 1(a) and 1(b) between the ACTION Director and his top assistants and all other ACTION employees' participating in decisions involving organizations with which they have been associated. The latter past association (1(a)) was limited to the last 2 years, but the Director and his assistants' disqualification (1(b)) was without time limit. The Committee on Conflict of Interests agreed that a dual standard was not warranted and that the 2-year time limit for everyone was a sufficient cooling off period. The final rule reflects this revision.

2. One commentator suggested that the scope of rule 1(a) was too broad and that by including within its scope "any person subject to the supervision of the employee who had the association," the Agency would be excluding from the decisionmaking process numerous employees whose participation might be necessary even though no real or apparent conflict existed on the part of those employees. After careful consideration of this point, the Committee on Conflict of Interests decided that "persons subject to the supervision of the employee" should remain under the rule to prevent the "potential for" a conflict of interest in the form of pressure, whether real or imagined, by a supervisor on his or her subordinates.

3. Several comments suggested that proposed rules 3(a)(2) and 3(b)(2) were unnecessarily harsh in suspending from consideration for a grant or contract any organization which a present ACTION employee, prior to his or her employment at ACTION, had aided in developing a proposal. In the words of one commentator: "[a]n organization that has invested time and effort in a grant or contract proposal should not be suspended simply because its employee later obtains a job with ACTION, unless that employee, as an ACTION employee, would necessarily be involved with the particular grant or contract. It would be more effective to prevent the employee from becoming involved in a situation that creates the conflict, rather than to punish the potential contractor or grantee." The Committee agreed with this reasoning and changed the rule to prohibit such employees from participating in any aspect of the decision process regarding the grant or contract or in any oversight or management capacity in relation to that grant or contract. The organization itself, however, is no longer precluded from being considered for award of the grant or contract.

4. One commentator urged the amendment of rule 4 to permit desig-

V 43/194 OCT 5 1978

nees of the officials named to sit on the committee. This suggestion was not adopted, as the Committee was of the opinion that conflict-of-interest questions were of sufficient importance to the Agency to warrant the attention of the highest level of personnel possible.

5 There was a suggestion from one commentator that rule 5 was too broad in prohibiting a person who participated "personally" in a program while employed at ACTION from working for 1 year in any activity supported by ACTION funds received from that program. It was suggested that the language be changed to "personal participation in a significant decisionmaking or advisory capacity while at ACTION" because in many instances an employee who "personally participates" is not in a position to influence–the awarding of a contract or grant. While the Committee agreed that there would probably be examples of "personal participation" which were so insignificant as to warrant exclusion from the rule, it felt that the new Committee on Conflict of Interests should consider those cases on an individual basis and grant the necessary relief under its authority to grant specific relief from the provisions of rules 3, 5, and 6.

Accordingly, 45 CFR Part 1201 is revised to read as follows:

Subpart A—General

Sec.
1201.735-101 Introduction.
1201.735-102 Definitions.

Subpart B—General Conduct and Responsibilities of Employees

1201.735-201 Proscribed actions—Executive Order 11222.
1201.735-202 General conduct prejudicial to the Government.
1201.735-203 Criminal statutory prohibitions—Conflict of interest.

Subpart C—Outside Employment, Activities, and Associations

1201.735-301 In general.
1201.735-302 Association with potential grantee or contractor prior to ACTION employment.
1201.735-303 Association with ACTION grantee, contractor, or potential grantee or contractor while ACTION employee.
1201.735-304 Employment after leaving ACTION.
1201.735-305 Employment with ACTION grantee or contractor.
1201.735-306 Association with non-ACTION grantee or contractor while an ACTION employee.
1201.735-307 Gift, entertainment, and favors.
1201.735-308 Economic and financial activities of employers abroad.
1201.735-309 Information.
1201.735-310 Speeches; participation in conferences.
1201.735-311 Partisan political activities.
1201.735-312 Use of Government property.
1201.735-313 Indebtedness.
1201.735-314 Gambling, betting, and lotteries.
1201.735-315 Discrimination.
1201.735-316 Related statues and regulations.

Subpart D—Procedures for Submission by Employees and Review of Statements of Employment and Financial Interests

1201.735-401 Submission of statements.
1201.735-402 Review of statements.

AUTHORITY: E.O. 11222 of May 8, 1965, 30 FR 6469, 3 CFR, 1964-1965, Supp., p. 306, 5 CFR 735.104.

Subpart A—General

§ 1201.735-101 Introduction.

(a) Executive Order No. 11222 directs the Civil Service Commission to require each agency head to review and reissue his or her agency's regulations regarding the ethical conduct and other responsibilities of all its employees. One of the main purposes of the regulations in this part is to encourage individuals faced with questions involving subjective judgment to seek counsel and guidance. The general counsel is designated to be the counselor for ACTION with respect to these matters. Associate and assistant general counsels are designated to be deputy counselors. They will provide authoritative advice and guidance in this area to any ACTION employee who seeks it.

(b) The ACTION Committee on Conflict of Interests will review and monitor the agency's policies and procedures on conflict of interests. The committee shall consist of the general counsel, the Assistant Director of Administration and Finance, the Assistant Director of the Office of Compliance, the Director of Contracts and Grants Management Division, a Deputy Associate Director of Domestic Operations, a Deputy Associate Director for International Operations, a Deputy Assistant Director for the Office of Policy and Planning, and the Director's designee, who shall be a nonvoting member. The committee shall have the authority to:

(1) Adopt the procedures necessary to insure the implementation of and compliance with the conflict of interest regulations found at §§ 1201.735-301 through 1201.735-305.

(2) Issue interpretive opinions or clarifying statements on actual or hypothetical situations involving the provisions of §§ 1201.735-301 through 1201.735-305.

(3) Accept and review reports filed under § 1201.735-302(b).

(4) Grant specific relief from the provisions of §§ 1201.735-303 through 1201.735-305 by a majority vote of the committee, if, after due consideration, the committee finds that:

(i) No actual conflict of interest exists, and

(ii) The purpose of the rule would not be served by its strict application, and

(iii) A substantial inequity would otherwise occur. In each such case the committee shall issue a written decision setting forth its findings as required above. The committee may make any exception subject to such conditions and restrictions as it deems appropriate.

(c) Any violation of the regulations in this part may be cause for disciplinary action. Violation of those provisions of the regulations in this part which reflect legal prohibitions may also entail penalties provided by law.

(d) This part applies to all employees of ACTION. "Employee" as used in this part includes regular employees, Presidential appointees, "special Government employees," experts, and consultants whether employed on a full-time or intermittent basis.

§ 1201.735-102 Definitions.

(a) "Special Government employee" as used herein means a person appointed or employed to perform temporary duties for ACTION with or without compensation, on a full-time or intermittent basis, for not to exceed 130 days during any period of 365 days.

(b) "Regular Government employee" as used herein means any officer or employee other than a special Government employee.

(c) "Organization" as used herein includes profit and nonprofit corporations, associations, partnerships, trusts, sole proprietorships, foundations, and State and local government units.

(d) "Grantee" as used herein means any organization that receives financial assistance from ACTION including the assignment of volunteers.

(e) "Potential Grantee or Contractor" means any organization that has submitted a proposal, application, or otherwise indicated in writing its intent to apply for or seek a specific grant or contract.

(f) "Associated with" means:

(1) That the person is a director of the organization or is a member of a board or committee which exercises a recommending or supervisory function in connection with an ACTION project;

(2) That the person or his or her spouse, minor child or other member of his or her immediate household serves as an employee, officer, owner, trustee, partner, consultant, or paid adviser (general membership in an organization is not included within the definition of "associated with");

(3) That the person, his or her spouse, minor child, or other member of his or her immediate household, owns, individually or collectively, 1 percent or more of the voting shares of an organization;

(4) That the person, his or her spouse, minor child, or other member of his or her immediate household, owns, individually or collectively, either beneficially or as trustee, a financial interest in an organization through stock, stock options, bonds, or other securities, or obligations, valued at $50,000 or more; or

(5) That a person has a continuing financial interest in an organization, such as a bona fide pension plan, valued at $5,000 or more, through an arrangement resulting from prior employment or business or professional association.

The term "associated" does not include an indirect interest, such as ownership of shares in a mutual fund, bank or insurance company, which in turn owns an interest in an organization which has, or is seeking or under consideration for a grant or contract. Such and "indirect" interest, as well as financial interests of amounts less than those stated in subparagraphs (3) through (5) of paragraph (f) of this section, are hereby determined pursuant to 18 U.S.C. 208(b)(2) to be too remote to affect the integrity of the employee's services.

Subpart B—Conduct and Responsibilities of Employees

§ 1201.725-201 Proscribed actions—Executive Order 11222.

As provided by the President in Executive Order No. 11222, whether specifically prohibited by law or in the regulations in this part, no U.S. regular or special Government employees shall take any action which might result in, or create the appearance of:

(a) Using public office or employment for private gain, whether for themselves or for another person, particularly one with whom they have family, business, or financial ties.

(b) Giving preferential treatment to any person.

(c) Impeding Government efficiency or economy.

(d) Losing complete independence or impartiality.

(e) Making a Government decision outside official channels.

(f) Affecting adversely the confidence of the public in the integrity of the Government.

(g) Using Government office or employment to coerce a person to provide financial benefit to themselves or to other persons, particularly anyone with whom they have family, business or financial ties.

§ 1201.735-202 General conduct prejudicial to the Government.

An employee may not engage in criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct prejudicial to the Government (5 CFR 735.209).

§ 1201.735-203 Criminal statutory prohibitions: Conflict of interest.

(a) *Regular Government employees.* Regular employees of the Government are subject to the following major criminal prohibitions:

(1) They may not, except in the discharge of their official duties, represent anyone else before a court or Government agency in a matter in which the United States is a party or has an interest. This prohibition applies to both paid and unpaid representation of another (18 U.S.C. 205).

(2) They may not, after Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and in which they participated personally and substantially for the Government (18 U.S.C. 207).

(3) They may not for 1 year after their Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and which was within the boundaries of their official responsibility during their last year of Government service. This temporary restraint gives way to the permanent restraint described in subparagraph (3) of this paragraph if the matter is one in which the employee participated personally and substantially (18 U.S.C. 207).

(4) They may not receive any salary, or supplementation of their Government salary, from a private source as compensation for services to the Government (18 U.S.C. 209).

(b) *Special Government employees.* Special Government employees are subject to the following major criminal prohibitions:

(1) They may not, except in the discharge of official duties, represent anyone else before a court or Government agency in a matter in which the United States is a party or has an interest and in which they have at any time participated personally and substantially for the Government (18 U.S.C. 205).

(2) They may not, except in the discharge of official duties, represent anyone else in a matter pending before the agency they serve unless they have served there no more than 60 days during the past 365. They are bound by this restraint despite the fact that the matter is not one in which they have ever participated personally and substantially (18 U.S.C. 205). (See § 1201.735-303(b) for additional nonstatutory Agency restrictions on a special employee representing any other person or organization in a matter pending before the Agency.) The restrictions described in subparagraphs (1) and (2) of this paragraph apply to both paid and unpaid representation of another.

(3) They may not participate in their governmental capacity in any matter in which they, their spouse, minor child, outside business associate, or persons with whom they are negotiating for employment have a financial interest (18 U.S.C. 208).

(4) They may not, after their Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and in which they participated personally and substantially for the Government (18 U.S.C. 207).

(5) They may not, for 1 year after their Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and which was within the boundaries of their official responsibility during their last year of Government service. This temporary restraint gives way to the permanent restraint described in subparagraph (3) of this paragraph if the matter is one in which the employee participated personally and substantially (18 U.S.C. 207).

Subpart C—Outside Employment Activities and Associations

§ 1201.735-301 In general.

(a) There is no general prohibition against ACTION employees holding outside employment, including teaching, lecturing, or writing. But no employee may engage in outside employment or associatons if they might result in a conflict or an appearance of conflict between the private interests of the employee and his or her official responsibility.

(b) An employee shall not receive any salary or anything of monetary value from a private source as compensation for his or her services to the Government (18 U.S.C. 209).

(c) An employee shall not have a direct or indirect financial interest that conflicts substantially or appears to conflict substantially with his or her Government duties and responsibilities. Nor may an employee engage in, directly or indirectly, a financial transaction as a result of or primarily relying on information obtained through his or her Government employment.

V 43/194 OCT 5 78 UMI

§ 1201.735–302 Association with a potential grantee or contractor prior to ACTION employment.

(a) No employee, or any person subject to his or her supervision, may participate in the decision to award a grant or a contract to an organization with which that employee has been associated in the past 2 years. When an employee becomes aware that such an organization is under consideration for or has applied for a grant or a contract with the Agency, the employee shall notify his or her immediate supervisor in writing. The supervisor shall take whatever steps are necessary to exclude the employee from all aspects of the decision processes regarding the grant or contract.

(b) When the Director, Deputy Director, or an Associate or Assistant Director, becomes aware that an organization with which he or she has been associated in the past 2 years is under consideration for or has applied for a grant or contract with the Agency, he or she shall refrain from participating in the decision process and immediately notify the Assistant Director of the Office of Compliance, who shall select an independent third party, not in any way connected or associated with the concerned official. The third party shall participate in and review the decision process to the extent he or she deems necessary to insure objectivity and the absence of favoritism. Said third party shall preferably be a person experienced in the area of government contracts and grants. The third party shall file a report in writing with the Committee on Conflict of Interest stating his or her conclusions, observations, or objections, if any, to the decision process concerning the grant or contract, which document shall be attached to and become a part of the official file.

§ 1201.735–303 Association with ACTION grantee or contractor or potential grantee or contractor while an ACTION employee.

(a) No regular employee may be associated with any ACTION grantee, contractor, or potential grantee or contractor. Any organization that is associated with a regular employee shall be suspended from consideration as a grantee or contractor.

(b) No regular or special employee, except in his or her official capacity as an ACTION employee, shall either participate in any way on behalf of any orgainzation in the preparation or development of a grant or contract proposal involving ACTION or represent any other organization in a matter pending before ACTION. In the event that a regular or special employee participates while an employee of ACTION in any aspect of the development of a grant or contract proposal on behalf of an organization, or represents another organization in a matter pending before ACTION, that organization shall be suspended from consideration for the grant or contract.

(c) No regular or special employee who, prior to his or her employment at ACTION, participated in the development of a grant or contract proposal on behalf of another organization, shall participate as an ACTION employee, in any aspect of the decision process regarding that grant or contract, or, if the grant or contract is awarded, in any oversight or management capacity in relation to that grant or contract. In addition, any such grant or contract shall only be awarded through a competitive process. In the event a regular or special employee who participated in the development of the grant or contract proposal prior to being employed at ACTION does participate as an ACTION employee in the decision process for such grant or contract, the organization shall be suspended from consideration.

(d) If a special employee participates as an employee of ACTION in any aspect of the development of a proposal or project, whether or not such participation is minimal or substantial, any organization with which he or she is associated shall be suspended from consideration for the grant or contract.

(e) If an organization with which a special employee is associated submits a proposal for a grant or contract, and the special employee did not participate either as an employee of ACTION or an associate of the organization in any aspect of the project or proposal or the application therefor, the matter shall be referred to the Committee on Conflict of Interests for determination. The Committee shall consider the following factors and any others it deems relevant:

(1) The nature, length, and origin of the special employee's relationship with the Agency, the nature and scope of the employees's duties and responsibilities, the division or office to which the employee is assigned, and whether the employee's duties are in any way related to the proposed grant or contract.

(2) The nature, length, and type of the employee's relationship with the organization, whether the employee's position involves policy making or supervision of other employees and the relationship of the position with the organization to the work to be performed under the proposed grant or contract.

(3) Whether awarding the grant or contract to the organization would result in the appearance of or the potential for a conflict of interest.

(4) The process to be used in awarding the grant or contract.

(f) If a special employee wishes to become or remain associated with an ACTION grantee or contractor while he or she is an employee of ACTION, subject to the restrictions (b) through (e) of § 1201.735–303, the matter shall be referred to the Committee on Conflict of Interests for determination. The Committee shall consider the following factors and any others it deems relevant:

(1) The nature, length, and origin of the special employee's relationship with the Agency, the nature and scope of the employee's duties and responsibilities, the division or office to which the employee is assigned, and whether the employee's duties are in any way related to the grant or contract.

(2) The nature, length, and type of the employee's relationship with the organization, whether the employee's position involves policymaking or supervision of other employees and the relationship of the postion with the organization to the work to be performed under the proposed grant or contract.

(3) Whether such a relationship would result in the appearance of or the potential for a conflict of interest.

(g) Any suspension involving proposed contracts under this rule shall be in accordance with procedures set forth in 41 CFR 1–1.600 et seq.

§ 1201.735–304 Employment after leaving ACTION.

(a) Employees may negotiate for prospective employment with non-Government organizations only when they have no duties as ACTION employees which could affect that organization's interest, or after they have disqualified themselves, on the written permission of their supervisor, from such duties.

(b) For 1 year after leaying ACTION, no regular or special employee may serve pursuant to a personal or nonpersonal services contract or accept employment with an ACTION grantee or contractor for a position in which he or she would be working in any activity supported in whole or in part by ACTION funds received under an ACTION program which was within the boundaries of the employee's official responsibility or in which he or she participated personally while employed at ACTION.

(c) If, within 1 year after leaving ACTION, an individual accepts employment in violation of this rule, ACTION will disallow the costs allocated under the grant or contract for that position. In addition, a letter describing the violation will be placed in the employee's personnel file.

§ 1201.735–305 Employment with ACTION grantee or contractor.

An employee of an ACTION grantee or contractor who is compensated directly or indirectly from ACTION funds will be ineligible to be compensated under any personal or nonpersonal services contract with this Agency which will result in the employee being paid twice for the same time or product.

§ 1201.735–306 Association with non-ACTION-grantee or contractor while an ACTION employee.

(a) An employee shall not engage in outside employment which tends to impair the employee's mental or physical capacity to perform his or her official responsibility in an acceptable manner.

(b) *Teaching, lecturing, and writing*—(1) *Use of information.* An employee shall not, either for or without compensation, engage in teaching, lecturing, or writing that is dependent on information obtained as a result of his or her Government employment, except when that information has been or on request will be made available to the general public or when the agency head gives advance written authorization for the use of nonpublic information on the basis that the proposed use is in the public interest.

(2) *Compensation.* No employee may accept compensation or anything of value for any lecture, discussion, writing, or appearance the subject matter of which is devoted substantially to the ACTION programs or which draws substantially on official data or ideas which have not become part of the body of public information.

(3) *Clearance of publications.* No employee may submit for publication any writing, other than recruiting information, the contents of which are devoted to the ACTION programs or to any other matter which might be of official concern to the U.S. Government without in advance clearing the writing with the Office of Communications or regional communications specialists, as appropriate. Before clearing any such writing, the Office of Communications will consult with the appropriate ACTION office.

(c) *State and local government employment.* Regular employees may not hold office or engage in outside employment under a State or local government except with prior approval of the General Counsel, ACTION.

(d) All employees not required by § 1201.735–401 to report their outside employment and financial interests shall inform their supervisors of all outside employment they hold or accept.

§ 1201.735–307 Gifts, entertainment, and favors.

(a) *From donors dealing with ACTION.* (1) No regular or special employees may solicit or accept, directly or indirectly, for themselves, for any member of their family, or for any person with whom they have business or financial ties, any gift, gratuity, favor, entertainment, or loan or any other thing of value, from any individual or organization which:

(i) Has, or is seeking to obtain, contractual or other business or financial relations with ACTION;

(ii) Has interests that may be substantially affected by the performance or nonperformance of the employee's official responsibility;

(iii) Is in any way attempting to affect the employee's exercise of his or her official responsibility; or

(iv) Conducts operations or activities that are regulated by ACTION.

(2) Subparagraph (1) of this paragraph does not prohibit, even if the donor has dealings with ACTION:

(i) Acceptance of things of value from parents, children, or spouse if those relationships rather than the business of the donor is the motivating factor for the gift;

(ii) Acceptance of food and refreshments of nominal value on infrequent occasions in the ordinary course of breakfast, luncheon, or dinner meeting or other meetings;

(iii) Solicitation and acceptance of loans from banks or other financial institutions to finance proper and usual activities of employees, such as home mortgage loans, solicited and accepted on customary terms;

(iv) Acceptance on behalf of minor dependents of fellowships, scholarships, or educational loans awarded on the basis of merit and/or need;

(v) Acceptance of awards for meritorious public contribution or achievement given by a charitable, religious, professional, social, fraternal, nonprofit educational and recreational, public service, or civic organization.

(3) Regular or special employees need not return unsolicited advertising or promotional material, such as pens, pencils, note pads, calendars, and other things of nominal intrinsic value.

(b) *From other ACTION employees.* No employees in superior official positions may accept any gifts presented as contributions from employees receiving less salary than themselves. No employees shall solicit contributions from other employees for a gift to an employee in a superior official position, nor shall any employees make a donation as a gift to an employee in a superior official position. However, this paragraph does not prohibit a voluntary gift of nominal value or donation in a nominal amount made on a special occasion such as marriage, illness, or retirement.

(c) *From foreign governments.* No regular employee may solicit or, without the consent of the Congress, receive any present, decoration, emolument, pecuniary favor, office, title, or any other gift from any foreign government. See 5 U.S.C. 7342; Executive Order 11320; and 22 CFR Part 3 (as added, 32 FR 6469).

(d) *Gifts to ACTION.* Gifts to the United States or to ACTION may be accepted in accordance with ACTION regulations.

(e) *Reimbursement for expenses.* Neither this section nor § 1201.735–310(a) precludes an employee from receipt of bona fide reimbursement, unless prohibited by law, for expenses of travel and such other necessary subsistence as is compatible with this part and for which no Government payment or reimbursement is made. However, this paragraph does not allow an employee to be reimbursed, or payment to be made on his behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits. Nor does it allow an employee to receive non-Government reimbursement of travel expenses for travel on official business under ACTION orders; but rather, such reimbursement, if any, should be made to ACTION and amounts received should be credited to its appropriation. If an employee receives accommodations, goods, or services in kind from a non-Government source, this item or items will be treated as a donation to ACTION and an appropriate reduction will be made in per diem or other travel expenses payable.

§ 1201.735–308 Economic and financial activities of employees abroad.

(a) *Prohibitions in any foreign country.* A U.S. citizen employee abroad is specifically prohibited from engaging in the activities listed below in any foreign country:

(1) Speculation in currency exchange;

(2) Transactions at exchange rates differing from local legally available rates, unless such transactions are duly authorized in advance by the agency;

(3) Sales to unauthorized persons (whether at cost or for a profit) of currency acquired at preferential rates through diplomatic or other restricted arrangements;

(4) Transactions which entail the use, without official sanction, of the diplomatic pouch;

(5) Transfers of funds on behalf of blocked nationals, or otherwise in violation of U.S. foreign funds and assets control;

(6) Independent and unsanctioned private transactions which involve an

V 4 3 / 1 9 4

employee as an individual in violation of applicable control regulations of foreign governments;

(7) Acting as an intermediary in the transfer of private funds from persons in one country to persons in another country, including the United States;

(8) Permitting use of one's official title in any private business transactions or in advertisements for business purposes.

(b) *Prohibitions in country of assignment.* (1) A U.S. citizen employee shall not transact or be interested in any business or engage for profit in any profession or undertake other gainful employment in any country or countries to which he or she is assigned or detailed in his or her own name or through the agency of any other person.

(2) A U.S. citizen employee shall not invest in real estate or mortgages on properties located in his or her country of assignment. The purchase of a house and land for personal occupancy is not considered a violation of this subparagraph.

(3) A U.S. citizen employee shall not invest money in bonds, shares, or stocks of commercial concerns headquartered in his or her country of assignment or conducting a substantial portion of business in such country. Such investments, if made prior to knowledge of assignment or detail to such country or countries, may be retained during such assignment or detail.

(4) A U.S. citizen employee shall not sell or dispose of personal property, including automobiles, at prices producing profits which result primarily from import privileges derived from his or her official status as an employee of the U.S. Government.

§ 1201.735–309 Information.

(a) Release of information to press.

(1) Regular or special employees shall not withhold information from the press or public unless that information is classified or administratively controlled (limited official use). All responses to requests for information from the press should be referred to the Office of Communications or regional communications officers as appropriate who will be responsible for all releases. Regular and special employees should be certain that information given to the press and public is accurate and complete.

(2) Any questions as to the classification or administrative control of information should be referred to the general counsel.

(3) No regular or special employee may record by electronic or other device any telephone or other conversation. No regular or special employee may listen in on any telephone conversation without the consent of all parties thereto.

(b) Disclosure and misuse of inside information. No employee may, directly or indirectly, disclose or use for his or her own benefit, or for the private benefit of another, inside information as described in paragraph (c) of this section. The use of such information by an employee is restricted to the proper performance of his or her official duties. The disclosure of such information is restricted to official ACTION channels unless disclosure is authorized by the Director, the Deputy Director, an Associate Director, or a Regional Director of ACTION. In particular, no employee may:

(1) Engage in, directly or indirectly, a financial transaction as a result of or primarily relying on such information; or

(2) Publish any book or article, or deliver any speech or lecture, based on or using such information.

(c) Definition: The term "inside information" as used in this section means, generally, information obtained under Government authority which is not known by the general public and which could affect the rights or interests of the Government or of a non-Government organization or person. Such information includes information about ACTION operations or administration, and personnel which could influence someone's dealing with ACTION.

(d) This section is not intended to discourage the disclosure through proper channels of information which has been or should be made public, or which is by law to be made available to the public. Also, employees are encouraged to teach, lecture, and write, provided they do so in accordance with the provisions of this section and §§ 1201.735–301, and 1201.735–306.

§ 1201.735–310 Speeches; participation in conferences.

(a) *Fees and expenses.* (1) Although an employee may not accept a fee for his or her own use or benefit for making a speech, delivering a lecture, or participating in a discussion if the subject is ACTION or ACTION programs or if such services are part of the employee's official ACTION duties, the employee may suggest that the amount otherwise payable as a fee or honorarium be contributed to ACTION.

(2) When a meeting, discussion, etc., to which subparagraph (1) of this paragraph refers takes place at a substantial distance from the employee's home he or she may accept reimbursement for the actual cost of transportation and necessary subsistence, or expenses, but in no case shall he or she receive any amount for personal benefit. Such reimbursements shall be reported by the employee to his or her immediate supervisors.

(3) An employee may accept fees for speeches, etc., dealing with subjects other than ACTION or ACTION programs when no official funds have been used in connection with his or her appearance and such activities do not interfere with the efficient performance of his or her duties.

(b) *Racial segregation.* No employee may participate for ACTION in conferences or speak for ACTION before audiences where any racial group has been segregated or excluded from the meeting, from any of the facilities or conferences, or from membership in the organization sponsoring the conference or meeting.

(1) When a request for ACTION speakers or participation is received under circumstances where segregation may be practiced, the Director of the Office of Communications shall make specific inquiry as to the practices of the organization before the request is filled.

(2) If the inviting organization shows a willingness to modify its practices for the occasion, ACTION will cooperate in such efforts.

(3) Exceptions to this paragraph may be made only by the Director, ACTION and in his or her discretion.

§ 1201.735–311 Partisan political activity.

(a) **Prohibited activities:** No employee may:

(1) Use his or her official authority or influence for the purpose of interfering with an election or affecting the result thereof; or

(2) Take any active part in partisan political management or in political campaigns, except as may be provided by or pursuant to statute 5 U.S.C. 7324.

(b) Intermittent employees: Persons employed on an irregular or occasional basis are subject to paragraph (a) of this section only while in active duty status and for the 24 hours of any day of actual employment.

(c) Excepted activities: Paragraph (a) of this section does not apply to:

(1) Nonpartisan campaigns and elections in which none of the candidates is to be nominated by or elected as representing a national or State political party, such as most school board elections; or

(2) Political activities connected with questions of public interest which are not specifically identified with national or State political parties, such as constitutional amendments, referenda, and the like (5 U.S.C. 7326).

(d) Excepted communities: Paragraph (a) of this section does not apply to employees who are residents of certain communities. These communities, which have been designated by

the Civil Service Commission (5 CFR 733.301), consist of a number of communities in suburban Washington, D.C., and a few communities elsewhere in which a majority of the voters are Government employees. Employees who are residents of the designated communities may be candidates for, or campaign for others who are candidates for, local office if they or the candidates for whom they are campaigning are running as independent candidates. An employee may hold local office only in accordance with §§ 1201.735–301 through 1201.735–306 relating to outside employment and associations.

(e) Special Government employees are subject to the statute for the 24 hours of each day on which they do any work for the Government.

(f) While regular employees may explain and support governmental programs that have been enacted into law, in exercising their official responsibilities they should not publicly support or oppose pending legislation, except in testimony required by the Congress.

(g) The Foreign Service Act generally prohibits any Foreign Service employee from: (1) Corresponding in regard to the public affairs of any foreign government, except with the proper officers of the United States; and (2) recommending any person for employment in any position of trust or profit under the government of the country to which he or she is detailed or assigned.

§ 1201.735–312 Use of Government property.

A regular or special employee shall not directly or indirectly use, or allow the use of, Government property of any kind, including property leased to the Government for other than officially approved activities. All employees have a positive duty to protect and conserve Government property, including equipment, supplies, and other property entrusted or issued to them. By law, penalty envelopes may be used only for official Government mail.

§ 1201.735–313 Indebtedness.

ACTION considers the indebtedness of its employees to be a matter of their own concern and will not function as a collection agency. Nevertheless, a regular or special employee shall pay each just financial obligation in a proper and timely manner, especially one imposed by law such as Federal, State, or local taxes. For the purpose of this section, a "just financial obligation" means one acknowledged by the employee or reduced to judgment by a court, or one imposed by law such as Federal, State, or local taxes, and "in a proper and timely manner" means in a manner which the agency determines does not, under the circumstances, reflect adversely on the Government as his or her employer. In the event of a dispute between an employee and an alleged creditor, this section does not require ACTION to determine the validity or amount of the disputed debt.

§ 1201.735–314 Gambling, betting, and lotteries.

A regular or special employee shall not participate, while on Government owned or leased property or while on duty for the Government in any gambling activity including the operation of a gambling device, in conducting a lottery or pool, in a game for money or property, or in selling or purchasing a numbers slip or ticket.

§ 1201.735–315 Discrimination.

No regular or special employee may make inquiry concerning the race, political affiliation, or religious beliefs of any employee or applicant in connection with any personnel action and may not practice, threaten, or promise any action against or in favor of an employee or applicant for employment because or race, color, religion, sex, or national origin and in the competitive service on the basis of politics, marital status, or physical handicap.

§ 1201.735–316 Related statutes and regulations.

Each employee should be aware of the following related statutes and regulations:

(a) House Concurrent Resolution 175, 8th Congress, second session, 72A Stat. B12, the "Code of Ethics for Government Service."

(b) The prohibition against lobbying with appropriated funds (18 U.S.C. 1913).

(c) The prohibitions against disloyalty and striking (5 U.S.C. 7311, 18 U.S.C. 1918).

(d) The prohibition against accepting honorariums of more than $2,000 per speech, appearance or article or aggregating more than $25,000 in any calendar year (2 U.S.C. 441i).

(e) The prohibitions against (1) the disclosure of classified information (18 U.S.C. 798, 50 U.S.C. 783); and (2) the disclosure of confidential information (18 U.S.C. 1905).

(f) The provisions relating to the habitual use of toxicants to excess (5 U.S.C. 7352).

(g) The prohibition against the misuses of a Government vehicle (31 U.S.C. 638(a) (c)).

(h) The prohibition against the misuses of the franking privilege (18 U.S.C. 1719).

(i) The prohibition against the use of deceit in an examination or personnel action in connection with Government employment (18 U.S.C. 1917).

(j) The prohibition against fraud or false statements in a Government matter (18 U.S.C. 1001).

(k) The prohibition against mutilating or destroying a public record (18 U.S.C. 2071).

(l) The prohibition against counterfeiting and forging transportation requests (18 U.S.C. 508).

(m) The prohibitions against: (1) Embezzlement of Government money or property (18 U.S.C. 641); (2) failing to account for public money (18 U.S.C. 643); and (3) embezzlement of the money or property of another person in the possession of an employee by reason of his or her employment (18 U.S.C. 654).

(n) The prohibition against unauthorized use of documents relating to claims from or by the Government (18 U.S.C. 285).

(o) The prohibitions against political activities in subchapter III of chapter 73 of title 5, United States Code, and 18 U.S.C. 602, 603, 607, and 608.

(p) The prohibition against gifts to employee's superiors and the acceptance thereof (Rev. Stat. 1784, 5 U.S.C. 113).

(q) Chapter 11 if title 18, United States Code, relating to bribery, graft, and conflicts of interest, which is specifically applicable to special Government employees as well as to regular employees.

(r) The prohibitions against: (1) Accepting gifts from foreign governments; (2) engaging in business abroad; (3) corresponding on the affairs of foreign governments; and (4) discrimination on political, racial, or religious grounds contained in sections 1002 through 1005 of the Foreign Service Act of 1946, as amended.

(s) The prohibition against an employee acting as the agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219).

(t) The prohibition against appointing or advocating the appointment of a relative to a position within the Agency (5 U.S.C. 3110).

Subpart D—Procedures for Submission by Employees and Review of Statements of Employment and Financial Interests

§ 1201.735–401 Submission of statements.

(a) (1) Regulations of the Civil Service Commission (5 CFR Part 735) require ACTION to adopt regulations providing for the submission of statements of employment and financial interests from certain regular ACTION employees and all special ACTION employees.

(2) All special employees and those regular employees designated in paragraph (b) of this section shall com-

OCT 5 1978

V 43/194 OCT 5 78 UM

plete statements of employment and financial interests and submit them to the Office of General Counsel not later than 5 days after their entrance on duty. The Director of Personnel Management shall be responsible for supplying all new employees with the necessary forms either prior to or on the first day of their employment.

(3) The statement of employment and financial interests shall include information on organizations with which the employee was associated during the 2 years prior to his or her employment by ACTION, as well as information about current associations. Special employees shall also indicate to the best of their knowledge which organizations listed currently on their form have contracts with or grants from ACTION, or are applying for ACTION contracts or grants. If any information required to be included on the statement, including holdings placed in trust, is not known to an employee but is known to another person, he or she is required to request that other person to submit information on his or her behalf.

(4) Changes in or additions to the information contained in a regular or special employee's statement must be reported in a supplementary statement as of June 30 each year. The Director of Personnel Management shall be responsible for insuring that such supplementary statements are submitted by June 30. If there are no changes or additions, a negative report is required. Notwithstanding the filing of the annual report required by this paragraph, each employee shall at all times avoid acquiring a financial interest that could result, or taking an action that would result, in a conflict of interest and a violation of the conflict-of-interest provisions of section 208 of Title 18, United States Code, or the conflict-of-interest provisions of this part.

(5) In the case of temporary summer employees hired at FSR-7 or equivalent and below to perform duties other than those of an expert or consultant, the reporting requirement will be waived. It may also be waived by the Director of Personnel Management with respect to other appointments, except as experts or consultants, upon a finding that the duties of the position held by the special Government employee are of a nature and at such a level of responsibility that the reporting of employment and financial interests is not necessary to protect the integrity of the Government.

(6) Regular or special employees are not required to submit in a statement of employment and financial interests or supplementary statements any information about their connection with or interest in a professional society or a charitable, religious, social, fraternal, recreational, public service, civic, or political organization not conducted as a business enterprise. For this purpose, any organizations, doing work involving or potentially involving grants of money from or contracts with the Government are considered business enterprises and are required to be included in a regular or special employee's statement of employment and financial interests.

(7) The statements of employment and financial interests and supplementary statements required are in addition, and not in substitution for or in designation of, any similar requirement imposed by law, order, or regulation. The submission of a statement of supplementary statement by an employee does not permit him or her or any other person to participate in a matter in which his or her or other persons' participation is prohibited by law, order, or regulations.

(8) A regular employee who believes that his or her position has been improperly included under ACTION regulations as one requiring the submission of a statement of employment and financial interests shall be given an opportunity for review through ACTION's grievance procedures to determine whether the position has been improperly included.

(b) Statements shall be submitted by the following employees:

(1) Office of the Director:
(i) Director.
(ii) Deputy Director.
(iii) Executive Officer.
(iv) Special Assistants to Director and Deputy.
(v) Executive Assistants to Director and Deputy.

(2) Office of Domestic and Anti-Poverty Operations:
(i) Associate Director.
(ii) Deputy Associate Directors.
(iii) Special Assistants to Associate Director and to Deputy Associate Directors.
(iv) Supervisory program specialists.
(v) Program specialists and analysts.
(vi) Regional Directors.
(vii) Deputy Regional Directors.
(viii) Regional training chiefs.
(ix) Regional staff members with contracting and disbursing authority.
(x) Regional program operations officers.
(xi) State program directors.
(xii) State program officers.
(xiii) Deputy Directors, VISTA, and OAVP.

(3) Office of Administration and Finance:
(i) Assistant Director.
(ii) Deputy Assistant Director.
(iii) Director, Management and Organization.
(iv) Director, Administrative Services.
(v) Chief, Paperwork and Management.
(vi) Chief, Transportation.
(vii) Chief, Communications and Property.
(viii) Director, Accounting Division.
(ix) Chief, Fiscal Services.
(x) Chief, Accounting Operations.
(xi) Cashier.
(xii) Director, Personnel Management.
(xiii) Deputy Director, Personnel Management.
(xiv) Director, Health Services.
(xv) Director, Contracts and Grants Management.
(xvi) Chief, Procurement Division.
(xvii) Contract specialists, negotiators, and administrators.
(xviii) Purchasing agents.
(xix) Chief, Grants Division.
(xx) Senior Grants Administrator.
(xxi) Grants Administrator.
(xxii) Director, Computer Services.
(xxiii) Director, Staff Training and Development.

(4) Office of Recruitment and Communications:
(i) Assistant Director.
(ii) Deputy Assistant Director.
(iii) Special Assistant to Assistant Director.
(iv) Director, Planning and Evaluation.
(v) Director, Recruitment Resources.
(vi) Director, Office of Communications.
(vii) Director, Public Affairs.
(viii) Director, Creative Services.

(5) Office of Voluntary Citizen Participation:
(i) Assistant Director.
(ii) Director program operations.
(iii) Director, International and Special Assistance.
(iv) Program specialists.
(v) Director, School Partnership program.

(6) Office of the General Counsel:
(i) General Counsel.
(ii) Deputy General Counsel.
(iii) Associate General Counsels.
(iv) Assistant General Counsels.

(7) Office of Policy and Planning:
(i) Assistant Director.
(ii) Deputy Assistant Director.
(iii) Special Projects Officer.
(iv) Director, Budget Division.
(v) Director, Policy Development.
(vi) Director, Evaluation.
(vii) Director, Planning.
(viii) Special Assistants to Assistant Director.
(ix) Program analysts.
(x) Policy development analysts.
(xi) Supervisory program specialists.
(xii) Evaluation specialists.

(8) Office of Legislative and Governmental Affairs:
(i) Assistant Director.

(9) Office of Compliance:
(i) Assistant Director.
(ii) Inspector General.
(iii) Auditors, inspectors, program operations analysts.
(iv) Director, Division of Equal Opportunity.

(10) Office of International Operations:
(i) Associate Director.
(ii) Deputy Associate Directors.
(iii) Director, Programing and Training.
(iv) Director, Multilateral and Special programs.
(v) Director, Special Services.
(vi) Director, Office of Management.
(vii) Director, Office of Peace Corps Volunteer Placement.
(viii) Regional Directors.
(ix) Country Directors and those overseas staff members to whom contracting or procurement authority has been duly delegated by the Country Director.

§ 1201.735–402 Review of statements.

(a) The Office of General Counsel shall review all statements and forward the names of all listed organizations to the Director of Contracts and Grants Management. In addition, if the information provided in the statement indicates on its face a real, apparent, or potential conflict of interest under § 1201.735–301 through 305 of these standards, the General Counsel will review the situation with the particular employee. If the General Counsel and the employee are unable to resolve the conflict to the General Counsel's satisfaction, or if the employee wishes to request an exception to any of the above enumerated rules, the case will be referred to the Committee on Conflict of Interests. The Committee is authorized to recommend appropriate remedial action to the Director, who is authorized to take such action as may include, but is not limited to, changing assigned duties, requiring the employee or special employee to divest himself of a conflicting interest, taking disciplinary action, or disqualifying or accepting the self-disqualification of the employe or special employee for a particular assignment.

(b) The Office of Contracts and Grants Management shall maintain a list of all the organizations with which employees are or have been associated, as well as a list of all current grantees of and contractors with the Agency. When names of organizations with which new employees are or have been associated are submitted to the Grants office, they shall be checked against the list of current grantees or contractors. Similarly, before any new grants or contracts are awarded, the names of the potential grantees and contractors will be checked against the master list of organizations with which employees are or have been associated. Any real, apparent, or potential conflicts which come to light as a result of these cross checks will be referred to the Office of General Counsel for review. The General Counsel will proceed as in paragraph (a) of this section, referring the matter to the Committee on Conflict of Interests if necessary.

(c) Whenever an organization submits a proposal or application or otherwise indicates in writing its intent to apply for or seek a specific grant or contract, ACTION shall immediately forward a copy of the Agency standards of conduct to that organization and shall note which particular rules apply to potential grantees and contractors.

(d) Whenever a regular or special employee terminates his or her employment with ACTION, the Office of Personnel Management shall provide that employee with a copy of the rule which restricts a person's employment for a period of 1 year after leaving ACTION. Personnel shall also notify the Office of General Counsel when an employee terminates. One year after the date of termination, General Counsel will instruct the Office of Grants and Management to remove from the master list any organizations with which the terminated employee was associated. Three years after the date of termination, General Counsel will destroy the statement of employment and financial interests.

SAM BROWN,
Director, ACTION.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of the Great Swamp National Wildlife Refuge, N.J., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Great Swamp National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 5, 1978, through December 14, 1978.

FOR FURTHER INFORMATION CONTACT:

John L. Fillio, Great Swamp National Wildlife Refuge, Rural Delivery 1, Box 148, Basking Ridge, N.J. 07920, telephone 201–647–1222.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer of either sex with shotguns on the Great Swamp National Wildlife Refuge, N.J., is permitted, except on areas designated by signs as closed, during the period of December 5, 1978, to December 9 1978, inclusive, and December 14, 1978. Hunting of deer with firearms shall be in accordance with all State and Federal regulations subject to the following special conditions:

Deer may be taken throughout the hunt between the hours of 7 a.m., e.s.t., and 5 p.m., e.s.t. Participation will be limited to the 400 hunter permittees randomly selected for the special Great Swamp hunt. Only 150 hunters will be allowed to hunt on any given day during the hunt period. Armbands and parking area permits will be issued and must be displayed as designated. Armbands and permits must be surrendered prior to departure from the refuge. Hunters must furnish and wear a minimum of 200 square inches of blaze or hunter orange. All deer taken must be checked out at the refuge check station. Vehicles are restricted to public roads and areas designated by parking permits.

A shotgun not smaller than 12 gage will be permitted for hunting deer, and buckshot not smaller than No. 4, nor larger than No. 000, will be permitted in possession during the hunt. Hunter permittees will be required to have shotguns and loads certified prior to the hunt. Target practice or test firing is not permitted, and guns must be unloaded when in areas posted as "closed." Baiting or hunting with the aid of bait is prohibited.

Regulations, summaries, maps delineating open hunting areas, and shotgun and load certification forms and requirements are available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

The refuge will be closed to the general public during the above hunting dates. Other than on the days of the hunt, permitted entry will be allowed only on approved public use areas as designated by signs.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in 50 CFR Part 32. The public is invited to offer suggestions and comments at any time.

[4310-55]

PART 32—HUNTING

Opening of Certain National Wildlife Refuges in Arizona, California, New Mexico, Oklahoma, and Texas

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in the States of Arizona, California, New Mexico, Oklahoma, and Texas, is compatible with the objectives for which these areas were established, will utilize a renewable national resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting season for migratory game birds.

EFFECTIVE DATES: October 1, 1978 through January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

The refuge manager at the address or telephone number listed below in the body of these special regulations.

GENERAL CONDITIONS

Hunting on portions of the following refuges shall be in accordance with applicable State and Federal regulations. Portions of refuges which are open to migratory game bird hunting are designated by signs and/or delineated on maps. Special conditions applying to individual refuges are listed on hunting leaflets available at the individual refuge headquarters. Vehicular travel is restricted to designated roads and trails.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Listed migratory game bird species may be hunted on the following refuges:

ARIZONA AND CALIFORNIA

Cibola National Wildlife Refuge, P.O. Box AP, Blythe, Calif. 92225, telephone 714-922-4433. Ducks, geese, coots, and gallinules.

Special conditions: (1) All hunting equipment, including decoys, must be removed from the refuge immediately after the end of each hunt. (2) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt. (3) Hunting is prohibited within one-fourth (¼) mile of any occupied dwelling or within 250 yards of any farmworker. (4) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving game. (5) Neither hunters nor dogs may enter areas closed to hunting to retrieve game. (6) Possession of handguns and all rimfire firearms is prohibited. Rifled firearms of legal caliber for deer hunting may be possessed on the refuge, but only during the legal deer hunting season. (7) It is not permissible to possess shotgun shells containing slugs, a single ball or shot of a size larger than "BB". (8) No decoys may be used that exceed 36 inches in any dimension; i.e., length, width or height.

Havasu National Wildlife Refuge, P.O. Box A, Needles, Calif. 92363, telephone 714-326-3853. Ducks, geese, coots, gallinules, and common (Wilson's) snipe.

Special conditions: (1) Hunting in the Pintail Slough management unit will be permitted only on Fridays, Saturdays, and Sundays. This unit includes all refuge lands north of the north dike. (2) Hunters in Topock Marsh are required to use shotgun shells loaded with steel (iron) shot. It is not permitted to possess shotshells other than steel shotshells in this area. This area includes all refuge lands and waters open to hunting and lying north of the south dike; it includes the Pintail Slough management unit with other lands and waters. (3) Hunters may be required to check in or check out of the hunting area for the purpose of giving hunting information to managers. (4) Hunters are required to enter the hunting areas by way of designated parking areas. (5) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving game. (6) Neither hunters nor dogs may enter areas closed to hunting to retrieve game. (7) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt. (8) Hunting is prohibited within one-fourth (¼) mile of any occupied dwelling or concession operation.

Imperial National Wildlife Refuge, P.O. Box 2217, Martinez Lake, Ariz. 85364, telephone 602-783-3400. Ducks, geese, coots, and gallinules.

Special conditions: (1) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt. (2) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving game. (3) Neither hunters nor dogs may enter areas closed to hunting to retrieve game.

NEW MEXICO

Bitter Lake National Wildlife Refuge, P.O. Box 7, Roswell, N. Mex. 88201, telephone 505-622-6755. Ducks, geese, coots, common (Wilson's) snipe, and lesser sandhill cranes.

Special conditions: (1) Steel (iron) shot shotgun ammunition only may be used for taking ducks, geese, coots, snipe, or sandhill cranes on the south refuge unit (area C). Further, it is not permissible to have shotgun ammunition other than steel shotshells in possession in area C during the waterfowl season. (2) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving game. (3) Neither hunters nor dogs may enter areas closed to hunting to retrieve game. (4) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt.

Sevilleta National Wildlife Refuge, Bosque del Apache National Wildlife Refuge, P.O. Box 1246, Socorro, N. Mex. 87801, telephone 505-835-1828. Ducks, geese, and coots.

Special conditions: (1) Hunting days and hours are: Tuesdays, Thursdays, and Saturdays, from thirty (30) minutes before sunrise until 1 p.m. local time. (2) Vehicular entry and parking will be restricted to areas as posted and designated on a hunting map which is available from the refuge. (3) Camping is not permitted. (4) Entry into the hunting area will be no earlier than two (2) hours before sunrise. (5) All hunters must be out of the hunting area by one-half hour after shooting hours. (6) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving. (7) Neither hunters nor dogs may enter areas closed to hunting to retrieve game. (8) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt.

OKLAHOMA

Sequoyah National Wildlife Refuge, P.O. Box 398, Sallisaw, Okla. 74955, telephone 918-775-6223. Ducks, geese, coots, common (Wilson's) snipe, and woodcock.

Special conditions: (1) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel, where weapons must be cased or broken down. (2) Camping or possession of firearms on the refuge at night is prohibited. (3) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt. (4) Up to two (2) dogs per hunter are permitted for the purpose of hunting and retrieving.

Tishomingo National Wildlife Refuge, P.O. Box 248, Tishomingo, Okla. 73460, telephone 405-371-2402. Ducks, geese, and coots.

Special conditions: (1) All waterfowl hunting on the wildlife management unit of the Tishomingo National Wildlife Refuge will be by use of 12 gage shotguns using steel (iron) shot shotshells. Shotguns other than 12 gage and shotshells loaded with other than steel shot are prohibited in hunting zone 3 during the waterfowl season. (2) Ducks and coots may be hunted only in management unit zones 1 and 2. Duck and coot hunting is restricted to the period of one-half hour before sunrise to 11:45 a.m., local time, on Tuesdays, Thursdays, Saturdays, Sundays, and national holidays. (3) Duck and coot hunting in zone 2 is restricted to hunters using retrieving dogs. (4) Eight (8) duck blinds are provided in zone 1, and hunters will be assigned to these blinds on a first-come-first-choice basis. Construction of temporary blinds is permitted in the "pothole" area of zone 1; however, no hunter may have possessory rights to any blind. These temporary blinds may be placed where desired after giving due consideration to safety and hunting opportunities of hunters already in the area. Blinds may not be constructed or used within 80 yards of a blind already in use. (5) Geese may be hunted in zone 3 only. Goose hunting is restricted to the period of one-half hour before sunrise to 11:45 a.m., local time, on Tuesdays, Thursdays, Saturdays, Sundays, and national holidays. (6) Thirty-five (35) goose blinds are provided in zone 3; all goose hunting must be from these blinds. Hunters must apply in writing to the refuge manager at the above address for blind reservations. Reservation requests for 5 days may be submitted. Hunting applications for specific dates will be processed in the order in which they are received at the refuge until available blind spaces are filled. Confirmations and rejections of applications will be made by mail if time permits. (7) Blind assignments to those whose applications have been accepted will be determined by a punchboard procedure just prior to each day's hunt. (8) Each hunter in zone 3 is limited to the possession of six (6) steel shot shotgun shells. (9) The management unit will be closed to waterfowl hunting on November 13 and 14, 1978, for public safety due to a control deer hunt. (10) During the hunts, hunters in zones 1 and 3 must remain in blinds to which they have been assigned except to place or adjust decoys and to retrieve birds. (11) All hunters in all zones, upon entering or leaving the area, shall report to designated checking stations for the purpose of blind assignment and to furnish information on their hunting activities. (12) Skybusting; i.e., firing at birds in excess of 45 yards from the hunter, is prohibited in all hunting zones.

TEXAS

Brazoria National Wildlife Refuge, Box 1088, Angleton, Tex. 77515, telephone 713-849-6062. Ducks, geese, and coots.

Special conditions: (1) Access to the hunting areas must be entirely over public water routes. Travel across the refuge mainland to and from the area open to hunting is not permitted. (2) Pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt.

San Bernard National Wildlife Refuge, Box 1088, Angleton, Tex. 77515, telephone 713-849-6062. Ducks, geese, and coots.

Special conditions: (1) The waterfowl hunting area on this refuge is divided into two parts: Special permit waterfowl hunting area (SPWH area) and free waterfowl hunting areas (also locally known as the Cedar Lakes and the Smith Marsh tract). (2) A refuge permit will be required for participation in the SPWH area. Permit applications are available at the Refuge Office, 1014 North Velasco Street, Angleton, Tex., and must be returned to the refuge office by October 20, 1978, to be eligible for drawing for advanced reservations. (3) Due to a special on-refuge transportation problem, no dogs will be permitted in the SPWH area. (4) Hunters participating in the special permit waterfowl hunt are required to be present at the check station by 4:30 a.m., local time. (5) The refuge will furnish duck decoys for the special permit waterfowl hunt and no other duck decoys may be used in this segment of the hunt. Goose decoys are permitted but will not be furnished. (6) Hunters participating in the special permit waterfowl hunt may not leave their blinds except to retrieve dead or wounded waterfowl or to rearrange their decoys. (7) Hunting days for the SPWH area will be Saturdays, Sundays, and Wednesdays. (8) Hunters will stop hunting and shooting at 10 a.m., local time, in the SPWH area and be prepared to be transported out of the hunt area. (9) Any available hunting blinds in the SPWH area will be filled by hunters without reservations on a standby basis immediately prior to each day's hunt. (10) A "special hunter service recreation fee" of $3 will be collected from each hunter for each hunting trip on the SPWH area. Holders of "Golden Age Passports" will be charged $1. (11) Transportation from the check station to the SPWH area will be provided. (12) In the SPWH area guns may not be loaded until hunters reach their assigned blinds. (13) Upon returning to the check station from the SPWH area, hunters may be required to answer questions regarding the hunt to further the management of the hunt. (14) No guest or observers are permitted in the blinds, only properly selected hunters. (15) Access to the free waterfowl hunting areas (Cedar Lakes and Smith Marsh tract) must be primarily over public water routes. (16) On the free waterfowl hunting areas pits may not be dug and permanent blinds may not be constructed. Hunters may not have possessory rights to any blind. Temporary blinds may be made of native dead vegetation. Any materials brought on to the refuge for blind construction must be removed at the end of each hunt. (17) Birds may not be plucked on the refuge. (18) Alcoholic beverages and controlled drugs are prohibited in all hunt areas on the refuge.

Laguna Atascosa National Wildlife Refuge, P.O. Box 2683, Harlingen, Tex. 78550, telephone 512-423-8328.

Special condition: The hunting of migratory game birds on the Laguna Atascosa National Wildlife Refuge is suspended for the 1978-79 hunting

V 43/194 OCT 5 78

season. It has been determined that the entire refuge is required for resource protection, especially in that the redhead, a bird in short supply is a major wintering species.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic input statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of DeSoto National Wildlife Refuge, Iowa, to Migratory Bird Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to migratory bird hunting of the DeSoto National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 1, 1978, through December 9, 1978, both dates inclusive.

FOR FURTHER INFORMATION CONTACT:

George Gage, Refuge Manager, DeSoto National Wildlife Refuge, Route 1, Box 114, Missouri Valley, Iowa 51555, telephone area code 712-642-4121.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Migratory game bird hunting is permitted on the DeSoto National Wildlife Refuge, Iowa, only on the area designated as open to hunting. This area, comprising 355 acres, is delineated on maps available at the refuge headquarters and from the office of the area manager, Kansas City area office, Suite 106, Rockcreek Office Building, 2701 Rockcreek Parkway, North Kansas City, Mo. 64116, telephone area code 816-374-5951. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Only waterfowl species (ducks, geese, coots) may be taken;

2. Shooting hours will be from one-half hour before sunrise to 12 noon each day;

3. All hunting will be by refuge permit only. Advanced reservations for a specific date will be accepted, by mail, or in person, at refuge headquarters between the hours of 8 a.m.-5 p.m., Monday through Friday, through Saturday, September 30, 1978. A drawing to determine successful applicants will be held on Monday, October 2, 1978. Should openings remain following the drawing, reservations will be accepted on a first-come-first-serve basis on and after October 6, 1978. Reservations will not be accepted by telephone;

4. Individuals will be allowed only one reservation at any one time. When this reservation is used, the individual may apply for an unfilled date;

5. Applicants for reservations must be at least 16 years of age or older. A $3 fee must accompany each request for a reservation and this must be in the form of a check or money order made payable to "U.S. Fish and Wildlife Service." Each reservation holder will be entitled to bring two additional hunters with him in order to utilize the three-man blinds. Each person will be charged a $1 blind-use fee when he registers to hunt;

6. Reservations are nontransferrable and fees will not be refunded. No provision shall be made for "standby" hunters;

7. All hunters must hunt from refuge-constructed three-man blinds only. Blinds will be assigned on a drawing basis each day of the hunt. All hunting will be from assigned blinds only with the exception that wounded birds may be pursued and shot within the shooting zone (within 40 yards of blind, as posted). Wounded birds may be pursued beyond this point up to the retrieval zone line (within 100 yards of blind, as posted), but guns must remain within the shooting zone;

8. Hunters will be required to check in and out at the refuge check station on each hunting day.

9. Permit holders must park in assigned parking lots within the hunting area. Nonrefuge hunters may not use the refuge parking areas as access to private lands;

10. Hunters are allowed the use of decoys (personal or rented at check station) and retrieving dogs (one per hunter). Goose decoys, up to 3 dozen per blind, may be rented at the refuge check station at a charge of $1 per dozen. Hunters will be responsible for rented decoys and will be charged for any decoys lost or damaged;

11. Only shotguns capable of holding three shells or less will be permitted.

12. Only steel shot loads will be allowed in the hunting area:

13. A maximum of 25 shells per hunter will be allowed per day.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 22, 1978.

GEORGE E. GAGE,
Refuge Manager.

PART 32—HUNTING

Opening of Valentine National Wildlife Refuge, Nebr., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of Valentine National Wildlife Refuge is compatible with objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 14, 1978, to January 4, 1979.

FOR FURTHER INFORMATION CONTACT:

Robert M. Ellis, Fort Niobrara National Wildlife Refuge, Hidden Timber Route, Valentine, Nebr. 69201, telephone 402-376-3789.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of ducks on Valentine National Wildlife Refuge, Nebr., is permitted during the regular State seasons except on areas designated by signs as closed. This open area is shown on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, 10597 West Sixth Avenue, Lakewood, Colo. 80215. Hunting shall be in accordance with all State and Federal regulations covering the hunting of ducks.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in title 50, Code of Federal Regulations, part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

ROBERT M. ELLIS,
Refuge Manager.

CHAPTER VI—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

Part 652—Surf Clam and Ocean Quahog Fisheries

Amendment to Increase Fishing Time and Reallocation of Quota

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Amendment to final regulations.

SUMMARY: This amendment increases the hours during which surf clams may be harvested in the fourth quarter of 1978. The current 24-hour weekly fishing period is extended to 36 hours. The longer hours are permitted because of a projected surplus of surf clams from the surf clam quota for the third quarter of 1978, and the expected high incidence of adverse fishing conditions during the winter months. It is expected that the additional hours will permit fishermen to harvest and not exceed the total adjusted surf clam quota during the fourth quarter.

EFFECTIVE DATE: 12:01 a.m. October 1, 1978, through 12 midnight December 31, 1978.

FOR FURTHER INFORMATION:

Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: Pursuant to section 302 of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended (Act), a fishery management plan (FMP) for the surf clam and ocean quahog fisheries was prepared by the Mid-Atlantic Fishery Management Council. The FMP was approved in accordance with section 304 of the Act and published on November 25, 1977 (42 FR 60438). Regulations implementing the FMP were published on February 17, 1978 (43 FR 6952) and codified at 50 CFR Part 652.

Section 652.7 of the initial regulations implementing the FMP provides for a 4-day fishing week, Monday through Thursday, subject to adjustment by the Regional Director of the National Marine Fisheries Service to permit the continued catch of surf clams throughout an entire quarter, and to protect the integrity of the quarterly quotas on the harvest of surf clams. Based upon determinations by the Regional Director § 652.7 was amended on February 21, 1978 (43 FR 7208), March 31, 1978 (43 FR 13581), May 5, 1978 (43 FR 19397), and June 26, 1978 (43 FR 27549). These amendments were necessary to prevent the quarterly quota from being exceeded, and to permit the continued harvest of surf clams throughout the entire quarter.

Section 652.7(a)(2) requires the Regional Director, prior to the beginning of each quarter, to determine the level of effort which will permit the continued harvest of surf clams throughout the entire quarter. There is a projected surplus of 50,000 bushels of surf clams from the quota for the third quarter which expires on September 30, 1978. In addition, adverse weather conditions occur during the winter months. Consequently, in accordance with § 652.6(e)(1), the Regional Director has added the surplus of 50,000 bushels of surf clams to the fourth quarter quota of 350,000 bushels for a total of 400,000. The Regional Director also has determined that a thirty-six- (36) hour weekly fishing period will permit the harvest of the total adjusted surf clam quota of 400,000 bushels throughout the fourth quarter.

This change from the present 24-hour weekly fishing period will relieve the present reductions in the fishery. Because of this, the extensive discussion of the fishing effort restrictions in § 652.7 during a series of public hearings held earlier this year and because of the closeness of the fourth quarter, the Assistant Administrator for Fisheries further finds it is unnecessary, impractical, and contrary to the public interest to delay implementation of these amendments. Consequently, the new fishing hours are effective at 12:01 a.m. October 1, 1978.

The Assistant Administrator has determined that this action does not constitute a significant action requiring the preparation of a regulatory impact analysis under Executive Order 12044.

Signed in Washington, D.C., this Friday of September 29, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director,
National Marine Fisheries Service.

50 CFR 652.7(a)(1) is revised as follows:

§ 652.7 Effort restrictions.

(a) *Surf Clams.* (1) Fishing for surf clams shall be permitted during 4 days per week, from 12:01 a.m. (0001 hours) Monday to 12 midnight (2400 hours) Thursday. However, no fishing vessels shall engage in fishing for surf clams for more than 36 hours in any week. For the period from October 1, 1978 to December 31, 1978, inclusive, the authorized fishing periods for surf clams for each vessel shall be periods designated on the letter of authorization from the Regional Director. The letter shall be kept aboard the vessel at all times and shall state those periods in which the vessel is authorized to fish for surf clams. Such periods shall be 12, 18, 24, or 36 hours in duration and cumulatively cannot exceed 36 hours total in one week. No changes in authorized fishing periods will be permitted once a quarter has commenced. All requests for changes for subsequent quarters must be received by the Regional Director 15 days prior to the beginning of the next quarter. Fishing for any part of an authorized period will be counted as one period of fishing. In this paragraph "fishing" means the actual or attempted catching of fish, but not activities in preparation for fishing, such as traveling to or from the fishing grounds.

* * * * *

50 CFR 652.6(a) is amended as follows:

§ 652.6 Catch quotas.

* * * * *

(a) * * *

Oct. 1, 1978 through Dec. 31, 1978	400,000

* * * * *

(Section 302 of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended (Act).)

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[4910-13]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 25 and 121]

[Docket No. 16854; Notice No. 78-15]

AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

Airplane Cabin Ozone Contamination

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice of proposed rulemaking (NPRM) proposes to establish specific airplane cabin ozone concentration standards for the issuance of type certificates for transport category airplanes. Cabin ozone standards are also proposed for the operation of transport category airplanes by all air carriers and commercial operators. The circumstances which created the need for this action were complaints of crewmembers and passengers of physical discomfort, due to ozone gas, on high-altitude flights. This action is intended to alleviate problems due to high-altitude ozone by placing limitations on acceptable levels of cabin ozone concentrations.

DATE: Comments must be received on or before January 5, 1979.

ADDRESS: Send comments on the proposal in duplicate to Federal Aviation Administration, Office of the Chief Counsel, Attn.: Rules Docket (AGC-24), Docket No. 16854, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR INFORMATION CONTACT:

Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-755-8716.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before January 5, 1979, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

AVAILABILITY OF NPRM'S

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

DISCUSSION OF THE PROPOSED RULE

A. BACKGROUND

During the winter of 1976, the FAA received several crewmember and passenger complaints of physical discomfort on high-altitude flights. By March 1977, information from FAA air carrier inspectors, air carriers, and aircraft manufacturers led the FAA to believe that ozone gas (O_3) was the probable cause of many of the crewmember and passenger complaints.

The FAA Flight Standards Service published on July 21, 1977, Advisory Circular No. 00-52, Ozone Irritation During High Altitude Flight, which defined ozone irritation, discussed its causes and symptoms, and described a means of dealing with the problem should it occur in flight.

The FAA initiated a research project on May 26, 1977, to study the health effects of exposure to ozone in the aviation environment. Respiratory, hematologic, visual, and performance parameters are being assessed. In support of this research, an extensive scientific literature search and a review of flight crewmember complaints have been undertaken.

An advance notice of proposed rulemaking (ANPRM) No. 77-22 was issued on September 29, 1977 (42 FR 54427, Oct. 6, 1977), to seek information concerning ozone contamination from air carriers, aircraft manufacturers, crewmember organizations, high-altitude research organizations, health organizations, and other interested persons. The closing date for receiving comments on the ANPRM was December 6, 1977.

B. DISCUSSION OF COMMENTS

The FAA received 42 comments in response to this ANPRM. A synopsis of the comments received on each question asked in the ANPRM follows.

Question one, regarding statistics of ozone contamination of aircraft cabins, drew 17 comments. The comments ranged from in-flight measurements of ambient and aircraft cabin ozone concentrations to a log containing 111 flights with reported crewmember and passenger complaints.

High-altitude ambient ozone concentration levels were reported by several commenters. One comment included data from the National Aeronautics and Space Administration, global atmospheric sampling program (GASP). These reports show, for example, an average ambient ozone concentration at 37,000 feet above New York City to be 0.16 parts per million by volume (ppmv) with peaks to 0.58 ppmv during the high ozone season of March, April, and May. These average and peak values rise with increases in altitude and latitude. Measurements over Anchorage, Alaska, for the same period and conditions show a mean of 0.48 ppmv with peaks to 0.66 ppmv. In addition, GASP measurements in the cabin of a B-747SP airplane without ozone filters showed ozone concentrations which ranged from 0.05 to 0.65 ppmv due to differences in altitude, latitude, season, and weather patterns. Similar cabin data for a B-747-100 ranged from 0.04 to 0.40 ppmv. One commenter completed a cabin monitoring study and reported hourly averages below 0.3 ppmv with peaks of 1.035 ppmv for 2 to 3 minutes. Three commenters stated that they have no

knowledge of ozone contamination in aircraft cabins and thus feel no action beyond a program of continuing research is necessary.

Ozone contamination symptoms were primarily reported on long flights and were usually associated with the B-747 airplane (symptoms were also reported on B-707, DC-8, and DC-10 airplanes).

One commenter reported no problems with corporate jet airplanes at altitudes up to 51,000 feet.

The second question, regarding the health effects of ozone contamination, drew 17 comments. Several commenters submitted extensive summaries of previous research done in the area of ozone toxicology. All but one commenter agreed that there is a potential health problem associated with present cabin ozone concentration levels at jet operating altitudes. An extensive review of ozone research on humans, conducted under the sponsorship of the Environmental Protection Agency (EPA), cited convincing evidence showing that pronounced effects on the mechanical functions of the lungs occur at ozone exposures of 0.37 to 0.75 ppmv for 2 hours under conditions of intermittent moderate exercise. On the basis of other evidence, this review also concluded that changes in mechanical lung function may occur in some persons at ozone concentrations less than 0.25 ppmv for 2 hours, and that there may be some risk of inducing functional changes at levels in the range of 0.15 to 0.25 ppmv.

The risk of harmful effects on a person's respiratory system increases with the concentration of ozone experienced, the frequency of exposure, and the intensity of exercise of the exposed person. The EPA concluded that there is not a sharp dividing line between protective responses and potential for pathological consequences. However, the biochemical effects induced by ozone concentration levels of 0.1 to 0.2 ppmv appear to be largely adaptive while effects caused by levels of 0.5 and greater have definite toxic potential. Other comments pointed out the increased effects ozone contamination can produce on young children and persons with respiratory disease.

Comments to the third and seventh questions dealing with possible aircraft design changes and the best solution to the aircraft cabin ozone contamination problem are grouped together, as virtually all commenters believe that the solution to the ozone problem is a mechanical fix rather than an operational or forecasting solution. Two basic ozone reduction design concepts were submitted: Charcoal filters and catalytic converters. Some commenters reported that available charcoal filter designs have unacceptable weight and fuel penalties. A few commenters reported new catalytic converter designs which they consider effective and economically feasible. Four comments were also received suggesting ozone monitors and backup systems such as the use of high-pressure bleed air at a temperature sufficient to disassociate ozone and a readily available supply of auxiliary oxygen for passenger use.

Question four, regarding the feasibility and availability of ozone meters, drew 20 comments from various interested commenters. Some of these commenters reported systems which they felt were operationally feasible and functional, or expressed confidence that such units would be available as soon as a demand is created. Five commenters recommended requiring ozone meters on aircraft and one recommended that the FAA or an independent group monitor ozone. Three commenters indicated that an ozone meter for use by flightcrews is infeasible and unnecessary.

Forecasting of atmospheric ozone concentration, as mentioned in question five, received eight direct comments. The consensus was that forecasting may be of some general value but that forecasting techniques were not available to predict ozone concentrations for a given flight, date, and altitude.

Question six, concerning the use of operational procedures to reduce ozone contamination, received 11 comments. Nine commenters suggested procedures such as switching on high-pressure bleed air to disassociate the ozone or reducing flight altitude to seek a lower ozone concentration. Two commenters reported that changing operational procedures would not be practical or economical, especially considering that atmospheric ozone concentrations can vary dramatically in the time it would take to get clearance to change altitude or the aircraft's flightpath.

The last question, number eight, asked whether each certificate holder should warn passengers on high-altitude flights of the possibility of exposure to high levels of ozone and the ensuing health effects. This query received 19 comments with 11 commenters against and 8 for the proposal. The majority of those opposed to warning the passengers cited: (1) The numerous other physiological problems and health risks associated with flying for which no warning is given, (2) the expense of written warnings, and (3) the alternative of fixing the problem and avoiding undue alarm to the public. Three commenters expressed the view that there is not enough evidence of a health hazard to justify a written warning to the passengers. Those in favor of the warning felt that the passengers should be warned of the hazards to allow sensitive persons to avoid the irritation and adverse health effects.

C. ANALYSIS

Based on a review of comments received in response to ANPRM No. 77-22, the FAA has concluded that specific airplane cabin ozone concentration standards should be established in parts 25 and 121 of the Federal Aviation regulations (14 CFR Parts 25 and 121). The FAA belives that it is not necessary to establish cabin ozone concentration standards for aircraft certificated under part 23 or operated solely under part 91 or 135 (14 CFR Parts 23, 91, and 135). This belief is based upon a review of the comments to the ANPRM which indicated that there was no problem justifying the institution of rulemaking procedures for these types of aircraft and operations. However, additional comments may be submitted by interested persons with respect to the desirability of extending the coverage of this proposal to encompass these areas.

The part 25 amendment would establish a limitation for in-cabin high-altitude ozone of 0.3 ppmv for all new transport category airplane design specifications. It would also establish a 2-hour time-weighted average limit of 0.1 ppmv. Consistent with this, the part 121 amendment would require certificate holders to demonstrate, for transport category airplanes, by analysis or tests, that in-cabin high-altitude ozone levels will not exceed a 0.3 ppmv limit for all flight segments. Further, for flight segments with scheduled block times in excess of 3 hours, a concentration standard of 0.1 ppmv is proposed. This standard is computed as a time-weighted average over the scheduled length of an individual flight segment.

For the purpose of this notice, high-altitude ozone is the natural ozone manufactured by the sun in the atmosphere above 18,000 feet (FL 180). Flight level 180 has been selected as a place to start controlling airplane cabin ozone because it is implicit in a review of atmospheric statistics that some division is needed to separate the upper atmosphere-controlled ozone region from that region where a significant portion of the pollution is derived from human activities, especially near large urban areas.

The 0.1 ppmv time-weighted average is the primary controlling standard, and eliminates the possibility that relatively long-duration flights will expose passengers and crewmembers to ozone levels which might prove symptomatic or unhealthy. This standard is adopted from Occupational Safety and Health Administration

V 43 / 194 OCT 5 78 LIM

(OSHA) standards instead of the U.S. ambient air quality standard because the OSHA standards more accurately reflect the nature of the exposure aboard airplanes than does the U.S. ambient air quality standard. Section 1910.1000 of chapter XVII, Occupational Safety and Health Regulations (29 CFR 1910.1000), provides that an employee's exposure to ozone in any 8-hour work shift of a 40-hour workweek shall not exceed the 8-hour time-weighted average limit of 0.1 ppmv.

The limit of 0.3 ppmv is taken from standards adopted by government and industrial hygiene specialists. A 0.3 ppmv exposure is allowable under the OSHA 0.1 ppmv 8-hour time-weighted average limitation which would permit a 2-hour exposure to ozone of 0.3 ppmv. The intent of incorporating this limit for aviation is to eliminate the possibility of exposures to relatively high ozone levels for brief periods of time.

Compliance with the proposed parts 25 and 121 ozone concentration standards must be demonstrated by analysis or tests of atmospheric and cabin ozone concentration for each airplane type. This will be accomplished by showing that the airplane's systems are capable of destroying enough atmospheric ozone prior to its entering the cabin the meet the cabin ozone standards or that the airplane will not penetrate atmospheric ozone concentrations above the standards. It is expected that many short-range transport category airplanes will be able to demonstrate compliance without a hardware modification. Demonstrations that cabin ozone concentrations are in compliance with the proposed standards may be based on specific routes, altitudes flown, and atmospheric ozone statistics acceptable to the Administrator. One such set of statistics is contained in appendix A of Department of Transportation Report No. FAA-EQ-78-03, Guidelines for Flight Planning During Periods of High Ozone Occurrence. To demonstrate compliance, a statistical analysis must show, at a statistical confidence of 84 percent, that the applicable standards are met.

While the 0.3 ppmv in-cabin ozone limit applies to all flight segments, above flight level 180, of transport category airplanes under part 121 operations, the 0.1 ppmv time-weighted average has been applied only to those flight segments that exceed a scheduled flight time of 3 hours. An airplane on a flight segment with a scheduled flight time of 3 hours could only be flying in high concentrations of high-altitude ozone (above FL 180) for approximately 2 hours, based on conservative times for start, taxi, takeoff, climb, descent, approach, and landing. Thus, the total high-altitude ozone exposure on a flight of 3 hours or less could not exceed that exposure permitted by OSHA for an 8-hour work shift.

This notice is specifically requesting comments on the ozone concentration levels proposed. The FAA will also consider any other levels, that are based upon proper scientific data, which commenters propose.

The FAA believes that a 6-month period should be sufficient for part 121 certificate holders to comply with this proposal. This is in part based on GASP data which shoes that modifying the air conditioning system of one airplane type and adding a currently available ozone filter have reduced the cabin ambient ozone concentration ratio from 80 percent to 5 percent. The FAA does, however, solicit comments regarding the problems involved in compliance and the scope of the proposed amendment.

Regulatory Evaluation

Under the regulatory reform policies of the Secretary of Transportation and the FAA Administrator, a draft regulatory evaluation of this proposed rule has been completed and is available in the FAA rules docket at the address above, in docket No. 16854, for public review and comment.

This notice proposes requirements which would provide an increase in health and safety to crewmembers and passengers on flights above FL 180. The FAA has decided to set airplane cabin ozone concentration standards, for transport category airplanes, as a means of solving the cabin ozone contamination problem rather than to prescribe a specific corrective action or to warn passengers. This regulatory approach will insure a safe solution to the problem without imposing overly burdensome requirements. By not requiring a specific corrective action, the FAA is encouraging the development of ozone disassociation technology and providing part 121 certificate holders and transport category airplane manufacturers the flexibility to comply with the proposed amendment in a manner best suited to their specific airplanes or operations. They may show compliance with the ozone concentration standards by presenting to the Administrator an analysis which demonstrates that the standards will not be exceeded in their airplanes in specific flight operations. If a flight operation cannot meet the standards, the certificate holder has the option of selecting an alternate route of flight amending its flight operations procedures, or modifying its airplane to insure that the standards are met.

The FAA has elected not to warn passengers of the ozone contamination problem because it believes that the public interest can best be served by correcting the problem. With the adoption of this amendment, the problem of in-cabin high-altitude ozone should be solved and therefore there is no reason for a warning. Setting ozone concentration standards serves to protect all passengers in a much more effective way than does a requirement to warn passengers of a potential problem.

Due to the lack of economic data received in response to the ANPRM, comments are solicited from all interested parties on the economic effect of this proposed amendment. These comments will be considered prior to final rulemaking and should specify capital investment, operating, maintenance, administrative, and other costs.

Drafting Information

The principal authors of this document are Charles H. Huettner, Flight Standards Service, and Howard A. Bartnick, Office of the Chief Counsel.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend parts 25 and 121 of the Federal Aviation Regulations (14 CFR Parts 25 and 121) as follows:

1. By the addition of a new section to part 25 to read as follows:

§ 25.832 Cabin ozone concentration.

The airplane cabin ozone concentration during flight above flight level 180 must be shown not to exceed—

(a) 0.3 parts per million by volume; and

(b) 0.1 parts per million by volume time-weighted average during any 2-hour interval. Compliance with this section must be shown by analysis or tests based on airplane operational procedures and performance limitations.

2. By the addition of a new section to part 121 to read as follows:

§ 121.578 Transport category airplane: Cabin ozone concentration.

After (6 months after effective date) no certificate holder may operate a transport category airplane above flight level 180 unless it has successfully demonstrated to the Administrator that the concentration of ozone inside the cabin will not exceed—

(a) 0.3 parts per million by volume; and

(b) For each flight segment that exceeds 3 hours, 0.1 parts per million by volume time-weighted average over that flight segment.

For the purpose of this section "flight segment" means the scheduled nonstop flight time between any two airports. Compliance with this section must be shown by analysis or tests

baed on airplane operational procedures and performance limitations.

(Secs. 313, 601, 603, and 604, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354, 1421, 1423, and 1424); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.45 of the Federal Aviation Regulations (14 CFR 11.45).)

Issued in Washington, D.C., September 27, 1978.

J. A. Ferrarese,
Acting Director,
Flight Standards Service.

[14 CFR Part 39]

[Docket No. 78-WE-14-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas DC-10 Series Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require inspection and possible rework of certain autopilot wiring in DC-10 series airplanes. Deactivation of the automatic landing mode is an alternative to inspection rework. Results of inspections have revealed wire-to-wire chafing in the wires associated with the automatic landing system which could produce landing performance outside of FAA certification limits. The proposed AD is needed to prevent potentially unsafe landing performance.

DATES: Comments must be received on or before December 8, 1978.

ADDRESSES: Send comments on the proposal in duplicate to: Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, World Way Postal Center, Los Angeles, Calif. 90009.

The applicable DC-10 service bulletin may be obtained from: McDonnell Douglas Corp., 3855 Lakewood Boulevard, Long Beach, Calif. 90846, Attention: Director, Publications and Training, CI-750, (54-60).

Also a copy of the service bulletin may be reviewed at, or a copy obtained from: Rules docket in room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591; or Rules docket in room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, Calif. 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Interested persons are also invited to comment on the economic, environmental and energy impact that might result because of adoption of the proposed rule. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on a proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the rules docket.

Inspection of 22 airplanes have revealed instances of wire damage caused by wires chafing in the empennage area of DC-10 series airplanes. The wire chafing causes wire-to-wire faults in the empennage location near the No. 2 engine. Most of the chafing wires are associated with the flight guidance system and some are critical to the autopilot "land" mode, (automatic landing system). These wire-to-wire faults when coupled with a second failure in the autopilot "land" mode could allow performance outside the certified landing limits. The critical wire-to-wire faults are detectable through the use of the electric inspections specified herein.

Since this condition is likely to exist or develop on other airplanes of the same type design with an activated autopilot "land" mode, the proposed AD would require the following to be accomplished.

Deactivation of the autopilot "land" mode, unless specified inspections of certain wire bundles are made. While the inspections will prolong the use of the "land" mode, eventual deactivation is required unless the specified wire bundles are replaced. If the wire bundles are replaced, the replacement wire bundles are also subject to inspection considering the age of the wire bundles rather than the age of the airplane. The manufacturer plans to develop wire bundles which, when available, will provide for intrinsic detection of the wire-to-wire faults and operation of the autopilot "land" mode without the inspections defined herein.

Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

McDonnell Douglas: Applies to DC-10-10, -10F, -30, -30F and -40 series airplanes certificated in all categories.

Compliance is required as indicated.

To reduce the probability of an autopilot "land" mode failure that could cause automatic landing system performance outside the certification limits, accomplish the following, unless already accomplished:

a. Within the next 100 hours' time in service from the effective date of this AD, on airplanes with 30,000 or more hours of service on wire bundles serviced by receptacles R5/P1-226, R5/P1-267, R5/P1-281 or R5/P1-282:

1. Deactivate the autopilot "land" mode in accordance with paragraph (d) of this AD; or

2. Replace wire bundles with like serviceable parts and comply with the inspection schedule of paragraph (b) of this AD.

b. Within the total time in service on the wire bundles identified in paragraph (a) and as specified in the following table:

Total hours' time in service on wire bundles	Initial inspection	Repetitive inspections
10,000 to 12,999	Within 3,000 additional hours' time in service after the effective date of this AD.	3,000 hours' time in service intervals.
13,000 to 14,999	Prior to accumulation of 16,000 hours' time in service.	3,000 hours' time in service intervals.
15,000 to 24,999	Within 1,000 additional hours' time in service after the effective date of this AD.	3,000 hours' time in service intervals.
25,000 to 25,999	Within 1,000 additional hours' time in service after the effective date of this AD.	1,000 hours' time in service intervals.

1. Perform the initial and repetitive inspections indicated in paragraph 2 of McDonnell Douglas Alert Service Bulletin A24-99, dated June 19, 1978; or

V 43/194 OCT 5 78 UMI

2. Deactivate the autopilot "land" mode in accordance with paragraph (d) of this AD.

NOTE.—Service Bulletin A24-99, dated June 19, 1978, is the only version of the service bulletin suitable for compliance with paragraphs (a) and (b) of this AD.

c. If wire-to-wire faults are found during the inspection of (b)(1), before further flight:

1. Deactivate the autopilot "land" mode in accordance with paragraph (d) of this AD; or

2. Replace wire bundles with like serviceable parts and comply with the inspection schedule of paragraph (b) of this AD.

d. Deactivation of the autopilot "land" mode shall be accomplished as follows:

1. Coil and stow wires 1C512B24 and 2C512B24 or 1C512M24 and 2C512M24 as applicable.

2. Placard the autopilot "land" mode inoperative.

e. For autopilot wiring defined in paragraph (a) with 10,000 or more hours' time in service, prior to reactivation of autopilot "land" mode following deactivation for any reason, the initial inspection of paragraph (b) of this AD must be accomplished.

f. Upon request of an operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Aircraft Engineering Division, FAA Western Region, may adjust the initial and repetitive inspections at intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

g. Equivalent inspection procedures and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

h. Special flight permits may be issued in accordance with FAR's 21.197 and 21.199 to authorize operation of aircraft to a base where the modification required by this AD may be performed.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document is not significant in accordance with the criteria required by Executive Order 12044 and set forth in the interim Department of Transportation guidelines.

Issued in Los Angeles, Calif., on September 22, 1978.

M. C. BEARD,
Acting Director,
FAA Western Region.

[Airspace Docket No. 78-ASW-45]

TRANSITION AREA

Proposed Alteration: Killeen, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of the action being taken is to propose alteration of the transition area at Killeen, Tex. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new instrument approach procedure to the Killeen Municipal Airport. The circumstance which created the need for the action was the establishment of a nondirectional radio beacon (NDB) south of the airport.

DATES: Comments must be received on or before November 6, 1978.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex. An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch, ASW-536, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart G § 71.181 (43 FR 440) of FAR part 71 contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting IFR activity. Alteration of the transition area at Killeen, Tex., will necessitate an amendment to this subpart.

COMMENTS INVITED

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before November 6, 1978, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. box 1689, Fort Worth, Tex. 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

THE PROPOSAL

The FAA is considering an amendment to subpart G of part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area at Killeen, Tex. The FAA believes this action will enhance IFR operations at the Killeen Municipal Airport by providing additional controlled airspace for aircraft executing proposed instrument approach procedures using the newly established NDB located south of the airport. Subpart G of part 71 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 440).

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) by altering the Killeen, Tex., transition area to read as follows:

KILLEEN, TEX.

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Hood AAF (lat. 31°08'15" N., long. 97°42'50" W.); within a 7-mile radius of Robert Gray AAF (lat. 31°04'20" N., long. 97°49'45" W.); within 9.5 miles west and 5 miles east of the Hood VOR 352° and 172° radials extending from 2 miles north of the VOR to 12 miles south of the VOR; within 5 miles southeast and 9.5 miles northwest of the Hood VOR 219°T(210°M) radial extending from the VOR to 19 miles southwest of the VOR; within 3.5 miles each side of the 337° bearing from STARN RBN (lat. 31°10'03" N., long. 97°52'41" W.) extending from the 7-mile radius area to 11.5 miles north of the RBN; within a 5-mile radius of Killeen Municipal Airport (lat. 31°05'15" N., long. 97°41'00" W.), within 3.5 miles each side of the 197° bearing from the proposed NDB (lat. 31°01'26" N., long. 97°42'28" W.), extending from the 5-mile radius to 11.5 miles southwest of the proposed NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978.).

Issued in Fort Worth, Tex., on September 22, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[6351-01]

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 170]

REGISTERED FUTURES ASSOCIATIONS

Proposed Standards Governing Commission Review of Applications for Registration As a Futures Association; Form of Registration Statement

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commodity Futures Trading Commission is proposing to adopt standards to be applied by the Commission in determining whether to register an applicant futures association under section 17 of the Commodity Exchange Act.[1] In order for a futures association to be registered by the Commission, section 17(b) requires that "the Commission finds, under standards established by the Commission" that an applicant association is in the public interest and that it will be able to comply with the provisions of and to carry out the purposes of section 17.[2] The proposed standards reflect the Commission's preliminary views on the more general requirements imposed on futures associations in section 17 as well as the Commission's perception of the nature of activities in which associations should engage and the types of rules an association should be able to develop and implement in order to effectuate the purposes of that section. In addition, the Commission is requesting comment on the proposed form of the registration statement to be filed with the Commission by an applicant futures association as well as the information that should be contained in that statement.

DATE: Comments must be received on or before November 8, 1978.

ADDRESS: Written comments should be sent to Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581.

FOR FURTHER INFORMATION CONTACT:

Mark D. Young, telephone 202-254-5716.

SUPPLEMENTARY INFORMATION: Prior to the enactment of the Commodity Futures Trading Commission Act of 1974, only commodity exchanges that had been designated as contract markets were specifically authorized under the Commodity Exchange Act to exercise self-regulatory authority by monitoring certain aspects of futures trading. However, title III of the Commodity Futures Trading Commission Act of 1974, Pub. L. No. 93-463, § 301, 88 Stat. 1406 (1974), added section 17 to the Commodity Exchange Act and contemplates the creation of new self-regulatory organizations—registered futures associations—of persons engaged in commodity futures trading and related activities. Title III provided the Commission with discretionary authority to register futures associations, should the Commission find that an applicant organization could serve the public interest and could satisfy the requirements of section 17.

The Commodity Exchange Act sets forth certain specific functions that registered futures associations may perform. For example, futures associations might adopt and administer written proficiency examinations for persons wishing to register with the Commission as futures commission merchants, associated persons and floor brokers.[3] In addition, associations might promulgate and assure adherence to association rules designed to combat unethical behavior, thereby assisting the Commission in detecting and punishing fraudulent, manipulative or other unlawful conduct by persons subject to the Commission's jurisdiction.[4]

Once an association is registered by the Commission, section 17 further contemplates that the Commission will perform a continuing and extensive oversight role concerning the activities of the association. For example, the Commission is empowered to review and approve all association rule changes,[5] to abrogate any rule of an association if it appears to the Commission that such action "is necessary or appropriate to assure fair dealing by the members of such association, to assure a fair representation of its members in the administration of its affairs or effectuate the purposes of this title," and to supplement or alter association rules in the public interest or for other purposes.[6] In addition, any person disciplined by or denied membership in an association may seek review by the Commission of the association's action or the Commission, on its own motion, may review the action.[7] The Commission is also authorized to revoke or suspend the registration of a futures association,[8] to expel or suspend the membership of any person in such an association,[9] and to remove from office any director or officer of a registered association for willfully failing to enforce association rules or for willfully abusing his or her authority.[10]

LEGISLATIVE HISTORY OF TITLE III

During the congressional deliberations which culminated in the Commodity Futures Trading Commission Act of 1974, one of the most consistent themes of the hearings and debates was a concern that the existing self-regulatory emphasis of Federal futures regulation no longer adequately served the broad public interests involved in the Nation's rapidly expanding futures markets.[11] As a result, the Commodity Futures Trading Commission was created and was armed with new and enhanced oversight and enforcement powers for regulating contract markets. In addition, the 1974 amendments brought three classes of commodity professionals under regulation by the Federal Government for the first time: Commodity trading advisers, commodity pool operators and associated persons of futures commission merchants. Unlike floor brokers and futures commission merchants who are members of commodity exchanges and who were previously regulated under the Act, these three newly-regulated categories of persons are not directly subject to the self-regulation that exchanges provide. Furthermore, the Commission believes that a growing number of futures commission merchants have relinquished their exchange memberships with the advent of negotiated commission rates. To deal with this phenomenon, the Act specifically empowers the Commission to impose regulatory requirements on those persons who are not members of contract markets.[12] In ad-

V 43 / 194 OCT 5 1978

dition, futures associations formed under section 17 could prove to be a valuable self-regulatory mechanism to complement Commission regulation of these commodity professionals.

In hearings before the House Committee on Agriculture and the Senate Committee on Agriculture and Forestry on legislation to amend the Commodity Exchange Act, many witnesses addressed the propriety of authorizing the creation of registered futures associations as a new form of self-regulation for the industry.[13] A recurrent theme of this testimony was the comparison of such an association to the National Association of Securities Dealers, Inc. ("NASD").[14] Proponents of futures associations believed that such organizations, like the NASD, could complement the regulatory efforts of the Federal agency overseeing the industry and assist in improving the caliber of persons in the industry who deal with the public.[15]

[13] See, Hearings Before the House Committee on Agriculture Concerning Review of Commodity Exchange Act and Discussion of Possible Changes, 93d Cong., 1st Sess. Ser. No. 93-GG, 94 (1973) ("October House Hearings"); Hearings Before the House Committee on Agriculture on H.R. 11195, 93d Cong., 2d Sess. Ser. No. 93 TT, 18-19, 46, 55, 101-102, 116, 127, 262 (1974) ("January House Hearings"); Hearings Before the Senate Committee on Agriculture and Forestry on S. 2485, S. 2578, S. 2837 and H.R. 13113, 93d Cong., 2d Sess. 231, 510, 542-543, 548-549, 718-719, 721, 729, 739-740 (1974) ("Senate Hearings").

[14] See, October House Hearings at 94, January House Hearings at 19, 46, 101-102, 184 and 328. See, Senate Hearings at 718-719, 721 and 740.

[15] See, October House Hearings at 94, January House Hearings at 262 and 328-329; Senate Hearings at 427 and 751; 120 Cong. Rec. 10737 (Apr. 11, 1974) (statement of Representative Poage); 120 Cong. Rec. 10749 (Apr. 11, 1974) (statement of Representative Thone).

There are two significant limitations on the value of any analogy drawn between registered futures associations as contemplated by section 17 of the Act and the NASD, which has been registered as a securities association under the Securities Exchange Act of 1934. First, the NASD, was established in order to regulate directly a specific market: the over-the-counter securities market. As such, the Maloney Act of 1938, which amended the Securities Exchange Act, authorized the creation of registered securities associations in order to fill a regulatory gap by providing for an exchange-like organization to regulate the over-the-counter market. (See H.R. Rept. No. 75-2307, 75th Cong., 3d Sess. (1938) and S. Rept. No. 75-1455, 75th Cong., 3d Sess. (1938).) There is, however, no lawful over-the-counter market in the futures industry. Thus, futures associations, as contemplated by section 17, would not regulate directly a specific, single market. Since futures associations lack the sharp primary purpose of the NASD, the establishment of a futures association is necessarily a more difficult task.

Secondly, it is important to note that the NASD evolved from other industry associations that had been monitoring the over-the-counter securities markets prior to the enactment of the Maloney Act. Under the National Recovery Administration, the Investment Bankers Code Committee was formed in 1933 to prepare and enforce an industry code governing conduct relating to the over-the-counter market. This committee was disbanded as a result of the Supreme Court's decision in *A.L.A. Schechter Poultry Corp. v. United States*, 295 U.S. 495 (1935) (National Recovery Act held to be unconstitutional). However, shortly after this decision a new organization was created under the supervision of the Securities and Exchange Commission—the Investment Bankers Conference Committee—which assumed the responsibilities of its predecessors. It was soon determined that legislation was the only appropriate means for affording adequate self-regulation to the over-the-counter market. Thus, a new group was formed—the Investment Bankers Conference—which assisted the SEC in developing and implementing the legislation which became the Maloney Act. See, Report of the Special Study of the Securities Market of the Securities and Exchange Commission, H. Doc. No. 95, pt. 4, 88th Cong., 1st Sess. 604-607 (1963). The Commission has not had the benefit of an ongoing regulatory relationship with an association analogous to the forerunners of the NASD.

The House Committee on Agriculture reported out a bill, H.R. 13113, which authorized the creation of registered futures associations. The committee explained that its legislation

> • • • provides enabling authority at the discretion of the Commission for persons registered under the Act and in the commodity trading business to establish a voluntary futures association or associations which would have authority to regulate the practices of its members in the public interest. Such an association would register with the Commission and establish a uniform code of professional conduct for those in the commodities business and have disciplinary authority over its members. • • • Association activity would serve solely as a complement rather than a displacement to the authority of the new Commission.
>
> • • • • •
>
> There would be two stated inducements for belonging to a registered futures association: Each registrant not a member of such an association would (1) be required to pay such fees and charges as the CFTC would establish to defray any costs of additional regulatory duties required to be performed by the [CFTC] because such person is not a member of a registered futures association, and (2) be subject not only to the obligations and requirements of the Act imposed on other persons but such other requirements and obligations as the CFTC found necessary to protect the public interest and promote just and equitable principles of trade.
>
> • • • • • •
>
> The Committee reiterates that the authority provided for the recognition of an association as provided in this title is a grant of discretion for registration to the Commission, to be exercised by the Commission under the terms and conditions provided in this title, and orders and regulations adopted by the Commission to implement the statutory language. However, an association once registered with the Commission may be suspended under the terms and conditions provided in title III.[16]

The House of Representatives adopted H.R. 13113 as recommended by its Committee on Agriculture on April 11, 1974.[17]

The Senate Committee on Agriculture and Forestry was uncertain of the benefits that would result from the immediate creation of a new self-regulatory association. Consequently, that Committee's report on H.R. 13113 authorized the "Commission to investigate the need for legislation providing for the registration of futures associations • • • [and] to report its findings to Congress within two years." [18] The Senate adopted the approach taken by the Committee on Agriculture and Forestry.[19]

The Conference Committee generally accepted the House provisions concerning futures associations and required the new Commission to inform Congress annually of the developments relating to registered futures associations.[20] These provisions subsequently were enacted and signed into law as title III to the Commodity Futures Trading Commission Act of 1974.

Commission Experience to Date

Title III of the Commodity Futures Trading Commission Act of 1974 envisioned that the members of the futures industry would generate and create proposals for the formation of futures associations. The Commission would assist this process by establishing appropriate standards and the precedural framework required by the Act in order that organizations could apply for registration and the Commission could determine whether to register particular applicants. In addition, section 17 vested in the Commission statutory power that would allow the Commission to act as a catalyst for the formation of a futures association. Under sections 17 (d) and (e) of the Act,[21] the Commission may impose additional fees to defray the costs of regulating nonmembers of futures associations and may adopt specific regulations governing the conduct of such persons. As stated by the House Committee on Agriculture in its report cited above, such fees and regulations could provide a possible incentive for the creation of futures associations.

[16] H.R. Rep. No. 93-975, 93d Cong., 2d Sess. 4, 17 and 30 (1974).

[17] 120 Cong. Rec. 10769 (Apr. 11, 1974).

[18] S. Rep. No. 93-1131, 93d Cong., 2d Sess. 4 (1974).

[19] 120 Cong. Rec. 30468 (Sept. 9, 1974).

[20] Section 17(m) of the Act, 7 U.S.C. 21(m) (1976); H.R. Rep. No. 93-1383, 93d Cong., 2d Sess, 39 (1974) (Report of Conference Committee).

[21] 7 U.S.C. 21 (e) and (f) (1976).

And, as noted above, section 8a(8) of the Act grants broad rulemaking authority over registrants who are not members of contract markets.

To date the Commission has not utilized these statutory provisions. Instead, the Commission has undertaken to study the concept and practice of self-regulation in the futures industry. This analysis, it was hoped, would provide the Commission with a realistic understanding of the contribution futures associations might make to the existing scheme of regulation of commodity professionals. Accordingly, on August 5, 1975, the Commission created the Advisory Committee on the Regulation of Contract Markets and Self-Regulatory Associations, chaired by Commissioner Read P. Dunn, Jr.[22] In his final report on the activities of his Advisory Committee, Commissioner Dunn explained:

> The Committee members expressed interest in discussing specific items in the areas of Commission-industry interface and industry self-regulation, but did not seem ready to try to develop general principles applicable to these areas. Lacking such principles, the Committee did not appear to be ready to face the question of whether a title III organization is necessary or even desirable.
>
> Considering this atmosphere, the Chairman decided that further Committee discussions in this area would not be fruitful. Rather, he believed that better purpose would be served if industry members gave such questions further consideration. It was recognized that there had been ongoing discussions among the exchanges and among certain FCM's.
>
> • • • • •
>
> As this report is being finalized in December 1976, active industry discussions are ongoing looking toward the formulation of a proposal to the Commission for an industry-wide self-regulatory association under title III of the Act.[23]

Certain of the industry discussions referred to by Commissioner Dunn in his report are reflected in correspondence received by the Commission. In August 1976, John W. Clagett, president of the Futures Industry Association, Inc. ("FIA"), proposed that his organization "apply initially (for registration as a futures association) for the limited responsibility of establishing minimum training and experience qualifications and to conduct preliminary investigations and examinations of competency for associated persons."[24] Mr. Clagett also suggested that once his association had established its capability to perform these functions, the responsibilities of the association might be expanded to include customer suitability rules, advertising and public relations guidelines, customer complaints and public protection, industrywide arbitration procedures, disciplinary sanctions on a standardized basis, and minimum financial competency standards for futures commission merchants, commodity pool operators, and commodity trading advisers.

In September 1976, the Commission received a letter concerning formation of the National Futures Association ("NFA"), which was designed to fulfill the requirements of section 17 of the Act as a registered futures association.[25] In this letter counsel for the organizing committee of the NFA outlined the organization's initial precepts and plans, and contended that the

> public interest would be best served by a single organization under § 17 with the capability to undertake all functions contemplated in § 17. • • • [A] § 17 organization should give priority to regulatory and administrative functions that lie outside the jurisdiction of the designated contract markets and should undertake functions within contract market jurisdiction only with such markets, prior concurrence.[26]

Membership in the NFA was to be limited to three categories or classes: (1) Contract markets, (2) futures commission merchants with contract market membership privileges, and (3) all other commodity professionals. NFA proposed to begin by concentrating on the performance of four functions: (a) Adoption of comprehensive standards of surveillance and discipline of its members, (b) financial rules for members not subject to the Commission's financial requirements or those of contract markets, (c) a nationwide customer grievance procedure, and (d) standards for examination and registration of associated persons.

Subsequently, the board of directors of the FIA reviewed the organizational documents of the NFA and determined to defer further development of its plans to apply for registration as a futures association.[27] The FIA stated that in its view the public interest could be better served if the NFA were organized so that the commodity exchanges, if they so desire, could avail themselves of certain audit and investigative services provided by the NFA.

At the same time another group was considering applying to the Commission for registration as a futures association. The Commodity Options Dealers Association, Inc. ("CODA") informed the Commission that the organization's principal purpose was to register as a title III association under section 17 of the Act.[28] Counsel for CODA recognized that the Commission had not established the procedural requirements necessary for entertaining applications from futures associations and, accordingly, submitted to the Commission on a "pre-filing basis" a draft version of CODA's articles of incorporation and bylaws. CODA purported to be an independent self-regulatory organization designed to regulate its members—futures commission merchants or other persons registered with the Commission who engage in commodity options transactions. Counsel for CODA explained his organization's rationale for proposing the registration of an association of option dealers to be independent from a proposed national futures association:

> We are aware that the National Futures Association ("NFA") has also been organized for the purpose of registering as a "Title III" organization. However, some of the issues and problems inherent in the commodity options business may be sufficiently separate and distinct from the issues and problems of the futures industry at large that a separate organization, such as CODA, would be appropriate. In our opinion, CODA, or a similar organization, is required in the public interest.[29]

Shortly thereafter the Commission was informed of the further activities of the organizers of CODA. In a letter from counsel to CODA it was stated

> it is appropriate and in the public interest to proceed with the continued organization of CODA on a track which parallels the Commission's promulgation of its definitive option regulations • • •. [W]e intend to shortly resolicit the 25 to 30 firms with which CODA has previously communicated, together with ICCH [International Commodity Clearing House, Ltd., London] in an attempt to bring such firms together to more actively participate in more formally structuring CODA and with an eye toward registering CODA as a title III organization with the Commission.[30]

However, the Commission never has been officially informed of the results of CODA's resolicitation efforts. Therefore, the Commission assumes that the organization's development faltered or has been held in abeyance.

On January 31, 1977, the organizing committee of the NFA submitted to the Commission draft articles of incorporation, a document entitled "Points of Agreement—With Committee Intent" and a memorandum to the organizing committee from its counsel. This informal proposal was placed before the Commission in order to facilitate and encourage discussion of certain issues involved in the registration of futures associations. The NFA proposal included a new aspect which

was explained by counsel for NFA as "the difficult problem of how to assure that all companies handling customer business in the futures or options industry will join the NFA * * *."

The organizing committee proposes that the NFA take the initiative in the following way:

(1) The NFA would prohibit its own members from handling customer business in futures or options for any firm that is not a member of NFA; and

(2) Independently, contract markets would require their member firms doing customer business to join the NFA.[31]

This approach, in effect, would make NFA membership a prerequisite for futures commission merchants and commodity professionals to conduct a customer's business in futures contracts or commodity options.[32]

The NFA proposal also envisioned a 15-member board of directors, with 5 members representing each of the classes of membership contemplated by NFA: Class 1 to represent the exchanges, 2 directors representing the largest exchanges and 3 representing the remaining exchanges; class 2 to be comprised of futures commission merchant members who were also members of contract markets; and class 3 to represent all other segments of the industry as well as the public.[33]

Subsequent to this submission, the Commission held a public meeting to discuss title III issues and agreed to the following statement of guidance issued on February 10, 1977:

The organizing committee of the National Futures Association has presented, in outline form, its concept of a title III association and has asked for some preliminary Commission reaction before proceeding with more organizational work.

The Commodity Exchange Act envisions that the orderly functioning of the futures markets is the joint responsibility of the exchanges and the CFTC and also envisions an industrywide responsibility under title III of the Act. The CFTC endorses this concept of cooperative regulation and considers the NFA proposal to be a valuable first step toward implementing the purposes of title III.

There are certain aspects of the NFA proposal which need further study and perhaps modification, such as those involving incentives to membership, fair representation and fair implementation. The Commission wishes, however, to emphasize that it stands ready to work with the representatives of NFA to establish a viable title III association. While the Commission cannot and will not ignore its responsibilities under the Act, it can and will help to find solutions to problems and to seek alternatives where required.[34]

During the ensuing months, Commission staff and representatives of the NFA corresponded and met to discuss a number of the staff's concerns regarding the NFA's proposals, including the structure of the board of directors and the question of compulsory membership. At a meeting on June 7, 1977, the Commission, recognizing that a formal registration application had not been filed, agreed to the following statement:

The Commission, as a matter of policy, approves the concept of "uniform required membership" as proposed by the NFA organizing committee. This approval is stated "in the abstract," would be applicable to any title III association, and would be the basis for the proposed NFA structure, subject of course to all of the continuing powers and processes of the Commission in the further structuring and implementation of the NFA proposal, or any other title III proposal.[35]

On July 20, 1977, a revised version of the NFA articles of incorporation was submitted to the Commission along with revised "points of agreement" setting forth the organizing committee's intent.[36] While the compulsory membership aspect of NFA's proposal was not amended from the January version, a modifed scheme of selecting an expanded board of directors was proposed in an apparent effort to respond to expressed concerns. The board was to be expanded to 17 directors. Five directors would represent contract markets, and would be selected so that two would represent the exchanges with the largest and second largest contract volume, two would represent contract market members headquartered in New York (unless one or both of these contract markets qualifes as the largest or second largest) and one director selected by those contract markets not represented by the other four directors. There would be five representatives of futures commission merchant members on the board, elected by all futures commission merchants whether or not they were members of exchanges. One director would represent futures commission merchants having 15 or less offices; one would represent futures commission merchants having more than 15 and no more than 50 offices and three would represent futures commission merchants having more than 50 offices.

Five directors would represent and be directly elected by the third category of members, "other participants" in the industry: (1) Persons engaged in manufacturing, processing, refining, or merchandising a commodity traded for future delivery on a contract market, (2) commodity pool operators, (3) commodity trading advisors, (4) broker-dealers in commodity options or leverage contracts, and (5) commercial bankers. To be elected as a director representing one of these classifications, one would not be required to be a member of NFA. Finally, the NFA proposed to select two public directors from among those persons nominated by the Commission or by NFA members.

Additionally, the NFA's modified proposal included an exemption for contract markets against enforcement of association rules,[37] an arbitration or settlement procedure allowing NFA members to bring claims against customers and customers to bring claims against members and the authorization for the assumption by the NFA of the Commission's trial function in reparation cases (see NFA articles of incorporation July 20, 1977, article III, sections 1(c), 1(d), and 2).

A number of reservations about this modified proposal were expressed. Of particular concern was whether NFA's compulsory membership provision was the least anticompetitive means available to the Commission to accomplish the Act's regulatory objectives and, therefore, was consistent with section 15 of the Act.[38] Also, there was concern whether the proposed composition of NFA's board of directors comports with the "fair representation" standard of section 17(b)(5) of the Act.[39] Similar and additional concerns have been expressed by the Antitrust Division of the Department of Justice.[40]

Although the Commission does not necessarily share the views of the Department and is, of course, not obliged to accede to them, the Commission determined, on October 19, 1977, that due to the widespread dissemination of the Department of Justice's comments and the vigor with which they were put forth, the NFA should be afforded an adequate opportunity to respond. NFA's response was received by the Commission on February 2, 1978, and contained its legal analysis supporting NFA's opposition to the substantive matters addressed by the Department.[41]

In addition, the Public Interest Economic Center ("PIE-C"), under contract with the CFTC, undertook a study of the competitive aspects of the futures trading industry and expressed some reservations on the NFA proposal. PIE-C also suggested that as an alternative to compulsory membership, the CFTC require "all persons who transact business in futures markets for third parties to be members of a regulated exchange."[42]

Finally, the Commission recently has received a letter from an attorney purporting to represent a number of commodity professionals interested in establishing under section 17 of the Act "a professional organization to protect the public in the Los Angeles area from the fraudulent selling of commodity futures, commodity options, and leverage contracts." While recognizing that "the ideal situation" would be a national organization, the attorney asserts that people involved in

commodity futures ought to be able to do what they can to keep the crooks out. A regional organization, furthermore, may give some impetus to the formation of a national organization.[43]

Subsequent Legislative Developments

During the present congressional session, successful efforts have been made by the NFA organizers and others to amend certain provisions of section 17 of the Act. Subcommittees of both the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry heard testimony from many witnesses expressing their opinion that a futures association should be created.[44] For example, the House subcommittee was informed that

[w]ith the complete elimination of minimum commissions on March 7, 1978, some futures commissions merchants who are now members of one or more of the commodity exchanges will no longer find it advantageous to retain their exchange membership(s). In which case they will not be subject to the rules or regulations of any exchange.

An association formed under the provision of title III of the Act could provide such uniform rules and regulations as well as audits and investigations of their unscrupulous and unfair business practice.[45]

The Senate subcommittee was told that

[t]he industry has worked to develop a regulatory organization which would apply to the CFTC for approval * * *. This title III organization is designed to regulate all FCM's taking over the responsibility in this area formerly carried out by the exchanges, whereby the exchanges will regulate all activities at the exchange level, such as floor trading practices, contract details, financial integrity of clearinghouse members, et cetera.

Thus, the industry would be regulated through the exchanges concerning exchange operations, and through the title III organization concerning FCM's and their contacts with the public.[46]

Subsequently, the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry recommended the adoption of legislation concerning the powers and scope of futures associations.

The Senate committee reported favorably S. 2391, a bill which, among other things, provided authority for (1) the Commission to delegate certain aspects of the registration of associated persons to futures associations, (2) futures associations to adopt procedures to have customers seek reparations from members of the association, (3) increasing the limit on the amount in controversy in a futures association arbitration proceeding from $5,000 to $15,000, and (4) Commission approval of rules of futures association or contract market requiring compulsory membership in such futures association.[46]

In its report to accompany S. 2391, the Senate committee explained that it had

adopted an amendment to section 17 of the Act to make it clear that the Commission has authority to approve mandatory membership rules of a title III association or of a contract market of persons eligible for membership. The committee believes that the Commission should approve any such rules only after public hearings to determine whether such rules are necessary or appropriate to achieve the purposes and objectives of the Act. The amendments adopted by the committee permit, but do not require, the formation of a title III association or associations in which membership would be mandatory for futures professionals registered under the Act.[47]

During the senate floor debate on this legislation, Senator Patrick J. Leahy stated that the proposed amendments concerning futures associations were being offered in order

to speed the establishment of these associations and to allow them to assume some of the duties currently being conducted by the Commission. These associations could free Commission personnel to engage in other activities.[48]

On July 12, 1978, the Senate passed S. 2391 without amending any of the committee's provisions affecting futures associations.[49]

The House Committee on Agriculture reported favorably H.R. 10285, a bill containing one modification of the Act's provisions concerning membership in future associations. This amendment expressly allows the Commission to approve rules of futures associations that make membership in at least one futures association mandatory for persons eligible for membership.[50] The committee commented that

[u]se of the authority in this amendment would be completely discretionary with the Commission. The committee was persuaded that such discretion may be useful to the Commission if it should decide that such a provision is necessary for an effective self-regulatory program and is otherwise in the interest of the objectives of section 17.[51]

The House passed H.R. 10285, including this amendment, on July 26, 1978.[52]

On August 17, 1978, the Committee of Conference of the Senate and House on S. 2391 agreed to the membership provision contained in the House bill which became the House amendment to S. 2391, expressly permitting the Commission to approve futures association mandatory membership rules. The Conferees also adopted the provisions in S. 2391 that increase the limit on the amount in controver-

sy in futures association arbitration proceedings to $15,000 and authorize the Commission to delegate to a futures association certain aspects of the Commission's registration function for associated persons.[53]

POLICY QUESTIONS

The Commission is in basic agreement with the views expressed by Justice William O. Douglas, then Chairman of the Securities and Exchange Commission, in 1938 when that Commission was considering the formation of a national securities association.

> Self-dicipline is always more welcome than discipline imposed from above * * *. Self-regulation of this kind can be pervasive and subtle in its conditioning influence over business practices and business morality. By and large, government can operate satisfactorily only by proscription. That leaves untouched large areas of conduct and activity; some of it susceptible of government regulation but in fact too minute for satisfactory control; some of it lying beyond the periphery of law in the realm of ethics and morality.[54]

The Commission would like to apply, and believes there is a need to apply, this concept to the formation of registered futures associations. During the past 3 years, the Commission has received and reviewed the comments of many interested persons concerning futures associations. In that time, the Commission has also studied and considered the essential elements of a self-regulatory program and has acquired a better understanding of the professionals and the industry it regulates. The Commission believes that its experience during the past 3 years has served to crystallize some of the major issues of law and policy involved in the registration of futures associations.

The Commission has received many suggestions concerning the possible activities of prospective futures associations. Indeed, the Commission is hopeful that consistent with the requirements of section 17(b) of the Act, futures associations could also perform effectively the following regulatory functions: (1) Devising proficiency standards for commodity trading professionals and related training and testing programs, (2) establishment of safeguards with respect to the financial responsibility of its members, (3) adoption of standards for handling customer orders and funds and related recordkeeping requirements, (4) promulgation of standards for soliciting customer business and preserving the integrity of the marketplace, including advertising and other forms of promotion, and (5) educating the public as to the economic benefits of futures trading. The Commission believes that performance of these functions could be an appropriate means for accomplishing the self-regulatory goals outlined in 1938 by Justice Douglas and for shifting part of the burden and cost of regulation and enforcement to market participants. The Commission believes it more appropriate for persons who directly participate in the futures markets to assume a greater portion of the cost of regulation of those markets than to have general tax revenues pay for the entire cost of regulation.

Of course, even if a futures association is created and registered under the Act, the Commission wishes to make clear that it will not abdicate any of its statutory responsibilities and intends to pay particular attention to monitoring and evaluating the actions of futures associations. It should also be pointed out that the Commission has not made, at this time, any final determination concerning the best mechanism for encouraging the development of futures associations under the Act. Accordingly, the Commission is soliciting public comment not only on the standards it is proposing to apply to registration applications, but also with respect to the following policy questions.

(1) Whether there exists a need for futures association to assist in regulating the futures industry and other enterprises regulated by the Commission? What regulatory void will futures associations fill? What functions should such an association perform?

(2) Should futures associations be structured to allow for self-regulation by particular classes of commodity professionals, e.g., commodity trading advisers regulating commodity trading advisers, rather than to encompass all professionals on an industrywide basis?

(3) What are the benefits and detriments of a national rather than regional futures association?

(4) The Act provides that contract markets may be members of futures associations. What role, if any, should contract markets play in a futures association?

(5) How can a futures association best be structured to assure fair representation of members and otherwise to combat any anticompetitive implications or impact upon its members with respect to its membership policy, financing structure, and professional activities?

(6) Is some compulsory membership aspect of a futures association in the public interest? What public interest would be served by requiring a person to join an association with those with whom he is in competition and to become subject to the full range of the association's disciplinary powers, including expulsion from the association and, therefore, from the commodity industry?

(7) If compulsory membership is desirable, should it be accomplished directly by the rules of associations or through Commission regulations requiring membership in some futures association or indirectly through the imposition by the commission of fees to defray regulatory costs or of other regulatory requirements providing a strong incentive to membership?

(8) In the alternative, should compulsory membership be so structured so as to require all commodity professionals to be members either of a futures association or a contract market?

(9) If permitted by law in the futures, should the Commission delegate to futures associations the responsibility for performing certain functions the Commission presently performs, e.g., registration of associated persons?

(10) Should public hearings be held on the issues surrounding futures associations?

Interested persons are invited to submit comments on these questions and on any other aspect of futures associations discussed in this release or on which they wish to express a view.

PROCEDURAL REQUIREMENTS OF SECTION 17 AND THE COMMISSION'S PROPOSED STANDARDS

Section 17 of the Act provides certain procedural steps for the Commission to take prior to its consideration of an application for registration as a futures association. Section 17(b) of the Act provides that, in making a determination to register an applicant, the Commission must find, "under standards established by the Commission" that the applicant association (A) "is in the public interest" and will be able to comply with and carry out the provisions and purposed of section 17 and (B) meets the specific requirements set forth in section 17(b)(2).[55] In accordance with this authority and its general rulemaking authority under sections 8a (5) and (8) of the Act, 7 U.S.C. 12a (5) and (8), the Commission is proposing these standards as the initial step in the registration procedure. Establishing standards would not only meet this statutory requirement, but should also facilitate the registration process by affording any applicant association an opportunity to develop and to present its qualifications in a manner consistent with the Commission's view of the requirements of section 17(b).

Many of the requirements of subsections 17(b) (1) through (10) of the Act are very specific and need little, if any, elaboration. Other requirements enumerated in section 17(b), however, are more general in nature, and it is toward these that the Commission believes it should direct its efforts to establish appropriate "standards." As indicated above, section 17(b)(5) provides that an association must have "fair representation" for its members. In addition, section 17 requires associations to provide for "equitable allocation of dues among its members" and to establish a "fair and orderly procedure" for disciplining its members.[56] The Commission is proposing these standards as an expression of its views on these general requirements embodied in section 17. Of course, any standards the Commission adopts will merely supplement the requirement of section 17(b)(1) that an association demonstrate "that it will be able to comply with the provisions" of section 17 of the Act.

The standards also are designed to reflect the Commission's preliminary judgment concerning those activities in which a futures association should engage consistent with the "public interest" and to ensure that the association can "carry out" the purposes of section 17. A primary purpose of section 17, expressed by the Conference Committee in 1974, is that futures associations be established to regulate the practices of its members.[57] Accordingly, proposed new § 170.1 of the Commission's regulations requires that an association should be able to demonstrate its ability to require its members to adhere to regultory requirements governing their business practices at least as stringent as those imposed by the Commission. As an example, § 170.1 provides that an association must be able to establish and maintain a financial compliance program for its members who are futures commission merchants.[58]

The Commission understands that associations may wish to phase in certain of the functions contemplated by the Act. We are, however, soliciting comment on what other functions a futures association should be required to perform as a condition of registration. We suggest, for purposes of comment, that associations might be required under new § 170.1 (1) to develop and administer training programs and proficiency exams for all members, (2) to develop and enforce minimum financial standards for members who are not futures commission merchants, or (3) to establish and enforce standards for advertising and disclosure by its members.

The Commission recognizes that the standards it adopts may have a substantial impact upon the types of futures associations that will apply for registration, as well as the registration process itself. Accordingly, any standards that may be adopted by the Commission will be the result of an extensive Commission analysis of the self-regulatory policies to be fulfilled by a futures association.

In conjunction with the Commission's adoption in the future of final standards under section 17(b), the Commission also plans to set forth its requirements for a registration application for futures associations. Section 17(a)(1) of the Act provides that an applicant for registration as a futures association may file with the Commission for review and approval a "registration statement in such form as the Commission may prescribe" setting forth

> * * * (1) Data as to its organization, membership, and rules of procedure, and such other information as the Commission may by rules and regulations require as necessary or appropriate in the public interest * * *.[59]

Under section 17(a)(2), an applicant must accompany the registration statement with its "rules of the association," [60] i.e., copies of its charter, with all amendments thereto, and its bylaws. Accordingly, the commission is now soliciting comments regarding the form an applicant's registration statement should take and specifying the additional information the registration statement should contain as "necessary or appropriate in the public interest." In the Commission's view the registration statement need not be complicated, and might take the form of a transmittal letter containing the information specified in section 17(a)(1) and the additional information prescribed by the Commission. Comments are requested on this point. To the extent that the "rules of the association" contain the information required by the registration statement, it has been suggested that the applicant be permitted to incorporate the information by reference.

Additional information necessary or appropriate in the public interest might include such matters as the method by which the association is to be funded and the number of employees the association intends to hire in its first year of operation in order to discharge its responsibilities.

Once an application for registration of a futures association is filed with the Commission in compliance with the Commission's requirements, the Commission intends to establish the following procedure for consideration of that application. First, the Commission will publish the application in the FEDERAL REGISTER and request comment from the public. Second, the Commission will request comment from the NASD and those Government agencies whose expertise might assist the Commission in its deliberations. Third, the Commission may hold a public hearing in order that all interested persons will be allowed to communicate their views on the application to the Commission and that the Commission and its staff may question the applicant association in order to ascertain additional information or the association's rational for offering certain aspects of its proposal. The Commission intends to solicit meaningful public participation in the registration process and would appreciate receiving any additional suggestions of appropriate procedures for considering applications from futures associations under section 17 of the Act.

The Commission will proceed deliberately in determining the proper manner of implementing the discretionary authority vested in the Commission in section 17 of the Act. In the view of the Commission, the issues surrounding the evolution of futures associations are among the most significant presently facing both the Commission and those persons regulated by the Commission.

Accordingly, the Commission hereby proposes to adopt a new part 170 of 17 CFR chapter I, as follows:

PART 170—REGISTERED FUTURES ASSOCIATIONS

Subpart A—Proposed Standards Governing Commission Review of Applications for Registration as a Futures Association Under Section 17 of the Act

Sec.

170.1 Demonstration of purposes (section 17(b)(1) of the Act).
170.2 Membership restrictions (section 17(b)(2) of the Act).
170.3 Fair and equitable representation of members (section 17(b)(5) of the Act).
170.4 Allocation of dues (section 17(b)(6) of the Act).
170.5 Prevention of fraudulent and manipulative practices (section 17(b)(7) of the Act).
170.6 Disciplinary proceedings (sections 17 (b)(8) and (b)(9) of the Act).
170.7 Membership denial (section 17(b)(9) of the Act).

---

[53] 124 Cong. Rec. H10685, H10687, H10689, H10691 (daily ed. Sept. 25, 1978) report of the Committee of Conference). In anticipation of the enactment of this legislation proposed § 170.8 reflects the statutory amendment that increases the maximum amount in controversy in futures association arbitration proceedings to $15,000.

[54] Address of William O. Douglas, Chairman, Securities and Exchange Commission before the Bond Club of Hartford, Jan. 7, 1938.

[55] 7 U.S.C. 21(b) (1976).

[56] Secs. 17(b)(6) and 17(b)(8); 7 U.S.C. 21(b)(6) and 21(b)(8) (1976).

[57] H.R. Rept. 93-1383, 93d Cong., 2d sess., 39 (1974). See also, H.R. Rept. 93-975, 93d Cong., 2d sess., 4, 16-17 (1974); S. Rept. 95-850, 95th Cong., 2d sess., 11-12 (1978).

[58] In this connection, the Commission notes that it has recently adopted § 1.52(b) of its regulations, effective June 30, 1979, requiring all self-regulatory organizations, including futures associations that may be registered by the Commission, to have in effect minimum financial and related reporting requirements with respect to futures commission merchants which are members of the organization. 43 FR 39981-39982 (Sept. 8, 1978).

V 43 / 194 OCT 5 1978

170.8 Settlement of customer disputes (section 17(b)(10) of the Act).

AUTHORITY: 7 U.S.C. 21 (1976).

Subpart A—Proposed Standards Governing Commission Review of Applications for Registration as a Futures Association Under Section 17 of the Act

§ 170.1 Demonstration of purposes (section 17(b)(1) of the Act).

A futures association must demonstrate that it will be able to carry out the purposes of section 17. Since a basic purpose of a futures association is to regulate the practices of its members, an association should demonstrate that it will require its members to adhere to regulatory requirements governing their business practices at least as stringent as those imposed by the Commission. For example, the association should be prepared to establish and maintain in accordance with § 1.52 of this chapter, a financial compliance program for those members of the association who are futures commission merchants.

§ 170.2 Membership restrictions (section 17(b)(2) of the Act).

A futures association may restrict its membership to individuals registered by the Commission in a particular capacity—floor brokers, futures commission merchant, commodity trading advisers, commodity pool operators and associated persons—or to individuals doing business in a particular geographical region or to firms having a particular level of capital assets or which engage in a specified amount of business per year.

§ 170.3 Fair and equitable representation of members (section 17(b)(5) of the Act).

A futures association must assure fair and equitable representation of the views and interests of all association members in the procedures providing for the adoption, amendment, or repeal of any association rule, in an association's procedure for the selection of association officers and directors and in all other phases of the association's affairs and activities, including disciplinary and membership hearings. No single group or class of association members shall dominate or otherwise exercise disproportionate influence on any governing board of an association or on any disciplinary or membership panel of such an association. Nonmembers of the association shall be represented wherever practicable on any board or hearing panel of the association.

§ 170.4 Allocation of dues (section 17(b)(6) of the Act).

Dues imposed on members of a futures association must be allocated equitably among members and may not be structured in a manner constituting a barrier to entry to any person seeking to engage in commodity-related business activities.

§ 170.5 Prevention of fraudulent and manipulative practices (section 17(b)(7) of the Act).

A futures association must establish and maintain a customer protection program, including the adoption of rules to protect customers and customer funds and to promote fair dealings with the public. These rules shall set forth the ethical standards for members of the association in their business dealings with the public. An applicant association must also demonstrate its capability to foster a professional atmosphere among its members, including an acceptance of and adherence to the ethical standards, and to monitor and enforce compliance with the customer protection program and rules.

§ 170.6 Disciplinary proceedings (sections 17 (b)(8) and (b)(9) of the Act).

A futures association must provide a fair and orderly procedure with respect to disciplinary actions brought against association members or persons associated with members. These rules governing such disciplinary actions shall contain, at a minimum, the procedural safeguards contained in section 17(b)(9) of the Act. In addition, an association, in disciplining its members should demonstrate that it will (a) take vigorous action against those who engage in activities in violation of association rules; (b) conduct proceedings in a manner consistent with the fundamental elements of due process; and (c) impose discipline which is fair and has a reasonable basis in fact.

§ 170.7 Membership denial (section 17(b)(9) of the Act).

A futures association must provide a fair and orderly procedure for processing membership applications and for affording any person denied membership an oral hearing to respond to the grounds for denial stated by the association. The procedures governing denials of membership in the association shall contain, at a minimum, the procedural safeguards contained in section 17(b)(9) of the Act.

§ 170.8 Settlement of customer disputes (section 17(b)(10) of the Act).

A futures association must be able to demonstrate its capability to promulgate rules and to conduct proceedings which provide a fair and equitable procedure, through arbitration or otherwise, for the voluntary settlement of a customer's claim or grievance of less than $15,000 brought against any member of the association or any employee of a member of the association. Such rules shall conform to and be consistent with section 17(b)(10) of the Act and be consistent with part 180 of the Commission's regulations governing contract market arbitration and dispute settlement procedures.

Issued by the Commodity Futures Trading Commission in Washington, D.C., on October 2, 1978.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

DEPARTMENT OF STATE

[22 CFR Part 6a]

[Docket No. SD-138]

PRIVACY ACT POLICIES AND PROCEDURES

Proposed Amendments

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State proposes to amend Title 22, Part 6a of Title 22 of the Code of Federal Regulations by exempting a portion of a record system from certain provisions of the Privacy Act of 1974 (5 U.S.C. 552a). The proposed amendment would exempt the records of the Special Assignments Staff, which are described in the Security Records (State-36), from the provisions of subsection (c)(3), (d), (e)(1), (e)(4)(G), (H), (I), and (f).

DATES: Comments must be received on or before November 20, 1978.

ADDRESS: Send comments to the Chief of the Privacy Staff, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT:

Sharon B. Kotok, 202-632-1267.

SUPPLEMENTARY INFORMATION: The Department has found it necessary to exempt from disclosure records compiled by the Special Assignments Staff of the Office of Security, which are included among the Security Records (State-36). Pursuant to subsection (j)(2) of the Privacy Act, the Department intends to exempt these records in order to assure effective investigative and judicial proceedings in criminal cases. The Special Assignments Staff conducts criminal and counterintelligence investigations and investigations to determine suitability for continued employment. If the records of these investigations are not investigations to determine suitability for continued employment. If the records of these investigations are not exempt from disclosure under the provisions of the Privacy Act, the investigative and judicial processes will be seriously impaired. The Department of State therefore proposes to amend its Privacy Act regulations as set forth below.

1. In § 6a.6, paragraph (h) will be amended to read as follows:

§ 6a.6 Exemptions

• • • • •

(h) Records originated by another agency when that agency has determined that the record is exempt under 5 U.S.C. 552a(j). Also, pursuant to section (j)(2) of the act, records compiled by the Special Assignments Staff and by the Passport and Visa Fraud Branch of the Office of Security may be exempt from the requirements of any part of the act, except subsections (b); (c)(1) and (2); (e)(4)(A) through (F); (e)(6), (7), (9),(10), and (11); and (i), to the extent necessary to assure the effective completion of the investigative and judicial process.

• • • • •

AUTHORITY: Sec. 4 of the Act of May 26, 1949, as amended (63 Stat. 111; 22 U.S.C. 2658); Pub. L. 93-579 (88 Stat. 1897); 5 U.S.C. 552a.

Dated: September 13, 1978.

For the Secretary of State.

BEN H. READ,
Deputy Under Secretary for Management.

[4201-01]

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

[25 CFR Part 700]

RESALE OF PROPERTY

Proposed Revision of Regulations

AGENCY: Navajo and Hopi Indian Relocation Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes revisions in the resale of property regulations which would allow the Navajo and Hopi Indian Relocation Commission to dispose of property which has been purchased from relocatees by selling it to the tribal government having jurisdiction over said property at its fair market value or by giving it to the tribal government having jurisdiction over said property.

DATE: Comments must be received on or before November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Paul M. Tessler, CFR Liaison Officer, Navajo and Hopi Indian Relocation Commission, 2708 North Fourth Street, Suite E-1, Flagstaff, Ariz. 86001, Telephone 602-779-3311, extension 1512 or 1513, FTS: 261-1512.

SUPPLEMENTARY INFORMATION: This notice is published for reason that the Commission, after reviewing its regulations concerning resale of property, became aware that the regulations were in conflict with tribal law concerning land use and may have been in conflict with tribal sovereignty.

The following sections of 25 CFR Part 700, § 700.12 are proposed to be revised as follows:

§ 700.12 Resale of property.

The Commission is authorized to dispose of dwellings and other improvements acquired pursuant to the Act in such manner, including resale of such dwellings and improvements to members of the tribe exercising jurisdiction over the area at prices no higher than the acquisition cost, as best effects section 8 of the Act and the order of the district court pursuant to section 3 or 4 of the Act. All resale of said property shall proceed as follows:

(a) The tribe acquiring jurisdiction of the partitioned area shall have the first opportunity to purchase the acquired property at the fair market value at the time of the sale.

(b) If the tribe does not purchase any of said improvements on the property, the impovements may be sold to persons designated by the tribe for the fair market value of the property at the time of the sale.

(c) If neither tribe nor the designated persons purchase said property, the Commission may dispose of it by giving it to tribal government having jurisdiction over said property or by giving it to any Federal agency, designated by the tribe having jurisdiction of the area, which has programs that can make use of said improvements. In the event the Commission determines that any habitations or other improvements purchased from any relocatee are unsafe or in any manner dangerous to the health and welfare of any persons or animals that may be in the area, the Commission may contract to destroy and/or remove said improvements from the property.

(d) Notices for any such sales shall be mailed to the tribal government and the tribal government shall excecise its option to purchase said property within sixty (60) days of said notice unless the Commission extends the option purchase date. If the tribal government does not purchase said property and an individual is designated by the tribe to purchase said property, said individual shall have sixty (60) days from the date of notice of his option in which to exercise his option to purchase the improvements, unless such period of time is extended by the Commission.

Interested persons may submit written comments regarding the proposed rule change to the Chairman, Navajo and Hopi Indian Relocation Commission, 2708 North Fourth Street, Suite E-1, Flagstaff, Ariz. 86001, on or before November 6, 1978.

ROBERT E. LEWIS,
Chairman, Navajo and Hopi Indian Relocation Commission.

[7600-01]

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

[29 CFR Parts 2200 and 2201]

RULES OF PROCEDURE

Informal Hearing on Proposed Rulemaking

AGENCY: Occupational Safety and Health Review Commission.

ACTION: Notice of informal hearing on proposed rules of procedure.

SUMMARY: The Occupational Safety and Health Review Commission will hold an informal hearing on its proposal, published on August 18, 1978 (43 FR 36854), to amend certain of its present Rules of Procedure, as well as the adoption of certain additional rules.

DATES: Public hearing: October 30, 1978.

Persons who wish to present testimony at the informal hearing must notify the Commission in writing by October 20, 1978. The notice should indicate an estimate of the amount of time needed for the testimony presentation, as well as the witness' business telephone number.

ADDRESSES: The hearing will be conducted at the Commission's Chicago field office at 1 p.m. on October 30, 1978, in Room 1530, 55 East Monroe Street, Chicago, Ill.

All communications should be addressed to: Robert C. Gombar, Counsel for Appellate and Administrative Legal Services, 1825 K Street NW., Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT:

Robert C. Gombar, Counsel for Appellate and Administrative Legal Services, 202-634-4015.

SUPPLEMENTARY INFORMATION: On August 18, 1978, the Occupational Safety and Health Review Commission

V 43 / 194

proposed the amendment of several of its Rules of Procedure as well as the adoption of certain additional Rules of Procedure (43 FR 36854). One of the more significant proposals was a new set of rules of simplified proceedings, designed to reduce both paperwork and expense to the parties as well as to make Commission adjudications less complex and time consuming. The Commission also proposed a new rule on interlocutory appeals, the elimination of the 20-day reconsideration period between the mailing of the judge's initial decision to the parties and the filing of his report with the Commission, the reinstitution of a 25-day deadline for the filing of petitions for discretionary review, a new rule on briefs, and a rule on settlements designed to give better notice of settlement proposals to affected employees.

The Commission considers it desirable to encourage public debate on these proposals and to hear oral comments of interested persons at places and times convenient both to the interested persons and to the Commission. Thus, in addition to the opportunity to submit written comments on its rulemaking proposal, the Commission has decided to hold an informal hearing that all interested persons are invited to attend. Any person who wishes to testify at the hearing must notify the Commission in writing by October 20, 1978. This notice must state the witness' business telephone number as well as the amount of time the testimony is expected to consume. The Commission will contact each witness concerning the schedule of testimony. Timothy F. Cleary, Chairman of the Commission, will preside at the hearing.

Signed at Washington, D.C., this 29th day of September 1978.

ROBERT C. GOMBAR,
Counsel for Appellate and Administrative Legal Services.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[30 CFR Part 715]

SURFACE COAL MINING RECLAMATION AND RECLAMATION OPERATIONS

Appendix—Alluvial Valley Floors Technical Guidelines; Public Hearing; Correction

AGENCY: Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior.

ACTION: Corrections.

SUMMARY: This document corrects the proposed Technical Guidelines that begin on page 38035 of the FEDERAL REGISTER of August 25, 1978, from Doc. 78-23668.

ADDRESSES: Regional Director, Office of Surface Mining Reclamation and Enforcement, Region V, 1823 Stout Street, Denver, Colo. 80202.

FOR FURTHER INFORMATION CONTACT:

John Hardaway, Office of Surface Mining and Enforcement, Region V, 1823 Stout Street, Denver, Colo. 80202, 303-837-5511. Additional copies may be obtained from Mr. Hardaway.

WALTER N. HEINE,
Director.

The following corrections are made:

1. On page 38036, "Introduction", quotation of the 1st paragraph, line 16 of the quotation "granting areas would be removed from use", is corrected to read "grazing areas would be removed from use."

2. On page 38036, "Introduction", 6th paragraph, which begins "Relevant sections of the law include:" and in particular, line 3 of subparagraph (3), "No permit or revision application affirma-" is corrected to read "No permit or revision application shall be approved unless the application affirma-." The corrected line is the 20th line from the bottom of page 38036 in the third column.

3. On page 38040, section I.A. Geomorphic Characteristics—Relationship of surface landform (terrace) to underlying material (valley fill)", first full paragraph in the second column, line 2, "are found in flatlying of terraces." is corrected to read "are found in flatlying valley fills and there is no development of terraces."

4. On page 38040, section "I.A. Geomorphic Characteristics—Relationship of surface landform (terrace) to underlying material (valley fill)", first full paragraph in the second column, line 17 (last line), "stream side area alluvial valley floor.", is corrected to read, "stream side area shall not be mapped as an alluvial valley floor.

5. On page 38041, section "I.B. Water Availability Characteristics—Guideline Procedure I.B.2. Discussion", line 4, "sufficient for floor irrigation or subirriga-", is corrected to read, "sufficient for flood irrigation or subirriga-".

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[GEN Docket No. 19142; FCC 78-665]

RADIO BROADCAST SERVICES

Children's Programing and Advertising Practices

AGENCY: Federal Communications Commission.

ACTION: Extension of deadlines for filing comments and reply comments in the Secod Notice of Inquiry, GEN Docket No. 19142.

SUMMARY: On August 21, 1978 (43 FR 37136), the Commission published in the FEDERAL REGISTER its Second Notice of Inquiry regarding children's programing and advertising practices. The Second Notice of Inquiry is hereby amended, but only to the extent necessary to incorporate the extension of filing dates as contained herein.

DATES: Initial comments must be received on or before January 15, 1979. Reply comments must be received on or before March 1, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Susan C. Greene, Children's Television Task Force, 202-632-6312.

SUPPLEMENTARY INFORMATION:

Adopted: September 21, 1978.

Released: September 27, 1978.

In the matter of the Second Notice of Inquiry Regarding Children's Programing and Advertising Practices; order to extend time for filing comments and reply comments.

By the Commission.

1. On July 27, 1978, the Comnmission reactivated the proceedings of docket 19142 and announced November 1, 1978, as the deadline for filing comments and December 15, 1978, as the deadline for filing reply comments therein. *Second Notice of Inquiry*, GEN Docket No. 19142, —— FCC 2d —— (adopted July 27, 1978).

2. Since the adoption of the *Second Notice of Inquiry*, we have received several informal expressions of concern from members of interested parties suggesting that the original deadlines preclude sufficient time for formulating effective comments. We also note that the Federal Trade Commission has recently postponed its filing and hearing dates which we were scheduled in its initial notice of proposed rulemaking regarding children's advertising. 43 FR 37203 (1978). In view of overlapping issues and the participation of many of the same parties in both our inquiry and the FTC proceedings, we are of the opinion that an extension of the deadlines originally announced in our *Second Notice of Inquiry* is in the public interest.

3. We desire to conduct these proceedings in a timely fashion. However, we recognize that additional time may result in the submission of useful information. No further extension beyond this time period is anticipated.

4. Accordingly, *it is ordered*, That the date for filing coments is extended to January 15, 1979, and the date for filing reply comments is extended to March 1, 1979.

5. This action is taken pursuant to authority found in section 4(i) of the Communications Act of 1934, as amended.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[BC Docket No. 78-313; RM-3052]

TELEVISION BROADCAST STATION IN SAN DIEGO, CALIF.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of UHF television channel 69 to San Diego, Calif. The proposed assignment would provide for a station which could furnish additional television service to a steadily growing community.

DATES: Comments must be filed on or before November 21, 1978, and reply comments must be filed on or before December 12, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 22, 1978.

Released: October 3, 1978.

In the matter of amendment of § 73.606(b), *Table of Assignments*, Television Broadcast Stations (San Diego, Calif., BC Docket No. 78-313, RM-3052.

1. The Commission has before it for consideration a petition for rulemaking,[1] filed by Center City Complex, Inc, ("petitioner"), requesting the amendment of the Television Table of Assignments (§ 73.606(b) of the Commission's rules) by the assignment of Channel 27 to San Diego, Calif. No responses to the proposal have been received.

2. San Diego (pop. 697, 027), seat of San Diego County (pop. 1,357,854)[2], is located in the extreme southwest corner of California at the United States-Mexican border. San Diego is presently assigned Channel 8 (KFMB-TV), Channel 10 (KGTV), educational Channel *15 (KPBS-TV), Channel 39 (KCST-TV), and Channel 51 (construction permit granted to Gross Broadcasting Company (KJOG-TV) BPCT-3842).

3. Petitioner asserts that San Diego, which includes all of San Diego County, has grown in population from 573,224 in 1960 to 697,027 in 1970, and continues to increase with an estimated population of 787,153 in 1976.[3] According to petitioner, the economic growth of San Deigo continues to be healthy and notes that the median household effective buying income figure for the city is $11,548 and for the county $11,876. Petitioner has submitted detailed information with respect to population and economic growth in order to demonstrate the need for an additional television assignment.

4. Since the filing of the instant petition, Channel 27 was assigned to Tijuana, Mexico, by the United States of Mexico and therefore its assignment to San Diego is precluded under the provisions of the United States-Mexico Television Agreement. However, a channel study by the Commission staff indicates that Channel 69 is available for assignment to San Diego. We make that proposal here.

5. Channel 69 can be assigned in conformity with all minimum distance separation requirements and other technical criteria. Since San Diego is located within 320 kilometers (199 miles) of the United States-Mexican border, the proposed assignment of Channel 69 to that city is subject to concurrence by the Mexican Government.

6. In view of the foregoing, the Commission proposes to amend the Television Table of Assignments (§ 73.606(b) of the Commission's rules) with respect to San Deigo, Calif., as follows:

City	Channel No. Present	Channel No. Proposed
San Diego, Calif.	8, 10, *15, 39, 51	8, 10, *15, 39, 51, 69

7. Authority to institute rulemaking proceedings, showings required, cutoff proceedures, and filing requirements are contained below and are incorporated by reference herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the appendix before a channel will be assigned.

8. Interested parties may file comments on or before November 21, 1978, and reply comments on or before December 12, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, *It is proposed* to amend the FM Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the Notice of Proposed Rulemaking to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding:

(a) counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rulemaking to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of

[1] Public notice of the petition was given on February 7, 1978, Rept. No. 1099.

[2] Population figures are taken from the 1970 U.S. Census, unless otherwise indicated.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Part 172]

[Docket No. HM-141]

COLOR CODING OF COMPRESSED GAS PACKAGES

Termination of Docket

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Termination of docket HM-141.

SUMMARY: Docket HM-141 is closed without issuance of a final rule. The advance notice of proposed rulemaking, establishing docket HM-141, requested information from the public to develop a system of color coding for compressed gas packages and to substantiate whether any such color coding system would significantly enhance safety. Upon additional analysis and consideration of comments received, the Materials Transportation Bureau has concluded that further consideration of color coding of compressed gas packages is not justified.

EFFECTIVE DATE: Docket HM-141 is terminated on October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Douglas A. Crockett, Standards Division, Office of Hazardous Materials Regulation, 2100 Second Street SW., Washington, D.C. 20590, 202-426-2075.

SUPPLEMENTARY INFORMATION: An advance notice of proposed rulemaking (41 FR 43188, Sept. 30, 1976) was published by the Materials Transportation Bureau (MTB) in response to requests and to bills considered by both Houses of Congress in the past several years seeking the establishment of a system of color codes for compressed gas packages. The purpose of a color code would be to provide safety for any person within the sphere of hazard surrounding a compressed gas package, whether the package is in transportation, use, or storage, by facilitating ready identification of the gas contained in the package.

Most commenters objected to the concept of a color code system because:

(1) Some degree of color blindness affects a significant segment of the population (variously described as 10 percent to 15 percent of the working population).

(2) The great multiplicity of gases and the almost infinite number of mixtures (sometimes including up to five different gases) would require a complex color code system.

(3) The complexity of such a system would require a reference source that would be unwieldy in size and possibly of limited usefulness.

(4) The continual development of new mixtures would require frequent updating of the reference source.

(5) The variable appearance of color pigments under different light sources, and the possible fading of pigments, might result in substantial confusion.

(6) The many years of transition, while older compressed gas packages of varying color combinations are emptied and returned to a source for filling and application of a new color code, would be a major source of confusion.

(7) Labels, placards and/or markings already provide identification of each gas by means of color, symbol and text.

Comments from organizations and individuals associated with the delivery of health care services questioned the value of modifying existing medical gas color codes even though medical gases constitute only a small part of the total number of gases and gas mixtures in use at the present time. The American Association for Respiratory Therapy addressed color coding as being probably the least important mechanism for safe handling of compressed gases.

The National Society for the Prevention of Blindness, Inc., strongly disagreed with the premise that any color code system would enhance safety for personnel involved in loading, handling or storage. This society viewed color codes as impractical and possibly dangerous.

Various military organizations suggested use of a number of standards dependent on the intended use of compressed gas packages, such as diving, medical, or general application. These commenters did not address fire fighting or emergency response uses of compressed gases. However, MTB notes that the color red is widely used at present to identify fire extinguishers that may contain any of a number of different gases, such as carbon dioxide, nitrogen, or various refrigerant gases.

Few comments were received from persons concerned with fire protection. The Fire Equipment Manufacturers' Association, Inc., requested to be excluded from any color code system that might be established. The association was concerned with the cosmetic and esthetic acceptance of portable fire extinguishers in both the workplace and the home. Further, the association remarked that for industrial use, a color coding system already is employed to identify certain agents for special fire application. This system was not explained further.

The Florida State Fire Marshal's Office limited comment to liquefied petroleum gas transportations safety and stated that changing the color of packagings used to transport this material could lead to confusion with resultant danger to the public. Similarly, the California Division of Industrial Safety suggested that extending the use of a color code system to shipping containers would confuse people accustomed to differing color code systems in use within their workplace. The Safety Department of the University of Wisconsin further supported this view by stating that color markings would be more detrimental than advantageous and cannot be substituted in any conceivable way for a label.

The docket also includes a letter from the Deputy Assistant Secretary of the Department of Labor (DOL) to a Member of the House of Representatives relating to color code legislation. The letter explains that with the advent of many sophisticated mixtures of exotic gases, color coding alone became too complex to assure the necessary recognition of hazards. A vendor's catalog is cited as containing a list of over 200 gas mixtures, including a mixture of carbon monoxide, helium, oxygen, argon, and nitrogen. The letter also states that the Occupational Safety and Health Administration is working with the Department of Transportation and a number of other Federal agencies in an attempt to standardize labeling requirements, including the use of color, symbol and legend. (The MTB published new standards for labeling requirements including the use of color, symbol and legend on April 15, 1976 (41 FR 15972), docket HM-103/112. The DOL currently has this and other standards under consideration.)

The MTB wrote the DOL, on October 15, 1976, requesting statistics on deaths or injuries involving compressed gas cylinders where the cause of death or injury was the injured or deceased's lack of knowledge as to the gas contained in the cylinders. The DOL injury data system is based on investigations where one fatality, or five hospital admissions occur. In subsequent communication, MTB was informed that no such deaths or injuries had been reported.

The single accident situation cited by the primary and virtually single proponent of the color coding concept occurred on his company's premises in 1955 and involved a compressor test in which oxygen was inadvertently used rather than an inert gas. In his statement, he suggests the infrequency of such accidents by saying, "The amazing thing to us is that we can find no case so far where this type of accident has occurred in the past." Similarly, the MTB has not found one case that has occurred since. While the proponent has stated that "we know of no safety precautions we could have taken, except an actual analysis of all gases, which could have prevented this disaster," the facts as presented by the proponent indicate that insufficient planning had led to an exhaustion of suitable supplies of gases to be used for the tests. To hasten delivery of the needed gas the company made an uncustomary pickup rather than waiting for delivery by fully trained personnel. This can be considered the primary causal factor in the unfortunate incident. The proponent stated September 14, 1955, that "we (the company) are taking every possible step to make certain that such substitution cannot occur again." The MTB notes that the precautions taken by the proponent's company have been successful in the subsequent 23 years, which suggests that color coding is not necessary to prevent death and injury.

The proponent of the color code system maintains that only six colors are specified by MIL-STD-101B. However, the DOD lists 115 various color combinations of four or more colors, representing only a small number of the gas mixtures possible. The coding of cylinders in the six basic colors referred to may adequately prevent the particular kind of accident referred to by the proponent, but it would not prevent the inadvertent mixture of gases within a grouping that could lead to adverse reactions in a laboratory or industrial environment. As pointed out earlier in this document, commenters indicate that even the military does not have only one color code system, but several systems patterned for specific uses.

The staff conclusions of the MTB on the major economic and public safety issues involved in the adoption of a uniform, nationwide color code system for compressed gas cylinders are quoted below:

A uniform, nation-wide system of color coding compressed gas cylinders as a means of preventing serious cylinder accidents in the normal, routine environment characterizing the workplace or households is felt to be of little or marginal value as a safety measure; and the adoption of such a system may increase, rather than decrease, serious accidents involving such cylinders.

The costs of adopting a uniform, nationwide system of color coding compressed gas cylinders would not be negligible. With an estimated 110 million cylinders in existence, and a unit conversion cost of $1 to cover such expenses as conversion of current workplace procedures, new safety training requirements, the development of new owner identification systems, sandblasting and repainting cylinders, and so forth—the cost of the new system could easily exceed $110 million. When viewed against the expected marginal benefits to be derived from it, the color coding system does not appear to be the most cost-effective way to improve the public safety associated with the transportation, handling and storage of compressed gas cylinders.

The use of color code systems for cylinders in emergency response situations where rapid reaction time is of vital importance to save life or limb (as in hospitals, or in the military) does have an obvious and demonstrated value. However, a color code system for the purpose of improving emergency response/reaction times involving (after-the-fact) transportation accidents is of less obvious value, since cylinders are usually stored or packed together in a manner that allows only a few cylinders to be taken in at a glance; and since shipping paper requirements provide a much more rapid means for identifying cargo content.

The complete staff summary of "The Economic and Public Safety Implications of a Uniform Nationwide Color Code System for Compressed Gas Cylinders," is available for public review in the Dockets Branch, Office of Program Support, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590. Primary drafters of this document are Paul H. Seay, Technical Division, and Douglas A. Crockett, Standards Division, Office of Hazardous Materials Regulation, MTB.

Based on the comments received, and the conclusions reached, docket HM-141 is hereby terminated without further action.

(49 U.S.C. 1803, 1804, 1808, 49 CFR 1.53(e) and paragraph (a)(4) of app. A. to part 102.)

NOTE.—The Materials Transportation Bureau has determined that this notice will not have a major economic impact under the terms of Executive Order 12044 and DOT implementing procedures (43 FR 9582).

Issued in Washington, D.C., on September 27, 1978.

ALAN I. ROBERTS,
Associate Director for Hazardous Materials Regulations, Materials Transportation Bureau.

[Docket No. PS-51, Notice 2]

TRANSPORTATION OF LIQUIDS BY PIPELINE

Procedures for Operation, Maintenance, and Emergencies

AGENCY: Materials Transportation Bureau (MTB).

ACTION: Extension of comment period.

SUMMARY: This notice extends the period for comment on a notice of proposed rulemaking concerning procedures for operation, maintenance, and emergencies involving transporation of hazardous liquids by pipeline. This proposed rule was published on Augsut 10, 1978, at 43 FR 35513. The comment period is extended from October 6, 1978 to November 6, 1978. The extension is being granted because of a request from the American Petroleum Institute.

DATE: Comments must be received on or before November 6, 1978.

ADDRESS: Comments should identify the docket and notice and should be submitted in triplicate to the Docket Section, Materials Transportation Bureau, 2100 Second Street SW., Washington, D.C. 20590. Comments are available at MTB's Docket Room 6500.

FOR FURTHER INFORMATION CONTACT:

Frank Robinson, 202-426-2082.

SUPPLEMENTARY INFORMATION: Request for an extension of time was submitted by the American Petroleum Institute (API) on September 29, 1978. The API requested that the comment period be extended from October 6, 1978, to December 6, 1978. The API argued that more meaningful data could be developed by the industry if the comment period is extended. The API also argued that the industry personnel qualified to comment on the proposed rulemaking are the same key people who are required to make day-to-day company decisions and that these same key people cannot devote full time to the proposed rulemaking.

The MTB has decided that in light of the request by API and in light of the urgency of the proposed rulemaking, a reasonable extension of the

Federal Railroad Administration

[49 CFR Chapter II]

[Docket No. RSSI-78-6; Notice No. 1]

SPECIAL SAFETY INQUIRY

Association of American Railroads Requirement for Lifting Lugs; Notice of Safety Inquiry

AGENCY: Federal Railroad Administration, DOT.

ACTION: Notice of safety inquiry.

SUMMARY: The Federal Railroad Administration (FRA) is initiating a special safety inquiry to examine a requirement of the Association of American Railroads (AAR) that each new freight car used in interchange service be equipped with appliances (lugs) permitting the car body to be lifted by means of hooks in case of derailment. The inquiry is intended to be responsive to a petition filed by four tank car builders and a lessor of tank cars questioning the safety of these devices as applied to tank cars carrying hazardous materials. The safety inquiry will provide FRA with adequate information to determine whether regulatory action is appropriate with respect to the application of lugs to freight cars, generally, or to particular types of cars.

DATE: The public hearing in this inquiry will begin at 10 a.m. on October 31, 1978. Written comments should be submitted by that date.

ADDRESSES: The public hearing will be held in roon 3201, Trans Point Building, 2100 Second Street SW., Washington, D.C. Written comments should be submitted to the Docket Clerk, Office of Chief Counsel (RCC-1), 2100 Second Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Rolf Mowatt-Larssen, 202-426-0924, or Grady Cothen, Jr., 202-426-8220.

SUPPLEMENTARY INFORMATION: The Association of American Railroads (AAR) has adopted a requirement for all new and rebuilt cars used in interchange service which are ordered after July 1, 1978. FRA believes that this requirement should be examined in a public safety proceeding prior to the construction of cars subject to its terms.

AAR Mechanical Division Circular D.V. 1897 specifies that new cars must be equipped with rings or openings for lifting hooks "to provide a means to vertically lift a loaded upright car." Such a provision for lifting is known as a lifting "lug." The purpose of the requirement is "to improve the method of handling derailed cars." The Circular further states that lugs shall be provided "at four places, preferably in or near the body bolster at the side sill."

On September 19, 1978, FRA received a petition from four major tank car builders and a major lessor of cars requesting an emergency exemption of tank cars from the AAR Circular. The petition recited efforts to dissuade the AAR from issuance of the Circular and discussed the petitioners' reasons for opposition to the lifting lug requirement. Receipt of the petition followed testimony by the lessor of cars on this topic at the FRA General Safety Inquiry on freight car and safety applicance standards on July 13, 1978. The railroad industry has not directly responded to that testimony.

In brief, the petitioners object to the requirement of lifting lugs on tank cars because of the alleged likelihood of misue of the devices in the course of wreck clearance and because the presence of the devices might prompt wreck crews to act without properly assessing damage to equipment or the need for transferring product prior to rerailing. Petitioners point out that the AAR Circular specifies design criteria for the lugs which contemplate use only when the car is essentially upright and is to be lifted within 15 degrees of the vertical. Concern is expressed by the petitioners that, since most serious derailments result in cars being displaced from their trucks and distributed in various positions, wreck crews may improperly rely on lifting lugs to drag or lift overturned cars. Possible consequences of misuse are said to be release of hazardous materials and/or direct injury to wreck crew members or bystanders.

While the petitioners have limited their request for relief to an "exemption" from AAR lifting lug requirements with respect to tank cars used to transport hazardous materials, the FRA believes that the questions raised by petitioners concerning the safety of wreck clearance operations may have application to other kinds of freight cars, as well. Therefore, FRA is taking two steps designed to assure adequate public examination of the relevant safety considerations prior to the construction of significant numbers of new cars under the requirements of the Circular and their introduction into commerce. First, by separate order published in another portion of today's FEDERAL REGISTER, FRA is temporarily staying the effectiveness of the AAR Circular pending examination of the merits of the Circular. Second, FRA is instituting a special safety inquiry into the requirements of the Circular and the safety of alternate methods used to lift freight car bodies in wreck clearance operations. See 49 CFR 211.61 (FRA Rules of Practice).

A public hearing will be held in furtherance of the inquiry at 10 a.m. on October 31, 1978, in room 3201, Trans Point Building, 2100 Second Street SW., Washington, D.C. Representatives of the railroad industry, car builders and owners, wreck clearance contractors, and other interested persons are invited to attend the hearing and to make informal oral presentations. An FRA board of inquiry will direct questions to each witness for the purpose of developing a full factual background to inform FRA decisions. Written comments are also solicited and should be submitted to the address indicated above not later than the date of the hearing.

Commenters are encouraged to provide information concerning all issues relevant to the topic under examination. Comment is specifically solicited on the following issues:

1. Under the design specification of Circular D.V. 1897, each lifting lug must be able to support 40 percent of the gross weight of a loaded car when the car is essentially upright and is lifted from a position within 15 degrees of the vertical. In view of the fact that many cars do not come to rest in an upright position, would lifting lugs designed to the minimum requirements of the Circular present an unreasonable possibility of misuse and consequent injury to persons at the scene of a derailment? What are the specific possibilities of misuse which bear on safety? Should the AAR Circular be changed to require adequate strength to allow for lifting at angles greater than 15 degrees from the vertical? What should that angle be? Would the presence of a warning stencil at each lug reduce the possibilities of abuse?

2. What design specifications for lifting lugs are actually planned for applications on general purpose box cars, hopper cars, tank cars, and other freight cars? Does the standard box car, for example, permit the application of a lifting lug which would exceed the minimum AAR requirement with respect to the directionality of load capacity and, thereby, reduce the possibilities for misuse involving hazard to personnel at a derailment site?

3. Wreck clearance operations are often conducted by local construction companies and other entities under contract to the railroads or by crews specifically hired for the purpose. To what extent can the railroads assure that operations at a derailment site will be conducted according to accepted procedures, including proper use of lifting lugs?

4. Would the application of lifting lugs to tank cars or other cars used to carry hazardous materials involve risks qualitatively or quantitatively different from any risks common to freight cars in general? What is the current procedure for evaluating whether hazardous materials should be unloaded prior to the rerailing of cars containing such materials? Would misuse of lifting lugs applied to a body bolster or pressure tank materially increase the risk that hazardous materials might be released? Would wreck crews or contractors be tempted to forego unloading of damaged cars if lifting lugs were available? Should special requirements be imposed for cars used to carry hazardous materials? Should tank cars and/or cars used to carry explosives be excepted from the lifting lug requirement?

5. Present wreck clearance techniques involve the use of slings applied around car bodies in two locations. Crane hooks are sometimes used on side sills, center sills and other portions of car bodies. What risks are presented by current methods of clearing wrecks? Can slings be applied securely in all situations? How frequently are hooks used directly on portions of the car body not designed for lifting? Have cars been dropped or caused to lose lading because of improper handling by wreck crews or wreck contractors? What is the history of injuries and fatalities related to wreck clearances? Have lifting lugs presently in service been subject to failure or misuse (provide details of each occurrence)? What are the dimensions and load characteristics of lugs presently in service?

6. Are the AAR specifications contained in Circular D.V. 1897 adequate? (See text of Circular below.) Will the recommended dimensions of the Circular accommodate crane hooks currently in use, assuring that hook and lug mate securely? Is it possible to design a lifting lug so that a hook will not engage unless the direction of lift is within the specified angle from the vertical?

7. To what extent would lifting lugs (a) expedite the restoration of train operations and (b) reduce damage to rail equipment associated with wreck clearance? What is the estimated economic benefit to the railroad industry from the Circular? Of the total benefit anticipated, what portion is attributable to avoidance of damage to tank car jacketing and tank appurtenances?

Information gathered in this safety inquiry may form the basis of rulemaking under the Federal Railroad Safety Act of 1970 (45 U.S.C. 421 et seq.); or FRA may recommend that the Department's Materials Transportation Bureau take action under the Hazardous Materials Transportation Act (49 U.S.C. 1801 et seq.). As soon as possible following the public hearing, a determination will be made concerning whether the stay of Circular D.V. 1897 should be lifted or extended pending further regulatory action.

(Secs. 202, 208, 84 Stat. 971, 974 (45 U.S.C. 431, 437); § 1.49(n) of the Regulations of the Office of the Secretary of Transportation (49 CFR 1.49(n)).)

Issued in Washington, D.C., on October 2, 1978.

JOHN M. SULLIVAN,
Administrator.

The text of AAR Mechanical Division Circular D.V. 1897 follows:

PROVISION FOR LIFTING FREIGHT CAR

Standard

Adopted, 1977

Effective: Cars ordered new after July 1, 1978

1. The purpose of this provision is to provide a means to vertically lift a loaded upright car. This provision is for new and rebuilt cars to facilitate rerailing operations and to improve the method of handling derailed cars.
2. The provision shall be made available at four places, preferably in or near the body bolster at the side sill.
3. The design force at each provision for the upright car must be 40 percent of the gross rail load applied within 15 degrees of the vertical axis of the upright car. Each connection zone must be designed to support the above load without exceeding the yield strength of the material except that local deformation is permitted to achieve hook bearing area.
4. The provision may be similar to that shown below and should have rounded ends and provide sufficient opening to accommodate lifting means.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1062]

[Ex Parte No. MC 107]

TRANSPORTATION OF GOVERNMENT TRAFFIC

Extension of Time for Filing Public Comments

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time for filing public comments in this proceeding.

SUMMARY: By an interim decision served July 21, 1978, and printed at 129 MCC 623, the Commission (Commissioners Murphy and Stafford dissenting), reached certain tentative conclusions as to the major issues presented and the resolution of those issues through a comprehensive plan of motor carrier licensing for the transportation of government traffic. Appropriate rules and regulations embodying those provisional findings were proposed. All parties and other interested persons were invited to file comments respecting those tentative conclusions and the effectuating rules and regulations proposed. September 25, 1978, was designated as the date on or before which such comments would be received. At the request of several interested parties, and in order to insure a full opportunity to prepare their comments a 30-day extension of time for filing comments is being given.

DATES: Comments regarding the tentative conclusions and the effectuating rules and regulations proposed to be adopted in this proceeding should now be submitted to the Commission on or before October 25, 1978.

ADDRESS: Copies of the Commission's interim decision can be obtained from the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, 202-275-7292.

Decided September 29, 1978.

By the Commission, Robert J. Brooks, Director, Office of Proceedings.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 611]

TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING

Proposed Incremental Apportionment

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Notice of proposed amendment to regulations.

SUMMARY: Under the provisions of the preliminary fishery management plan (PMP), the National Marine Fisheries Service will continually monitor U.S. fisheries, periodically re-evaluate U.S. processing and catching capacities and make appropriate changes. This proposed amendment revises the total allowable level of foreign fishing for Pacific cod and sablefish in the Bering Sea. The effect of the amendment will be to make available the surpluses of U.S. capacity estimates to foreign nations desiring additional fishery allocations.

DATE: Comments are invited until October 15, 1978.

ADDRESS: Send comments to Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

Mr. Harry L. Rietze, Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99801, telephone 907-586-7221.

SUPPLEMENTARY INFORMATION: On September 6, 1977, the National Marine Fisheries Service (NMFS) published a notice of availability of a supplement to the final environmental impact statement for the preliminary fishery management plan for the trawl fisheries and herring gillnet fishery of eastern Bering Sea and northeast Pacific (PMP) (42 FR 9298), which in § 2.3.1.1 stated that:

> Periodic re-evaluation of the U.S. capacity will be required to determine what portions of the reserves are required by the United States or what portions of the reserves and the stated U.S. capacities are surplus to U.S. needs. The NMFS will continually monitor U.S. fisheries, periodically re-evaluate U.S. processing and catching capacities, and make appropriate changes in U.S. capacities, appropriate distribution of reserves, and appropriate increases in TALFF's. Notice of the incremental apportionments of the reserve between U.S. capacities and TALFF's will be published in the FEDERAL REGISTER within 7 days after the end of March, June, August, and October. Those publications will provide the mechanism for the Secretary of State to allocate to foreign nations those portions of U.S. capacities and reserves surplus to U.S. needs.

The Director of the Alaska regional office has reassessed the U.S. capacity to harvest sablefish and Pacific cod and has determined that domestic fishermen will harvest only 200 mt of sablefish and 1,000 mt of cod in the Bering Sea and northwest Pacific fisheries. In keeping with the intent of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et. seq.), as amended (FCMA), the resulting surpluses of U.S. capacity estimates should be made available to foreign nations desiring additional fishery allocations.

The Assistant Administrator for Fisheries (Assistant Administrator), for good cause, has determined: (1) That the U.S. capacity estimate of sablefish in the Bering Sea and northeast Pacific is reduced from 600 mt to 200 mt, and the resulting surplus of 400 mt of the sablefish reserve is added to the TALFF, and; (2) that the U.S. capacity estimate of Pacific cod in the Bering Sea and northeast Pacific is reduced from 1,500 mt to 1,000 mt, and the resulting surplus of 500 mt of the Pacific cod reserve is added to the TALFF.

Accordingly, the PMP is (further) amended as follows:

1. The original sablefish TALFF of 5,000 mt which appeared in table 18 (42 FR 9325), on February 15, 1977, for areas I, II, and III combined, was reduced to 2,400 mt with a 600 mt reserve in the supplemental environmental impact statement (42 FR 60945) on November 30, 1977. That 600 mt reserve is hereby reduced to 200 mt and the TALFF for sablefish in areas I, II, and III combined, is increased to 2,800 mt.

2. The original cod TALFF of 58,000 mt which also appeared in table 18 was reduced to 56,500 mt with a 1,500 mt reserve on November 30, 1977. That 1,500 mt reserve is hereby reduced to 1,000 mt and the TALFF for cod is increased to 57,000 mt.

This amendment does not modify the optimum yield for those species established in the PMP, nor does it adversely affect the conservation of the resource.

The Assistant Administrator finds that a 15-day notice of proposed rulemaking is adequate because this amendment involves only a very small number of people, all of whom have had prior notice of this proposed action.

Signed in Washington, D.C., this 29 day of September 1978.

WINFRED H. MEIBOHM,
Acting Executive Director,
National Marine Fisheries Service.

§ 611.20 [Amended]

It is proposed to amend 50 CFR 611.20(c) by revising table I as follows:

Lines 24 and 31 are revised to read:

"Species Code:" 006; "Species" Cod, Pacific; "Ocean Area" Aleutians and Bering Sea; "Amended TALFF (mt)" 57,000.

• • • • • •

"Species Code:" 007; "Species" Sablefish; "Ocean Area" Bering Sea; "Amended TALFF (mt)" 2,800.

§ 611.93 [Amended]

Amend 50 CFR 611.93(b) by revising table I as follows:

1. In column one, bottom line, add words "and revised" between the words "initial" and "TALFF".

2. In column seven headed "Sablefish, Areas I-III" strike "2,400," substitute "2,800."

In column nine headed "Pacific Cod," strike "56,500," substitute "57,000."

[FR Doc. 78-28267 Filed 10-4-78; 8:45 am]

[3510-22]

FISHERY MANAGEMENT PLAN, "HALIBUT OFF THE COAST OF ALASKA"

Change in Public Hearing Schedule for Draft Environmental Impact Statement

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Notice of change in public hearing schedule.

SUMMARY: Cancellation and new dates for the public hearing schedule as listed in the FEDERAL REGISTER of 43 FR 41244 and 43 FR 41245 for the Fishery Management Plan, "Halibut Off the Coast of Alaska" are as follows: Cancel Sitka, Alaska on October 24; cancel Seattle, Wash. on October 26. Add: Petersburg, Alaska, October 25, 1978, 1:30 p.m. to 5:30 p.m. and in the evening, if everyone is not heard; City Council Chambers, Maine Street, 99833; Seattle, Wash., October 27, 1978, 9 a.m. to 5 p.m., Vance Airport Inn at Sea-Tac, 18220 Pacific Highway South, 98199.

DATE: Comments will be received until October 31, 1978.

ADDRESS: Comments should be addressed to: Chairman, North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510. This Notice of Public Hearings is being published at the request of and in cooperation with the North Pacific Fishery Management Council.

Dated: September 25, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director,
National Marine Fisheries Service.

Forest Service

NEZ PERCE (NEE-MEE-POO) NATIONAL HISTORIC TRAIL STUDY IN OREGON, IDAHO, WYOMING AND MONTANA

Intent to Prepare an Environmental Statement

Pursuant to paragraph 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, in cooperation with the National Park Service, Department of Interior, will prepare an environmental statement for the Nez Perce (Nee-Mee-Poo) National Historic Trail study which will involve 1,350 miles of the route traveled by the nontreaty Nez Perce Indians from the vicinity of Wallowa Lake, Oreg., to Bear Paw Mountain, Mont.

By enactment of Pub. L. 94-527, October 17, 1976, Congress amended the National Trails System Act of 1968 to authorize a study to determine the feasibility of designating the Nez Perce (Nee-Mee-Poo) Trail as a component of the National Trails System.

Key issues evolve from the complex nature of landownership and land use. This trail enters 4 States and 21 counties within these States. It crosses portions of four Forest Service regions (1, 2, 4, and 6), 10 national forests, and three national parks. Also involved are four State offices of the Bureau of Land Management. Several RARE II roadless areas, the North Absaroka Wilderness, and the Snake, Salmon, Clark Fork of the Yellowstone and Missouri Rivers, all designated as wild or scenic rivers are crossed by this trail. There are several national and State historic sites along the route. The trail also passes through a portion of critical grizzly bear habitat in Yellowstone Park and the Shoshone National Forest.

The responsible official is Forest Service Chief John McGuire. Robert Torheim, who has initiated this cooperative study, is the Regional Forester of the Northern Region in Missoula. Ray Thompson is the study leader working with Gene Balaz of the National Park Service.

The draft feasibility report/environmental statement is scheduled for completion by December 1978, with a 60-day review period. The final report/ES is scheduled for submission to Congress in June 1979.

Comments on the notice of intent or on the trail study should be sent to the Regional Forester, Attention: Director, Recreation and Lands, Forest Service, Federal Building, Missoula, Mont. 59807.

Dated: September 25, 1978.

JAMES E. REID,
Acting Regional Forester,
Northern Region.

Soil Conservation Service

BROAD BROOK WATERSHED PROJECT, MASSACHUSETTS

Notice of Deauthorization of Federal Funding

Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83-566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of deauthorization of Federal funding for the Broad Brook Watershed Project, Hampshire and Hampden Counties, Mass., effective on September 15, 1978.

A notice of intent to deauthorize Federal funding was published on June 26, 1978. Appropriate committees of Congress and concerned local, State, and Federal agencies were notified of the proposed deauthorization at least 60 days prior to the effective date. No objections to deauthorization or expressions of support to complete the project have been made known to the Soil Conservation Service.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Pub. L. 83-566, 16 U.S.C. 1001-1008.)

Date: September 26, 1978.

JOSEPH W. HAAS,
Assistant Administrator for Water Resources, Soil Conservation Service.

[3410-16]

DARRS CREEK WATERSHED, TEXAS

Intent To Not File an Environmental Impact Statement for Deauthorization of Funding of the Darrs Creek Watershed

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service; Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for deauthorization of funding of the Darrs Creek Watershed, Bell County, Tex.

The environmental assessment of this action indicates that deauthorization of funding of the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Marks, State conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this action.

The project plan provided for accelerated technical assistance for application of land treatment measures and the installation of four floodwater retarding structures.

The notice of intent to not prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, P.O. Box 648, 101 South Main Street, Temple, Tex. 76501; 817-774-1214. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal is available to fill single copy requests.

No administrative action on the proposal will be taken until December 4, 1978.

(Catalog of Federal Domestic Assistance program No. 10.904, Watershed Protection and Flood Prevention Program—Pub. L. 83-566, 16 U.S.C. 1001-1008.)

NORTHEAST MISSISSIPPI R.C. & D. AREA CRITICAL AREA TREATMENT R.C. & D. MEASURES, MISSISSIPPI

Intent Not to Prepare Environmental Impact Statements

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that environmental impact statements are not being prepared for the Northeast Mississippi Resource Conservation and Development Area Critical Area Treatment Measures in Alcorn, Benton, Chickasaw, Choctaw, Clay, Itawamba, Kemper, Lee, Lowndes, Marshall, Monroe, Noxubee, Oktibbeha, Pontotoc, Prentiss, Tippah, Tishomingo, Union, Webster, Winston, Calhoun, and Lafayette Counties, Miss.

The environmental assessment of this federally assisted action indicates that the projects will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Chester F. Bellard, State Conservationist, has determined that the preparation and review of environmental impact statements are not needed for this project.

The measures concern plans for critical area treatment. The planned works of improvement include small grade stabilization structures, diversions, critical area plantings, debris basins, fencing, concrete and grass flumes, grassed waterways, and tree planting.

The notice of intent not to prepare environmental impact statements has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contracting Mr. Chester F. Bellard, State Conservationist, Soil Conservation Service, P.O. Box 610, Jackson, Miss. 39205, telephone 601-969-4335. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until November 6, 1978.

NORTHWEST MISSISSIPPI R.C. & D. AREA CRITICAL AREA, TREATMENT R.C. & D. MEASURES, MISSISSIPPI

Intent Not to Prepare Environmental Impact Statements

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that environmental impact statements are not being prepared for the Northwest Mississippi Resource Conservation and Development Area Critical Area Treatment Measures in Attala, Bolivar, Carroll, Coahoma, De Soto, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Panola, Quitman, Sharkey, Sunflower, Tallahatchie, Tate, Tunica, Washington, Yalobusha, and Yazoo Counties, Miss.

The environmental assessment of this federally assisted action indicates that the projects will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Chester F. Bellard, State Conservationist, has determined that the preparation and review of environmental impact statements are not needed for this project.

The measures concern plans for critical area treatment. The planned works of improvement include small grade stabilization structures, diversions, critical area plantings, debris basins, fencing, concrete and grass flumes, grassed waterways, and tree planting.

The notice of intent not to prepare environmental impact statements has been forwarded to the Environmental Protection Agency. HERMITAGE PUBLIC SCHOOL CRITICAL AREA TREATMENT R.C. & D. MEASURE, ARKANSAS

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Hermitage Public School Critical Area Treatment R.C. & D. Measure, Bradley County, Ark.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. M. J. Spears, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for treating about 9 acres of critical eroding areas on the school ground. The planned works of improvement include topsoil, shaping, grading, sprigging and sodding Bermuda grass, constructing a grassed waterway, mulching, fertilizing, and irrigation. One road will be removed and another road constructed. Two parking areas will also be installed.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. M. J. Spears, State Conservationist, Soil Conservation Service, Federal Office Building, 700 West Capitol Avenue, Little Rock, Ark. 72203, telephone 501-378-5445. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until November 6, 1978.

MISPILLION PROJECT WATER-BASED RECREATION R.C. & D. MEASURE, DELAWARE

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Mispillion Project Water-Based Recreation R.C. & D. Measure, Sussex County, Del.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Otis D. Fincher, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for water-based recreation. The planned works of improvement include the installation of a 10' x 30' fishing peir along the south shoreline of Silver Lake in Milford, Del. The pier will be located near the intersection of Maple and Lakeview Avenues at the eastern end of the lake.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Otis D.

MITCHELL SWAMP-PLEASANT MEADOW BRANCH WATERSHED PROJECT, SOUTH CAROLINA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the proposed action in Mitchell Swamp-Pleasant Meadow Branch Watershed, Horry County, S.C.

The watershed project was planned in 1964 and authorized by congressional committees in 1965. None of the planned structural measures have been installed.

The proposed action is to deauthorize the planned project. The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basis data developed during the environmental assessment is on file and may be reviewed by contacting Mr. George E. Huey, State Conservationist, Soil Conservation Service, One Greystone West, 240 Stoneridge Drive, Columbia, S.C. 29210; 803-765-5681. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties.

No administrative action on implementation of the proposal will be taken until 60 days from the time congressional committees are notified.

MOORE UNITED GAS GULLY CRITICAL AREA TREATMENT R. C. & D. MEASURE, FLORIDA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Moore United Gas Gully Critical Area Treatment R. C. & D. Measure, Escambia County, Fla.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. William E. Austin, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for gully stabilization. The planned works of improvement include a grade stabilization structure and 1.5 acres of vegetative cover.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. William E. Austin, State Conservationist, Soil Conservation Service, 401 SE. First Avenue, Gainesville, Fla. 32601, telephone 904-377-8732. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until November 6, 1978.

RONALD RIGBY GULLY CRITICAL AREA TREATMENT R.C. & D. MEASURE, FLORIDA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Ronald Rigby Gully Critical Area Treatment R.C. & D. Measure, Escambia County, Fla.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. William E. Austin, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for gully stabilization. The planned works of improvement include an earthen embankment with a pipe drop inlet and conduit, plunge basin, and 3.5 acres of vegetative cover.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. William E. Austin, State Conservationist, Soil Conservation Service, 401 Southeast First Avenue, Gainesville, Fla. 32601, telephone 904-377-8732. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. ARMS CONTROL AND DISARMAMENT AGENCY

GENERAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I, (the Act) and paragraph 8b of Office of Management and Budget Circular No. A-63 (Revised March 27, 1974) (the OMB Circular), that a meeting of the General Advisory Committee (GAC) is scheduled to be held on October 12, 1978, from 7 a.m. to 7 p.m. at Strategic Air Command Headquarters, Offutt Air Force Base, Omaha, Nebr., and on October 13, 1978, from 8 a.m. to 12 noon at Ellsworth Air Force Base, Rapid City, S.D.

The purpose of the meeting is for the GAC to receive briefings and hold discussions concerning arms control and related issues which will involve national security matters classified in accordance with Executive Order 11652 dated March 10, 1972.

The meeting will be closed to the public in accordance with the determination of September 5, 1978, made by the Director of the U.S. Arms Control and Disarmament Agency pursuant to section 10(d) of the Act and paragraph 8d(2) of the OMB Circular that the meeting will be concerned with matters of the type described in 5 U.S.C. 552(b)(1). This determination was made pursuant to a delegation of authority from the Office of Management and Budget dated June 25, 1973, issued under the authority of Executive Order 11769 dated February 21, 1974.

Dated: September 25, 1978.

CIVIL AERONAUTICS BOARD

[Docket 24048]

BRANIFF AIRWAYS, INC. AND BRANIFF INTERNATIONAL CORP.

Notice of Proposed Approval

Notice is hereby given, pursuant to statutory requirements of section 408(b) of the Federal Aviation Act of 1958, as amended, that the Civil Aeronautics Board intends to issue the attached order. Interested persons are hereby afforded until October 16, 1978, to file or request a hearing on the action proposed in the order.

Dated at Washington, D.C., September 20, 1978.

PHYLLIS T. KAYLOR,
Secretary.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

By Order 73-5-17, May 14, 1973, the Board authorized Braniff Airways, Inc. to establish and acquire control of A-B Aircraft, Inc. (Aircraft, Inc.) as a wholly owned subsidiary for the special purpose of immediately coverting into cash some portion of the value of certain conditional sales contracts for 11 BAC-111's, spare parts, and related equipment delivered to Allegheny Airlines, Inc.[1] Also, the Board authorized Braniff to lease the aircraft and related equipment from Aircraft, Inc. if the latter repossesses such aircraft on termination of the conditional sales contract with Allegheny. Further the Board's authorizations were made effective only so long as the activities of Aircraft, Inc. are limited to the legal or beneficial ownership and leasing of the aircraft and to the winding up of its corporate affairs as a special-purpose corporation.[2]

Braniff and Braniff International Corporation (BIC) now request that the Board approve, under section 408 of the Federal Aviation Act of 1958, as amended, and authorize, under the conditions of Order 73-11-8, October 23, 1973, the acquisition of control of Aircraft, Inc. by BIC through an interaffiliate transaction.[3]

Braniff proposes to sell its interest in Aircraft, Inc. to BIC by exchanging the capital stock for cash in the amount of the net book value of the stock at the end of the month preceding the transfer. According to the applicants, the aggregate book value of Aircraft, Inc., as of April 30, 1978, was approximately $2,609,500 and the purchase price is to be paid in cash at the date of the transfer.[4]

In support of their request, the applicants state that Braniff's financial statements carry the amount of the stockholders' equity on the books of Aircraft, Inc. as the book value of Braniff's investment in it; that the net effect of the proposed sale will be to substitute cash on Braniff's balance sheet for the book value of its nonairline investment, asset in Aircraft, Inc.; that this transfer will improve Braniff's attractiveness to creditors and simplify its corporate structure. The applicants further state that they have selected book value as the most reasonable selling price in the absence of a readily acceptable alternative means of valuing the Aircraft, Inc. stock. Also, they note that the Board has approved this method of valuation in authorizing the transfer of other Braniff subsidiaries to BIC.[5]

Applicants further assert that no one will be adversely affected by the transfer. None of the obligaitons of any of the parties to the lease and financing agreements would be affected and the two financing banks have consented to the present transaction.

No one has filed any objections to this application or requested a hearing.

We have concluded that BIC is a person controlling an air carrier, that Aircraft, Inc. is a person engaged in a phase of Aeronautics, and that the transaction is subject to Board approval under section 408 of the Act and under the conditions of Order 73-11-8 supra.[6] We further conclude, however, that the transaction does not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation, does not result in

[1] According to Braniff, if Aircraft, Inc. borrows from the lending banks on the security of the conditional sales contracts, Braniff would not incur recourse obligations, thus avoiding a contingent liability on its books.

[2] The conditional sales contracts involved 11 BAC-111's on which there was an outstanding balance plus accrued interest of approximately $17,650,000 as of March 1, 1973. Under the terms of the Braniff's arrangements with Aircraft, Inc. following the latter's establishment, Braniff was to turn over the conditional sales contracts to Aircraft, Inc. which in turn was to borrow about $13,200,000 from two banks using the conditional sales contracts as security and transmit the proceeds to Braniff. The difference between the $17,650,000 and the $13.2 million represented Braniff's investment in Aircraft, Inc. As between the latter and the lending banks, the principal and interest payments from Allegheny were to be applied to the $13.2 million bank loans.

[3] By this order the Board granted interim approval, subject to conditions, of BIC's acquisition of Braniff and the latter's subsidiaries, including Aircraft, Inc., which was established earlier in the same year.

[4] Applicants state that as of April 30, 1978, the remaining balance due Aircraft, Inc. from Allegheny was $3,859,748, with the final payment scheduled in August, 1980. As of the same date, the remaining balance owed by Aircraft, Inc. on the loan to the banks was $1,166,000 with the final payment due in August, 1978.

[5] Braniff Airways, Inc., and Braniff International Corp., Order 73-11-8 (transfer of Braniff International Hotels, Inc. and Braniff Education Systems, Inc.); Order 75-1-23, January 7, 1975 (transfer of International Resort Properties, Inc. and Western Restaurante, Ltd.); and Order 78-4-59, April 13, 1978 (transfer of BIC Guardian Services, Inc.)

[6] See Order 78-4-59, *supra.*, n. 5 above; Braniff Airways, Inc., and Braniff International Corp., Orders 75-1-23, January 7, 1975, and 75-2-56, February 13, 1975, at n. 1 (also involving Guardian Services, Inc.)

V 43 / 194 OCT 5 78

creating a monopoly or tend to restrain competition. No person disclosing a substantial interest in this matter requests a hearing and we conclude that the public interest does not require one.

The transfer of Aircraft, Inc. to BIC does not raise any issues which the Board did not consider in approving Braniff's and, through Braniff, BIC's acquisition of Aircraft, Inc. in Orders 73-5-17 *supra.*, and 73-11-8, *supra.*[7] Aircraft, Inc., a person engaged in a phase of aeronautics, will still be affiliated with the certificated air carrier, Braniff, under the common control of BIC. It appears that the basic findings and conclusions concerning that affiliation which the Board made in the earlier orders still are valid.[8]

The transaction will not impair Braniff's integrity or its ability to fulfill its certificate obligations. The Board finds, therefore, that the control relationships which the acquisition of direct control of Aircraft, Inc. by BIC create are consistent with the public interest and that the requirements of section 408 are otherwise fulfilled. Our action is not a major Federal action within the meaning of the National Environmental Policy Act of 1969.[9]

We have published in the FEDERAL REGISTER a notice of intent to dispose of this application without a hearing and have furnished a copy of the notice to the Attorney General not later than the day after its publication, both in accordance with the requirements of section 408(b) of the Act.

Accordingly, we approve the acquisition of A-B Aircraft, Inc. by Braniff International Corp. under section 408(a)(6) of the Act and in accordance with the conditions of Order 73-11-8, dated October 23, 1973.

The Board retains jurisdiction in this proceeding for the purpose of amending or revoking the approval granted here, with or without hearing, as the public interest may require.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-28201 Filed 10-4-78; 8:45 am]

[7] See also Order 78-4-59, *supra*, and Tiger International, Inc., Orders 76-3-96, March 15, 1976, and Order 77-2-124, February 25, 1977.

[8] See Santa Fe Industries, Inc. and Santa Fe Natural Resources, Order 72-4-40, April 10, 1972, and Order 78-4-59, *supra*. The applicants have stated BIC's willingness to liquidate Aircraft, Inc., according to Braniff's commitment, when the purpose for which it was established has been accomplished.

[9] From the examination of the application it appears that a grant of the requested relief will not cause any of the results set forth in section 312.9 of the Board's Procedural Regulations.

NEW ENGLAND FISHERY MANAGEMENT COUNCIL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council, established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 95-265), will meet to discuss: (1) Foreign fishing regulations for 1979; (2) Foreign fee schedules for 1979; (3) Gear conflicts committee report; (4) Groundfish trip limits analysis and new plan development; and (5) Other business.

DATES: The meeting will convene on Monday, October 23, 1978, at approximately 10 a.m. and adjourn on Tuesday, October 24, 1978, at approximately 5 p.m. This meeting is open to the public.

ADDRESS: The meeting will take place at the Sheraton Inn, 291 Jones Road, Falmouth, Mass.

FOR FURTHER INFORMATION CONTACT:

Spencer Apollonio, Executive Director, New England Fishery Management Council, Peabody Office Building, One Newbury Street, Peabody, Mass. 01960.

SUPPLEMENTARY INFORMATION: For information on seating arrangements, changes to the agenda, and/or written comments, contact the Executive Director.

Dated: October 2, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

National Technical Information Service

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, DC 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield Va. 22161 for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN WOOL TEXTILE PRODUCTS FROM THE REPUBLIC OF KOREA

Announcing Additional Import Controls

SEPTEMBER 28, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling certain shoe soles and uppers of wool felt in Category 459 (only T.S.U.S.A. numbers 700.7510 through 700.7560) from the Republic of Korea at 2,850,000 pounds during the 12-month period which began on January 1, 1978.

(A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 3421) and September 5, 1978 (43 Fr 39408).

SUMMARY: Under the terms of paragraph 16 of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of December 23, 1977, as amended, between the Governments of the United States and the Republic of Korea, the Government of the United States has decided to control imports of wool textile products in Category 459 (only T.S.U.S.A. numbers 700.7510 through 700.7560), produced or manufactured in the Republic of Korea and exported to the United States during the 12-month period which began on January 1, 1978, in addition to those categories previously designated.

EFFECTIVE DATE: October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert C. Woods, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5423.

SUPPLEMENTARY INFORMATION: On December 30, 1977, there was published in the FEDERAL REGISTER (42 FR 65246) a letter dated December 27, 1977 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, produced or manufactured in the Republic of Korea, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the 12-month period which began on January 1, 1978 and extends through December 31, 1978. On June 30, 1978, a further notice was published in the FEDERAL REGISTER (43 FR 28531) which established levels of restraint for wool and man-made fiber textile products in Categories 440 and 605 during the agreement year which began on January 1, 1978.

In accordance with the terms of the bilateral agreement, the U.S. Government has decided also to control imports of wool textile products in Category 459 (only T.S.U.S.A. numbers 700-7510 through 700.7560) produced or manufactured in the Republic of Korea and exported to the United States during the 12-month period which began on January 1, 1978. The level of restraint of 2,850,000 pounds will be adjusted to reflect imports of 1,917,967 pounds during the period beginning on January 1, 1978 and extending through July 31, 1978. Further adjustments will be made to account for imports during the period beginning on August 1, 1978 and extending through the effective date of this action.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

SEPTEMBER 28, 1978

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: This directive further amends, but does not cancel, the directive issued to you on December 27, 1977 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in the Republic of Korea.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 23, 1977, as amended, between the Governments of the United States and the Republic of Korea; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on October 2, 1978 and for the 12-month period beginning on January 1, 1978 and extending through December 31, 1978, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Category 459 (only T.S.U.S.A. numbers 700.7510 through 700.7560), produced or manufactured in the Republic of Korea, in excess of 2,850,000 pounds.[1]

Wool textile products in Category 459 (only T.S.U.S.A. numbers 700.7510 through 700.7560) which have been exported to the United States prior to January 1, 1978 shall not be subject to this directive.

Wool textile products in Category 459 (only T.S.U.S.A. numbers 700.7510 through 700.7560) which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408).

V 43 / 194 OCT 5 1978 UM

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of wool textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

[FR Doc. 78-28107 Filed 10-4-78; 8:45 am]

[3510-25]

NEW MULTIFIBER AGREEMENT

Announcing Import Restraint Levels With Columbia

SEPTEMBER 28, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool, and man-made fiber textile products from Columbia during the 12-month period beginning on July 1, 1978, pursuant to a new bilateral agreement.

SUMMARY: On August 3, 1978, the Governments of the United States and Colombia exchanged notes establishing a new Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement for the 4-year period begining on July 1, 1978 and extending through June 30, 1982. Within the applicable group limits, the agreement establishes specific limits for Categories 313, 443, 633, and 641 during the 12-month period beginning on July 1, 1978. Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit imports for consumption, or withdrawals from warehouse for consumption, of cotton, wool, and man-made fiber textile products in Categories 313 (cotton sheeting), 443 (men's and boys' wool suits), 633 (men's and boys' suit-type coats of man-made fibers), and 641 (man-made fiber blouses, not knit) to the designated amounts, pursuant to the new agreement. The levels of restraint in the letter have not been adjusted to account for imports during the period beginning on July 1, 1978 and extending through the effective date of this action. Imports during this period will be charged to the new levels.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408)).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5423.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

SEPTEMBER 28, 1978

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of August 3, 1978, between the Governments of the United States and Colombia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on October 2, 1978, and for the 12-month period beginning on July 1, 1978 and extending through June 30, 1979, entry into the United States for consumption, and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products, exported from Columbia in the following categories, in excess of the indicated 12-month levels of restraint:

Category and 12-month level of restraint[1]

313—8,500,000 square yards.
443—11,292 dozen.
633—66,298 dozen.
641—124,138 dozen.

In carrying out this directive entries of cotton, wool, and man-made fiber textile products in the foregoing categories, produced or manufactured in Columbia and exported to the United States prior to July 1, 1978 and entered on and after the effective date of this directive, shall not be charged against the levels of restraint established in this directive.

[1] The levels of restraint have not been adjusted to reflect any imports after June 30, 1978.

Cotton, wool, and man-made fiber textile products in the foregoing categories that have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C 1448 (b) before the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43FR 39408).

In carring out the above directions, entry in the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Columbia and with respect to imports of cotton, wool, and Man-made fiber textile products from Columbia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

COMMISSION OF FINE ARTS

Meeting

The Commission of Fine Arts will meet in open session on Tuesday, October 24, 1978, at 10 a.m. in the Commission's offices at 708 Jackson Place NW., Washington, D.C. 20006, to discuss various projects affecting the appearance of Washington, D.C.

Inquiries regarding the agenda and requests to submit written or oral statements should be addressed to Charles H. Atherton, Secretary, Commission of Fine Arts, at the above address.

This notice confirms notice of December 27, 1977, published at 42 FR 64651.

Dated in Washington, D.C., September 26, 1978.

CHARLES H. ATHERTON,
Secretary.

DEPARTMENT OF DEFENSE

Department of the Air Force

PRIVACY ACT OF 1974

New System of Records

AGENCY: Department of the Air Force.

ACTION: Notification of a new system of records.

SUMMARY: The Department of the Air Force proposes a new system of records identified as F03001 SAC A, entitled: "Drug Rehabilitation Action Management Information System".

DATES: This system shall become effective as proposed without further notice on November 6, 1978, unless comments are received on or before November 6, 1978, which would result in a contrary determination requiring republication for further comments.

ADDRESS: Send comments to the system manager identified in the record system notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Jon Updike, HQ USAF/DAAD(S), Bolling Air Force Base, Washington, D.C. 20330, telephone 202-767-4545.

SUPPLEMENTARY INFORMATION: The Department of the Air Force systems of records notices, as prescribed by the Privacy Act have been published in the FEDERAL REGISTER as follows:

FR Doc. 77-28255 (42 FR 50784), September 28, 1977.
FR Doc. 78-25819 (43 FR 42376), September 20, 1978.

The Department of the Air Force has submitted a new system report on August 28, 1978, pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a(o)).

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

OCTOBER 2, 1978.

F03001 SAC A

System name:

Drug Rehabilitation Action Management Information System.

System location:

At servicing Air Force (AF) installation Social Actions Offices, Consolidated Base Personnel Offices, Strategic Air Command Headquarters, SAC Drug Rehabilitation Center and Air Force Manpower and Personnel Center. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notice.

Categories of individuals covered by the system:

Air Force active duty military personnel who are identified as drug abusers.

Categories of records in the system:

As a minimum, the system contains computerized data and manual files related to drug abuse identification, category of abuse, acceptance of treatment, and subsequent personnel actions.

Authority for maintenance of the system:

5 U.S.C. 301, Departmental regulations; and 10 U.S.C. 8074, Commands: territorial organization.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To identify and track a person's acceptance/declination and progress in the Strategic Air Command drug rehabilitation program and ultimate disposition (retained on active duty, separated, demoted, etc.). Those authorized to have access to the files are base and command level social actions staffs, drug rehabilitation instructors, and selected command staff personnel. The files are used to maintain information on drug abusers, to measure the success of program objectives, to substantiate personnel actions, provide analysis reports to concerned managers, and to support separation actions.

Policies and practices for storing, retrieving, accessing, retaining, and disposition of records in the system:

Storage:

Computer disk/tape files and manual file folders.

Retrievability:

Filed by name, by other identification number, or system identifier.

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. The computer file is secured on computer disk/tape by computer operations personnel. Manual file folders are stored in security file containers/cabinet safes.

Retention and disposal:

Computerized and manual files will be retained indefinitely; disposed of in accordance with AFM 12-50.

System manager(s) and address:

Deputy Chief of Personnel, Strategic Air Command, SAC Drug Rehabilitation Center, McConnell AFB KS, and base level Social Actions Offices.

Notification procedures:

Chief, Social Action, Strategic Air Command Headquarters for Computer Files or Det 1, 3902 ABW/CC, McConnell AFB KS, and base level Social Actions Offices for manual files. Requests to determine existence of record on file should include full name, grade, and unit of assignment. Personal visit proof of identification requires full name and possession of Department of Defense (DD Form 2AF) Armed Forces Identification Card, or driver's license and personal recognition of counselor.

Record access procedure:

Chief of Social Actions, Strategic Air Command Headquarters, Det 1, 3902 ABW/CC, McConnell AFB KS, or base level Social Actions Offices. Mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notice.

Contesting record procedures:

The Air Force's rules for accessing records and for contesting and appealing initial determinations by the individual concerned may be obtained from the systems manager.

Record source categories:

Information obtained from medical institution, personnel records, individuals.

Systems exempt from certain provisions of the Act:

None.

ENVIRONMENTAL IMPACT ANALYSIS PROCESS

Proposed Closure of Chanute AFB, Ill.

SEPTEMBER 26, 1978.

The Air Force has begun the formal environmental impact analysis process for the proposed closure of Chanute Air Force Base (AFB), Ill.

Since the late sixties, there has been a significant downward trend in the number of Air Force installations, down 38 percent; aircraft, down 40 percent; and manpower, down 35 percent. These reductions in overall activity have resulted in a decrease in technical training requirements and a study as to whether reductions could be made in the Air Force base structure supporting technical training.

There are five technical training centers (TTC's) located at the follow-

V 43 / 194

ing major installations: Chanute Air Force Base, Ill.; Keesler Air Force Base, Miss.; Lackland Air Force Base, Tex.; Lowry Air Force Base, Colo.; and Sheppard Air Force Base, Tex. An evaluation of each of these locations led to the recommendation that Keesler Air Force Base, Lackland Air Force Base, and Sheppard Air Force Base be excluded from further consideration of either a complete closure or relocation of the technical training center mission.

The proposed action is the closure of Chanute Air Force Base, Ill., with the alternative being to reduce Lowry Air Force Base, Colo., by relocation of the technical training and other activities to other DoD installations.

The environmental impact analysis process will consider the impact on the area surrounding Chanute Air Force Base of the departure of approximately 2,850 assigned military personnel, plus an average student load of approximately 5,000 students, and an estimated change in civilian jobs as follows:

Loss of approximately 1,450 Department of the Air Force Civil Service jobs.

Loss of other jobs (base exchange, concessionaire, nonapproriated fund), approximately 1,100 full and part-time.

The process will also consider the impact of the increase of personnel at Keesler Air Force Base by approximately 1,600 permanent party and students, at Lowrey Air Force Base by approximately 1,090 permanent party and students, and at Sheppard Air Force Base by approximately 4,890 permanent party and students.

The environmental impact analysis of the altenative action will consider the impact on the area surrounding Lowry Air Force Base of the departure of approximately 3,700 assigned military personnel, plus an average student load of 4,100 students, and an estimated change in civilian jobs as follows:

Loss of approximately 1,270 Department of the Air Force civil service jobs.

Loss of other jobs (base exchange, concessions, nonappropriated fund), approximately 1,400 full and part time.

The analysis of the alternative will also consider the impact of an increase of personnel at Keesler AFB by approximately 2,120 permanent party and students, at Chanute AFB by approximately 3,610 permanent party and students, at Sheppard AFB by approximately 1,560 permanent party. Approximately 3,470 permanent party manpower authorizations and 100 base operating support contract man-years would remain at Lowry Air Force Base and 280 manpower authorizations and 160 students in the Denver area.

The environmental impact analysis process will lead to a formal environmental assessment which will be used to determine if a draft environmental impact statement (EIS) should be prepared or if a finding of no significant impact is appropriate.

If the formal environmental assessment indicates there is significant impact on the quality of the human environment, the Air Force will file a Draft EIS with the Environmental Protection Agency and release it to the public.

If such impact is not found, a finding of no signficant impact will be prepared and released.

Any comments or questions should be directed to the Deputy for Environment and Safety, Office of the Secretary of the Air Force, Room 4C885, the Pentagon, Washington, D.C. 20330, telephone 202-697-0800.

CAROL M. ROSE,
Air Force, Alternate
Federal Register Liaison Officer.

[FR Doc. 78-28138 Filed 10-4-78; 8:45 am]

[3910-01]

ADVANCED TANKER/CARGO AIRCRAFT PROCUREMENT

Environmental Determination

AUGUST 29, 1978.

The Air Force is contemplating the procurement of approximately 20 modified DC-10-30F wide-bodied freighter aircraft for use as tankers with cargo-carrying capability. A limited pre-delivery test program would begin in April 1980 and operational aircraft delivery to the Strategic Air Command would begin in October 1980. In accordance with the National Environmental Policy Act, the Air Force has prepared a Candidate Environmental Impact Statement (EIS) for the proposed procurement. After careful review of the Candidate EIS, it was determined that the proposed action was not a major Federal action significantly affecting the quality of the human environment nor was it likely to be highly controversial with regard to its environmental impacts. This conclusion is based upon the following:

a. The KC-10 is a derivative of the DC-10-30CF wide-bodied convertible freighter aircraft currently flying in commercial service with several commercial U.S. and foreign airlines. Minimum modifications to the aircraft would be made.

b. It is estimated that the KC-10 fleet would fly about 1900 hours/year in the stratosphere based on current projected typical missions. This would have a minimal climatic impact. The injection of oxides of nitrogen into the atmosphere by the proposed KC-10 fleet has been investigated by the Air Force Geophysics laboratory and they have determined that the effects on the ozone layer would be negligible (less than .01% change in ozone).

c. The KC-10 fleet would consume approximately 22 million gallons of fuel per year. The KC-10 uses fuel more efficiently than most other current Air Force aircraft in terms of ratio of fuel transferred to fuel burned. The propulsion systems would operate with JP-4, JP-5, and JP-8 fuel, all of which are low in sulfur and metal content.

d. The KC-10 would utilize the General Electric CF6-50C1 engine. These engines will comply with the Environmental Protection Agency air pollutant emission standards applicable to commercial engines at the time of procurement.

e. The KC-10 is quieter than the turbo jet, turbofan tanker/cargo aircraft presently in the Air Force inventory and meets Federal Aviation Regulation (FAR) Part 36 noise standards.

f. Existing avionics equipment would be used to the greatest extent possible. The navigation and other electronic systems would also comply with civilian air traffic control requirements. The KC-10 utilizes a search/weather radar which except for system checkout, would not be operated on the ground and would therefore not pose a hazard to personnel. System checkout would be conducted in accordance with AFR 127-101 and other safety provisions to prevent any on-ground radar hazards.

g. Logistic support concepts for tanker and cargo forces are not expected to change with the addition of the KC-10 force. Existing ground support equipment and existing maintenance facilities would be utilized; maintenance support would be performed in existing facilities.

For the reasons outlined above, the United States Air Force has decided not to file a Draft EIS with the Environmental Protection Agency and has prepared a negative determination.

Copies of the negative determination and the supporting documentation are available, upon request, from the Deputy for Environment and Safety, SAF/MIQ, Office of the Secretary of the Air Force, Pentagon, Washington, D.C. 20330, telephone 202-697-9297.

CAROL M. ROSE,
Air Force Alternate Federal Register Liaison Officer.

OCT 5 1978

[3810-71]

Department of the Navy

SECRETARY OF THE NAVY'S ADVISORY COMMITTEE ON NAVAL HISTORY

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. I), notice is hereby given that the Secretary of the Navy's Advisory Committee on Naval History will meet on October 26, 1978, at 9 a.m., in Room 4D710, the Pentagon, Washington, D.C.

The purpose of the meeting is to review the naval historical activities of the past 18 months and to make comments and recommendations on these activities to the Secretary of the Navy.

Depending on available space, public attendance may be limited to those persons who have given written notice at least 5 days prior to the meeting of their intention to attend.

For further information about this notice and the Secretary of the Navy's Advisory Committee on Naval History contact: Captain A. D. Thomson, U.S. Navy, Deputy Director of Naval History, Building 200, Washington Navy Yard, Washington, D.C. 20374, telephone 202-433-2379.

Dated: September 27, 1978.

P. A. WILLE,
Captain, JAGC, U.S. Navy
Deputy Assistant Judge Advocate General (Administrative Law).

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. 77-001-LNG; (CP74-160, CP74-207, CP75-83-3)]

PAC INDONESIA LNG CO. AND WESTERN LNG TERMINAL ASSOCIATES

DOE/ERA Opinion No. 2, Opinion on Rehearing—Issues Related to the Escalator and Currency Adjustor Contract Provisions

SEPTEMBER 29, 1978.

I. INTRODUCTION

A. SUMMARY

In Opinion No. 1, the Department of Energy (DOE) conditionally approved a proposed importation of liquefied natural gas (LNG) from Indonesia to the West Coast. Among other things, the DOE disallowed certain escalation and currency adjustment clauses in the LNG purchase contract between the U.S. importer (Pac-Indonesia LNG Co., hereinafter "Pac-Indonesia") and the Indonesian supplier (Perusahaan Pertambangan Minyak Dan Gas Bumi Negara, hereinafter "Pertamina"). The DOE also disapproved Pac Indonesia's proposal that its tariff provide for automatic flow-through of any price increases under those clauses. Opinion No. 1 did indicate, however, that DOE would consider revisions to the escalation and currency adjustment provisions.

Following procedures described below, Pac Indonesia has filed an amendment to tis contract with Pertamina, which contains revised escalation provisions, and has requested that flow-through of the cost increases resulting from the new escalator provisions and the currency adjustor provision as orginally proposed be approved.

After considering the applications for rehearing, the revisions filed by Pac Indonesia, and the comments filed thereon, the DOE finds that the amended contract escalation clause would not be inconsistent with the public interest in the special circumstances of this proceeding. Moreover, the DOE now withdraws its objections to the currency adjustment clause, and conditionally sanctions the operation of that clause, as explained below.

The DOE will shortly address remaining matters raised by the applications for rehearing of Opinion No. 1 and then issue the justiciable order under section 19(b) of the Natural Gas Act.

B. PROCEDURAL BACKGROUND

In reviewing the pricing clauses in the Pertamina-Pac Indonesia contract, we take note of the special history of these proceedings. The first application for permission to import the LNG, filed on November 30, 1973, with the Federal Power Commission (FPC), reflected Pertamina's September 6, 1973, contract to sell LNG for 63 cents per million Btu (MMBtu) with escalation at 2 percent per year. On January 9, 1975, upon the refusal of the Indonesian government to approve a contract containing an escalator which did not reflect world energy prices, Pertamina and Pac Indonesia's predecessor revised the contract, as follows:

To set a base price of $1.25 per MMBtu for LNG FOB the tanker at the loading dock in Sumatra;

To escalate the base price by a formula based on two energy price indicators: (a) 50 percent on changes in the actual average price of exported Indonesian crude oil, and (b) 50 percent on changes in the U.S. Department of Labor, Bureau of Labor Statistics, (BLS) Code 05 Wholesale Price Index for Fuels and Related Products.

On October 28, 1975, the parties again revised the contract to fix a minimum pricing provision designed to cover the amortization of interest on Pertamina's debt as well as its operating costs.

The Administrative Law Judge conditionally approved the import on July 22, 1977. On October 1, 1977, the FPC ceased to exist and its gas import jurisdiction vested in the Secretary of Energy.

The DOE issued Opinion No. 1 on December 30, 1977. Pac Indonesia and others submitted applications for rehearing within the 30 day period allowed by section 19(a) of the Natural Gas Act. On February 22, 1978, the Administrator of the DOE's Economic Regulatory Administration held a conference to consider the applications for rehearing. An Order Granting Rehearing for the Purpose of Further Consideration was issued on February 28, 1978.

The Order allowed Pac Indonesia until May 1, 1978, to submit a contract amendment containing revised escalation provisions, and all parties were given 15 days to comment on any submissions. After four extensions of time, Pac Indonesia filed the revised provisions on July 28, 1978. Comments were filed by the staff of the Federal Energy Regulatory Commission (FERC staff) on August 7, 1978, by Hollister Ranch Owners' Association and the Santa Barbara Citizens for Environmental Defense (Hollister) on August 10, 1978, and by San Diego Gas & Electric Co. (San Diego) on August 11, 1978. Pac Indonesia filed a limited response to Hollister on August 21, 1978.

C. ECONOMIC BACKGROUND

Opinion No. 1 explicitly recognized that some escalation provisions might be appropriate in the present LNG contract. We recognize Pertamina's concerns with respect to revenues over the life of a long-term contract which will not terminate until the next century, 20 years after initial delivery. The necessity for a long-term contract reflects the large capital outlays involved in an LNG venture, including the liquefaction plant, the cryogenic tankers, and the receiving, storage and regasification terminal. Such projects must wed a substantial, dedicated gas supply (over 4 trillion cubic feet of non-associated gas in this project) to a large, assured market.

These factors support our favorable consideration of appropriate escalation provisions. However, the approval of price provisions in LNG import contracts must also be based upon a careful assessment of the impact the provisions would have on national energy goals as well as a determination of the extent to which the resulting prices in particular projects are justified in terms of national and regional needs for gas.

V 43/194
OCT 5 1978

Domestic natural gas consumption will continue to draw primarily on the conventional supplies obtainable in the contiguous United States. Such natural gas resources are within the reach of drilling technology—on shore and on the continental shelf—at locations near the established pipeline infrastructures. National energy policy recognizes the primacy of these proximate supplies of conventional gas, as enterprise develops them and claims access to U.S. markets. Other potential supplies are marginal or at least intramarginal with respect to U.S. markets, principally by reasons of remoteness (as reflected in the transportation costs) or uncertain technology. Intramarginal supplies include gas from the Alaskan North Slope, various supplies from advanced technology applied to domestic resources, and overland supplies from neighboring sovereign countries, as mutual benefits may dictate such transactions. Marginal supplies include synthetic natural gas (SNG) from imported petroleum and LNG from abroad.

Even though capital-intensiveness, price, long-term commitment and vulnerability make remote foreign LNG supplies most marginal for U.S. markets, there is a place for some such projects. We must take care, however, that decisions taken with respect to LNG imports from remote sources do not discourage the ultimate development of proximate resources, and that only those LNG projects are approved in which the need for the gas cannot be satisfied by more basic sources of supply. In that context, we must also protect the consumer from unacceptable risks of escalation in the price of the gas.

In Opinion No. 1, DOE found that the need for this import and its general acceptability as a source of supply did not outweigh the risk to the consumer of unreasonable price increases posed by the contract escalator provisions. Applicants now present us with a revised escalator which we must evaluate with respect to that risk, bearing in mind California's special needs for gas, as discussed in Opinion No. 1.

II. Discussion

A. The Revised Price Escalation Provision

In Opinion No. 1, DOE disapproved the Pac-Indonesia FOB price escalator provision (based 50 percent on Indonesian crude oil prices and 50 percent on the BLS Wholesale Price Index-Fuels and Related Products) on the grounds that it was tied too directly to future movements in world petroleum prices and that the BLS fuels element would be influenced by future domestic energy pricing policy and by the price of the import itself, thus creating a significant self-compounding effect. DOE did not object, however, to the concept of an escalator provision and suggested, alternatively, the use of an index generally reflecting world or U.S. economic conditions in order to provide a more broadly-based means of adjusting prices over the life of the contract.

The applicants submitted an amendment on July 28, 1978, reflecting a revised escalator provision. The revised escalator continues to modify 50 percent of the base price of $1.25/MMBtu on the basis of changes in Indonesian crude oil prices, but with the added constraint of a 15 percent floor and ceiling on annual price fluctuations, which allows any increase above the 15 percent annual limitation and any downward adjustment in excess of 15 percent to be carried forward and applied in future years to the extent permitted by the floor or ceiling. The remaining 50 percent of the revised escalator now reflects a broad-based U.S.A. economic index, the BLS Index of Wholesale Prices All Commodities (WPI-AC).

In commenting on the filing of the revised escalator, Hollister and the FERC staff objected to the use of any indicator based on Indonesian prices for crude oil. Hollister further requested formal hearings to explore the operation of the escalator and to develop an evidentiary record. Objections to Hollister's request were filed by Pac Indonesia. San Diego stated that the revised escalator should be approved.

DOE finds that the revised escalator acceptably responds to the objections raised in Opinion NO. 1, and we will, therefore, approve the flow-through of costs associated therewith. It must be stressed that our conclusion is based on the specific circumstances of this case, including the fact that the escalator provisions in this contract have now been revised twice in an effort to reach terms acceptable to both governments. Our approval in the circumstances of this protracted case, however, should not necessarily be viewed as a precedent for approval of similar contract pricing provisions in proposed import cases involving different circumstances with respect to supply alternatives, market requirements or other salient factors.

While DOE continues to have grave reservations concerning the acceptability of any LNG supply contract which substantially or totally links the price of gas to cartel-influenced oil prices, there are also features of this contract which tend to mitigate the inclusion of a crude oil-based element in the escalation clause. We note, for example, that the contract generally establishes a fair and symmetrical basis for the relationship between buyer and seller. The contract sets terms for a fixed 20-year period with no option to reopen. It includes a "most favored nation" clause under which Pac Indonesia would be entitled to a price for LNG no higher, on an FOB equivalent basis, than that paid any other purchaser under any other contract with Pertamina in existence as of January 9, 1975. The escalator provisions do not apply to the full cost of the LNG as imported and delivered to the United States, but only to the price of the LNG in Sumatra near the point of production.

Further, the contract's terms provide symmetrical and countervailing responsibilities and penalties for buyer and seller. Each may terminate the contract if the other fails to meet its obligations. Quantities underlifted by Pac Indonesia will be made up at the contract sales price in effect at the time of actual delivery. Quantities under-delivered by Pertamina will be made up at the price prevailing at the time of Pertamina's failure to deliver. In addition, if Pertamina fails to deliver at least 90 percent of contract requirements and fails to make up those quantities, Pac Indonesia may terminate the contract or require Pertamina to deliver a quantity equivalent to that not delivered previously, at a 10 percent discount from the contract sales price (Article 7.7).

The base price of the LNG is not arbitrarily inflated. Most of the initial FOB price of $1.25 per MMBtu consists of the extensive capitalization expenses necessary for the liquefaction plant. The portion of the base price remaining for production and pipeline transmission to the liquefaction plant is estimated to be in the range of $0.20–$0.60 per MMBtu. The wellhead portion of the base price, after deducting the pipeline transmission costs, will be somewhat less.

In summary, the contract generally establishes a reasonable base price for the gas and terms which are fair to buyer and seller alike. These generally equitable provisions, when balanced against the provisions of the escalator clause, tend to weigh in favor of acceptance of provisions which otherwise might be found to be unacceptable.

We find the revised escalator formula to be a substantial improvement over the original provision. The escalator provision disapproved in Opinion No. 1 was linked entirely to energy price movements. The revision limits the direct tie to energy prices, thereby providing greater protection from future increases in world oil prices.

In addition, the 15 percent annual limitation provides some protection against the consequences to gas consumers of a drastic rise in world oil prices. Although any such increases will eventually be reflected in this

component, the limitation effectively spreads their impact over time, and would tend to mitigate partially the economic dislocation that could occur in the event of any significant price increases for Indonesian crude oil. Although a lower ceiling may well be essential in other circumstances, we are persuaded that this limitation provides sufficient protection to the consumer when viewed in the context of all the facts in this case.

We also note that the Indonesian crude oil portion of the formula continues to compute increases from the actual sales prices paid for Indonesian exports (as opposed to posted prices), and as such represents a broad and accurate mechanism for measuring changes in actual energy prices. Moreover, the more volatile spot market prices paid for Indonesian crude are excluded from the calculations. The use of such a price quotation mechanism, which appears to reflect the market for the bulk of Indonesian exports, assures greater stability and clarity in this component than would be provided if it were based on commodities with a more volatile and limited market.

We will also approve the use of the WPI-AC for the other 50 percent of the escalator provision in order to provide a broader basis for price adjustments, as called for in Opinion No. 1. We note that the contract amendment specifies a procedure for development of an alternative index in the event that BLS ceases to compile and publish the WPI-AC. Indeed, we have been advised by the Department of Labor that its current series of indices is undergoing significant revisions with possible abolishment of some. DOE will direct, therefore, that the applicants submit for approval any new index adopted pursuant to these contract provisions. We suggest that the GNP-deflator published by the United States Department of Commerce would be an acceptable alternative, since it is also a broad-based domestic indicator which avoids any significant self-compounding effect in relation to this project.

Hollister requested further hearings in which to explore the operation of the revised contract provisions. However, the revised escalator formula is clearly defined by the Applicants' filing and information regarding operation of the WPI-AC is readily available to all parties. Therefore, the opportunity given all the parties to comment on the proposal provided an adequate airing of views concerning this issue. Moreover, Hollister has not met its burden of showing that hearings on the subject of the escalator would provide us with additional material information. We note finally that Hollister's intervention in this proceeding was granted for the limited purpose of participation in the siting and environmental aspects. No need has been established for further hearings, and Hollister's request will be denied.

B. The Currency Revaluation Factor

In Opinion No. One, DOE disapproved the automatic flow-through of costs associated with the currency revaluation factor contained in the sales contract, based upon a finding that the factor did not afford "equitable distribution of currency fluctuation risk between buyer and seller." On rehearing, the applicants argue that DOE's finding is in error, because it is based on conclusions (a) that the contract sales price would never be adjusted downwards in the event of an appreciation of the dollar, and (b) that the 25-percent limitation on adjustments due to dollar depreciation applies quarterly and therefore has no ceiling. Applicants state that neither conclusion is correct, and therefore request that DOE approve the currency revaluation factor as negotiated.

Hollister and the FERC staff oppose the applicants' request. Hollister suggests that DOE should take notice of recent announcements by the Organization of Petroleum Exporting Countries that it intends to adopt a mechanism which will provide for automatic adjustments in crude oil prices to reflect changes in the value of the U.S. dollar. They argue that if DOE accepts an escalator clause which is tied to Indonesian crude oil prices, the adoption of such a mechanism, in conjunction with the currency adjustor, would provide a double adjustment for fluctuations in the value of the dollar. The FERC staff opposes the currency revaluation factor "because its proposed use is satisified by use of the escalator based on the United States Wholesale Price Index."

DOE has reexamined the currency adjustment provision in light of Pac Indonesia's explanations, and finds that its objections in Opinion No. 1 were based upon a misconstruction of its operation. Paragraph 9.6 of the amended contract does provide an absolute limit of 25 percent on the amount of adjustment called for by this clause, and further provides for downward adjustment in the event of appreciation of the dollar (although such downward adjustment cannot carry the price below the price on the date of first initial delivery in any quarter when the Calculated Contract Sales Price exceeds the price on the date of initial delivery). Properly understood, the currency reevaluation factor, while not perfectly symmetrical in its operation, is not unreasonable in this long-term contract; flow-through of costs associated therewith will thus be approved.

The FERC staff's argument that use of the WPI satisfies the need for a currency adjustor is not persuasive. As stated in Opinion No. 1, we do not object to the concept of a currency revaluation factor, per se, as a means by which Indonesia may assure itself of stability of real revenues under this long-term contract.

Hollister's objection would have serious merit if Pertamina were to adopt a mechanism that adjusted Indonesian crude oil prices to reflect changes in the value of the dollar. However, Pertamina has not taken any such action. Our order will require that if such a mechanism is adopted in the future, appropriate action be taken to remove the potential for duplicative adjustment of the LNG price.

III. Conclusion

The DOE finds that good cause exists to modify Opinion No. 1, as described in the body of this Opinion. Upon completion of the DOE's consideration of other matters raised in the applications for rehearing, an appropriate Order shall be issued, reflecting the DOE's findings with respect to such matters as well as those set forth herein.

Issued in Washington, D.C., September 29, 1978.

Federal Energy Regulatory Commission

[Docket No. ER78-616]

CENTRAL ILLINOIS PUBLIC SERVICE CO.

Filing New Connection Point

September 27, 1978.

Take notice that Central Illinois Public Service Co. ("CIPS") on September 19, 1978, tendered for filing two additional connection points to be included in Appendix "A" of the Interconnection Agreement between Illinois Power ("IP"), Union Electric Co. ("UE") and Central Illinois Public Service Co. CIPS indicates that the revised connection point identified as CIPS-IP Connection Point 9—Canton, eliminates the condition whereby CIPS made payment to Illinois Power covering cost of capital investment for facilities at the 138 kV Cuba Switching Station and telemetering equipment at Decatur. CIPS further indicates that the new connection point, identified as CIPS-IP Connection Point 36—East of West Frankfort, provides for installa-

V 43/194
OCT 5 1978

tion of a 345/138 kV substation East of West Frankfort. Effective dates of June 26, 1978 and May 17, 1978, are respectfully requested.

A copy of this filing has been served upon Illinois Power and Union Electric by mailing a copy postage prepaid according to CIPS.

Any person desiring to be heard or to protect said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commision and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-619]

CENTRAL ILLINOIS PUBLIC SERVICE CO.

Cancellation

SEPTEMBER 27, 1978.

Take notice that on September 20, 1978, the Central Illinois Public Service Co. (CIPSC) tendered for filing pursuant to the Facility Use Agreement between CIPSC and Illinois Power Co. dated January 15, 1956, a letter of cancellation of Appendix "I".

CIPSC proposes an effective date of June 1, 1978, and therefore requests waiver of the Commission's notice requirements.

According to CIPSC a copy of this filing have been mailed to Illinois Power Co. and the Illinois Commerce Commission.

Any person desiring to be heard or to protect said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

COLUMBIA GULF TRANSMISSION CO. AND TEXAS GAS TRANSMISSION CORP.

Application

SEPTEMBER 25, 1978.

Take notice that on September 15, 1978, Columbia Gulf Transmission Co. (Columbia), 3805 West Alabama Avenue, Houston, Tex. 77027, and Texas Gas Transmission Corp. (Texas Gas), 3800 Frederica Street, Owensboro, Ky. 42301, filed in Docket No. CP78-525 a joint application, pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity for authority to transport and exchange gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

In the instant proposal Columbia proposes to transport for Texas Gas natural gas through existing facilities, pursuant to an agreement of July 6, 1978. Columbia proposes to receive up to 3,000 Mcf of gas per day at its existing facilities at the terminus of Exxon Corp.'s Garden City gas plant in St. Mary Parish, La., and to transport it to Columbia's Rayne, La. compressor station, at which point Columbia would retain the subject gas as exchange gas.

Columbia and Texas Gas further seek authority to exchange gas, as provided in their July 6, 1978, agreement. Columbia proposes to deliver to Texas Gas at existing facilities of Columbia connecting with Texas Gas' pipeline near Egan, La., the thermal equivalent of the gas received by Columbia at the terminus of Exxon Corp.'s Garden City plant, less a *pro rata* share of the volume of gas unaccounted for and 1 percent used as fuel in the facilities through which the gas is transported to the Rayne Exchange Point.

It is asserted that Texas Gas agreed to pay Columbia for the transportation portion of the service a monthly demand charge of 71 cents per Mcf (at 14.73 psia) of gas. The transportation service and the exchange of gas is proposed to commence upon the date of first delivery of gas and would continue for a term of 3 years and thereafter as provided in the agreement.

It is asserted that the reason for the proposed transportation and exchange is that purchases Texas Gas have made from Texas Gas Exploration Corp. (Exploration) have become unavailable absent the addition of compression facilities. It is indicated that Exploration has accordingly arranged for the delivery of the gas which Texas Gas purchases from Exploration to Exxon Corp.'s Garden City gasoline plant where Columbia has facilities and Texas Gas does not. Columbia would transport the volumes received for the account of Texas Gas at the Garden City plant and deliver, by exchange, such volumes to Texas Gas at a point near Egan, La.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP61-92]

EL PASO NATURAL GAS CO.

Petition to Amend

SEPTEMBER 28, 1978.

Take notice that on September 19, 1978, El Paso Natural Gas Co. (Petitioner), P.O. Box 1492, El Paso, Tex. 79978, filed in Docket No. CP61-92 a petition to amend the order of January 11, 1965, issued in the instant docket[1] pursuant to section 7(c) of the Natural Gas Act so as to authorize an additional delivery point between Petitioner and Northern Natural Gas Co. (Northern) in Roger Mills County, Okla., all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Pursuant to the order of January 11, 1965, Petitioner was authorized to construct and operate certain facilities and deliver natural gas on an exchange basis to Northern at certain designated points on Petitioner's facilities in Ochiltree County, Tex. Such arrangement is a part of the authorized exchange of natural gas provided pursuant to the 1963 service agreement, dated August 17, 1962, as amended, between Petitioner and Northern on file with the Commission as special Rate Schedule Z-1 to Petitioner's FERC Gas Tariff, Third Revised Volume No. 2, it is stated.

It is indicated that Northern has acquired additional quantities of natural gas attributable to its 9.788 percent purchase interest in the production of the No. 1 W. H. Wright Unit well in Roger Mills County, which gas Northern desires to make available to Petitioner as part of the authorized exchange arrangements. Petitioner states that it and Northern have entered into a letter agreement dated May 1, 1978, wherein the parties have agreed to revised exhibit A to special Rate Schedule Z-1 so as to reflect the proposed additional point necessary for the delivery of natural gas to Petitioner.

Petitioner indicates that it has constructed and now operates as part of its South Zybach gathering system in Roger Mills, County, Okla., approximately 0.06 mile of 4½-inch O.D. pipeline, with appurtenances, including a 4½-inch O.D. standard orifice meter run, which connects the No. 1 W. H. Wright Unit well to Petitioner's existing gathering system. Petitioner proposes to utilize such facilities for the receipt of volumes of natural gas attributable to Northern's interest in production from said well, which Northern would cause to be delivered to Petitioner at the wellhead. It is stated that Northern may cause the delivery of up to 500 Mcf of Natural gas per day to Petitioner from the No. 1 W. H. Wright Unit well, and that Petitioner would receive such gas from said well and subsequently transport and redeliver it to Northern as part of the total exchange volume now authorized under special Rate Schedule Z-1. It is stated that Northern would pay Petitioner 2.0 cents for each Mcf of gas exchanged and attributable to Northern's interest in the No. 1 W. H. Wright Unit well.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 20, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28163 Filed 10-4-78; 8:45 am]

[1] This proceeding was commenced before the FPC. By joint regulation of Oct. 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

[6740-02]

[Docket No. CP78-527]

GREAT LAKES GAS TRANSMISSION CO.

Application

SEPTEMBER 28, 1978.

Take notice that on September 18, 1978, Great Lakes Gas Transmission Co. (Applicant), 2100 Buhl Building, Detroit, Mich. 48226, filed in Docket No. CP78-527 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of natural gas for Michigan Wisconsin Pipe Line Co. (Mich-Wis), and authorizing the construction and operation of certain metering facilities necessary for the proposed transportation and exchange service, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant indicates that it has entered into a gas transportation and exchange contract dated May 30, 1978, with Mich-Wis, which contract provides that Applicant would exchange up to 300,000 Mcf of natural gas per day with Mich-Wis during the summer period (April 1 through October 31). Applicant states that it would receive the gas from Mich-Wis at the interconnection of the facilities of Applicant and Mich-Wis near Farewill Mich. (Farwell interconnection), and redeliver a thermally equivalent quantity of gas to ANR Storage Co. (ANR) for the account of Mich-Wis at a new point of interconnection to be established between the existing facilities of Applicant and those to be constructed by ANG in Crawford County, Mich. (Crawford interconnection). Applicant further states that during the winter period (November 1 through March 31) it would receive up to 550,000 Mcf of natural gas per day at the Crawford interconnection and transport and redeliver thermally equivalent quantities to Mich-Wis at the Farwell interconnection.

It is indicated that applicant would charge Mich-Wis a rate of 2.66 cents per Mcf for the proposed transportation service.

Applicant states that in order for it to perform the proposed transportation and exchange services it would install metering facilities at the Crawford interconnection. The total cost of the proposed facilities is estimated to be $1,294,100, which cost Applicant would finance with funds generated internally, together with borrowings from banks under short-term lines of credit, if required, it is said.

It is asserted that this application is a companion to the application filed by ANR in Docket No. CP78-432, by which application ANR requested authorization to construct and operate the facilities required for its storage project.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 20, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natu-

V 4 3 / 1 9 4

0 C 5 7 8

ral Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-620]

IDAHO POWER CO.

Filing

SEPTEMBER 27, 1978.

Take notice that Idaho Power Co., on September 20, 1978, tendered for filing an Agreement dated September 11, 1978, for the purchase and delivery of electric power between Idaho Power (as Seller) and Portland General Electric Co. (as Buyer).

Idaho Power indicates that the Agreement states that Portland General Electric's Trojan Nuclear Generating Plant has been ordered to temporarily suspend generation, and as a result, Portland General Electric finds it necessary to procure additional sources of energy. Idaho Power further indicates that it has a contract for the purchase of electric power from the Utah Power & Light Co. with such electrical power being made available out of Utah's Emery Unit No. 1, and is willing to make a portion of this electric power available to Portland General Electric.

Idaho Power requests an effective date of August 6, 1978, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon Portland General Electric Co., the Idaho Public Utilities Commission and the Public Utility Commissioner of Oregon, according to Idaho Power.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-103]

INDIANA & MICHIGAN ELECTRIC CO.

Extension of Time.

SEPTEMBER 27, 1978.

On September 26, 1978, Staff Counsel filed a motion on behalf of all parties to this proceeding requesting a postponement of the initial conference set by the Commission order of January 6, 1978 and extended by the notices of March 29, 1978 and April 14, 1978. The motion states that counsel for Indiana & Michigan Electric Co. has a scheduling conflict and that the company and intervenor are engaged in settlement negotiations.

Upon consideration, notice is hereby given that the initial conference is rescheduled for November 28, 1978 at 10 a.m.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ES77-50]

IOWA SOUTHERN UTILITIES CO.

Application

SEPTEMBER 27, 1978.

By order issued September 15, 1977, the Federal Power Commission[1] authorized Iowa Southern Utilities Co. (Applicant) to issue up to 200,000 additional shares of common stock pursuant to its Automatic Dividend Reinvestment and Stock Purchase Plan (Plan). As part of the Plan, the optional cash payment was set at not less than $30 per month nor more than $5,000 per quarter.

On September 22, 1978, Applicant filed an application with the Commission, pursuant to section 204 of the Federal Power Act, seeking authority to amend the prior Commission order to the extent that the maximum cash contribution shall be $5,000 per month rather than $5,000 per quarter and that in every other instance the order shall remain unchanged.

Applicant is incorporated under the laws of the State of Delaware with its principal business office at Centerville, Iowa and is engaged in the electric utility business in 24 counties in Iowa.

The proceeds from the issuance of the common stock pursuant to the plan will be used to provide funds to finance, in part, the Applicant's construction program for 1978, the principal item of which, is $31,735,000 for the Applicant's 33 percent ownership share in a 675,000 kilowatt turbo-generator station near Ottumwa, Iowa. Any person desiring to be heard or to make any protest with reference to the application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-526]

NATURAL GAS PIPELINE CO. OF AMERICA AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Pipeline Application

SEPTEMBER 25, 1978.

Take notice that on September 18, 1978, Natural Gas Pipeline Co. of America, 122 South Michigan Avenue, Chicago, Ill. 60603 and Transcontinental Gas Pipe Line Corp., 2700 South Post Oak Road, Houston, Tex. 77056 (applicants), filed in Docket No. CP78-526 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of joint offshore gas gathering facilities in the Ship Shoal area, offshore Louisiana, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that they have the right to purchase natural gas reserves located in Ship Shoal Block 272. Applicants propose to construct jointly a gathering line from a production platform in Block 272 to a production platform in Block 269 for further transportation onshore through Transcontinental Gas Pipe Line Corp. existing offshore facilities. Applicants estimate the total cost of the proposed facilities will be $5,616,900. Applicants state that their respective shares of said costs will be financed initially through revolving credit arrangements, short-term loans and from funds on hand. Permanent financing will be undertaken as part of applicant's respective long-term financing programs at later dates.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 17, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestant's parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-44]

NEW ENGLAND POWER CO.

Compliance Filing

SEPTEMBER 27, 1978.

Take notice that New England Power Co. (NEP) on September 19, 1978, tendered for filing an unexecuted power contract dated as of May 1, 1977, between the town of Hudson, Mass., and NEP.

NEP states that the power contract has been amended in compliance with the presiding administrative law judge's initial decision dated July 13, 1978, which was made a final decision by the Commission's notice issued September 5, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 13, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. EL78-42]

OGLETHORPE ELECTRIC MEMBERSHIP CORP. V. GEORGIA POWER CO.

Complaint and Motion for Summary Disposition and Rejection of Illegal Practice and Order Directing Immediate Refund

SEPTEMBER 28, 1978.

Take notice that on September 11, 1978, Oglethorpe Electric Membership Corp. (OEMC) tendered for filing a Complaint and Motion for Summary Disposition and Rejection of Illegal Practice and Order Directing Immediate Refund. OEMC states that by this filing it complains strongly about the recently attempted Georgia Power Co. (GPC) practice of additionally including variable operation and maintenance (variable O. & M.) expenses within the energy charge component of its PR-3 rate for partial requirements wholesale electric service to OEMC and the other PR-3 customers in contravention of GPC's filed PR-3 rate and tariff.

OEMC further states that this practice by GPC of recovering variable O. & M. costs as part of its energy charge to its partial requirements customers constitutes a blatant violation of the filed rate doctrine because it patently fails to comport with GPC's present PR-3 rate on file with the Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 27, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-523]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Application

SEPTEMBER 25, 1978.

Take notice that on September 15, 1978, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Tex. 77001 filed in Docket No. CP78-523 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Bay State Gas Co. (Bay State), a distributor customer of Applicant, all as more fully set forth in the application on file with the Commission and open to public inspection.

It is indicated that Bay State has arranged to purchase volumes of liquefied natural gas (LNG) from Distrigas of Massachusetts Corp. (DOMAC), pursuant to an agreement between these parties dated February 10, 1976. In Docket No. CP77-216, et al., DOMAC received temporary certificate authorization from the Commission to make the sale, it is said.

Applicant states that it is requesting authorization to transport gas for Bay State in order to enable Bay State to receive volumes of natural gas equivalent to volumes of LNG which Bay State would purchase from DOMAC.

Applicant proposes to receive from Boston Gas Co. (Boston Gas), a distributor customer of Applicant, daily volumes of natural gas as requested by Bay State, up to a maximum daily volume of 5,000 Mcf, and to transport and deliver equal volumes to Bay State at Applicant's existing Agawam Sales Meter Station Delivery Point in Hampden County, Mass. Boston Gas would receive daily volumes of LNG from DOMAC and would release equivalent volumes of gas to Applicant, it is said.

For the proposed transportation service, Applicant would charge Bay State a volume charge of 5.03 cents per Mcf and a monthly demand charge of 42.0 cents per Mcf, it is indicated.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be dully given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. AR64-2, etc.]

TEXAS GULF COAST AREA RATE PROCEEDING, ET AL.

Filing of Refund Distribution Plan

SEPTEMBER 28, 1978.

In the matter of Texas Gulf Coast Area Rate Proceeding, Docket No. AR64-2, et al.; Other Southwest Area Rate Proceeding, Docket No. AR67-1, et al.; South Louisiana Area Rate Proceeding, Docket Nos. AR61-2 and AR69-1, et al.

Take notice that on September 22, 1978 Florida Gas Transmission Co. (Florida Gas) P.O. Box 44, Winter Park, Fla. 32790, filed a report of distribution of additional refunds in the above captioned dockets. Of the $622,715.99 refunds received, Florida Gas has determined that $265,966.66 pertains to jurisdictional sales. Florida Gas states that the method employed to allocate the refunds between jurisdictional and nonjurisdictional sales of Florida Gas is the same as that employed in its plan for distribution of supplier refunds previously received in the above-captioned dockets which was accepted by the Commission September 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-417]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition To Amend Certificate of Public Convenience and Necessity

SEPTEMBER 27, 1978.

Take notice that on September 13, 1978, Transcontinental Gas Pipe Line Corp. (Transco), filed in Docket No. CP77-417 a petition to amend the permanent certificate of public convenience and necessity issued on July 19, 1977, as previously modified on September 16, 1977, by vacating Ordering Paragraphs (C) of the former and (A) of the latter Order to the extent such provisions require adjustments depending on the outcome of the rate proceedings in Docket No. RP77-108.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 17, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed and with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-617]

CENTRAL LOUISIANA ELECTRIC CO., INC.

Filing

SEPTEMBER 27, 1978.

Take notice that on September 19, 1978, Central Louisiana Electric Co., Inc. (CLECO) tendered for filing an agreement for electric service with the City of Franklin, La. (City), dated July 7, 1978, which provides for the sale by CLECO to the City for wholesale service for resale.

CLECO states that the City was in an emergency condition and had requested 1,700 Kw of power for three (3) years.

CLECO has requested waiver of the notice provisions of § 35.3 of the Commission's regulations in order to permit the sale of wholesale service for resale to commence on June 7, 1978.

Copies of the filing were served upon the City and upon the Louisiana Public Service Commission, according to CLECO.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28175 Filed 10-4-78; 8:45 am]

[6740-02]

[Docket No. RP78-66]

CIMARRON TRANSMISSION CO.

Order Approving Rate Increase Application, Accepting Certain Gas Rate Supplements, and Rejecting Other Gas Rate Supplements

SEPTEMBER 15, 1978.

On August 16, 1978, Cimarron Transmission Co. (Cimarron) filed in Docket No. RP78-66 a proposed minor rate increase and proposed supplements to its FERC Gas Rate Schedule No. 1. The rate increase application would increase jurisdictional revenues by $34,067 annually, based on costs and sales volumes for the 12 months ended April 30, 1978, as adjusted. Cimarron requests that the proposed rate increase and supplements to its gas rate schedule become effective on September 18, 1978. For the reasons stated below, the Commission shall approve the proposed rate increase and allow it to become effective on September 18, 1978, without suspension, and shall accept in part the various proposed supplements to Cimarron's gas schedule.

Public notice of Cimarron's filing was issued on August 25, 1978, providing for the filing of protests or petitions to intervene on or before September 6, 1978.

Cimarron operates under a cost of service tariff which is a fixed allowance for rate of return and for depreciation. According to Cimarron, the $34,067 annual increase is due solely to an increase from 4.5 percent to 6.0 percent in the annual depreciation rate to reflect a decrease in its reserve estimates and declining field pressures and an increase in overall rate of return from 7.0 percent to 11.0 percent on net investment rate base which will yield a return of 12.51 percent on common equity. As discussed hereafter, Cimarron also filed a proposed "Fourth Supplement" to its Gas Rate Schedule No. 1 which would remove the rate ceiling of 3.5 cents per Mcf contained in its First Supplement to Gas Rate Schedule No. 1 and allow Cimarron to charge any higher rate authorized by the Commission.

Based on a review of Cimarron's filing, the Commission finds that the rate increase proposed therein is just and reasonable. Accordingly, the Commission shall approve Cimarron's rate increase application, and allow the proposed rate increase to become effective on September 18, 1978, without suspension. The Commission shall also accept for filing and approve Fourth Supplement to become effective as of September 18, 1978, because it provides that Cimarron shall receive its total costs including the depreciation expense at the rate approved by this Commission plus a return allowance equal to that approved by this Commission.

Simultaneous with its rate increase application, Cimarron filed three supplements to its Gas Rate Schedule No. 1. Those supplements, which are amendments to the sales contract between Cimarron and its sole customer, Natural Gas Pipeline Co. of America (Natural), are as follows:

(1) Second Supplement to Gas Rate Schedule No. 1 is an amendment dated March 2, 1964, which revises the daily average quantity of gas to be sold;

(2) Third Supplement is an amendment dated October 31, 1976, which increases the rate limitation under the contract from 3.5 to 3.65 cents per Mcf; and

(3) The Fourth Supplement is an amendment dated April 11 1978, which removes the rate limitation under the contract and allows Cimarron to charge any higher rate authorized by the Commission.

Since the Second Supplement was previously filed with and accepted by the Federal Power Commission, it is currently an effective provision of Cimarron's gas rate schedule and requires no further action by the Commission at this time. As discussed above, we shall accept the Fourth Supplement to become effective September 18, 1978. The Third Supplement, however, presents a different problem. As noted above, it is dated October 31, 1976, and would raise the 3.5 cents per Mcf ceiling contained in Supplement No. 1 to 3.65 cents per Mcf. In light of the fact that we have previously accepted Fourth Supplement which removes the 3.5 cents per Mcf overall ceiling as of September 18, 1978, there would be no purpose in accepting the Third Supplement as of September 18, 1978. Accordingly, we shall reject Third Supplement as being moot.

Examination of Cimarron's Form No. 2 reveals that for both 1976 and 1977, Cimarron charged average annual rates in excess of the maximum rate of 3.5 cents per Mcf allowed under its effective rate schedule. Cimarron's average rates for 1976 and 1977 were 3.69 and 4.6 cents per Mcf respectively, despite the 3.5 cents per Mcf maximum rate limitation in its rate schedule. Such excessive rates constitute an apparent violation of the Natural Gas Act and of our regulations because, prior to the instant filing, Cimarron never filed a notice of rate change pursuant to section 4 of the Natural Gas Act and § 15422 of the

V 4 3 / 1 9 4

Regulations to modify the 3.5 cents per Mcf rate ceiling. Furthermore, to charge rates in excess of the filed rate violates § 154.21 of the Regulations. By separate letters we shall require Cimarron and Natural to explain why these rates have been collected. Upon receipt of the responses the Commission shall take such further action as it may deem appropriate.

The Commission orders:

(A) Cimarron's August 18, 1978 rate increase application is accepted and approved, and may become effective on September 18, 1978, without suspension.

(B) Cimarron's proposed Third Supplement to its Gas Rate Schedule No. 1 is rejected.

(C) Cimarron's proposed Fourth Supplement is accepted for filing as the 24th Supplement to its Gas Rate Schedule No. 1, and shall become effective September 18, 1978, without suspension.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI75-21]

INDEPENDENT OIL & GAS ASSOCIATION OF WEST VIRGINIA

Petition for Declatory Order

SEPTEMBER 28, 1978.

Take notice that on August 17, 1978, Independent Oil & Gas Association of West Virginia filed a petition for a declatory order pursuant to § 1.7(c) of the Commission's rules of practice and procedure requesting that the Commission remove an uncertainty with respect to the pricing provisions governing sales of gas made by its producer members and other similarly situated small producers in West Virginia to Equitable Gas Co. and other interstate pipelines operating in West Virginia. Specifically, petitioner asks that the Commission confirm that the personal property tax imposed by section 11-5-1 of the West Virginia Code is "a production, severance, or similar tax" which would subject the rate received by petitioner to upward adjustment pursuant to § 2.56a(b) of the Commission's General Policy and Interpretations.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 20, 1978. Protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-28177 Filed 10-4-78; 8:45 am]

[6740-02]

[Docket No. RI77-108, etc.]

JOHN P. BOOTH & ASSOCIATES, ET AL.

Amended Petition for Special Relief

SEPTEMBER 25, 1978.

Take notice that on June 23, 1977, as amended May 2, 1978, John P. Booth & Associates (Petitioner), 209 Philtower Building, Tulsa, Okla. 74103 filed a petition for special relief, joined in by Sun Oil Co. (Sun) as owner of an undivided 0.155631 working interest in the leases covered by the application (original Sun filing noticed in Docket No. RI78-48) for natural gas sales to Northern Natural Gas Co. (Northern) from the Sitka Unit, Hugoton-Anadarko Area, Clark County, Kans. Petitioner seeks an increase from a rate of 35 cents per Mcf to a rate of 58 cents per Mcf plus applicable ad valorem tax, as agreed to by Northern. Petitioner states that the applicable four wells are currently being operated at a loss and that the requested rate increase is necessary to prevent abandonment of these wells.

Take further notice that Atlantic Richfield Co. (Atlantic), North American Producing Division, Natural Gas Department, Post Office Box 2819, Dallas, Tex. 75221, filed on May 1, 1978, as amended May 2, 1978, a petition for special relief pursuant to 18 CFR 2.76 requesting a base rate of 58.0 cents per Mcf at 14.65 psia plus 100 percent State tax reimbursement and subject to Btu adjustment for the sale of its gas from Bick, Well No. 1; McMinimy, Well No. 1; E. McMinimy, Well No. 1; and Swayze, Well No. 1, Sitka Field, Clark County, Kans., to Northern Natural Gas Co. The sale is currently being made pursuant to contracts dated August 18, 1961, and June 12, 1961, under the certificate issued in Docket Nos. CI62-531 and CI62-105 and Rate Schedule Nos. 462 and 234 at the rate of 29.5 cents per Mcf.

Atlantic states that in order to continue gas production from the subject wells that it will be necessary to install a compressor to compress the gas. Atlantic further states that the operator and holder of an interest, John P. Booth & Associates (Petition For Special Relief in Docket No. RI77-108), estimates a cost of $22,622 to install a rental compressor and total operating expenses of $31,176 annually. Atlantic estimates that this work cannot be economically justified at the current price level of the gas.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 17, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-524]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

SEPTEMBER 27, 1978.

Take notice that on September 15, 1978, Natural Gas Pipeline Co. of America (applicant), 122 South Michigan Ave., Chicago, Ill. 60603, filed in Docket No. CP78-524, an application pursuant to section 7(c) of the Natural Gas Act for authorization to construct and operate 31.03 miles of 36-inch loop pipeline on its gulf coast pipeline system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to construct and operate a 36-inch loop pipeline to close the existing loops between its compressor stations 302 and 304. The proposed loop lines, applicant states, would be located in the counties of Liberty, San Jacinto, Rush, and Panola, Tex. The current annual average capacity of applicant's lines flowing north from its compressor station 304, applicant states to be approximately 1,589,000 Mcf of gas per day. Applicant's supply available for its gulf coast system is in excess of its line capacity, it is stated. Applicant estimates that the proposed loop lines would increase capacity by approximately 186,000 Mcf per day thus increasing supply management and flexibility, it is stated. It is estimated that the cost of the proposed facilities would be $15,477,000, which would be financed through interim and permanent financing.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission, or its designee, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP71-125 (PGA78-2)]

NATURAL GAS PIPELINE CO. OF AMERICA

Purchased Gas Cost Adjustment to Rates and Charges

SEPTEMBER 27, 1978.

Take notice that on September 11, 1978, Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the below listed tariff sheets, to be effective as indicated:

	To be effective
Revised Substitute Thirty-Fourth Revised Sheet No. 5.	Sept. 1, 1978
Second Substitute Thirty-Fourth Revised Sheet No. 5.	Sept. 2, 1978

The tariff sheets reflect base rates in effect subject to refund in Docket No. RP77-98.

Natural states that the purpose of this submittal is to file a revised tariff sheet to become effective September 1, 1978, reflecting increased purchased gas costs other than increased costs associated with emergency purchases from Oklahoma Natural Gas (ONG) in excess of the appropriate nationwide rate. Natural further states that the tariff sheet to be effective September 2, 1978 reflects the inclusion of the increased costs associated with the emergency purchases from ONG in excess of the appropriate nationwide rate. These rates were permitted to become effective September 2, 1978, subject to refund, per Commission order issued August 31, 1978. Both tariff sheets also reflect the elimination of purchased gas costs associated with the subsequent reduction in rates by United Gas Pipe Line, as required by the Commission order.

Copies of the filing have been mailed to Natural's jurisdictional customers and to interested State regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

PUBLIC SERVICE CO. OF COLORADO

Filing

SEPTEMBER 27, 1978.

Take notice that Public Service Co. of Colorado (PSCO) on September 20, 1978, tendered for filing as a rate schedule a Power Purchase Agreement (Agreement) with the Town of Julesburg, Colo. (Town).

PSCO states that the Agreement provides for PSCO to sell and deliver to the Town and the Town agrees to receive and purchase from PSCO all purchased electric power and energy required by the Town for distribution and use in and adjacent to the Town. PSCO proposes an effective date of October 20, 1978.

According to PSCO copies of this filing were served upon parties to the Agreement and affected State commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests or petitions should be filed on or before October 10, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

RATON NATURAL GAS CO.

Amendment to Rate Filing

SEPTEMBER 27, 1978.

Take notice that on September 19, 1978, Raton Natural Gas Co. (Raton) tendered for filing an amended Eighteenth Revised Sheet No. 3a. This filing amends rate changes proposed by Raton's August 28, 1978, rate filing in Docket No. RP78-84.

Raton states that the result of the revision is to reduce Raton's proposed rate of return on its net investment rate base to 10 percent.

The company states that copies of this filing were served on its jurisdictional customer and the Public Service Commission of New Mexico.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 199; Docket No. E-9110]

SOUTH CAROLINA PUBLIC SERVICE AUTHORITY

Filing of Offer of Settlement

SEPTEMBER 27, 1978.

Take notice that on June 9, 1978, South Carolina Public Service Authority (Applicant) filed an Offer of Settlement in this docket with the Presiding Administrative Law Judge. The Offer of Settlement was certified to the Commission by the Judge on June 19, 1978.

If accepted and approved by the Commission, the Offer of Settlement would settle all of the outstanding issues in this relicensing proceeding with respect to the Santee Cooper Project with the exception of the complaint involving three canals on Lizzie Creek, Lake Marion, and the complaint involving the Applicant's rates.

In its offer of settlement, the Applicant proposes to adopt and to enforce a land use plan whereby certain portions of the project lands would be set aside as natural areas, public recreation areas, residential areas, and forestry management areas. The Applicant also agrees to accept a 30-year license under section 15 of the Federal Power Act which would contain the standard license conditions as well as certain special conditions providing for the protection of water quality and for various studies to be undertaken by the Applicant with respect to the ecological values of the project.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR §§ 1.8 or 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any protest or petition to intervene must be filed on or before October 20, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP78-92]

SOUTHWEST GAS CORP.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 27, 1978.

Take notice that southwest Gas Corp. ("Southwest") on September 20, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume Nos. 1 and 2. The proposed changes would increase revenues from jurisdictional sales and service by $1,389,178 based on the 12-month period ending June 30, 1978, as adjusted.

Southwest states that the reason for the proposed increase in rates is to compensate Southwest for increases in virtually all items of costs, such as capital, labor, materials and supplies, taxes, and including a claimed rate of return of 10.61 percent.

The company proposes an effective date of October 20, 1978.

Copies of the filing were served upon Southwest's jurisdictional customers, Sierra Pacific Power Company and CP National, including the California Public Utilities Commission and the Public Service Commission of Nevada.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 5, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 982-8; PP 8G2054/T169]

CYCLIC METHYLENE (DIETHOXYPHOSPHINYL) DITHIOIMIDOCARBONATE

Establishment of Temporary Tolerances

American Cyanamid Co., Agricultural Division, P.O. Box 400, Princeton, N.J. 08540, submitted a pesticide petition (PP 8G2054) to the Environmental Protection Agency (EPA). This petition requested that temporary tolerances be established for residues of the nematocide cyclic methylene (diethoxyphosphinyl) dithioimidocarbonate in or on the raw agricultural commodities corn grain (except popcorn), field corn fodder (except popcorn), sweet corn (kernels plus cob with husk removed), and sweet corn fodder at 0.05 part per million (ppm).

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material showed that the requested tolerances were adequate to cover residues resulting from the proposed experimental use, and it was determined that the temporary tolerances would protect the public health. The temporary tolerances have been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. American Cyanamid Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire September 12, 1979. Residues not in excess of 0.05 ppm remaining in or on corn grain (except popcorn), field corn fodder (except popcorn), sweet corn (kernels plus cob with husk removed), and sweet corn fodder after this expiration date will not be considered actionable if the pesticide is legally applied during the term of an in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Dr. Eugene Wilson, Product Manager 21, Registration Division (TS-767), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460, 202-426-2456.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: September 27, 1978.

HERBERT S. HARRISON,
Acting Director,
Registration Division.

DIQUAT

Renewal of a Temporary Tolerance

On September 26, 1977, the Environmental Protection Agency (EPA) announced (42 FR 48923) the renewal of a temporary tolerance for residues of the herbicide diquat (6,7-dihydrodipyrido (1,2-a:2',1-c) pyrazidiinium) derived from application of the dibromide salt and calculated as the cation in or on the raw agricultural commodity potatoes at 0.2 part per million (ppm).

This tolerance was established (40 FR 41833) in response to a pesticide petition (PP 4G1470) submitted by Chevron Chemical Co., 940 Hensley Street, Richmond, CA 94804. This renewal expired August 29, 1978.

Chevron Chemical Co. requested a 15-month renewal of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of the experimental use permit that has been renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

The scientific data reported and all other relevant materials were evaluated, and it was determined that a renewal of the temporary tolerance would protect the public health. Therefore, the temporary tolerance has been renewed on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. Chevron Chemical Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires November 30, 1979. Residues not in excess of 0.2 ppm remaining in or on potatoes after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. George LaRocca, Acting Product Manager (PM) 23, Registration Division (TS-767), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460, 202-755-1397.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: September 27, 1978.

HERBERT S. HARRISON,
Acting Director,
Registration Division.

[6560-01]

[FRL 983-4, PP 7G1944/T168]

MEFLUIDIDE

Extension of a Temporary Tolerance

On May 8, 1978, the Environmental Protection Agency (EPA), in response to a pesticide petition (PP 7G1944) submitted to the Agency by 3M Co., 3M Center, St. Paul, Minn. 55101, established a temporary tolerance for residues of the plant growth regulator mefluidide (*N*-[2,4-dimethyl-5[[(trifluoromethyl)sulfonyl]amino]phenyl] acetamide) in or on the raw agricultural commodity sugarcane at 0.2 part per million (ppm).

This temporary tolerance is scheduled to expire May 8, 1979. The 3M Co. requested a 4-month extension of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of an experimental use permit that has been extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

The scientific data reported and all other relevant material were evaluated, and it was determined that an extension of the temporary tolerance would protect the public health. Therefore, the temporary tolerance has been extended on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

V 43 / 194 OCT 5 1978

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. 3M Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires September 8, 1979. Residues not in excess of 0.2 ppm remaining in or on sugarcane after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. Robert Taylor, Product Manager 25, Registration Division (TS-767), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460, 202-426-2632.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: September 27, 1978.

Emergency Broadcast System

CLOSED CIRCUIT TEST

SEPTEMBER 29, 1978.

A test of the Emergency Broadcast System (EBS) has been scheduled for Wednesday, October 18, 1978 between 2:03:30 to 2:09 p.m. Washington, D.C. e.s.t. Only ABC, AP Radio, CBS, IMN, MBS, NBC, NPR, and UPI audio radio network affiliates will receive the test program for the closed circuit test. AP and UPI wire service clients will receive activation and termination messages of the closed circuit test. Television networks are not participating in the test.

Network affiliates will be notified of the test procedures via their network beginning 4 days in advance of the test. Test messages will also be run by AP and UPI radio press wire services for 4 days in advance of the test to insure wide dissemination of the test announcement and schedule.

A final evaluation report will be made by the end of November 1978.

THIS IS A CLOSED CIRCUIT TEST AND WILL NOT BE BROADCAST OVER THE AIR.

Action by the Commission September 28, 1978. Commissioners Ferris (chairman), Lee, Quello, Washburn, Fogarty, White, and Brown.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 537]

D'AMATO FREIGHT FORWARDING CO.

Order of Revocation

On September 26, 1978, D'Amato Freight Forwarding Co., 17 Murray Street, New York, N.Y. 10007, voluntarily surrendered its Independent Ocean Freight Forwarder License No. 537 for revocation.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 501.(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 537 issued to D'Amato Freight Forwarding Co. be and is hereby revoked effective September 26, 1978, without prejudice to reapplication for a license in the future.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon D'Amato Freight Forwarding Co.

ROBERT G. DREW,
Director, Bureau of
Certification and Licensing.

GENERAL SERVICES ADMINISTRATION

[Temporary Reg. H-20]

SECRETARY OF THE INTERIOR

Delegation of Authority

SEPTEMBER 8, 1978.

SUBJECT: Delegation of authority

1. *Purpose.* This regulation delegates authority to the Secretary of the Interior to outlease oil and gas deposits underlying Ellington Air Force Base, Houston, Tex. (GSA Control No. D-Tex-420-AU).

2. *Effective date.* This delegation of authority is effective immediately.

3. *Background.* The Department of the Interior, by letter dated March 10, 1978, advised that Ellington Air Force Base has oil and gas deposits in significant quantities. The Secretary of the Interior recommends that because of the short supply of such minerals the deposits be outleased to control development in a timely manner, and the Bureau of Land Management, Department of the Interior, act as the Federal leasing agent. It is considered that the best interest of the Government would be served by GSA's delegating authority to the Department of the Interior to outlease the oil and gas deposits underlying Ellington Air Force Base since the Department of the Interior has expertise and organizational support for leasing and controlling the development of these deposits.

4. *Delegation.* a. Pursuant to the authority vested in me by sections 203 and 205(d) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484, 486(d)), authority is delegated to the Secretary of the Interior to outlease the oil and gas deposits in Ellington Air Force Base, Houston, Tex. When the Department of the Interior has completed the disposal of all the oil and gas that is commercially salable, it shall notify GSA that the project has been completed.

b. The Secretary of the Interior may redelegate this authority to any officer, official, or employee of the Department of the Interior.

c. This authority shall be exercised in accordance with the Federal Property and Administrative Services Act of 1949, as amended, other applicable statutes, and regulations issued pursuant thereto. In this regard, the Department of the Interior, as the disposal agency, shall be responsible for (1) securing, in accordance with FPMR 101-47.303-4, any appraisals deemed necessary by the Secretary; (2) complying with the provisions of the National Environmental Policy Act of 1969; (3) complying with section 106 of the National Historic Preservation Act of 1966, if appropriate; (4) coordinating with all present and subsequent occupants, Federal or otherwise, so as not to impede use of the facilities or impair the integrity of utilization; and (5) insuring that lands that are disturbed or damaged are restored after removal of the oil and gas deposits are completed.

d. A copy of any documents executed under this delegation shall be forwarded immediately to the General Services Administrative, Federal Property Resources Service, Office of Real Property (DR), Washington, D.C. 20405.

JAY SOLOMON,
Administrator of
General Services.

Health Services Administration

ADVISORY COMMITTEE

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of October 1978:

Name: National Advisory Council on Migrant Health.

Date and Time: October 23-25, 1978—9 a.m.

Place: Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857. Open for entire meeting.

Purpose: The Committee is charged with advising, consulting with, and making recommendations to the Secretary and the Administrator, Health Services Administration, concerning the organization, operation, selection, and funding of Migrant Health Centers and other entities under grants and contracts under section 319 of the Public Health Service Act.

Agenda: Agenda items include: (1) Orientation of new Council members; (2) general review of Council legisla-

V 43 / 194
OCT 5 78
UMI

tion regulations; (3) report of the number of migrants being serviced in Migrant Health Centers and Projects, Rural Health Initiative Projects and Community Health Center Projects; (4) report of the revision of the National Migrant Referral System; and (5) updates on the Adolescence Health and Improved Pregnancy Outcome Program; Migrant Assurance Program; Immunization Programs; ADAMHA training of BCHS Primary Project Providers on mental health problems of migrant and other poor people; eligibility of migrants for Medicaid coverage; and Interagency Agreement with the Departments of Agriculture and Labor.

The meeting is open to the public for observation and participation. Anyone wishing to participate, obtain a roster of members, or other relevant information, should contact Mr. Jaime Manzano, Bureau of Community Health Services, Room 7A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, telephone 301-443-1153.

Agenda items are subject to change as priorities dictate.

Dated: September 25, 1978.

WILLIAM H. ASPDEN, JR.,
Associate Administrator for Management.

Centennial Mountains Primitive Area Modification

SEPTEMBER 27, 1978.

The designation of the Centennial Mountains Primitive Area published in the FEDERAL REGISTER, August 5, 1975 (p. 32848 FR vol. 40, No. 151), described lands not intended to be managed as primitive. The Centennial Mountains Primitive Area is hereby modified to delete the following described lands:

PRINICIPAL MERIDIAN, MONTANA

T. 14 S., R. 1 E.,
Sec. 21, Lots 4, 5, 6, 7, and 8;
Sec. 22, Lots 3 and 4, and N½SE¼; and
Sec. 23, Lots 2, 3, 4, 5, 6, 7, and 8.
T. 14 S., R. 1 W.,
Sec. 31, Lot 5.
T. 14 S., R. 2 W.,
Sec. 18, SE¼NE¼ and E½SE¼;
Sec. 19, Lots 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12; and
Sec. 26, Lots 1, 2, 3, 5, and 6, SW¼NE¼, SE¼NW¼, NE¼SW¼, and NW¼SE¼.
T. 14 S., R. 3 W.,
Sec. 23, Lots 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10, and N½SE¼; and
Sec. 26, Lot 1 and SE¼NE¼.
T. 14 S., R. 4 W.,
Sec. 11, NW¼; and
Sec. 15, Lots 2, 3, and 4.

The above-described lands are to be managed as access points with campsites, parking areas, and other facilities supporting the use of the adjoining Centennial Mountains Primitive Area.

KANNON RICHARDS,
Acting State Director.

NEW MEXICO

Notice of Application

SEPTEMBER 28, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Northern Natural Gas Co. has applied for one 8-inch; one 12-inch; and three 4-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 16 S., R. 27 E.,
Sec. 1, lots 11, 13, 14, 15, E½SW¼, NW¼SW¼ and NW¼SE¼;
Sec. 12, E½W½ and W½SE¼;
Sec. 13, E½W½;
Sec. 24, E½W½;
Sec. 25, NE¼NW¼ and SE¼SW¼.
T. 17 S., R. 27 E.,
Sec. 1, lot 3, SE¼NW¼ and E½SW¼;
Sec. 12, NE¼NW¼ and SE¼SW¼;
Sec. 13, E½W½;
Sec. 24, E½SW¼;
Sec. 25, E½W½.
T. 18 S., R. 27 E.,
Sec. 1, lot 3, SE¼NW¼ and E½SW¼;
Sec. 12, E½W½, SW¼SW¼ and SW¼SE¼.

These pipelines will convey natural gas across 12.01 miles of public lands in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

CASPER DISTRICT GRAZING ADVISORY BOARD

Meeting

SEPTEMBER 26, 1978.

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Casper District Grazing Advisory Board will be held on November 1, 1978.

The meeting will begin at 9 a.m. in the conference room of the Bureau of Land Management Office at 951 Union Boulevard, Casper, Wyo.

The agenda for the meeting will include: (1) A discussion of the function of the Board; (2) the expenditure of range betterment funds for range improvements; (3) a review of the current policy and program relating to allotment management plans including the future grazing environmental statement effort; (4) election of officers; (5) discussion of the board's future involvement in the allotment management plan program, and; (6) the arrangements for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the board between 3:30 and 4:30 p.m. on November 1, 1978, or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 951 Union Boulevard, Casper, Wyo. by October 27, 1978. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection within 30 days following the meeting.

ROBERT E. WILBER,
District Manager.

Application

SEPTEMBER 25, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16,

V 43/194

1973 (87 Stat. 576), Northwest Pipeline Corp. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 29 N., R. 12 W.
Sec. 7, E½SE¼ and SW¼SE¼.

This pipeline will convey natural gas across 0.235 of a mile of public land in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

STELLA V. GONZALES,
Acting Chief, Branch of Lands, and Minerals Operations.

[M 34980(ND)]

NORTH DAKOTA

Coal Lease Offering by Sealed Bid and Oral Auction

SEPTEMBER 27, 1978.

U.S. Department of the Interior, Bureau of Land Management, Montana State Office, Granite Tower, 222 North 32d Street, P.O. Box 30157, Billings Mont. 59107. Notice is hereby given that the coal resources in the lands described below, located in Mercer County, N. Dak., near the communities of Beulah and Zap, and being offered for lease to the qualified bidder of the highest cash amount per acre or fraction thereof:

T 143 N, R 89 W, 5th P.M.
Sec. 2: Lots 1, 2, S½N½, SW¼, NW¼SE¼.
Containing 440.96 acres.

The coal resources offered are limited to the Beulah-Zap bed. The Conservation Division, Geological Survey, has reported that the tract contains 2,610,000 short tons of lignite coal recoverable by surface mining methods. The average coal thickness projected over the entire proposed leasehold is about 9 feet. The heating value of the noncoking coal is about 7,080 Btu's per pound with a sulfur content of about 0.7 percent. The coal resources are within the Knife River Known Recoverable Coal Resources Area. The offer is made as a result of an application filed by the North American Coal Co.

The lands are being offered for lease by sealed bid followed by oral auction starting at the level of the highest sealed bid received. The minimum bonus bid is $25 per acre figured on 441 acres. The sale will be held at 2 p.m., October 25, 1978, in the Conference Room on the 6th Floor of the Granite Tower Building. At that time all sealed bids will be opened and read and oral bids, beginning at the level of the highest sealed bid, will be received. The successful high bidder will be notified in writing if his bid is acceptable. No bids received after 2 p.m. October 25, 1978, will be considered. Sealed bids may not be modified or withdrawn unless such modification or withdrawal is received before the date, time, and place set for the opening of such bids. The successful bidder is obligated to pay for the newspaper publications of this notice.

Public comments: The public is invited to submit written comments to the Bureau of Land Management on the fair market value of the tract to be sold. Public comments should be sent to the State Director, Bureau of Land Management, at the address given above, to arrive no later than October 20, 1978.

Notice of availability: Copies of the detailed statement including bidding instructions and proposed coal lease are available at the office listed above. All case file documents and written comments submitted by the public on fair market value or royalty rates, except those portions identified as proprietary by the commenter, and meeting exemptions stated in the Freedom of Information Act, will be available for public inspection at the Bureau of Land Management Office, at the address given above.

EDGAR D. STARK,
Acting Chief, Branch of Lands and Minerals Operations.

[4310-84]

[Wyoming 64967]

WYOMING

Application

SEPTEMBER 26, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo., filed an application for a right-of-way to constuct a 4½-inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYO.

T. 36 N., R. 93 W.,
Sec. 19, lot 3.

The propopsed pipeline will transport natural gas produced from the No. 12-19 Federal Fuller Well at a location in the SW¼ of section 19, in a generally northwesterly direction into their existing natural gas pipeline facilities also located in the SW¼ of section 19, T. 36 N., R. 93 W., Fremont County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

MARLA B. BOHL,
Acting Chief, Branch of Lands and Minerals Operations.

[Wyoming 64965]

WYOMING

Application

SEPTEMBER 28, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo. filed an application for a right-of-way to construct a 4½ inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. N., R. 93 W.,
Sec. 30, lots 2 and 3.
T. 36 N., R. 94 W.,
Sec. 25, E½NE¼.

The proposed pipeline will transport natural gas produced from the No. 12-30 Federal Fuller Well located in the SW¼ sec. 30, T. 36 N., R. 93 W., to a point of connection with Colorado Interstate Gas Co's existing pipeline located in the NE¼NE¼ sec. 25, T. 36 N., R. 94 W., in Fremont County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

National Park Service

FORT BOWIE NATIONAL HISTORIC SITE, ARIZONA

Boundary Modification

Notice is hereby given that the boundaries of Fort Bowie National Historic Site, established by publication in the FEDERAL REGISTER, Vol. 37, No. 150, Thursday, August 3, 1972, are adjusted to include 30 additional acres pursuant to the authority contained in section 1 of Public Law 88-510, 78 Stat. 681 (16 U.S.C. 461) which provides for inclusion of 1,000 acres in the Site.

The boundary of Fort Bowie National Historic Site is hereby extended to include the following described land within Cochise County, Ariz.:

GILA AND SALT RIVER BASE AND MERIDIAN

PARCEL 1

T. 15 S., R. 28 E.
Sec. 3, S½SW¼SW¼;
Sec. 10, N½N½NW¼NW¼, excepting southerly 18 feet.

PARCEL 2

A strip of land 20 feet in width, extending 10 feet on both sides of the hereinafter described centerline and located within the S½NW¼NW¼, section 7 T. 15 S., R. 29 E., Gila and Salt River Base and Meridian, Cochise County, Ariz., the said centerline being more particularly described as follows:

Beginning at a point on the existing Cochise County-maintained and graded road which leads from the Apache Pass County Road to the Knape Ranch near Bear Spring in the SW¼ of said section 7, which point is within the land owned by Sam and Josephine Moseley adjacent to and easterly of the Fort Bowie National Historic Site; thence northwesterly and southwesterly over the existing dirt road, extending thru the Moseley's property and leading toward the area of the Fort Bowie Ruins, to the intersection with the east boundary of the Fort Bowie National Historic Site in Section 12, T. 15 S., R. 28 E., G & S.R. B. & M.

Dated: May 26, 1978.

JOHN H. DAVIS,
Acting Regional Director, Western Region.

INTERNATIONAL TRADE COMMISSION

[303-TA-3]

CERTAIN FISH FROM CANADA

Determination of No Injury or Likelihood Thereof

On the basis of information developed during the course of investigation No. 303-TA-3, undertaken by the U.S. International Trade Commission under section 303(b) of the Tariff Act of 1930, as amended, the Commission determines unanimously[1] that an industry in the United States is not being injured, is not likely to be injured, and is not prevented from being established, by reason of the importation of certain duty-free fish from Canada, provided for in items 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, and 111.6800 of the Tariff Schedules of the United States Annotated (1978) (TSUS), upon which the Department of the Treasury has determined that a bounty or grant is being paid within the meaning of section 303 of the Tariff Act of 1930, as amended.

On June 27, 1978, the U.S. International Trade Commission received advice from the Department of the Treasury that a bounty or grant is being paid with respect to certain duty-free fish imported from Canada that are entered under TSUS items 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, and 111.6800. Accordingly, the Commission, on July 13, 1978, instituted investigation No. 303-TA-3, under section 303(b) of the Tariff Act of 1930, as amended, to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Notice of the institution of the investigation, public hearing, and request for written views was published in the FEDERAL REGISTER of July 19, 1978 (43 FR 31072). On August 15, 1978, a public hearing was held in Washington, D.C., at which all persons who requested the opportunity were permitted to appear in person or by counsel.

The Treasury investigation resulting in the countervailing duty determination was initiated as a result of a petition filed with the Treasury Department on June 10, 1977, by the Fishermen's Marketing Association of Washington, Inc., Seattle, Wash. The petition was supported by the Point Judith Fishing Cooperative, Point Judith, R.I.

STATEMENT OF REASONS FOR CHAIRMAN JOSEPH O. PARKER, VICE CHAIRMAN BILL ALBERGER, AND COMMISSIONERS GEORGE M. MOORE, CATHERINE BEDELL, AND ITALO H. ABLONDI

On June 27, 1978, the U.S. International Trade Commission received advice from the Department of the Treasury, in accordance with section 303(b) of the Tariff Act of 1930, as amended, that a bounty or grant is being paid with respect to certain duty-free fish and fish products from Canada that enter the United States under items 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, and 111.6800 of the Tariff Schedules of the United States Annotated (1978) (TSUS). Accordingly, the Commission, on July 13, 1978, instituted investigation No. 303-TA-3 under section 303(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(b)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

DETERMINATION

On the basis of information obtained in the investigation, we determine that an industry in the United States is not being injured, is not likely to be injured, and is not prevented from being established,[2] by reason of the importation of certain duty-free fish from Canada, provided for in items 110.1585, 110.1589, 110.4710, 110.4726, 110.7033, 110.7039, 111.2200, 111.6400, and 111.6800 of the TSUS upon which the Department of the Treasury has determined that a bounty or grant is being paid within the meaning of section 303 of the Tariff Act of 1930, as amended.

THE PRODUCTS UNDER INVESTIGATION AND THE RELEVANT U.S. INDUSTRY

The imported articles that are the subject of this investigation are: Whole cod, fresh, chilled, or frozen; salted, pickled, smoked, or kippered code, cusk, haddock, hake, and pollock; cod and flatfish (except turbot) meat frozen in blocks of 10 pounds or more each; flatfish fillets, fresh or chilled (except halibut); and flatfish fillets, frozen (except halibut or turbot). The principal imported flatfish products included in the investigation are fillets and frozen blocks of

[1] Chairman Joseph O. Parker, Vice Chairman Bill Alberger and Commissioners George M. Moore, Catherine Bedell, and Italo H. Ablondi concurred in the negative determination. Commissioner Daniel Minchew did not participate in the determination.

[2] Prevention of establishment is not an issue in this investigation and will not be discussed further in this statement of reasons.

OCT 5 1978

V 43/194 OCT 5 78

flounder. Whole cod and frozen cod blocks are also important in terms of imports. Together, the cod, cusk, hake, pollock, and flatfish covered herein are referred to as groundfish.

In this determination we consider the relevant U.S. industry to consist of those facilities, including fishing boats, devoted to the catching or processing of cod, cusk, haddock, hake, pollock, and flatfish. The groundfish that are the subject of this investigation are landed by an estimated 700 east coast and 300 west coast fishing vessels and are processed by about 100 east coast and 25-30 west coast processing plants.

NATURE OF EXTENT OF COUNTERVAILABLE CANADIAN BOUNTIES AND GRANTS

Treasury's investigation of Canadian bounties and grants covered the period 1976 through mid-1978. The countervailable bounties and grants found by Treasury applied to virtually the entire output of the Canadian fishing and fish processing industry. Only a small proportion of the bounties and grants prior to April 1, 1978, did not apply to the entire Canadian catch of groundfish. These are certain bounties and grants given to the Newfoundland fishermen and fishermen in other Atlantic Provinces in the form of loans and other assistance from the Federal and Provincial governments. Treasury found the total countervailable bounties and grants to be equal to 17.22 percent of the value of U.S. imports of groundfish and groundfish products from Canada prior to April 1, 1978. Effective April 1, 1978, some of the bounties and grants were eliminated and the remainder were estimated by Treasury to be equivalent to 5.22 percent of the value of U.S. imports from Canada. With the termination of direct cash grants to fishermen, effective October 1, 1978, Treasury estimates the Canadian bounties and grants remaining will be equivalent to 1.22 percent of the value of all of U.S. imports of groundfish and groundfish products from Canada. Furthermore, for those groundfish and groundfish products imported from the Canadian west coast fisheries, the remaining level of Canadian bounties and grants will be equivalent to only 0.85 percent of the value of the imports. Based on the actions by the Canadian Government to eliminate virtually all of the bounties and grants by October 1, 1978, and the other statutory criteria for granting a waiver, Treasury has stated its intention to waive countervailing duties under section 303(d) of the Tariff Act of 1930, as amended.

NO INJURY

In making its determination the Commission has construed the statutory criteria of section 303(b) in the same way it has construed the identical language in section 201(a) of the Antidumping Act, 1921, as amended. This construction is supported by the report of the House Ways and Means Committee which states in part:

> The relevant language regarding injury determinations by the Tariff Commission was derived verbatim from the Antidumping Act, 1921, and is intended to have the same meaning.[3]

After considering these criteria we have determined that the information obtained in this investigation does not establish that the domestic industry is being or is likely to be injured within the meaning of the statute.

While total U.S. imports from Canada of groundfish and groundfish products subject to countervailable bounties and grants increased from 84 million pounds in 1975 to 126 million pounds in 1977, such imports accounted for only 17 percent of total U.S. imports of groundfish and groundfish products in 1977. Although imports from Canada of groundfish and groundfish products subject to countervailable bounties and grants accounted for an increasing percentage of apparent of U.S. consumption from 1975 to 1977, the percentage of apparent U.S. consumption accounted for by domestic producers also increased during this period. It is, therefore, apparent that the impact of the imports from Canada was primarily on imports from other sources, which declined as a percentage of apparent domestic consumption.

U.S. production (landings) of all groundfish rose from 147 million pounds fillet weight in 1975 to 174 million pounds in 1977, or by 18 percent. The 1977 production level was the highest reached in recent years. In January–June 1978, U.S. production amounted to 96 million pounds fillet weight, 8 percent above the January–June 1977 level. Landings of cod increased by 28 percent between 1975 and 1977, and by 28 percent between 1976 and 1977 and by another 20 percent between January–June 1977 and January–June 1978. Landings of all subject groundfish increased by 21 percent between 1975 and 1977, and increased by 15 percent between January–June 1977 and January–June 1978. Increased boat building activity is believed to have substantially increased the capacity of the New England groundfishing fleet in recent years.

Although data on overall employment trends in the domestic industry were sought through the Commission's questionnaires, the domestic industry did not supply such information. It might be inferred, however, that U.S. employment in the production of groundfish and groundfish products has probably risen in line with the recent increases in groundfish landings and in the production of groundfish products.

Specific profit-and-loss data for U.S. producers were also requested through Commission questionnaires but most respondents indicated that they could not provide such data. Despite the absence of such data, rising prices for most categories of groundfish and groundfish products coupled with increases in production indicate that the financial situation for U.S. producers may be improving.

Price comparisons for domestic and imported groundfish can be made only at principal markets. Nearly half of the constructed monthly prices compared for whole cod at Boston (the major east coast groundfish market) during the period January 1976–June 1978, showed Canadian cod selling for higher prices than U.S. cod. Since March 1978, there have been no months when the average constructed price of Canadian whole cod was below the price of the U.S. product in the Boston market. In the west coast market Canadian and United States whole cod bring virtually the same price. While east coast prices for whole cod may have dropped recently, west coast prices have increased. In 1977, cod accounted for 26 percent of the total U.S. catch of the subject groundfish; over 80 percent of the groundfish covered by this investigation are caught by the Atlantic fleet. Most other sales of Canadian groundfish and groundfish products appear to have been at approximately the same prices as the U.S. products. In addition, it appears that the most rapid drop in the U.S. prices for groundfish, occurring in the Boston Market for whole cod, occurred during April–June 1978, at the same time that Canadian subsidies were in the process of being considerably reduced.

NO LIKELIHOOD OF INJURY

The bounties and grants found by Treasury to be bestowed upon Canadian exports of groundfish and groundfish products are scheduled to be virtually eliminated, effective October 1, 1978. The remaining bounties and grants, estimated by Treasury to be equivalent to 1.22 percent of the value of the imports from Canada, are not likely to have any injurious impact on the U.S. industry. In addition, imports into the west coast will be subject to bounties and grants equivalent to only 0.85 percent of the value of such imports. Other factors indicate that fish stocks presently depleted will be replenished and that many foreign vessels will be excluded from the recently expanded territorial fishing grounds of the United States.

[3] H. Rept. No. 93-571 93d Cong. 1st Sess. (1973), p. 74.

CONCLUSION

Based on the foregoing, it is our determination that an industry in the United States is not being injured, is not likely to be injured, and is not prevented from being established, by reason of the importation of certain duty-free fish and fish products from Canada which Treasury has determined are subject to Canadian bounties and grants.

Issued: October 2, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

CONTROLLED SUBSTANCES

Proposed Aggregate Production Quotas for 1979

Section 306 of the Controlled Substances Act (21 U.S.C 826), requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations.

The quotas are to provide adequate supplies of each substance for (1) the estimated medical, scientific, research, and industrial needs of the United States, (2) lawful export requirements, and (3) the establishment and maintenance of reserve stocks.

In determining the below listed proposed 1979 aggregate production quotas, the Administrator considered pursuant to section 302 subsection (a) of the Public Health Services Act (42 U.S.C. 242(a)) the "results of studies and investigations of the quantities of narcotic drugs or other drugs subject to control under such acts, together with reserves of such drugs, that are necessary to supply the normal and emergency medicinal and scientific requirements of the United States" which were supplied by the Department of Health, Education, and Welfare. In addition, the proposed aggregate quotas were established considering the following factors:

(1) Total actual 1977 and estimated 1978 and 1979 net disposals of each substance by all manufacturers.

(2) Projected trends in the national rate of net disposals of each substance.

(3) Estimates of inventories of each substance and of any substance manufactured form it, and trends in accumulation of such inventories.

(4) Projected demand as indicated by procurement quota applications which were filed pursuant to § 1303.12 of Title 21 of the Code of Federal Regulations.

Pursuant to Title 21 Code of Federal Regulations § 1303.23(c), the Administrator of the Drug Enforcement Administration will in early 1979 adjust individual manufacturing quotas allocated for the year based upon end of year inventory and actual 1978 disposition data for each basic class of Schedule I and II controlled substance which will be provided by quota applicants.

Based upon consideration of the above factors, the Administrator of the Drug Enforcement Administration hereby proposes that aggregate production quotas for 1979 for the following controlled sustances, expressed in grams of anhydrous acid or base, be established as follows:

Basic class	Proposed 1979 quota
SCHEDULE I	
2,5-Dimethoxyamphetamine	36,960,000
SCHEDULE II	
Alphaprodine	59,000
Amobarbital	7,498,000
Amphetamine	3,245,000
Anileridine	251,500
Cocaine	1,482,000
Codeine (for sale)	50,473,000
Codeine (for conversion)	2,962,000
Desoxyephedrine (2,213,000 grams for the production of levodesoxyephedrine for use in a non-controlled, non-prescription product, and 359,000 grams for the production of methamphetamine.)	2,572,000
Dihydrocodeine	1,023,000
Diphenoxylate	1,330,000
Ecgonine (for conversion)	1,000,000
Ethylmorphine	26,000
Pentanyl	2,000
Hydrocodone	1,163,000
Hydromorphone	122,000
Levorphanol	8,000
Meperidine	11,383,000
Methadone	1,458,000
Methadone Intermediate (4-cyano-2-dimethylamino-4,4-diphenylbutane.)	1,970,000
Methaqualone	16,023,000
Methylphenidate	1,632,000
Mixed Alkaloids of Opium	20,000
Morphine (for sale)	815,000
Morphine (for conversion)	59,571,000
Opium (tinctures, extracts, etc. expressed in terms of powdered opium)	2,334,000
Oxycodone (for sale)	1,838,000
Oxycodone (for conversion)	8,000
Oxymorphone	4,000
Pentobarbital	13,984,000
Phenmetrazine	3,084,000
Secobarbital	4,596,000
Thebaine (for sale)	2,660,000
Thebaine (for conversion)	1,617,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. A person may object to or comment on the proposals relating to any one or more of the above mentioned substances without filing comments or objections regarding the others. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, U.S. Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by November 3, 1978. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrant a full adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing (which shall not be less than 30 days after the date of the order).

Dated: September 26, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

NATIONAL COMMISSION ON NEIGHBORHOODS

MEETING

ACTION: Notice of meeting under emergency circumstances.

SUMMARY: This notice, required under the Federal Advisory Committee Act (5 U.S.C. Appendix I), announces a public meeting.

TIME AND DATE: Friday, October 6, 1978; 12 a.m.-4 p.m.

PLACE: General Services Administration Departmental Auditorium, Conference Room A, Main Lobby Entrance, Constitution Avenue between 12th and 14th Street NW., Washington, D.C.

AGENDA: (1) Consideration of old business; (2) report on financial situation; (3) reorganization of Commission; (4) report from the Drafting Committee; (5) consideration of internal personnel adjustments.

STATUS: Open to the public.

CONTACT PERSON:

Mr. John Eade, Administrative Officer, telephone 202-632-5200.

JOHN EADE,
Administrative Officer.

NATIONAL COMMUNICATIONS SYSTEM

TELECOMMUNICATIONS: DIGITAL COMMUNICATION PERFORMANCE PARAMETERS

Proposed Federal Standard 1033; Extension of Comment Period

AGENCY: National Communications System.

ACTION: Extension of comment period.

SUMMARY: This extension is necessary because delay in the printing of the proposed Federal Standard 1033 (described in 43 FR 41314, September 15, 1978) has, in turn, caused delays in making it immediately available to requesters. This extension will allow interested parties the full 60 days to respond.

DATE: Comments must be received on or before December 29, 1978.

ADDRESS: Office of the Manager, National Communications System, Attention: NCC-TS, Washington, D.C. 20305.

FOR FURTHER INFORMATION CONTACT:

Mr. Dennis Bodson, 202-692-2124.

MAURICE W. ROCHE,
Director Correspondence and Directives, Washington Headquarters Services, Department of Defense.

SEPTEMBER 29, 1978.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-327 and 50-328]

TENNESSEE VALLEY AUTHORITY—SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2

Order Extending Construction Completion Dates

Tennessee Valley Authority (TVA) is the holder of Provisional Construction Permit No's. CPPR-72 and CPPR-73, issued by the Atomic Energy Commission [1] on May 27, 1970 for construction of the Sequoyah Nuclear Plant, Units 1 and 2, presently under construction at the licensee's site in Hamilton County, Tenn.

On February 14, 1978, TVA filed a request, superseding their previsous request of July 29, 1977, for an extension of the completion dates because construction has been delayed due to:

1. Delays in delivery of critically needed equipment and materials;
2. Additions to the plant fire protection systems;
3. Interference problems in the installation of seismic and pipe rupture restraints;
4. Modification of the feedwater design to include all volatile treatment for water chemistry, and addition of the requirement for acid cleaning of the secondary system prior to hot functional testing; and
5. Indirect effect of additional construction activities associated with additions to the scope of the project.

This action involves no significant hazards consideration; good cause has been shown for the delay; and the extension is for a reasonable period, the bases for which are set forth in a staff evaluation dated September 28, 1978.

A negative declaration and an Environmental Impact Appraisal have been prepared and are available, as are the above stated documents, for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Chattanooga-Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tenn. 37402.

It is hereby ordered That, the latest completion dates for Provisional Construction Permit No's. CPPR-72 and CPPR-73 be extended from September 1, 1977 and May 1, 1978 to August 1, 1979 and April 1, 1980 for Units 1 and 2, respectively.

Dated of issuance: September 29, 1978.

For the Nuclear Regulatory Commission.

ROGER S. BOYD,
Director, Division of Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 78-28134 Filed 10-4-78; 8:45 am]

[1] Effective Jan. 20, 1975, the Atomic Energy Commission became the Nuclear Regulatory Commission and permits in effect on that day were continued under the authority of the Nuclear Regulatory Commission.

[7590-01]

[Docket Nos. 50-327 and 50-328]

SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2 TENNESSEE VALLEY AUTHORITY (TVA)

Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has reviewed the Tennessee Valley Authority's (permittee) request to extend the expiration date of the provisional construction permits for the Sequoyah Nuclear Plant, Units 1 and 2 (CPPR-72 and CPPR-73) which is located near Daisy in Hamilton County, Tenn. The permittee has requested an extension of the latest completion dates specified in the permits to August 1, 1979 for Permit No. CPPR-72 (Unit 1) and April 1, 1980 for Permit No. CPPR-73 (Unit 2) so as to allow for a reasonable period for completion of construction of the Sequoyah Nuclear Plant, and further allowance for contingencies. The principal cause of delay is attributable by the permittee to schedule impacts of new fire protection design requirements, delays in delivery of critical equipment, and other required retrofits and add-ons.

The Commission's Division of Site Safety and Environmental Analysis (staff) has prepared an environmental impact appraisal relative to this change to CPPR-72 and CPPR-73. Based upon this appraisal, the staff has concluded that an environmental impact statement for this particular action is not warranted because, pursuant to the Commission's regulations in 10 CFR Part 51 and the Council of Environmental Quality's Guidelines, 40 CFR 1500.6, the Commission has determined that this change to the construction permits is not a major Federal action significantly affecting the quality of the human environment.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555; and at the Chattanooga-Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tenn. 37402.

Dated at Bethesda, Md., this 25th day of July 1978.

For the Nuclear Regulatory Commission.

RONALD L. BALLARD,
Chief, Environmental Projects Branch 1, Division of Site Safety and Environmental Analysis.

[FR Doc. 78-28206 Filed 10-4-78; 8:45 am]

[7590-01]

[Docket No. 50-289]

METROPOLITAN EDISON CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 45 to Facility Operating License No. DPR-50, issued to Metropolitan Edison Co., Jersey Central Power & Light Co., and Pennsylvania Electric Co. (the licensees), which revised the license and its appended Technical specifications for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Dauphin County, Pa. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to reflect plant operating limitations for operation in Cycle 4 beyond 125±5 effective full power days. This amendment also deletes paragraph 2.c.(3) from the license. This paragraph, which was added by Amendment No. 40, set forth a license condition applicable to operation during the early portion of Cycle 4.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated June 23, 1978, as supplemented by letter dated August 7, 1978, (2) Amendment No. 45 to License No. DPR-50, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW, Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Box 1601 (Education Building), Harrisburg, Pa. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 22nd day of September 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc. 78-28132 Filed 10-4-78; 8:45 am]

[7590-01]

[Docket No. 50-289]

METROPOLITAN EDISON CO. ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 44 to Facility Operating License No. DPR-50 issued to Metropolitan Edison Co., Jersey Central Power & Light Co. and Pennsylvania Electric Co. (the licensees), which revised the license for operation of the Three Mile Island Nuclear Station, Unit No. 1, located in Douphin County, Pa. The amendment is effective as of its date of issuance.

This amendment adds a license condition relating to the completion of facility modifications for fire protection.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's submittals dated May 16, 1977, and June 12, July 14, July 20, July 28, August 15, August 28, and September 8 and 18, 1978, (2) Amendment No. 44 to License No. DPR-50, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Box 1601 (Education Building), Harrisburg, Pa. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of September 1978.

[7590-01]

[Docket Nos. 50-280 and 50-281]

VIRGINIA ELECTRIC AND POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 44 and 43 to Facility Operating License Nos. DPR-32 and DPR-37, issued to Virginia Electric and Power Co. (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit Nos. 1 and 2 (the facilities) located in Surry County, Va. The amendments are effective within 30 days of the date of issuance.

These changes to the Technical Specifications, (1) reduce the allowable pressurizer heatup rate from 200° F/hr to 100° F/hr, (2) reflect a new title of "Resident Quality Control Engineer" to replace "Quality Control Engineer," and (3) correct a typographical error on page TS 3.16-2 which was issued on May 10, 1978.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 55.1(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated December 19, 1977, (2) Amendment Nos. 44 and 43 to License Nos. DPR-32 and DPR-37, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Swem Library, College of William and Mary, Williamsburg, Va. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md, this 27th day of September 1978.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[7590-01]

[Docket No. 50-305]

WISCONSIN PUBLIC SERVICE CORP. ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 22 to Facility Operating License No. DPR-43 issued to Wisconsin Public Service Corp., Wisconsin Power & Light Co., and Madison Gas & Electric Co. (the licensee) which revised Technical Specifications for operation of the Kewaunee Nuclear Power Plant located in Kewaunee, Wis. The amendment is effective as of the date of issuance.

The amendment reduces the allowable pressurizer heatup rate from 200° F per hour to 100° F per hour and changes the frequency of the tests for permissives P8 and P10 and the 25 percent reactor trip.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 20, 1978, (2) Amendment No. 22 to Facility Operating License No. DPR-43, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Kewaunee Public Library, 314 Milwaukee Street, Kewaunee, Wis. 54216. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 26th day of September 1978.

For the Nuclear Regulatory Commission.

[Docket No. 40-8502]

WYOMING MINERAL CORP.

Availability of Final Environmental Statement for Irigaray Uranium Solution Mining Project

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR part 51, notice is hereby given that the Final Environmental Statement prepared by the Commission's Office of Nuclear Material Safety and Safeguards, related to the proposed Irigaray uranium solution mining project to be located in Johnson County, Wyoming, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

The Final Environmental Statement is also being made available at the State Clearinghouse, State Planning Coordinator, Office of the Governor, Capitol Building, Cheyenne, Wyo. 82001.

The notice of availability of the Draft Environmental Statement for the Irigaray uranium solution mining project and requests for comments from interested persons was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19488). The comments received from Federal agencies, State, and local officials and interested members of the public have been included as appendices to the Final Environmental Statement.

Copies of the Final Environmental Statement (Document No. NUREG-0481) may be purchased on or about October 13, 1978 from the National Technical Information Service, Springfield, Va. 22161. (Printed copy: $10.75; Microfishe: $3.)

Dated at Silver Spring, Md., this 26th day of September, 1978.

For the Nuclear Regulatory Commission.

LELAND C. ROUSE,
Chief, Fuel Processing and Fabrication Branch, Division of Fuel Cycle and Material Safety.

[Docket Nos. 50-237, 50-249, 50-254, 50-265]

COMMONWEALTH EDISON CO., AND IOWA-ILLINOIS GAS & ELECTRIC CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717, and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

COMMONWEALTH EDISON CO. AND IOWA-ILLINOIS GAS & ELECTRIC CO.

(Dresden Nuclear Power Station, units 2 and 3.) (Quad Cities Nuclear Power Station, units 1 and 2.)

This action is in reference to a notice published by the Commission on August 22, 1978, in the FEDERAL REGISTER (43 FR 37245) entitled "Proposed Issuance of Amendments to Facility Operating Licenses."

The Chairman of this Board and his address is as follows:

Gary L. Milhollin, Esq., 1815 Jefferson Street, Madison, Wis. 53711.

The other members of the Board and their addresses are as follows:

Mrs. Elizabeth B. Johnson, Union Carbide Corp., Nuclear Division, P.O. Box X, Oak Ridge, Tenn. 37830.
Dr. Quentin J. Stober, Fisheries Research Institute, University of Washington, Seattle, Wash. 98195.

Dated at Bethesda, Md., this 28th day of September 1978.

JAMES R. YORE,
Chairman, Atomic Safety and Licensing Board Panel.

[4910-58]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-40]

ACCIDENT REPORT; RESPONSES TO SAFETY RECOMMENDATIONS

AIRCRAFT ACCIDENT REPORT

The formal report of investigation into the April 28, 1977, crash of a corporate jet at McLean, Va., has been released by the National Transportation Safety Board. The report, No. NTSB-AAR-78011, shows that the twin-jet Beech-Hawker 125 plunged into a populated residential area of Fairfax County less than 4 minutes after takeoff from Washington National Airport. The Southern Company Services, Inc., plane was returning to its headquarters in Birmingham, Ala.

After a flightcrew member reported that the aircraft was climbing through 9,300 feet, monitoring radar stations lost continuous reception of the aircraft's primary and secondary radar target information. Shortly thereafter, ground witnesses saw an explosion in the sky followed by wreckage of the aircraft falling to the ground. The sky was overcast and light rain was falling. The four persons aboard were killed and the aircraft was destroyed. One residence and two automobiles were destroyed by impact and fire, and several other homes were damaged by falling debris.

The Safety Board has determined that the probable cause of the accident was a failure or malfunction of an undetermined nature in the pilot's attitude indicating system which led to a loss of control and overstress of the aircraft structure.

The McLean crash was one of five cited by the Safety Board last April 13 when it recommended Federal Aviation Administration action on requirements for recorders on turbine-powered aircraft in air taxi and corporate operations. The Board recommended that FAA (1) develop recorder standards for "complex aircraft" based on intended aircraft use; (2) research and develop a family of low-cost recorders, including a composite flight data-cockpit voice recorder, for "complex general aviation aircraft"; and (3) require, in the interim, a cockpit voice recorder on all turbine aircraft certificated for two pilots and six or more passengers. These recommendations, Nos. A-78-27 through 29, are reproduced in the report. (See also 43 FR 18073, April 27, 1978.)

RESPONSES TO SAFETY RECOMMENDATIONS

Aviation

A-74-5.—Letter of September 15 from the Federal Aviation Administration is a followup to initial response dated April 23, 1974, to a recommendation issued as a result of investigation of the Pan American World Airways B-707 freighter accident at Boston, Mass., on November 3, 1973. The recommendation asked FAA to require that transport category airplanes certificated under Part 4b of the Civil Air Regulations prior to the effective date of Amendment 4b-8 comply with § 25.1439 of the Federal Aviation Regulations.

FAA's recent response indicates that Proposal 2-91 to amend §§ 25.1439 (a) and (b), and Proposal 2-213 to amend § 121.337, were included in Notice 75-10 published March 7, 1975. Also, Airworthiness Review Program Amendment No. 3 covering Proposals 2-91 and 2-213 was published on December 20, 1976. The proposed amendment to § 25.1439(a) was withdrawn, based on comments which stated that the action was premature in view of the current testing by the FAA. The proposal to amend § 121.337 was also withdrawn since the proposal (§ 25.1439(b)) to which it refers was withdrawn. As a result of this testing, FAA initiated a project to develop proposals to amend §§ 25.1439(b) and 121.337. FAA expects to issue a notice of proposed rulemaking for this project within the next year.

A-78-18 through 20.—FAA's letter of September 11 is in response to Safety Board recommendations issued last April 6, which called for more detailed information about mountain pass routes to be depicted on sectional charts. The Board's recommendation letter cited several fatal crashes which occurred when pilots became trapped in box canyons while attempting to cross mountain passes.

FAA, recognizing this hazard to VFR flying as a matter requiring a continuing safety education emphasis to instill pilot awareness, reports that the *FAA General Aviation News*, with a current circulation of 69,000, has been an effective media for bringing such recurring as well as current safety matters to the attention of general aviation pilots. The August 1978 issue (copy attached to FAA's response letter) features safety aspects of mountain flying. Other affirmative actions taken by FAA in response to these recommendations were stated in FAA's initial comments of June 19 (43 FR 31248, July 20, 1978).

A-78-27 and 28.—FAA on September 11 replied to the Safety Board's letter of August 10 concerning two of the recommendations issued in connection with the McLean, Va., crash (see summary of report, above). The Board's letter, replying to FAA's June 30 response (43 FR 32477, July 27, 1978), states that the Board's concerns in making the recommendations were based on the current scarcity of gov-

V 43 / 194 OCT 5 78

ernment/industry economic and technical information that is directly related to low-cost aircraft recorders. The Board cited a U.S. Army program to develop and install low-cost recorders on several thousand aircraft, based on emerging technology which appears to have almost direct and timely civil application.

FAA's June 30 response indicated intention to implement recommendations A-78-27 and 28 through advanced rulemaking action (ANPRM). Also, the ANPRM action was cited as obviating the need for Government-sponsored research and development, based on preliminary work already done by industry.

The Board's August 10 letter reports that on July 12 its Bureau of Technology hosted a U.S. Army/FAA/NASA meeting to brief FAA and NASA representatives, at the technical level, on the Army program to include safety and technical requirements, cost effectiveness, and goals for the next several years.

The Board further reports that NASA has undertaken research to develop solid-state recording devices. One objective is to demonstrate the feasibility of utilizing advanced low-cost digital systems to provide a solid-state general aviation crash recorder that would retain critical accident investigation parameters in a nonvolatile storage system. Another goal is to provide in fiscal year 1978 a solid-state data storage system suitable for replacing electromechanical tape recorders in aerospace vehicles. This data recorder will use "bubble memory" technology. NASA also indicates interest in conducting economic studies of new recorder technology as it relates to aircraft size and use.

Considering these developments, the Board on August 10 requested FAA to accelerate the proposed ANPRM action. In response, FAA on September 11 noted that its regulatory proposals are now subject to the criteria of Executive Order 12044, "Improving Government Regulations," and the proposed Department of Transportation Regulatory Policies and Procedures as published in the FEDERAL REGISTER on March 24 and June 1, respectively. FAA states that a major impact of these documents on the agency regulatory process is the emphasis placed on the procedures employed to determine: (1) what are significant regulatory projects and (2) what priority these projects will be assigned when the Department regulatory agenda is developed. At this time, FAA does not believe there is sufficient research data available to justify changing the regulatory agenda, but will consider such action should sufficient data become available prior to issuance of an ANPRM.

FAA acknowledges that NASA's recorder research projects should be useful in helping FAA accomplish its regulatory goals in developing crash recorder requirements. In this respect, FAA is now completing final action on major amendments to 14 CFR Part 135 to require that cockpit voice recorders be installed on turbojet airplanes with 10 or more passenger seats.

A-78-42.—Also on September 11, FAA responded to the recommendation issued following investigation of the crash of a Douglas DC-7BF after takeoff from the Yakutat (Alaska) Airport.

In response to this recommendation, which asked FAA to revise 14 CFR Part 91, Subpart D, to assure that an adequate level of safety is provided wherever these rules are applicable, FAA reports that its flight Standards Service has recently conducted two extensive reviews of certain regulations, both of which included Part 91. FAA also notes that the Airworthiness and Operations Review Programs generated many proposals still being that have been adopted as amendments to the regulations and other proposals still being considered in its rulemaking process. Further, FAA has recently initiated a comprehensive regulatory project to review Part 91, including Subpart D.

FAA states that its review of the 65 accidents cited by the Board as occurring between 1972 and 1976 indicates a 25-percent maintenance involvement could be identified as a cause or factor, rather than the 46-percent cause factor given in the Board's recommendation letter. FAA states, "We do not find that the supporting data identifies specific deficiencies in 14 CFR 91, Subpart D, but that it appears to relate to accidents caused by noncompliance with the current rule."

FAA is aware of the increasing number of surplus airline and military aircraft being operated under Part 91—approximately 5 percent of the total number of large aircraft. FAA has placed a high priority on the surveillance of operators using these aircraft and has so indicated in FAA Order 1800.12D, Flight Standards Program Guidelines, a copy of which is attached to FAA's response.

A-78-47 and 48.—Recommendations resulting from the crash of an Aero Commander 560E near Queen, Pa., last November 17 were answered by FAA on September 11.

Recommendation A-78-47 asked FAA to direct accident prevention specialists, flight instructors, and flight examiners, as part of their training or biennial review programs, to inform all owners and pilots of aircraft which use injection-type, pressure carburetors of the aircrafts' subceptibility to impact ice in the induction system. FAA reports that in keeping with established policy in its Accident Prevention Program and flight instructor courses, FAA will continue to stress to pilots the need to know the contents of aircraft owners' manuals and pilot operating handbooks. Copies of this recommendation have been forwarded to FAA accident prevention coordinators with the request that the information be used in meetings with pilots.

Recommendation A-78-48 asked FAA to require manufacturers of aircraft equipped with injection-type, single-barrel, low-pressure carburetors to publish and provide to all owners the necessary information about the hazard of impacting ice in the induction system and how to cope with it in flight. FAA notes that this information is required by FAR 23.1581(c) and 23.1585(a), and that the General Aviation Manufacturers Association Specification for Pilots Operating Handbook, Section 7, Paragraph 7.25(g), also contains a requirement for the information concerning air induction system ice protection. FAA says that future pilot handbooks will be prepared by the airplane manufacturers in compliance with the specification in this handbook, a copy of the pertinent part of which is attached to FAA's response. FAA is requesting its regions with type certification responsibility for airplanes equipped with the Stromberg PS Series carburetors to review the manufacturers' operating instructions for induction icing and take any necessary corrective action; this project will be completed by the end of February 1979.

A-78-49.—The FAA, also on September 11, responded to the recommendation issued following an incident last July 14 in which the pilot of a Bell 212 helicopter, conducting water-drop operations under contract for the Department of Interior near Vernel, Utah, made a precautionary landing after hearing a noise and excessive vibration emanating from the main transmission. He found that four teeth had separated from the main transmission input spiral bevel gear (PN 204-940-701-3).

The recommendation urged FAA to determine immediately the potential risks of operating the Bell 212 helicopter with the main transmission input spiral bevel gear PN 204-040-701-3 installed and act to minimize those risks. FAA states that an Airworthiness Directive, No. 78-17-03, was issued August 17 and effective on August 21; a copy is provided. FAA believes that this action will minimize the probability of failure of the main transmission input spiral bevel gear PN 204-040-701-3.

Highway

H-77-38- and 39.—Letter of September 6 from the Ohio Department of Transportation responds to the Safety Board's inquiry of August 7 regarding recommendations developed as a result of investigation of the truck collision with 10 automobiles in Valley View, Ohio, August 10, 1976. Reference is made in the Board's inquiry to ODOT's initial response of June 15 which cited efforts made in implementing recommendation H-77-38 to upgrade the traffic control of State Route 17 at the accident site.

Recommendation H-77-39 asked that the State of Ohio consider amending State laws to allow the Director of Transportation to place and maintain traffic control devices that conform to its manual and specifications upon all extensions of State highways through local jurisdictions. The Safety Board inquiry, noting that the problem of local jurisdictional lack of capability in traffic engineering is one of national concern, quotes from the Federal Highway Administration's Highway Safety Program Standard No. 13, "Traffic Engineering," which calls for: "A comprehensive manpower development plan to provide the necessary traffic engineering capability, including provision for supplying traffic engineering assistance to those jurisdictions unable to justify a full-time traffic engineering staff." The Board believes that an acceptable alternative to its recommendation, concerning a change in the State code to provide direct State responsibility for traffic control devices on State roads, would be a high degree of involvement with this section of Standard No. 13. The Board asked for a description of ODOT's activities in working with this standard to provide traffic engineering capability to local jurisdictions.

ODOT's September 6 letter notes that each of its 12 districts has been assigned an assistant District Traffic Engineer for Safety, 40 percent of whose time is spent in providing technical assistance to all non-State governmental units within his district. This assistance includes instructions on proper methods of identification and surveillance of high accident locations, signing, pavement marking, and traffic signal control. Among other local assistance programs for traffic engineering, ODOT distributed until last December 31 standard signs, primarily stop signs, to replace nonstandard regulatory signs. ODOT has, through the pavement marking demonstration program, provided thermoplastic pavement markings at signalized intersections and school zones within numerous municipalities throughout the State.

Further, ODOT reports, for many years it has furnished, free of charge, copies of the Ohio Manual of Uniform Traffic Control Devices for Streets and Highways to local jurisdictions; revisions to the manual are regularly distributed to holders. Copies of ODOT Traffic Control Application Standards, which are essentially departmental policy guidelines or problem treatments, have been sent to all Ohio county engineers and other selected local officials with updates distributed periodically. Other publications in late stages of development for local distribution include a "Recommended Walking Route to School" program manual and a Pavement Marking Handbook. Training in traffic engineering and related subjects is sponsored and funded by ODOT, including attendance at Northwestern University and Georgia Institute of Technology short courses.

H/78-13.—Letter of August 29 from the Federal Highway Administration responds to a recommendation issued following investigation of the March 8, 1977, collision of a tractor-semitrailer with a schoolbus near Rustberg, Va. The recommendation asked FHWA's Bureau of Motor Carrier Safety to request from the Interstate Commerce Commission the identity and categories of all current ICC-registered carriers operating in interstate commerce and of future registrants as soon as possible following their registration.

FHWA's response provides a great deal of data about the ICC as related to agricultural cooperatives and their operations. FHWA states that there is a notification procedure through which BMCS is provided with records of new operating authority given to common or contract motor carriers. The exempt agricultural cooperatives are not handled in the same manner as common or contract carriers and thus 339 cooperative firms that had filed intent to haul for nonmembers had not been given to BMCS. These cooperative carriers are not required to notify ICC when they discontinue this service, and FHWA notes that 159 of these names were not listed with BMCS. BMCS has initiated a field investigation of these 159 firms to determine status.

FAA notes that rules governing agricultural cooperatives (49 CFR 1047.20-23) have been amended, effective July 21, 1978. The most notable change is a new requirement that notifications of intent to haul for nonmembers be filed with the ICC annually. Carriers failing to renew their notification will be dropped from the active record and cannot legally perform transportation under this provision. The amendments also contain additional recordkeeping requirements and prohibit the use of one-way trip lease equipment in nonmember transportation. Arrangements have been made for ICC to furnish BMCS with copies of the new carrier notification forms as they are received. The BMCS records in this connection will then correspond with those of the ICCc and will be kept current.

Pipeline

P-78-53 through 55.—Letter of September 6 from the Oklahoma Natural Gas Company (ONG) is in response to the three Class I (urgent action) recommendations issued August 28 following investigation of the death of four ONG workmen in Oklahoma City, Okla., last April 24. The men were overcome by gas while working in a regulator vault to restore customer service. (See 43 FR 39871, September 7, 1978.)

ONG reports, in line with the Board's recommendations, that its modified policy requires employees to use a valve or other means to stop the flow of gas before disconnecting or reconnecting active gas lines in confined space. Further, ONG's current training for both new and long-term employees emphasizes the need to have safety equipment available while performing certain hazardous work in confined spaces as well as the importance of testing the atmosphere, the use of safety devices, and the use of safe procedures. ONG also states that its operating procedure now includes instruction on where and how to use all safety equipment presently available and that instructions and procurement of additional safety equipment are being expedited.

Railroad

R-77-40.—Letter of September 11 from Amtrak responds to the Board inquiry of August 18 regarding a recommendation which resulted from investigation of the Marland, Okla., grade-crossing collision of December 15, 1976. The recommendation asked the National Railroad Passenger Corporation (Amtrak) to strengthen and improve its locomotive units' operating compartments to that they effectively resist impact forces and deter entry of flammable liquids into locomotive cabs.

The Board's August 18 letter states that while Amtrak's retrofitting program to seal and weld the hinged nose door openings appears to be an effective method to deter entry of flammable liquids into locomotive cabs, there is concern that the schedule of retrofitting will result in many of Amtrak's SDP-40F locomotives continuing operation with the same design as the locomotive involved in the cited accident for an unacceptably long period of time. The Safety Board asked for further review of this matter and advice as to whether the retrofitting timetable might be shortened and whether

V 43 / 194 OCT 5 78

any temporary sealing methods have been considered.

Amtrak, in response, reports that it has accelerated the program of SDP40F modifications and conversions since previous contact with the Board. During fiscal year 1979, Amtrak plans to retrofit 31 SDP40F units. During fiscal year 1980, 19 or more SDP40F units are scheduled for retrofitting. Nose doors will be sealed by welding or, in the case of conversion to F40PH configuration, eliminated entirely. Amtrak also reports that its operating personnel have been instructed to insure that nose doors of locomotives so equipped are latched securely before locomotives are dispatched. These personnel have been advised of the safety implications of securing these doors. Amtrak is continuing to develop an improved latching device for nose doors of its few remaining units which have these doors.

NOTE: The above notice summarizes Safety Board documents recently released and recommendation response letters received. Single copies of accident reports are available without charge as long as supplies last. Copies of the Board's recommendation letters and letters in response to such recommendations may be obtained free of charge.

All requests for copies must be in writing, identified by report or recommendation number. Address requests to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

SCIENCE, TECHNOLOGY AND DEVELOPMENT ADVISORY COMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

Name: Science, Technology and Development Advisory Committee.
Date: October 20 and 21, 1978.
Time: 9 a.m. to 4 p.m.
Place: Room 2010, New Executive Office Building, 726 Jackson Place NW., Washington, D.C.
Type of Meeting: Part open:

Closed (Friday, October 20, 9 a.m. to 12 noon; and Saturday, October 21, 9 a.m. to 1 p.m.)

Open (Friday, October 20, 1 to 4 p.m.)

Contact Person: Mr. William J. Montgomery, Executive Officer, Office of Science and Technology Policy, 17th and Pennsylvania Avenue NW., Washington, D.C. 20500 (telephone: 202-395-4692). Anyone who plans to attend the open part of the meeting should contact Mr. Montgomery by October 17, 1978.

Summary Minutes—Open Portion: May be obtained from Mr. William J. Montgomery at the address listed above.

Purpose of Advisory Committee: In March 1978, the President decided to create a Foundation for International Technological Cooperation in the reorganized foreign aid structure. To develop detailed plans for the Foundation, a Planning Office has been established reporting to Governor Gilligan, Chairman of the Development Coordination Committee. OSTP has been instrumental in developing the concept of the Foundation and the Planning Office; the Advisory Committee being established will advise the Director of OSTP on the concept and early planning of the Foundation, as well as on related policy issues and programs of the U.S. Government.

Tentative Agenda:

Open portion: Discussion of planning alternatives for the Foundation for International Technological Cooperation.

Closed portion: Discussion of interagency documents which treat possible program and budget initiatives involving Executive Branch decisions.

Reason for Closing: The committee will review and discuss interagency documents which bear on possible program and budget initiatives involving agencies in the Executive Branch.

Authority for Closing: The Director of OSTP determined on September 29, 1978 that the portion of the meeting dealing with interagency budgetary discussions is within the exemption provided in 5 U.S.C. 552b (9)(B) and should therefore be closed to the public.

WILLIAM J. MONTGOMERY,
Executive Officer.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION

[(SR-Amex-78-16) Rel No. 15182]

Order Approving Proposed Rule Change

SEPTEMBER 22, 1978.

On August 2, 1978, the American Stock Exchange, Inc. (Amex) 86 Trinity Place, New York, N.Y. 10005 filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the Act) and rule 19b-4 thereunder, copies of a proposed rule change which would subject options market-makers on other exchanges, for orders sent to the Amex in dually-traded options, to the same rules of execution priority to which Amex market-makers, called registered options traders, are subject.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-15054, August 10, 1978) and by publication in the FEDERAL REGISTER (43 FR 36726, August 18, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552) were made available to the public at the Commission's public reference room.

The Amex proposed rule change is similar to a rule change of the Chicago Board Options Exchange, Inc. (CBOE), approved by the Commission in Securities Exchange Act Release No. 14677 (April 18, 1978), which extended to all nonmember broker-dealers the rules governing execution priority applicable to CBOE members. As in the case of the earlier CBOE rule, the proposed Amex rule appears reasonably calculated to further the protection of investors and to enhance the ability of investors' orders to meet without participation by a dealer and the Commission concludes that furtherance of these statutory goals, in this circumstance, outweighs any burden on competition which may be imposed upon nonmember broker-dealers.

The Commission therefore finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges. In particular, the proposed rule change is consistent with the investor protection purposes of section 6 and furthers the purpose of section 11A(a)(1)(C)(v) by enhancing the ability of investors' orders to meet without participation by a dealer.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-28190 Filed 10-4-78; 8:45 am]

[8010-01]

[Release No. 15188; SR-OCC-78-1]

THE OPTIONS CLEARING CORP. ("OCC")

Order Approving Proposed Rule Change

SEPTEMBER 25, 1978.

On May 15, 1978, OCC filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change which increased the margin requirements for certain low-priced, volatile, spot month options. Specifically, the proposals prescribes minimum marking prices for short positions in such options.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-14798, May 24, 1978) and by publication in the FEDERAL REGISTER (43 FR 23775, June 1, 1978). No written comments were received by the Commission. By letter dated July 18, 1978, OCC submitted the results of a test which, among other things, determined the effect of the proposal on clearing members' margin obligations.

The Commission finds that the proposed rule change is consistent with the requirements of the act and the rules and regulations thereunder applicable to clearing agencies, and in particular, the requirements of section 17A and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the act, that the proposed rule change referenced above be, and it hereby is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[FR Doc. 78-28207 Filed 10-4-78; 8:45 am]

[8010-01]

[Release No. 15191; File Nos. 4-196, 4-273, 4-274, 4-267]

BOSTON STOCK EXCHANGE, INC., ET AL.

Temporary Order Granting Approval

SEPTEMBER 26, 1978.

In the matter of Boston Stock Exchange, Inc., 53 State Street, Boston, Mass. 02109; Cincinnati Stock Exchange, Inc., 209 Dixie Terminal Building, Cincinnati, Ohio 45202; Midwest Stock Exchange, Inc., 120 South LaSalle Street, Chicago, Ill. 60604; Pacific Stock Exchange, Inc., 618 South Spring Street, Los Angeles, Calif. 90014; National Association of Securities Dealers, Inc., 1735 K Street NW., Washington, D.C. 20006.

Notice is hereby given that the Securities and Exchange Commission (the "Commission") has issued an Order, pursuant to Sections 17(d)(1) and 11A(a)(3)(B) of the Securities Exchange Act of 1934 (the "Act") (15 U.S.C. 78q(d)(1) and 78k-1(a)(3)(B)) granting approval, for a period of 270 days from the date of this Order, of plans for allocating regulatory responsibilities (the "Plans") filed pursuant to 17 CFR 240.17d-2 ("Section 240.17d-2") by the National Association of Securities Dealers, Inc. ("NASD") in conjunction with each of the Boston Stock Exchange, Inc. ("BSE"), Cincinnati Stock Exchange, Inc. ("CSE"), Midwest Stock Exchange, Inc. ("MSE"), and Pacific Stock Exchange, Inc. ("PSE") (the "participating exchanges" and, with the NASD, the "parties").[1]

Accordingly, for the period of temporary approval, the NASD shall assume, in addition to the regulatory responsibilities it already has under the Act, regulatory responsibilities allocated to it by the Plans, subject to the terms and conditions set forth in this Order, with respect to certain brokers and dealers which belong to both the NASD and one or more of the participating exchanges. At the same time, the BSE, CSE, MSE, and PSE shall be relieved of the regulatory responsibilities thus allocated to the NASD. The Commission expects temporary approval of the Plans to give it the opportunity to review and evaluate the findings of the Special Study of the Options Markets (the "options Study")[2] before taking further action on the Plans.

In addition, the Commission has determined not to give further consideration to the Plans unless the parties submit, within 180 days of the date of this Order or later if the Commission grants an extension to the parties, amendments which would allocate regulatory responsibilities not covered by the Plans as filed and supplementary information which would facilitate Commission oversight of broker-dealer examination programs under the Plans.

I. BACKGROUND

Absent reasonable justification or excuse, Section 19(g)(1) of the Act (15 U.S.C. 78s(g)(1)) obligates every self-regulatory organization ("SRO") (as defined in Section 3(a)(26) of the Act, 15 U.S.C. 78c(a)(26)) to examine for and enforce compliance with its own rules and the Act and rules and regulations thereunder by each of its members (as defined in Section 3(a)(3) of the Act, 15 U.S.C. 78c(a)(3)), persons associated with its members (as defined in Section 3(a)(18) of the Act, 15 U.S.C. 78c(a)(18)), or its participants (as defined in Section 3(a)(24) of the Act, 15 U.S.C. 78c(a)(24)).[3] For a broker or dealer which belongs to more than one SRO ("dual member"), this statutory obligation could result in a pattern of multiple examinations by each such SRO, creating unnecessary regulatory duplication and added expense for a firm and the industry. At the same time, violations by a firm could escape detection since they might fall between the perceived responsibilities of the SROs.[4]

Section 17(d)(1) of the Act (15 U.S.C. 78q(d)(1)), was intended, in part, to eliminate overlaps and gaps in the regulatory pattern.[5] With respect to a member or participant of more than one SRO, section 17(d)(1) authorized the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes rules and regulations, or to perform other specified regulatory functions.

On April 20, 1976, the Commission adopted 17 CFR 240.17d-1 ("Section 240.17d-1").[6] The rule provides that, with respect to a member of the Securities Investor Protection Corporation ("SIPC") which is also a member or participant of more than one SRO, the Commission shall name a single SRO as designated examining authority ("DEA")[7] to examine the firm for compliance with all financial responsibility rules which apply, including those promulgated by the Commission.[8] Once an SRO has been named a

[2] See Securities Exchange Act Release No. 14056 (October 17, 1977), 42 FR 56706 (1977), announcing the commencement of this investigative proceeding concerning trading of standardized options and its regulation.

[3] The responsibility which Section 19(g)(1) imposes is subject to Sections 17(d) and 19(g)(2) of the Act, 15 U.S.C. 78q(d) and 78s(g)(2).

[4] Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing, and Urban Affairs to Accompany S. 249, S. Rep. No. 94-75, 94th Cong., 1st Sess. 32 (1975) (hereinafter cited as Senate Report).

[5] *Id.*

[6] Securities Exchange Act Release No. 12352 (April 20, 1976), 41 FR 18809 (1976).

[7] Hereafter, unless otherwise indicated, the terms "DEA" and "designation" will be used to refer only to allocations of the responsibility to examine for compliance with applicable financial responsibility rules made pursuant to delegated authority by the Division of Market Regulation (the "Division") under section 240.17d-1. Pursuant to plans filed by the SROs under 17 CFR 240.17a-5, a broker or dealer must file its Financial and Operational Combined Uniform Single ("FOCUS") report with only its DEA.

[8] Formerly, SIPC had the authority to make designations for financial responsibility compliance under section 9(c) of the Se-

Footnotes continued on next page

V 4 3 / 1 9 4
OCT 5 1978

dual member's DEA, all other SROs to which the dual member belongs are relieved of the responsibility to examine the firm for compliance with financial responsibility rules.

On its face, section 240.17d-1 deals with financial responsibility compliance and no other aspect of an SRO's responsibilities. Thus, every SRO continues to be obligated, whether or not it is the DEA, to examine a dual member for compliance with its own rules and provisions of the Act and rules and regulations thereunder governing matters other than financial responsibility. Such matters include sales practices, standardized options transactions and marketmaking and trading activities and practices.

On October 28, 1976, the Commission adopted section 240.17d-2.[9] That section is significantly broader in scope than section 240.17d-1. It permits SROs to submit to the Commission joint plans proposing allocations of their regulatory responsibilities with respect to dual members.[10] It also permits the Commission to relieve an SRO of any regulatory responsibilities imposed on the SRO with respect to a dual member, including the responsibility to examine the dual member for compliance with the Act, rules and regulations thereunder, and the SRO's own rules, and, in effect, to allocate such responsibility to another SRO.

On October 25, 1977, the Commission published notice of filing of the NASD's Plans with the BSE, CSE, MSE, and PSE,[11] as required by section 240.17d-2(c). No comments were received.

II. Discussion

A. Description of the Operation of the Plans Subject to the Terms and Conditions Set Forth in This Order

1. Examinations

The NASD is allocated responsibility for monitoring the financial and operational condition, and for conducting on-site examinations, of each dual member for which it is the DEA under section 240.17d-1. The NASD's on-site examining responsibility shall require it to conduct both routine and special examinations for compliance with the provisions of the Act, rules and regulations thereunder, its own rules, and exchange rules which are comparable to any of these. The NASD shall also examine a dual member whose DEA it is under Rule 17d-1 for compliance with "unique exchange rules," i.e., those exchange rules (1) with which compliance cannot be monitored by surveillance on or through the exchange's trading facilities ("marketplace surveillance") and (2) to which neither provisions of the Act and rules and regulations thereunder nor NASD rules are comparable, if such unique exchange rules are regulatory, as opposed to purely administrative or housekeeping, in nature. Under the MSE and PSE Plans all MSE and PSE standardized options rules with which compliance cannot be monitored through marketplace surveillance shall be deemed to be unique rules of those exchanges and regulatory in nature, and accordingly, subject to NASD examination. While the NASD shall be responsible in general for examining for compliance with unique exchange rules (including unique CSE rules) which are regulatory in nature, the CSE plan and this order shall not require the NASD to assume responsibility for compliance with any unique CSE rules governing trading in the CSE multiple dealer trading system,[12] whether or not they are regulatory in nature.

In addition, the NASD shall examine a dual member for which it is DEA under Rule 17d-1 for compliance with unique administrative or housekeeping rules of a participating exchange if the exchange had been the dual member's DEA before the NASD was named DEA. Each exchange shall retain the responsibility, however, to enforce compliance with its unique administrative or housekeeping rules by a dual member whose DEA under section 240.17d-1 is the NASD, if that exchange was not previously the dual member's DEA. In that case the exchange shall examine the dual member for compliance with its unique administrative or housekeeping rules, unless the exchange monitors compliance by alternative means which the Commission deems to be satisfactory.

Each exchange shall retain responsibility for marketplace surveillance.

2. Membership Services

"Membership services" includes processing and acting upon a member's requests to open, close, or relocate branch offices and maintaining related records. It also includes processing and acting upon applications submitted by a member on behalf of persons seeking to become associated, or to change the nature of their association, with such member and maintaining related records.

Pursuant to this order, the NASD shall be responsible for performing membership services with respect to all dual members for the CSE under that exchange's plan with the NASD. The NASD shall also be responsible for performing membership services for the BSE, MSE, and PSE under their respective plans with respect to dual members for which the NASD is the DEA, i.e., those as to which the NASD is also allocated on-site examining responsibility under the Plans.[13]

Accordingly, the NASD shall maintain appropriate records for the exchanges with regard to requests by dual members covered by the Plans to open, close, or relocate branch offices. The dual members shall submit such requests to the NASD, and the NASD shall maintain such information and advise the exchanges monthly of openings, closings, and address changes of branch and main offices and of the names of branch office managers.[14] Although the NASD shall be responsible for performing this function, it shall forward dual members' applications for opening branch offices to the appropriate exchanges for approval, because the NASD's rules do not require its members to obtain prior approval of branch office openings. In its examinations of dual members under the Plans the NASD shall, however, ascertain whether they obtained exchange approval, if required, for the opening of branch offices.

The NASD shall be decision-maker as well as recordkeeper with respect to persons requiring NASD and exchange approval to become associated, or to change the nature of their association, with dual members covered by the Plans. A dual member shall submit Form U-4 [15] and other pertinent information to the NASD on an applicant's behalf. The NASD shall be responsible for processing and either approving or disapproving the application.[16] If it bars a person from becoming associated with a dual member based on failure to pass a required examination or to comply with qualification standards or administrative requirements, the NASD shall provide the necessary due process to the applicant or aggrieved person, and if its action becomes final, the NASD shall file the appropriate notice with the Commission under 17 CFR 240.19d-1 ("Section 240.19d-1").

The NASD shall forward to each interested exchange for its review the application of a person seeking association of a type not requiring NASD approval, e.g., as a shareholder associate or approved person.

If the NASD discovers, as a result of processing submissions, that a dual member or person associated, or seeking to become associated, with a dual member is subject to a statutory disqualification, the NASD shall decide whether the person is, or continues to be, acceptable under Sections 15A(g) and 6(c) of the Act (15 U.S.C. 78o-3(g) and 78f(c)). The NASD shall notify the interested exchanges of the commencement of any proceeding to determine the acceptability of the person and keep the exchanges apprised of the pertinent facts. The NASD shall consider any supplementary information the exchanges might furnish, but the NASD's National Business Conduct Committee, or, if appropriate, its Board of Governors, shall make the final decision.

Once the NASD renders its decision, matters shall proceed as they would have proceeded prior to approval of the Plans. The Plans shall not preclude an exchange from taking different action than the NASD. If it disagrees with the NASD, an exchange may file notice separately either under Section 240.19d-1, or 17 CFR 240.19h-1 ("Section 240.19h-1"). The Commission would settle a dispute by reviewing, as it would absent a dispute, the Section 240.19h-1 notice filed by either the exchange or the NASD.

The Plans apply only to brokers and dealers which are members of both the NASD and the given exchange. Accordingly, a broker or dealer not yet a member of either the NASD or the given exchange, or both, must still submit separate membership applications to the NASD and/or the exchange. Each SRO shall independently decide whether to admit the applicant to membership.[17] Both the NASD and the exchanges shall maintain their own membership records for dual, as well as sole, members.

The NASD shall advise the exchanges monthly of changes in the status of persons associated with the dual members covered by the Plans.[18]

3. Disciplinary Proceedings

The NASD shall advise an interested exchange with which it has a Plan of any apparent violations of NASD rules, the Act and rules and regulations thereunder or the exchange's rules which the NASD discovers while discharging its responsibilities under the given Plan. The NASD, however, shall have the responsibility to conduct disciplinary proceedings ("enforcement responsibility") for apparent violations of NASD rules and/or provisions of the Act and rules and regulations thereunder.[19]

The NASD shall refer to the BSE, MSE, or PSE, for such disciplinary action by the exchange as the exchange deems necessary or appropriate, any apparent violation of unique exchange rules which the NASD discovers in the performance of its regulatory responsibilities under the Plans. On a case-by-case basis, the BSE, MSE, or PSE may authorize the NASD to conduct any such disciplinary proceedings.[20] In addition, the BSE, MSE, or PSE may intervene and assume jurisdiction if a dual member is the subject of an NASD investigation relating to a transaction on the given exchange.[21] The BSE or PSE may assert jurisdiction, as provided in their Plans, over an investigation of a dual member commenced by the NASD and related to a transaction in connection with which an extension of time under 12 CFR 220.1-.8 ("Regulation T") was requested of, or granted by, the exchange.[22]

The NASD shall conduct all disciplinary proceedings for apparent violations of its own rules, provisions of the Act, rules or regulations thereunder or CSE rules which it discovers in the performance of its responsibilities under the CSE Plan. The CSE, however, may assume jurisdiction and responsibility for conducting disciplinary proceedings for apparent violations related to transactions on the CSE affecting CSE-listed securities or any other activities having a unique reference to the CSE.[23]

4. Extension Requests Under Regulation T and 17 CFR 240.15c3-3 ("Section 240.15c3-3")

Under the Plans and pursuant to this Order, the NASD as well as the BSE, CSE, MSE, and PSE shall continue to process requests which they receive for extensions of time under Regulation T and section 240.15c3-3.[24] The Commission understands that all parties shall retain both the responsibility and the authority to process these requests, whether or not specifically provided in the Plans as filed, because the Plans do not make any allocation of the responsibility to a single SRO.

The NASD shall have examining responsibility for compliance with Regulation T and section 240.15c3-3, and the NASD shall have exclusive responsibility with respect to related enforcement activities, except in instances where the BSE or PSE asserts jurisdiction concurrently with the NASD.[25] To permit the parties to fulfill their responsibilities for handling extension requests and related examining and enforcement responsibilities, each party shall keep the other informed of its activities in this area.[26]

5. Collection and Sharing of Information

The NASD shall be obligated to make any information it obtains in the performance of regulatory responsibilities under the Plans available to the BSE, CSE, MSE, or PSE, in response to a particular request. In addition to, but not in limitation of that obligation, the NASD shall be responsible for reporting to the BSE, CSE, MSE, or PSE any adverse information which the NASD discovers about a dual member's financial condition which should be known by the exchange or, in the case of the MSE or PSE, by its subsidiaries. The NASD shall also furnish the results of examinations it conducts under the Plans to a participating exchange on a routine basis if, after its Plan becomes effective, the exchange requests the NASD to do so.

curities Investor Protection Act of 1970 ("SIPA"). Pub L. No. 91-598, § 9(c), 84 Stat. 1654. Section 26 of the Securities Acts Amendments of 1975 (the "1975 Amendments"), Pub. L. No. 94-29, § 26, 89 Stat. 163, amended section 9(c), current version at 15 U.S.C. 78ii(c)), and transferred to the Commission the authority to make the designations under Section 17(d) of the Act.

[9] Securities Exchange Act Release No. 12935 (October 28, 1976), 41 FR 49093 (1976).

[10] The Commission extended the filing date for initial plans from March 15 to May 15, 1977. Securities Exchange Act Release No. 13537 (May 12, 1977), 42 FR 26274 (1977). The rule permits proposals for reallocation subsequent to this period when changes are necessary or appropriate.

[11] Securities Exchange Act Release Nos. 14091, 14094, 14098, and 14095, respectively (October 25, 1977), 42 FR 57197-198 (1977).

[12] See Securities Exchange Act Release No. 14675 (April 18, 1978), 43 FR 17894 (April 26, 1978). The CSE expects to engage under a separate agreement an auditor or another SRO to conduct any examinations required during the course of the pilot program to regulate the trading system.

[13] While the NASD has indicated that it will provide membership services to the BSE with respect to certain sole BSE members, the Commission does not, by virtue of this Order, express an opinion as to either the merits or the legality of such an arrangement.

[14] NASD/BSE, § 7; NASD/CSE, § 6; NASD/MSE, § 6; NASD/PSE, § 7.

[15] Form U-4 is a uniform registration form for securities industry representatives, agents and certain associated persons. It has been adopted by all SROs, 49 States, and the Commission.

[16] Although a dual member shall no longer be required to make duplicate filings with the NASD and the participating exchanges regarding both branch offices and associated persons, such dual member shall continue to be subject to comparable filing requirements of the nonparticipating exchanges to which it belongs.

[17] Where a member of only one party applies for membership in the other party, the Plans do not expressly provide for the first party to furnish any material in its files about such member to the second party. Neither do the Plans provide for such a transfer of information if a member of only one party withdraws and joins the other party. The Commission understands, however, that there will be a free exchange of such information between the NASD and the exchanges.

[18] NASD/BSE, section 6; NASD/CSE, section 6; NASD/MSE, section 5; NASD/PSE, section 6.

[19] The NASD shall conduct such proceedings under the Plans only against dual members for which it is the DEA or against persons associated with such dual members, because the Plans so limit the persons with respect to which the NASD is allocated enforcement responsibility.

[20] NASD/BSE, section 4; NASD/MSE, section 3; NASD/PSE, section 4.

[25] See discussion supra.

[26] NASD/BSE, section 9; NASD/MSE, section 8; NASD/PSE, section 9.

V 43 / 194

The BSE, MSE, and PSE undertake explicitly to maintain the confidentiality of information they receive from the NASD.[27]

Similarly, the exchanges shall provide the NASD with any information relevant to the NASD's examining and enforcement responsibilities under the Plans. In particular, they shall make known to the NASD all customer complaints about dual members for which the NASD has examining responsibility under the Plans.

6. Invalidation of Terms

To the extent they are inconsistent with the provisions of the Plans, subsequent changes in applicable laws or Commission rules or regulations, or restructuring of the regulatory framework shall supersede such provisions.[28]

7. Cancellation and Fees

For 3 years the NASD shall not charge the BSE or PSE any fees for performing regulatory responsibilities under the plans. If after 3 years the NASD chooses to impose charges, it shall give prior notice to the BSE and PSE which then may unilaterally terminate their agreements with the NASD subject to Commission approval.[29] In addition, the BSE may terminate its agreement without reason, subject to Commission approval, if it gives the NASD 30 days' notice and an opportunity to be heard.[30] The PSE may, subject to Commission approval, terminate its agreement for cause if it gives 30 days' notice to the NASD and an opportunity to the NASD to be heard.[31]

The NASD shall charge the MSE no fee for performing regulatory responsibilities under the MSE Plan during the period of temporary approval. The NASD or the MSE may cancel their agreement without cause with 1 year's written notice and Commission approval. If at any time the NASD imposes charges for performing regulatory responsibilities under the CSE Plan, the CSE may unilaterally terminate the agreement subject to Commission approval.[32]

The Commission may amend, modify, or terminate any of the Plans in a manner consistent with the provisions of the Act and Section 240.17d-2.

8. Limitation of Liability

The civil liability of one party to a plan and its officers, directors, governors, and employees (personnel) shall be limited to actual damages suffered by the other party and attributable to the willful misconduct of the first party or its personnel in fulfilling its regulatory responsibilities under the Plans.

Both parties disclaim all warranties regarding performance of their respective responsibilities.[33] This disclaimer provision shall have no impact on the rights of third parties under Federal law.[34]

B. STATUTORY CRITERIA

In deciding to approve the proposed allocation plans on a temporary basis the Commission has considered

> the regulatory capabilities and procedures of the self-regulatory organizations, availability of staff, convenience of location, unnecessary regulatory duplication, and such other factors as the Commission may consider germane to the protection of investors, cooperation and coordination among self-regulatory organizations, and the development of a national market system and a national system for the clearance and settlement of securities transactions . . .[35]

as required by section 17(d)(1) of the Act and § 240.17d-2.

1. Regulatory Capabilities and Procedures

By comparing the examination checklists of the BSE, MSE, and PSE with those of the NASD, the parties isolated those items which were designed for ascertaining compliance by a member with unique exchange rules, including rules governing standardized options transactions, with which the exchanges monitor compliance by on-site examination.[36] The NASD has added new items for reporting compliance with these unique exchange rules to its own examination checklists and has adopted examination procedures for ascertaining the extent of compliance with such rules. In addition, the NASD has conducted training seminars to introduce the new items on its examination checklists to its examiners and to advise them concerning related examination procedures.

The Commission is at present unable to determine whether the comparison of examination checklists which the NASD conducted with each of the BSE, CSE, MSE, and PSE identified all of those exchanges' unique rules. The Commission has therefore conditioned further consideration of the BSE, CSE, MSE, and PSE Plans on submission by the respective parties within 180 days of the date of this Order of a side-by-side comparison of those rules of the NASD and the given exchange which cannot be monitored by marketplace surveillance. Unique exchange rules shall be identified and then categorized as either regulatory rules or administrative and housekeeping rules. In addition, all parties must submit as a condition of further consideration of their Plans an index correlating the rules and regulations under the Act and the NASD and exchange rules with which compliance cannot be monitored by marketplace surveillance with the items under which compliance is to be reported in existing examination checklists of both the NASD and the given exchange.[37] These exercises will further clarify the parties' respective responsibilities under the plans and enable the Commission's staff to upgrade its oversight of the NASD's and exchanges' examining programs for both dual and sole members.

Although the parties have not persuaded the Commission thatt hey have isolated every unique exchange rule with which the NASD must examine for compliance both under the plans and in accordance with the terms and conditions set forth in this Order, the Commission does not find that the NASD's examination program as contemplated is inadequate. To the contrary, the Commission has determined that while the NASD's checklists and procedures may require amendment or revision, they nevertheless constitute an acceptabe mechanism for monitoring compliance with applicable statutes, rules, and regulations. The Options Study and other Divison staff are currently reviewing the NASD's proposed standardized options compliance procedures and, after the conclusion of the Options Study, the Division staff will continue to monitor, as a matter of course, the sufficiency of all examination procedures established by the NASD. Division staff will also continue to conduct oversight examinations of the NASD and the exchanges to determine whether they are conscientiously discharging their regulatory responsibilities under both the Act and the plans.

2. Availability of Staff

Shortly after the plans were signed and disclosure of their terms was made, the Division staff redesignated to the NASD, pursuant to delegated authority, nearly 180 dual members for which either the BSE, MSE, or PSE had been the DEA under § 240.17d-1, substantially decreasing the examining staff requirements of those exchanges.[38]

The NASD, on the other hand, has assimilated into its regular surveillance and annual examination programs for NASD-designated firms those dual members redesignated to the NASD from the BSE, MSE, and PSE. The total number of routine examinations to be conducted annually by the NASD has increased, however, by only half as many as the number of dual members redesignated to the NASD, because the firms were formerly staggered on a two-year examination cycle.

The Commission's staff is reviewing the NASD's proposed budget for the fiscal year beginning September 1, 1978, which was submitted in connection with a proposed rule change recently filed by the NASD under section 19(b)(3) of the Act (15 U.S.C. 78s(b)(3)) to amend its schedule of member assessments.[39] The NASD based its proposed examining staff authorizations on a review of its current manpower requirements.

Commission staff will continue to monitor the NASD's performance under the Plans as a matter of course, and the Commission may consider alternative allocations of regulatory responsibilities if its review of the NASD's regulatory capabilities and procedures and its staffing, among other factors, indicates that it is unable to fulfill adequately its responsibilities under the Act and Plans, or if the allocation of responsibilities in these Plans becomes inconsistent with the purposes of the Act.

3. Convenience of Location

The NASD has district offices in fourteen cities throughout the country, including four of the five cities in which the BSE, CSE, MSE, and PSE have trading floors. The Commission believes that the allocation to the NASD of regulatory responsibility with respect to dual members is consistent with considerations of convenience of location.

4. Unnecessary Regulatory Duplication

The designation of the NASD as examining authority for dual members under § 240.17d-1 relieved the exchanges only of their responsibility to monitor such firms for financial responsibility compliance. The BSE, CSE, MSE, and PSE retained their responsibility with respect to such dual members to conduct on-site examinations for compliance with other than financial responsibility rules. The Plans eliminate unnecessary regulatory duplication by consolidating the on-site examining responsibilities which the NASD and the exchanges otherwise would continue to have and then allocating it to a single SRO, i.e., the NASD.

The Plans, however, will subject approximately 20 dual members to duplicative standardized options compliance examinations by both the NASD and the American Stock Exchange, Inc. ("Amex"), Chicago Board Options Exchange, Inc. ("CBOE"), or Philadelphia Stock Exchange, Inc. ("Phlx").[40] The Commission has decided, however, not to object to this apparent overlap in examining responsibility at least until it has had an opportunity to review the findings and recommendations of the Options Study regarding surveillance of brokers and dealers transacting business in standardized options.

The Commission has also determined that centralization of membership services reduces unnecessary regulatory duplication with respect to dual members subject to the applicable portions of the Plans. The Plans consolidate the processing of requests concerning branch office openings, closings, and address changes as well as the review of Form U-4 and other submissions regarding persons associated, and seeking to become associated, with certain dual members, and the Plans allocate responsibility for these functions to the NASD. The Commission believes that this allocation of responsibility will reduce the aggregate cost of self-regulation and, by eliminating the exchanges' individual filing requirements, will reduce the cost of compliance to dual members subject to the membership services provisions of the Plans. In addition, as contemplated by the Commission in adopting §§ 240.19d-1 and 240.19h-1, the Plans establish procedures for coordinating the parties' notice filings with respect to persons denied association with such dual members or admitted or continued despite a statutory disqualification.

The Commission has determined that the allocation Plans also reduce unnecessary regulatory duplication by consolidating and allocating to a single SRO the responsibility for performing investigative and disciplinary functions which might otherwise be performed both by the NASD and one or more of the exchanges. The NASD is allocated enforcement responsibility unless an exchange has a peculiar interest in a proceeding, and the Commission finds this allocation to be reasonable, because the NASD's on-site examinations would make the surrounding facts more readily accessible to the NASD than to the exchanges. In both cases, a single SRO shall be responsible for filing notice under § 240.19d-1 if any action it takes results in a final disposition of charges.

C. STATUTORY PURPOSES

Motivated in part by concern that significant segments of the securities industry had been unresponsive to economic change and technological innovation, Congress enacted the 1975 Amendments which gave the Commission "broad authority" to oversee the implementation, operation and regulation of [a] national market system. . . ." [41] Major goals of the 1975 Amendments are to promote efficiency in the nation's capital markets and to provide protection to investors transacting business in those markets.[42] In furtherance of these goals not only does section 17(d)(1) of the act permit the Commission to relieve an SRO of regulatory responsibilities with respect to its dual members, but section 11A(a)(3)(B) also permits the Commission to authorize or require SROs to act jointly with respect to, among other things, regulating matters as to which they share authority under the Act.

While the Commission anticipates that the regulatory pattern will undergo changes as a national market system emerges, the Commission believes that these Plans may facilitate the development of a rational regulatory pattern for the national market system. The Plans promote efficiency by reducing costs to both the dual members subject to the Plans and the exchanges which have been granted relief from responsibility under then.

[28] NASD/BSE, section 3; NASD/CSE, section 3; NASD/MSE, section 2; NASD/PSE, section 3.

[29] NASD/BSE, Section 2; NASD/PSE, Section 2.

[30] NASD/BSE, Section 10.

[31] NASD/PSE, Section 10.

[32] NASD/CSE, Section 2.

[33] NASD/BSE at 8; NASD/CSE at 4; NASD/MSE at 8; NASD/PSE at 8.

[34] SRO's were not intended to become insurers of their members' compliance. *Senate Report, supra* note 4, at 33-34.

[35] Section 17(d)(1) of the Act, 15 U.S.C. 78q(d)(1).

[36] The NASD has not amended its examination checklists or procedures to accommodate unique CSE rules since the CSE currently is in the process of an extensive revision of its rules and, had the NASD adopted new checklist items or procedures based on existing CSE rules, they would soon have been obsolete.

[37] Since the CSE has indicated that it intends to file extensive revisions to its existing rules, those rule changes should be used as the basis for the CSE's comparison, classification, and correlation. If the Commission does not approve the rule change proposal in sufficient time to permit the parties to prepare the rules comparison, classification, and correlation within 180 days of the date of this Order, the CSE may petition the Commission eitehr to extend the time within which such submissions must be made or to direct the parties to use the CSE's unamended rulesd. In the event that the CSE becomes the examining authority for any dual or sole member, it will be required to submit promptly an examination checklist and correlation of its rules to its examination checklist.

[38] The CSE had no firms designated to it under § 240.17d-1.

[39] *See* Securities Exchange Act Release No. 15067 August 16, 1978), 43 FR 37046 (August 21, 1978).

[40] This pattern would continue if the Commission approves an allocation plan filed by the five exchanges which trade standardized options. This Amex/CBOE/Phlx/MSE/PSE plan would allocate the responsibility to conduct on-site examinations of brokers and dealers qualified to trade standardized options on two or more such exchanges for compliance with rules governing such transactions. *See* Securities Exchange Act Release No. 14153 (November 9, 1977), 42 FR 59337 (1977).

OCT 5 1978

V 4 3 / 1 9 4

In addition, the Plans promote investor protection by reallocating the respective responsibilities of the parties so that the locus of the parties' examining and enforcement responsibilities is in one SRO with established interfaces with the other parties.

The Plans and the preparations for their implementation which the parties have made are achievements in cooperation. By coordinating their regulatory functions in accordance with the Plans, the BSE, CSE, MSE, NASD, and PSE will reduce unnecessary regulatory duplication.

D. CONDITIONS

1. Conditions of Approval

This Order gives effect to the Plans subject to the terms and conditions set forth herein. This Order therefore gives no effect to any provision of such Plans as proposed by the parties which is either inconsistent or incompatible with the parties' respective responsibilities under the Plans as described in this Order. Furthermore, any responsibility performed in accordance with such description shall be deemed by all persons to be a responsibility performed under the Plans, whether or not such responsibility is consistent with the proposed allocation of responsibility under the Plans as filed by the parties. The parties shall notify any dual member affected by the Plans of its rights and obligations thereunder.

2. Conditions of Further Consideration

The Commission has determined, upon due consideration of the factors which it must consider in taking action on an allocation plan filed pursuant to § 240.17d-2, that the Plans between the NASD and each of the BSE, CSE, MSE, and PSE are necessary and appropriate in the public interest and for the protection of investors, to foster cooperation and coordination among SROs, and to remove impediments to and foster the development of a national market system. In addition, the Commission has determined that temporary approval of the Plans is not inconsistent with the requirements of sections 6(b)(1) and 15A(b)(2) of the Act (15 U.S.C. 78f(1) and 78o-3(b)(2)).

The parties must nevertheless allocate certain regulatory responsibilities and articulate certain procedures, which the Plans as filed do not explicitly address, before the Commission will consider the Plans further. The Commission understands that some of these functions and procedures are already the subject of informal, working agreements among the parties, although the Commission has not formally relieved any SRO of responsibility thus allocated.

Specifically, as a condition of further consideration of any Plan which is the subject of this Order, the parties must submit within 180 days of the date of this Order or any extension of such time granted by the Commission ("submission period"), remedial amendments to such Plan (1) conforming the allocation of responsibility thereunder to that mandated by the Commission in this Order, (2) allocating the responsibility to receive and process customer complaints, (3) allocating the responsibility to review and approve or disapprove dual members' advertising, (4) committing to the discretion of the NASD the decision whether to conduct a special or cause examination of a dual member under the Plans, and (5) providing for the resolution of disputes which may arise between the parties regarding the interpretation of the Plans or the parties' performance thereunder. Further consideration of any such Plan is also conditioned on the parties' submission of the rules comparison, correlation, and classification described herein during the submission period. As an additional condition on further consideration of the MSE Plan, the NASD and the MSE must submit within the submission period an amendment establishing whether, subsequent to the period of temporary approval, the MSE shall compensate the NASD for performing regulatory functions under the Plan and, if not, what procedural steps the NASD must take to impose charges at a future date.

It is therefore ordered, pursuant to sections 17(d) and 11(a)(3)(B) of the Act (15 U.S.C. 78q(d) and 78k-1(a)(3)(B)) that, for a period of 270 days from the date of this Order, unless such period is otherwise extended by the Commission, that the Plans, between the NASD and BSE, the NASD and CSE, the NASD and MSE, and the NASD and PSE filed pursuant to § 240.17d-2 are approved subject to the terms and conditions set forth in this Order.

It is further ordered that the BSE, CSE, MSE, and PSE are relieved of those responsibilities allocated to the NASD by such Plans as approved subject to the terms and conditions set forth in this Order.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Release No. 20715; 70-6209]

CONSOLIDATED NATURAL GAS CO.

Notice of Proposal by Holding Company To Act as Surety on Bond of Public Utility Subsidiary Company

SEPTEMBER 25, 1978.

Notice is hereby given that Consolidated Natural Gas Co. ("Consolidated"), 30 Rockefeller Plaza, New York, N.Y. 10020, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating section 12(b) of the Act and Rule 45 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

On May 3, 1978, Hope Natural Gas Co., a division of Consolidated's wholly owned public utility subsidiary company, Consolidated Gas Supply Corp. ("Supply Corporation"), filed revisions in its rate schedules with the Public Service Commission of West Virginia providing for increased rates and charges approximating $25,068,634 per year for furnishing natural gas service in the State of West Virginia. By action of the State commission, the effectiveness of the new rates was suspended until October 1, 1978. The new rates may now become effective upon the filing by Supply Corp. of a bond, with satisfactory surety, in the amount of $25,000,000, for the payment of any customer refunds which the State commission may order. The State commission has indicated that Consolidated may act as surety on such bond. Consolidated proposes, without fee or other consideration, to act as surety on the bond of Supply Corp. to save the cost of securing an outside corporate surety.

The fees and expenses incurred by Supply Corp. in connection with the proposed transaction are estimated at $2,250, including charges of $200 for the services, at cost, of Consolidated Natural Gas Service Co., Inc., Consolidated's wholly owned service company, and miscellaneous out-of-pocket expenses estimated at $50. The declaration states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 20, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed, or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulations, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[8010-01]

[Release No. 20714; 70-6093]

FALL RIVER ELECTRIC LIGHT CO. AND MONTAUP ELECTRIC CO.

Notice of Proposed Increase in Short-term Borrowing Authorization

SEPTEMBER 22, 1978.

Notice is hereby given that Fall River Electric Light Co. ("Fall River") 10 North Main Street, Fall River, Mass. 02722, and Montaup Electric Co. ("Montaup"), P.O. Box 391, Fall River, Mass. 02722, both electric utility subsidiary companies of Eastern Utilities Associates, a registered holding company, have filed a post-effective amendment to their application-declaration previously filed and amended in this matter pursuant to sections 6(a)(1), 7 and 12(c) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42(b)(2) and 50(a)(2) promulgated thereunder regarding the following proposed transaction. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transaction.

By order dated December 22, 1977 (HCAR No. 20355), Fall River and Montaup were authorized to make borrowings from banks through December 26, 1978, in the amounts of $5,850,000 and $21,600,000, respectively. By post-effective amendment Montaup requests that its borrowing authorization be increased to $32,300,000 through December 26, 1978. It is stated that such increase is necessary due to an increase in Montaup's estimated construction expenditures and the postponement of previously contemplated long-term financing of Montaup.

With respect to such notes to banks for which compensating balances of 20 percent are required, the notes will bear interest at not in excess of the prime or base rate in effect on the date of issuance of from time to time. With respect to such notes to banks for which no compensating balances are required, the notes will bear interest at not in excess of an effective rate derived from the prime or base rate in effect on the date of issuance, or from time to time, together with an assumed compensating balance of 20 percent. All notes will provide for prepayment in whole or in part without penalty. Based on a prime rate of 9½ percent, the effective cost of money would be 11.9 percent.

Proceeds from the borrowings will be used for construction expenditures, for meeting compensating balance requirements of lending banks, and to pay short-term debt at or before maturity through December 26, 1978. Construction expenditures for Fall River and Montaup for the 12-month period ending December 26, 1978, are estimated at $2,426,000 and $19,062,000, respectively. It is stated that the proposed issuance of notes is exempted from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(2).

There are no additional fees or expenses to be incurred in connection with the proposed transaction. No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 19, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact of law raised by said amended application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended by said post-effective amendment or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Release No. 10416; 811-2705]

FINANCIAL MUNICIPAL BOND FUND, INC.

Notice of Filing of Application Pursuant to Section 8(f) of the Act for an Order Declaring That the Company Has Ceased to be an Investment Company

SEPTEMBER 25, 1978.

Notice is hereby given that Financial Municipal Bond Fund, Inc. ("Applicant") P.O. Box 2040, 1050 South Broadway, Denver, Colo. 80201, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on August 21, 1978, and an amendment thereto on September 15, 1978, for an order of the Commission, pursuant to section 8(f) of the Act, declaring that Applicat has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a corporation organized under the laws of the State of Colorado, registered under the Act on November 15, 1976, and concurrently filed a registration statement on Form S-5 under the Securities Act of 1933 for the public offer and sale of shares of its common stock. Applicant states that this registration statement was never declared effective and has caused such registration statement to be withdrawn.

Applicant represents that it currently has no assets, no outstanding debts, and no security holders, and that it is not a party to any pending litigation or administrative proceeding. Applicant states that it is not currently engaged, and does not propose to engage,

OCT 5 1978 LIMI

V 4 3 / 1 9 4

in any business activities, and that it is currently in the process of being dissolved pursuant to Colorado State law, and in accordance with the requirements thereof, has filed a statement of intent to dissolve with the Colorado Secretary of State.

Section 8(f) provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than October 20, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of any attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Release No. 10417; 812-4364]

INVESTORS MUNICIPAL-YIELD TRUST, SERIES 1 (AND SUBSEQUENT SERIES) AND VAN KAMPEN SAUERMAN INC.

Notice of Filing of Application for an Order Granting Exemptions

SEPTEMBER 25, 1978.

Notice is hereby given that Investors' Municipal-Yield Trust, Series 1 (and Subsequent Series) ("Trust") 208 South LaSalle Street, Chicago, Ill. 60604, a unit investment trust registered under the Investment Company Act of 1940 ("Act") and its Sponsor, Van Kampen Sauerman Inc. ("Sponsor") (hereinafter the Sponsor and the Trust are referred to collectively as "Applicants"), have filed an application on September 8, 1978, and an amendment thereto on September 22, 1978, for an order of the Commission (a) pursuant to Section 6(c) of the Act exempting the Applicants from the provisions of Sections 14(a) and 22(d) of the Act, and Rules 19b-1 and 22c-1 under the Act, and (b) pursuant to section 11 of the Act permitting the Trust to offer its Units at net asset value plus a fixed dollar sales charge pursuant to a conversion option. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summerized below.

Series 1 of the Trust is a unit investment trust, and is the first of a series of similar but separate trusts which the Sponsor intends to form (hereinafter all such subsequent Series are collectively referred to as the "Series"). The Series will be created under the laws of the Commonwealth of Massachusetts pursuant to separate trust agreements, such agreements containing certain standard terms and conditions of trust common to all the Series. The Applicants represent that the investment objective of each Series will be to seek both federally tax-exempt income and the preservation of capital through the investment in a portfolio of tax-free municipal bonds ("Bonds") and, subject to certain limitations, Units of previously issued Series of the Trust (the Bonds and previously issued Units are collectively called herein the "Trust Securities"). The Trust Securities which will constitute the portfolio of each Series will be selected in advance and will be identifiable in respect of each Series on the date of deposit with the Trustee.

The Sponsor has filed a Form S-6 Registration Statement under the Securities Act of 1933 ("1933 Act") covering fractional undivided interests in Series 1 to be offered to investors at a public offering price set forth in the prospectus included in the S-6 Registration Statement. The 1933 Act Registration Statement has not yet become effective. The Sponsor has also filed a Form N-8A Notification of Registration and a Form N-8B-2 Registration Statement under the Act relating to Series 1.

Each Series of the Trust will be governed by the provisions of a trust indenture and agreement ("Indenture") to be entered into by the Sponsor and a corporation organized and doing business under the laws of the United States or a State thereof, which is authorized under such laws to exercise corporate trust powers and having at all times an aggregate capital, surplus, and undivided profits of not less than $2,500,000 ("Trustee"). It is contemplated that the Bradford Trust Co. will serve as Trustee for Series 1. Standard & Poor's Corp. will serve as Evaluator for Series 1. A separate Indenture will be entered into each time a Series is created and activated and the Trust Securities which comprise its portfolio (or delivery statements relating to contracts for the purchase of such Trust Securities together with funds represented by cash or an irrevocable letter of credit issued by a major commercial bank in the amount required for their purchase) are deposited with the Trustee. Each Series will be substantially identical except as to size, number of Units and the individual Trust Securities in the portfolio.

When a Series of the Trust is created, the Sponsor and the Trustee will enter into an Indenture and the Trust Securities to constitute such Series of the Trust (or delivery statements relating thereto and funds for the purchase thereof as set forth above) will be delivered to and deposited with the Trustee by the Sponsor. Substantially concurrently, the Trustee will issue in the name of the Sponsor, or such other name as the Sponsor may direct, one or more certificates evidencing the ownership of all of the undivided interests in such Series of the Trust. These Units will be separately offered for sale to the public at prices based upon their then respective current net asset values, after the registration statement filed in respect thereto under the 1933 Act has become effective.

Applicants state that Trust Securities will not be pledged or be in any other way subjected to any debt at any time after they are deposited with the Trustee. The Sponsor has been accumulating Trust Securities for the purpose of deposit in Series 1 and will follow a similar procedure of accumulating Trust Securities for each subsequent Series.

The assets of the Trust may consist of Bonds initially deposited, such Bonds as may continue to be held from time to time in exchange for or substitution of any of the Bonds, accrued and undistributed interest, undistributed cash and Units of previously issued Series of the Trust. On the date of deposit, the maximum number of Units in the Trust of a Series and the Bonds which will comprise the respective portfolios are determined. No additional Units can be issued, although the number of Units outstanding may be reduced by redemptions. No additional Bonds can be deposited

0 C 5 7 8

in the Trust except that under certain circumstances, refunding bonds issued in exchange and substituted for outstanding Bonds may be deposited with the Trustee. The Trustee may dispose of Bonds when events occur which may affect their investment stability and distribute the proceeds thereof in partial liquidation to Unitholders; and the Trustee must sell Bonds if necessary for the payment of the redemption price of Units tendered for redemption. The proceeds from such dispositions will be distributed to the holders of Units of the Trust ("Unitholders"), and not reinvested.

Each Unit of the Trust will represent a fractional undivided interest, the numerator of the fractional interest represented will be 1 and the denominator will be the number of Units issued and outstanding in any particular Series. Units are redeemable, and in the event that any Units are redeemed, the fractional undivided interest represented by each Unit will be increased accordingly. Units will remain outstanding until redeemed or until the termination of the Indenture. The Indenture may be terminated by 100 percent agreement of the Unitholders or, in the event that the value of Trust Securities shall fall below an amount specified, either upon direction of the Sponsor to the Trustee or by the Trustee without such direction. There is no provision in the Indenture for the issuance of any Units after the initial issuance and such activity will not take place (except to the extent that the secondary trading by the Sponsor in the Units is deemed the issuance of Units under the Act).

The Sponsor and/or certain of the Underwriters, while under no obligation to do so, intend to maintain a market for whole Units of the Trust and to offer to purchase such Units at prices in excess of the redemption price as set forth in the Indenture. In the absence of such a market, Unitholders may only be able to dispose of their Units by redemption.

SECTION 14(a)

Section 14(a) of the act, in substance, provides that no registered investment company and no principal underwriter for such a company shall make a public offering of securities of which such company is the issuer unless: (1) The company has a net worth of at least $100,000; (2) at the time of a previous public offering it had a net worth of $100,000; or (3) provision is made that a net worth of $100,000 will be obtained from not more than 25 responsible persons within 90 days, or the entire proceeds received, including sales charge, will be refunded.

Applicants seek an exemption from the provisions of section 14(a) in order that a public offering of Units of the Trust as described above may be made. In connection with the requested exemption from section 14(a) the Sponsor agrees: (1) To refund, on demand and without deduction, all sales charges to purchasers of Units of a Series if, within 90 days from the time that a registration statement for a Series becomes effective under the Securities Act of 1933, the net worth of the Series shall be reduced to less than $100,000, or if such Series is terminated; (2) to instruct the Trustee on the date Trust Securities are deposited in each Series that in the event that redemption by the Sponsor of Units constituting a part of the unsold Units shall result in that Series having a net worth of less than 40 percent of the principal amount of Trust Securities originally deposited for such Series, the Trustee shall terminate the Series in the manner provided in the Indenture and distribute any Trust Securities or other assets deposited with the Trustee pursuant to the Indenture as provided therein; and (3) in the event of termination for the reasons described in (2) above, to refund any sales charges to any purchasers of Units purchased from the Sponsor on demand and without any deduction.

The Sponsor has further represented that no Series of the Trust will be created which will contain in the portfolio on the date of deposit, Trust Securities (or delivery statements relating thereto and funds for the purchase thereof) having a face amount of less than $3,000,000. In the event the value of such Series should decrease to the greater of $1,000,000 or 20 percent of the amount of the Trust Securities initially deposited, for any reason, the Trustee may, and when so directed by the Sponsor shall, terminate and liquidate the Series. Thus, Applicants represent that it is highly unlikely that, except during the course of liquidation, the net worth of any Series would ever decline to $100,000 or less.

RULE 19b-1

Rule 19-1 provides in substance that no registered investment company which is a "regulated investment company" as defined in section 851 of the Internal Revenue Code shall distribute more than one capital gain dividend in any one taxable year. Paragraph (b) of the Rule contains a similar prohibition for a company not a "regulated investment company" but permits a unit investment trust to distribute capital gain dividends received from a "regulated investment company" within a reasonable time after receipt.

Distributions of interest and principal on each Series will be made to Unitholders semiannually unless a Unitholder elects to receive them monthly or quarterly. Applicants represent that distributions of principal constituting capital gains to Unitholders may arise in the following instances: (1) If an issuing authority calls or redeems an issue of Bonds held in the portfolio, the sums received by the Trust will be distributed on a pro-rata basis to each Unitholder on the next distribution date; (2) if Units are redeemed by the Trustee and Trust Securities from the portfolio are sold to provide the funds necessary for such redemption, each Unitholder will receive his pro-rata portion of the proceeds from the Trust Securities sold over the amount required to satisfy such redemption distribution; (3) if Bonds held in the portfolio are sold to maintain the investment stability of a Series of the Trust, the sums received by the Trust may be distributed on a pro-rata basis to each Unitholder on the next distribution date; and (4) as Bonds mature by their terms, the sums received by the Trust will be distributed on a pro-rata basis to each Unitholder on the next distribution date. In such instances, a Unitholder may receive in his distribution funds which constitute capital gains, since in some cases the value of the Trust Securities redeemed or sold may have increased since the date of their acquisition by the Trust.

As noted above, Paragraph (b) of Rule 19b-1 provides that a unit investment trust may distribute capital gain dividends received from a "regulated investment company" within a reasonable time after receipt. Applicants assert that the purpose behind such provision is to avoid forcing unit investment trusts to accumulate valid distributions received throughout the year and distribute them only at year end, and that the operations of Applicants in this regard are squarely within the purpose of such provision. However, in order to comply with the literal requirements of the Rule, each Series of the Trust would be forced to hold any moneys which would constitute capital gains upon distribution until the end of its taxable year. The application contends that such practice would clearly be to the detriment of the Unitholders.

In support of the requested exemption, Applicants state that the dangers against which Rule 19b-1 is intended to guard do not exist in the situation at hand since neither the Sponsor nor the Trust has control over events which might trigger capital gains, e.g., the tendering of Trust Units for redemption and the prepayment of portfolio bonds by the issuing authorities. In addition, it is alleged that any capital gains distribution will be clearly indicated as capital gains in the accom-

V 43 / 194
OCT 5 1978

panying report by the Trustee to the Unitholder. Furthermore, Applicants assert that the sale of Bonds in an effort to maintain the investment stability of a Series of the Trust is an activity designed generally to prevent or to retard deterioration of values when certain adverse factors exist. These factors include a default in the payment of principal or interest on its Bonds, or an adverse change in the market, revenue, or credit factors affecting the investment stability of the Bonds. Finally, Applicants contend that sale of Bonds in an effort to maintain investment stability of any Series is not expected to result in capital gain dividends to the Trust or its Unitholders because the above factors will normally have a depressing effect on the market value of the Bonds.

RULE 22c-1

Applicants state that following the initial offering period, the Sponsor and/or certain of the Underwriters, while not obligated to do so, intend to offer to purchase whole Units in the secondary market at prices based on the offering side evaluation of the Trust Securities in any Series, determined on the last business day of each week, effective for all sales made during the following week.

Applicants also state that the Sponsor has undertaken to adopt a procedure whereby the Evaluator, without a formal evaluation, will provide estimate evaluations on trading days. In the case of a repurchase, if the Evaluator cannot state that the previous Friday's price is at least equal to the current bid price, the Sponsor will order a full evaluation. The Sponsor agrees that, in case of the resale of Units in the secondary market, if the Evaluator cannot state that the previous Friday's price is not more than one-half point ($5 on a Unit representing $1,000 principal amount of underlying Trust Securities) greater than the current offering price, a full evaluation will be ordered. Under these circumstances, the Applicants contend that the exemption of the Sponsor from the provisions of Rule 22c-1 will in no way affect the operations of the Trust and will benefit the Unitholders by providing a repurchase price for their Units which is in excess of the current net asset value of such Units as computed for redemption purposes.

Rule 22c-1 provides, in pertinent part, that no registered investment company issuing any redeemable security, and no dealer in any such security, shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Applicants state that Rule 22c-1 has two purposes: (1) To eliminate or to reduce any dilution of the value of outstanding redeemable securities of registered investment companies which might occur through the sale, redemption or repurchase of such securities at prices other than their current net asset values; and (2) to minimize speculative trading practices in the securities of registered investment companies.

The secondary market activities of the Sponsor and/or the Underwriters and the manner for the acquisition by investors of new Units, may be deemed to violate Rule 22c-1 because of the absence of daily pricing. Applicants contend, however, that the purposes of Rule 22c-1 will not be offended by the Sponsor and/or the Underwriters in the secondary market activities. Applicants assert that the pricing of Units by the Sponsor in the secondary market will in no way dilute the assets of the Trust, and that Unitholders will benefit from the sponsor's pricing procedure in the secondary market since they will normally receive a higher repurchase price for their Units than they could by redeeming their Units at the current net asset value, and that this will be accomplished without the cost burden to the Trust of daily evaluations of the Unit redemption value.

Applicants also contend that speculation in Units of any Series is unlikely because price changes are limited in respect to the kind of Trust Securities which will be held by such Series. In addition, Applicants argue that because of the nature of the Trust Securities price changes are gradual and depend largely on general changes in interest rates. To avoid the Sponsor receiving more than the specified sales charge on the resale of Units, the Sponsor has undertaken not to resell any Units which it may repurchase at a price below the offering side evaluation of the Trust Securities in any Series.

Applicants therefore request an exemption from the provisions of Rule 22c-1 for Series 1 and for all subsequently created Series insofar as the Rule may apply after completion of the primary distribution of Units of such Series.

SECTION 22(d)

A. ARO PLAN

Applicants propose to offer the right to participate in an automatic reinvestment option ("ARO Plan") to Unitholders of record in each of its Series who have selected the semiannual plan of distribution. This ARO Plan will permit Unitholders to invest income and capital gain dividends made to them on a predecessor Series of the Trust into Units of a subsequent series of the Trust ("Reinvestment Series") at a reduced sales charge. Applicants state that its Unitholders will be able to join the ARO Plan at any time by delivering to the Trustee an Authorization Form. Likewise, a participant may withdraw at any time upon written notice to the Trustee. To assist in withdrawals, the Trustee intends to establish a toll-free telephone number. However, if notification of withdrawal has not been given to the Trustee prior to a particular semiannual distribution date, the participant will be deemed to have elected to participate in the ARO Plan with respect to that particular distribution, and his withdrawal will become effective for the next succeeding distribution. Unless the withdrawing participant specifically indicates in his withdrawal notice that he wishes to withdraw from the ARO Plan for less than all of the Series of the Trust which he might then own (specifically indentifying which Series he desires to continue in the ARO Plan), he will be deemed to have withdrawn completely from the ARO Plan in all respects. Once a participant has withdrawn completely from the ARO Plan he will only be allowed to again participate in that Plan by submitting an Authorization Form stating that he desires to again participate in the ARO Plan.

Each participant will have his interest and principal distributions reinvested on the corresponding distribution date in the appropriate Reinvestment Series of the Trust. Applicants represent that they intend to see to it that each Reinvestment Series will be declared effective by the Commission in sufficient time to allow distribution to Plan participants of final prospectuses relating to such Reinvestment Series. As presently contemplated, it is intended that each Reinvestment Series will become effective on or before each semiannual record date for determining who is eligible to receive distributions on the related Distribution Date. Applicants state that if a Reinvestment Series has not been declared effective in such sufficient time, the ARO Plan will be suspended with respect to that Series and recommenced with the next succeeding Series. In such a case, a participant would receive his normal cash distribution. Applicants represent that fractional Units in the denomination of tenths will be purchased under the ARO Plan and any excess cash from each distribution not used to purchase such Units will be distributed to the respective Plan participants.

Applicants have agreed that in the event any Reinvestment Series should materially differ from the particular Series of the Trust into which participants in the ARO Plan originally invested or the preceding Reinvestment Series, the Unitholders' authorization

to participate in the ARO Plan will be voided, and after filing of a registration statement under the 1933 Act for such Reinvestment Series, ARO Plan participants will be provided with a prospectus meeting the requirements of section 10(a) of the 1933 Act for such Reinvestment Series, a notice of the material change and an Authorization Form which would have to be returned to the Trustee before a Unitholder would again be able to participate in the ARO Plan.

In order that distributions may be reinvested on the next succeeding Distribution Date, the Authorization Form must be received by the Trustee no later than the 15th day of the month preceding such Distribution Date. Any Authorization Form received after such date will result in the commencement of reinvestment on the second Distribution Date thereafter. Once delivered to the Trustee, an Authorization Form will, except in the following instance, constitute a valid election to participate in the ARO Plan for each subsequent distribution as long as the Unitholder continues to participate in the ARO Plan.

Unless a Unitholder notifies the Trustee in writing to the contrary, any Unitholder who has acquired Units through the ARO Plan will be deemed to have elected the semiannual plan of distribution and to participate in the ARO Plan with respect to distributions made in connection with Units so purchased under the ARO Plan. A Unitholder may withdraw from the ARO Plan with respect to distributions related to Units purchased under the ARO Plan and remain in the ARO Plan with respect to Units acquired other than through the ARO Plan. All distributions made with respect to Units purchased under the ARO Plan will be accumulated with distributions generated from the Units of the Series of the Trust used to purchase such additional ARO Plan Units, but no distributons generated from Units of other Series of the Trust will be accumulated with the foregoing disributions for ARO Plan purchases. Thus, if a person owns Units in more than one Series of the Trust (which are not the result of purchases under the ARO Plan), distributions with respect thereto will not be aggregated for purchases under the ARO Plan. Any funds not utilized to purchase Units in the denomination of tenths in the Reinvestment Series will be automatically distributed by the Trustee on the Distribution Date. Confirmations of sales relating to Units purchased under the ARO Plan will be provided in the name of the ARO Plan participant in the normal course of business. However, certificates representing Trust Units purchased under the ARO Plan will not be sent to participants, except upon request. Both the Sponsor and the Trustee reserve the right to suspend, modify or terminate the ARO Plan at any time. All participants will receive notice of any such suspension, modification, or termination.

Units of each existing Series of the Trust will be offered at a public offering price of approximately $1,050 per Unit plus accrued interest. However, as noted above, it is the Sponsor's intention to permit purchases under the ARO Plan of fractional Units in the denomination of tenths rather than require purchases of full Units. The purpose of allowing purchases of fractional Units is to allow a minimum purchase requirement in the primary distribution of Trust Units, but at the same time permit maximum use of distributions for purchases through the reinvestment program.

Applicants propose to offer Reinvestment Series Units under the ARO Plan at a price reflecting a sales charge of 3½ percent of the underlying net asset value of the Trust Securities in such Series rather than the customary 4½ percent sales charge which applies to all primary and secondary sales of Units in the various Series of the Trust (including primary and secondary sales of Reinvestment Series Units purchased other than through the ARO Plan).

Section 22(d) of the act provides, in pertinent part, that no registered investment company shall sell any redeemable security issued by it except to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person, except a dealer, a principal underwriter or the issuer, except at a current public offering price described in the prospectus. Rule 22d-1 permits certain variations in sales load, none of which it is alleged are applicable to the proposed ARO Plan.

In support of the request, Applicants assert that applying a sales charge of less than the customary 4½ percent charge in the case of ARO Plan purchases is beneficial to ARO Plan participants, and also warranted in light of the related cost savings. Applicants state that approximately 3½ percent of the customary 4½ percent sales charge is attributable to brokerage efforts to make the initial customer solicitation, to ascertain the customer's financial requirements and to counsel him on the Sponsor's specific product. Applicants represent that each Reinvestment Series will be substantially similar to the Series of the Trust which the ARO Plan participant originally purchased with the exception of the make-up of the Series portfolio and certain portfolio related information. Consequently, the support for that portion of the sales charge attributable to counseling the participant on the Sponsor's product is reduced, as is the selling effect relating to initial solicitations. It is the Applicants' belief that cost savings related thereto should be passed on to ARO Plan participants.

However, with respect to any particular Reinvestment Series, Applicants believe a participant may seek professional advice and, thus, a reduced sales charge for such financial services is warranted. It is the Applicants' belief that a charge of 1½ percent of the net asset value of the underlying Trust Securities in each Reinvestment Series (or assuming a net asset value of approximately $1,000 per Unit, a sales charge of $15 per Unit) is a reasonable and justifiable expense to be allocated to the soliciting broker for his professional assistance in connection with each Reinvestment Series.

Applicants further assert that implementation and continuation of the ARO Plan will create special out-of-pocket costs which should properly be borne by the ARO Plan participants. It is the Sponsor's belief that the special out-of-pocket expenses related to the ARO Plan (including such items as: (a) Maintaining Trustee records on participants, (b) mailing, shipping, and miscellaneous delivery charges, (c) maintaining a toll-free telephone number with knowledgeable operators, and (d) separate printing charges) will amount to $10 per unit (assuming the above net asset value, 1 percent of such value). Finally, prior experience indicates that the normal out-of-pocket costs for establishing each Series of the Trust approximate 1 percent of the underlying net asset value of the Trust's portfolio. Applicants represent that all such costs will be covered in the proposed 3½ percent sales charge. Thus, Applicants conclude that the proposed 3½ percent sales charge for ARO Plan purchases not only passes through certain cost savings to ARO Plan participants but also charges such persons for reasonable expenses related to the creation of the ARO Plan, and for fees relating to periodic, professional, financial advice.

B. CONVERSION PLAN

Applicants propose to introduce a conversion option program (the "Conversion Plan") to Unitholders of the various series of Insured Municipals—Income Trust (the "Municipal Fund"), Investors' Corporate Income Trust (the "Corporate Fund") and Investors' Government-Guaranteed Income Trust (the "Government Fund") (Such Funds are collectively called

V 4 3 / 1 9 4
OCT 5 1978

herein the "Conversion Funds"). The Municipal Fund is comprised of a series of unit investment trusts, the portfolios of which are made up of tax-free municipal obligations (all of which are insured as to the timely payment of principal and interest by an independent insurance company or companies); the Corporate Fund is comprised of a series of unit investment trusts, the portfolios of which are made up of taxable corporate debt obligations; and the Government fund is comprised of a series of unit investment trusts, the portfolios of which are made up primarily of mortgage-backed securities of the modified pass-through type fully guaranteed as to principal and interest by the Government National Mortgage Association. The Conversion Funds are sponsored by Van Kampen Sauerman Inc. Under the Conversion Plan, as proposed, a Unitholder wishing to dispose of his Units in a Series of a Conversion Fund for which a secondary market is being maintained will have the option to convert his Units into Units of any Series of the Trust for which Units are available for sale. Applicants state that the purpose of the Conversion Plan is to provide investors in the Conversion Funds a convenient and less costly means of transferring interests as their investment requirements change. Applicants state that the Sponsor and/or certain of the Underwriters have indicated that they intend to maintain a market for the Units of each Series of the Conversion Funds and the Trust; however, there is no obligation to maintain such a market. Consequently, the Sponsor reserves the right to modify, suspend or terminate the Conversion Plan at any time without further notice to Unitholders.

Assuming a secondary market exists and Units of the Trust are available, a Unitholder who notifies the Sponsor of his desire to exercise his conversion option will be mailed a current prospectus for each Series in which the Unitholder indicates interest. The Unitholder may then select the Series into which he desires his investment to be converted. The conversion transaction will operate in a manner essentially identical to any secondary market transaction, except that Applicants propose to allow a reduced sales charge for all transactions effected under the Conversion Plan. Units of the Trust will be repurchased by the Sponsor and other Underwriters of them at the aggregate offering price per Unit of the underlying securities in the Trust and will be resold at that price per Unit plus a sales charge of 4½ percent of such offering price. Applicants propose (subject to the limitations set forth in the next paragraph with respect to conversions of Units of the Government Fund) to resell Units under the Conversion Plan at the Unit offering price of the underlying securities of the Trust plus a fixed charge of $15 per unit (or about 1½ percent of such offering price at current market values). The Unitholder will receive payment for any excess funds remaining in his account after the proceeds from his investment in the Conversion Funds are converted into full Units of the Trust.

Conversion transactions will only be effected in whole Units. To illustrate: Under the Conversion Plan a holder of three Units of a Series in the Municipal Fund with an offering price of $1,020 might seek conversion into Units of a Series of the Trust with an offering price of $880. In this example, the Unitholder's Units will total $3,060, which amount may be invested in Units of the Trust Series. Should three Units in a Series of the Trust be purchased the cost would be $2,685 ($2,640 for the Units and a $45 sales charge). The remaining $375 would be returned to the Unitholder in cash.

In connection with any conversion of Government Fund Units into Trust Units, certain limitations on the reduced sales charge are proposed, however, since certain inequities could arise in such conversions. Under the Conversion Plan, as it applies to Corporate Fund and Municipal Fund Unitholders, Applicants propose that such Unitholders be allowed to convert their Units into Units of the Trust for a special sales charge of $15 per Unit. Applicants assert that this porcedure is equitable to holders of all Funds involved since the sales charge relating to original purchases of Units in all such Funds amounts to 4½ percent of the net asset value of the portfolio underlying such Units (4.712 percent of the net amount invested). On the other hand, the sales charge relating to original purchases of Units in the Government Fund amounts to 3½ percent of the net asset value of the portfolio underlying the Units of the Government Fund (3.627 percent of the net amount invested). Thus, Applicants state that, although it is unlikely, it could be possible under certain circumstances for a person to acquire Units in the Government Fund and immediately convert such Units into Trust Units and pay a lower total sales charge than a person acquiring Trust Units at the same time directly. Under normal circumstances this situation is unlikely, since the initial sales charge on direct purchases of Units of the Government Fund (3½ percent of the net asset value) plus the conversion sales charge ($15 per Unit or approximately 1½ percent of the net asset value of Trust Units based on current market values) usually will exceed the sales charge related to direct purchases of Trust Units (4½ pecent of the net asset value). However, Applicants state that if the price of Trust Units were to increase sharply, the $15 sales charge on conversion could represent less than 1 percent of the net asset value in the Trust Units, in which case the converting Government Fund Unitholder could obtain an unfair price advantage when compared to investors making direct purchases of Units of the Trust.

Applicants assert, however, that after a Government Fund Unitholder has held his Government Fund Units for an adequate period of time the discriminatory nature of his effecting a conversion transaction is not as compelling, and thus argue that the possible abuses outlined above are not material if the converting Government Fund Unitholder has held his Government Fund units for at least an 8-month period of time.

Accordingly, Applicants propose that Unitholders of the Government Fund who have held their Units for a period of at least 8-months be allowed to acquire Trust Units under the Conversion Plan at net asset value plus a sales charge of $15 per Unit. Furthermore, Applicants propose that Government Fund Unitholders who wish to convert their Units into Units of the Trust prior to the expiration of the 8-month period be allowed to exchange such Units at net asset value plus a sales charge based on the greater of $15 per Unit or an amount which together with the initial sales charge paid in connection with the acquisition of the Units being converted equals 4½ percent of the net asset value of the Units of the Trust, determined as of the date of conversion.

Section 11(c) of the act provides among other things, that exchange offers involving registered unit investment trusts are subject to the provisions of section 11(a) of the Act, irrespective of the basis of exchange. Section 11(a) of the Act provides, in pertinent part, that it shall be unlawful for any registered open-end company or any prinicpal underwriter for such a company to make, or cause to be made, an offer to the holder of a security of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission.

As noted above, section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal under writer thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus. The sales charge for effecting regular secondary market purchases and sales of Units of the Trust will be greater than the sales charge which would be applicable to transactions under the Conversion Plan. Rule 22d-1 under the act permits certain variations in sales charges, none of which it is alleged will be applicable to transactions under the Plan.

Applicants assert that applying a sales charge of less than the customary 4½ percent in the case of Conversion Plan transactions is both beneficial to investors and warranted in light of the related cost savings. Applicants state that a large portion of the customary 4½ percent sales charge is attributable to brokerage efforts to make the initial customer solicitation, and the remainder is primarily attributable to the ascertainment of the customer's financial requirements and to counselling on their specific products. Applicants represent that under the Conversion Plan the selling effort relating to initial solicitations will be eliminated, and thus Applicants argue that the cost savings related thereto should be passed on to the participating investors.

Applicants contend, however, that some investor charge is clearly warranted at the time of conversion since a broker may well need to review his customer's financial objectives and likely will have to counsel the customer on the particular investment vehicle involved. Applicants have concluded that the proposed $15 per Unit sales charge for Plan conversions will not only pass through cost savings to investors but also will charge such persons a reasonable fee which is related to the periodic, professional, financial advice that it is anticipated will be furnished to them.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally, exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than October 16, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personnally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

SHIRLEY E HOLLIS,
Assistant Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

AIR TRAFFIC PROCEDURES ADVISORY COMMITTEE

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. I) notice is hereby given of a meeting of the Federal Aviation Administration Air Traffic Procedures Advisory Committee to be held October 24 through October 27, 1978, from 9 a.m. e.d.t. to 4 p.m. daily, except for the last day which will terminate at 1 p.m., in conference rooms 8A and B at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C.

The agenda for this meeting is as follows: A continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtained from, Mr. Franklin L. Cunningham, Executive Director, Air Traffic Procedures Advisory Committee, Air Traffic Service, AAT-300, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3725.

Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C., on September 22, 1978.

F. L. CUNNINGHAM,
Executive Director, ATPAC.

[Docket No. AMS-550-34]

REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES FOR THE NATIONAL AIRPORT AND AIRWAY SYSTEM

Request for Recommendations from Users

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of request for recommendations.

SUMMARY: This notice requests, and is intended to elicit, recommendations from the users of the national airport and airway system on methods of reducing nonessential Federal expenditures for aviation. Congressional legislation requires annual consultation with the users of this system.

DATE: Recommendations must be received on or before January 25, 1979.

ADDRESS: Send recommendations in duplicate to: Federal Aviation Administration, Office of Management Systems, AMS-500, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Leonard B. Bell, Chief, Management Analysis Division (AMS-500), Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8060.

SUPPLEMENTARY INFORMATION:

RECOMMENDATIONS INVITED

Interested users of the national airport and airway system are invited to submit such recommendations as they may desire in response to this notice. Communications should identify the docket number and be submitted in duplicate to: Federal Aviation Administration, Office of Management Systems, AMS-500, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before January 25, 1979, will be considered by the Administrator.

V 43 / 194 OCT 5 78

AVAILABILITY OF NOTICE OF REQUEST FOR RECOMMENDATIONS

Any person may obtain a copy of this notice of request for recommendations by submitting a request to the Federal Aviation Administration, Office of Public Affairs, attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058.

DISCUSSION

Section 25 of the Airport and Airway Development Act Amendments of 1976 (49 U.S.C. 1704) provides as follows:

The Secretary of Transportation shall, in accordance with this section, attempt to reduce, to the maximum extent practicable consistent with the highest degree of aviation safety, the capital, operating, maintenance costs of the national airport and airway system. The Secretary shall, at least annually, consult with and give due consideration to the views of users of such system on methods of reducing nonessential Federal Expenditures for aviation. The Secretary shall give particular attention to any recommendations which could reduce, without adverse effects on safety, future Federal manpower requirements and costs which are required to be recouped from charges on such users.

By § 1.47(f)(3) of the regulations of the Office of the Secretary of Transportation, the authority of the Secretary of Transportation in section 25 is delegated to the Administrator of the Federal Aviation Administration.

The first request for user views pursuant to section 25 was published in the FEDERAL REGISTER on August 1, 1977 (42 FR 38953). That notice drew 103 suggestions from 42 users, including the major organized user groups. The areas of principal interest shown by these users were: The way the air traffic control system operates, the amount of certification authority the FAA should turn over to State and aviation groups, and methods for controlling and reducing costs by reducing staffing, making organization changes, and improving administration.

The Administrator gave due consideration to all views and also advised users that the FAA has many significant activities under way that bear directly on the suggestions the users made. These include:

(1) Implementation of the first two phases of a Flight Service Automation Plan.

(2) Development of the Area Navigation Plan for direct flight routing.

(3) Proposals now in the rulemaking process to (a) develop new criteria for tower closings, and (b) revise Part 135 of the Federal Aviation Regulations which relates to air taxi operators and commercial operators of small aircraft.

(4) Elimination of approximately 320 internal headquarters reports, as the result of a special effort to reduce nonessential reporting requirements.

(5) Reduction of personnel, through hiring limitations, in many staff and support positions has resulted in considerable monetary savings.

(6) Development of Discrete Address Beacon Systems, Intermittent Positive Control, and other third generation projects, which will electronically provide the pilot with additional cockpit information.

(7) Consolidation of parts of the Airman's Information Manual into regional parts.

The principal authors of this document are James R. Askew, Office of Management Systems, and Howard A. Bartnick, Office of the Chief Counsel.

Accordingly, views and recommendations of users of the national airport and airway system are solicited on methods of reducing nonessential Federal expenditures for aviation and, in particular, on reducing, without adverse effects on safety, future Federal manpower requirements and costs which are required to be recouped from users.

(Sec. 25, Airport and Airway Development Act Amendments of 1976 (49 U.S.C. 1704); sec. 1.47(f)(3), Regulations of the Office of the Secretary of Transportation (49 CFR 1.47(f)(3)).)

Issued in Washington, D.C., on September 25, 1978.

BROOKS C. GOLDMAN,
Director, Office of Management Systems.

[4910-06]

Federal Railroad Administration

[Docket No. RSSI-78-6; Notice No. 2]

ASSOCIATION OF AMERICAN RAILROADS REQUIREMENT FOR LIFTING LUGS

Temporary Stay

AGENCY: Federal Railroad Administration, DOT.

ACTION: Order temporarily staying effectiveness of industry standard.

SUMMARY: The Federal Railroad Administration (FRA) has determined that requirement of the Association of American Railroads (AAR) imposed with respect to all new freight cars ordered after July 1, 1978, should be temporarily stayed pending inquiry into the consequences of the requirement for railroad safety. The AAR action requires that lugs which could be used to lift an upright freight car be provided at four locations on the car body.

DATES: The order is effective October 5, 1978.

FOR FURTHER INFORMATION:

Rolf Mowatt-Larssen, 202-426-0924, or Grady Cothen, Jr., 202-426-8220.

SUPPLEMENTARY INFORMATION: The FRA has published in the Proposed Rules portion of today's FEDERAL REGISTER a notice of special safety inquiry soliciting comment on the impact of lifting lugs required by AAR Mechanical Division Circular D.V. 1897, entitled "Provisions for Lifting Freight Car," on the safety of wreck operations in the railroad industry. In light of the considerations set forth in the notice of special safety inquiry, *It is ordered*, That:

1. The requirements of AAR Mechanical Division Circular D.V. 1897 are hereby temporarily stayed;

2. The AAR may not deny issuance of a certificate of construction based on nonconformity to Circular D.V. 1897; and

3. This order shall remain in effect pending review by the FRA of the potential impact of Circular D.V. 1897 on the safety of railroad wreck clearance operations.

This order is effective on October 5, 1978, since the purpose of the stay is to permit car builders to construct cars without the lifting provisions required by the Circular pending review of the industry standard

(Sec. 202, 84 Stat. 971 (45 U.S.C. 431); § 1.49(n) of the Regulations of the Office of the Secretary of Transportation (49 CFR 1.49(n)).)

Issued in Washington, D.C., on October 2, 1978.

JOHN M. SULLIVAN,
Administrator.

National Highway Traffic Safety Administration

[Docket No. LVM 77-07; Notice 1]

OFFICINE ALFIERI MASERATI S.P.A.

Petition for Exemption from Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Notice of receipt of a petition for exemption from average fuel economy standards.

SUMMARY: This notice announces the receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition submitted by Officine Alfieri Maserati S.p.A. (Maserati). The petition requests that the NHTSA exempt model year 1978-1980 passenger automobiles manufactured by Maserati from the generally applicable passenger automobile average fuel economy standards for those model years, and establish lower, alternative standards for those vehicles. In accordance with agency procedures, this notice summarizes the petition, describes the options available to the NHTSA in responding to the petition, and invites written public comment thereon.

COMMENT CLOSING DATE: October 30, 1978.

ADDRESS: Comments on the Maserati petition should refer to Docket No. LVM 77-07 and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automobile Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590, 202-755-9383.

SUPPLEMENTARY INFORMATION: Part A of Title III of the Energy Policy and Conservation Act (Pub. L. 94-163) amended the Motor Vehicle Information and Cost Savings Act (hereinafter referred to as "the Act") by adding a new Title V. That title requires the Secretary of Transportation to implement and administer a program for improving the fuel economy of new automobiles sold in the United States. Authority to administer the program was delegated by the Secretary to the Administrator of the NHTSA; 41 FR 25015, June 22, 1976.

Section 502(a)(1) of the Act establishes average fuel economy standards for passenger automobiles at 18.0 miles per gallon (mpg) for 1978, 19.0 mpg for 1979, and 20.0 mpg for 1980. They then steadily rise to a level of 27.5 mpg for 1985 and thereafter. Under 49 CFR Part 523, Vehicle Classification, published at 42 FR 38362, July 28, 1977, passenger automobiles include station wagons, sedans, coupes, and sport cars.

Section 502(a) of the Act provides that a low volume manufacturer of passenger automobiles may be exempted from the generally applicable average fuel economy standards if those standards are more stringent than the maximum feasible average fuel economy achievable by the low volume manufacturer, and if the NHTSA establishes alternative standards for the low volume manufacturer at the manufacturer's maximum feasible level. A low volume manufacturer under the Act is one which manufactures (within or without the United States) fewer than 10,000 passenger automobiles in the model year for which the exemption is sought (hereinafter "the affected model year"), and which manufactured fewer than 10,000 passenger automobiles in the second model year preceding the affected model year. In its determination of the maximum feasible average fuel economy, the NHTSA is required by the Act to consider—

(1) Technological feasibility;

(2) Economic practicability;

(3) The effect of other Federal motor vehicle standards on fuel economy; and

(4) The need of the Nation to conserve energy.

Part 525 of Title 49, Code of Federal Regulation, establishes the format and content requirements for petitions requesting exemption from the generally passenger automobile average fuel economy standards and describes the procedures that the NHTSA follows in acting on these petitions. Section 525.8 of that rule states that the NHTSA will publish a notice announcing receipt of a petition. This notice is published in response to that section.

Publication of this notice of receipt of a petition does not represent any agency decision or other exercise of judgment concerning the merits of Maserati's petition.

MASERATI'S PETITION

Maserati is an independent producer of "high performance automobiles". Maserati states that its "success in the passenger car market is largely based on its reputation for building high performance winning race cars and subsequently providing that same high performance know-how in commercial passenger cars." Annual sales in the United States are estimated as between 250 and 400 automobiles in the 1978 model year, and between 900 and 1600 automobiles in each of the 1979 and 1980 model years. To permit this increase in production, Maserati indicates that it will combine plant expansion with the use of outside contractors to produce components and subassemblies currently manufactured by Maserati.

At the present and through the end of model year 1980, this company will sell three vehicle configurations in the United States. A vehicle configuration is a classification of automobiles that includes all automobiles produced by the same manufacturer with the same inertia weight and which are equipped with the same engine, emission control system, transmission type (e.g., manual, automatic, or semi-automatic) and axle ratio. This is a simplification of the Environmental Protection Agency's definition of the term, which can be found at 40 CFR § 600.002-77(a)(24).

The V-6 Maserati for the 1978 model year achieves a combined fuel economy of 12.1 miles per gallon (mpg). The combined fuel economy for both the two- and four-door V-8 models for the 1978 model year is said to be 10.5 mpg. Maserati projects that 50 to 60 percent of its U.S. sales will be the V-6 model, 20 to 25 percent will be the two-door V-8, and 20 to 25 percent will be four door V-8 models. Based on this projected sales mix, Maserati indicated that its 1978 average fuel economy will be 11.3 mpg to 11.5 mpg.

For the 1979 and 1980 model years, Maserati projects that it will sell between 22 and 25 percent V-6 models, 11 to 19 percent two-door V-8's and 56 to 67 percent four-door V-8's. This mix shift will reduce Maserati's possible fuel economy for the 1979 model year. However, Maserati indicates in its petition that it will increase the combined fuel economy of its V-6 model by 0.5 mpg in the 1979 model year by producing a new more fuel efficient V-6 engine. No change is projected in the fuel economy to be achieved by Maserati's V-8 models in the 1979 model year. The net result of these changes will be to lower Maserati's average fuel economy for the 1979 model year to a level of 11.0 mpg.

For the 1980 model year, Maserati hopes to further refine the new V-6 engine, so that the fuel economy of V-6 models will increase 0.5 mpg over the 1979 levels to a combined fuel economy of 13.1 mpg. Additionally, Maserati's petition indicates that it plans to offer a small block V-8 engine in its V-8 models for the 1980 model year, and indicates that the use of this smaller engine will increase the fuel economy of V-8 models by 0.5 mpg above the 1979 level to a combined fuel economy of 11.0 mpg. The result of these engine improvements will be to raise Maserati's 1980 average fuel economy to a level of 11.4-11.5 mpg.

Maserati urges that its projected average fuel economy in each model year be found to be its maximum feasible average fuel economy in that model year. The company emphasizes in the petition that it produces high performance vehicles for a select group of customers. The petition states that when comparing power to fuel economy for other production engines of similar size, Maserati is always in the top bracket, and that this is especially true when compared to similar U.S. vehicles.

Maserati uses "rich-burn thermal reacters" as its emission control approach, and states that this gives it very low levels of exhaust emissions. Maserati states, however, that this emission control approach does not lend itself to optimization of fuel economy. The petition states that when the approach was selected in 1974, Maserati did not anticipate the need to satisfy fuel economy standards since fuel economy had never been a serious motivation for prospective Maserati purchasers.

V 4 3 / 1 9 4

OCT 5 1978

The petition indicates Maserati's opinion that the company's resources should be applied to the development of new fuel efficient high performance engines rather than to the improvement of existing engines, and that Maserati is currently engaged in that development. This opinion is based upon Maserati's conclusion that the existing engines could be recalibrated only to achieve a 10 percent fuel economy improvement, and this still leaves the fuel economy far below the requirements of the standards.

Maserati also states that its financial position will not allow it to make any major investments or explore alternative avenues for improving fuel economy. According to the petition, Maserati's plant was shut down for over a year because of the company's financial problems, which culminated in a reorganization. The company showed a net loss for the 1977 model year and expects a loss for the 1978 model year. With the increased sales projected for the 1979 and 1980 model years, Maserati hopes to show profits. The revenue could then be used by the company, according to the petition, to some degree to enable it to improve its fuel economy, while maintaining its high performance image.

The petition further indicates that Maserati intends to use a more advanced emission control technology on its automobiles for the 1981 and 1982 model years. Application of these technologies are expected to result in large fuel economy gains on Maserati automobiles. Maserati is also exploring the possibility of weight reduction and decreases in straight line acceleration for those model years.

Federal emission standards have impacted the fuel economy capabilities of Maserati's automobiles in the manner explained above. With respect to the Federal safety standards, Maserati states that the effects of these standards on fuel economy has not been measured by the company, but the company believes that the effect would be in direct proportion to the added weight requirements, and states that it believes the effects to be insignificant. However, the engineering and testing necessary to comply with the safety standards is said by Maserati to be inordinately expensive considering the few automobiles it sells in the U.S. each year, and any diversion of funds from fuel economy research for Maserati detracts from potential economy.

Because of all the foregoing factors, Maserati states that its currently planned average fuel economy levels of 11.3-11.5 mpg, 11.0 mpg, and 11.4-11.5 mpg for the 1978, 1979, and 1980 model years, respectively, are the maximum feasible average fuel economy levels for the company in those model years. However, the petition requests that the NHTSA exempt Maserati from the otherwise applicable average fuel economy standards for those model years, and establish alternative average fuel economy standards for Maserati of 11.0, 11.2, and 11.5 mpg for the respective model years. No reason was given for this discrepancy.

NHTSA Options

The NHTSA will carefully evaluate the Maserati petition and all comments received thereon. Following this evaluation, the NHTSA could find that Maserati plans to use all reasonably available means and strategies for improving its average fuel economy and that its projected average fuel economy for each affected model year is its maximum feasible average fuel economy for that model year. Alternatively, the NHTSA could find that Maserati has some additional means and strategies available to it to improve its average fuel economy above the projected level for one or all of the affected model years, and make a determination of the maximum feasible average fuel economy that could be achieved for each affected model year if those means and strategies were implemented.

If Maserati's maximum feasible average fuel economy for any affected model year is determined by this agency to be equal to or greater than the generally applicable standard, the petition will be denied for that model year. If Maserati's maximum feasible average fuel economy for any affected model year is determined to be less than the generally applicable standard, the petition may be granted for that model year.

If the petition is granted for any affected model year, the NHTSA will establish an alternative average fuel economy standard applicable to Maserati during that model year. The Act permits the NHTSA to establish that standard in one of three ways: (1) a standard may be established specifically for Maserati (2) classes, based on design, size, price, or other factors, may be established for the automobiles of exempted manufacturers, with a separate average fuel economy standard applicable to each class; or (3) a single standard may be established for all exempted manufacturers.

Copies of the Maserati petition as well as supporting materials, other information, and any comments received, are available for public inspection in the docket section between 8 a.m. and 4 p.m., Monday through Friday.

Comments on the Maserati petition are invited from the public. These comments must be in writing, refer to Docket No. LVM 77-07, be submitted to the address for comments, and must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion. It is requested, but not required, that five copies of the comments be submitted.

All comments received before the close of business on the comment closing date indicated above will be considered. Comments received after the closing date will be considered to the extent practicable. Comments received too late for consideration in developing a proposed decision on this petition will be considered in reaching a final decision.

Issued in Washington, D.C. on October 2, 1978.

MICHAEL M. FINKELSTEIN,
Associate Administrator for Rulemaking.

AMERICAN MANUFACTURER'S PETITION

Further Extension of Time for Comments Concerning an American Manufacturer's Petition to Reclassify Cotton Denim Trousers Known as "Blue Jeans"

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of further extension of time for comments.

SUMMARY: This notice further extends the period of time permitted for the submission of comments in response to a recent American manufacturer's petition to the Customs Service to reclassify certain cotton denim trousers for men and women, commonly referred to as "blue jeans." This extension will permit the preparation and submission of more detailed comments by interested members of the public.

DATE: Comments must be received on or before November 3, 1978.

ADDRESS: Comments, preferably in triplicate, should be addressed to the Commissioner of Customs, attention: Regulations and Legal Publications Division, U.S. Customs Service, Room 2335, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Philip Robins, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5865).

SUPPLEMENTARY INFORMATION:

Background

On August 3, 1978, the Customs Service published in the FEDERAL REGISTER (43 FR 34236) a notice of receipt of an American manufacturer's petition, filed under section 516 of the Tariff Act of 1930, as amended (19 U.S.C. 1516), requesting the reclassification of certain imported men's and women's cotton denim trousers known as "blue jeans". The petitioner contends that, under headnote 3, Schedule 3, Tariff Schedules of the United States (TSUS), the blue jeans are ornamented for tariff purposes, and are properly classifiable under item 380.00, TSUS, if for use by men or boys or item 382.00, TSUS, if for use by either sex or by women, girls, or infants.

Comments concerning the American manufacturer's petition were to have been received on or before September 5, 1978. The Customs Service was requested to extend the period of time for submission of comments in order to allow additional time for the preparation of responses to the American manufacturer's petition. Accordingly, a notice extending the period of time for submission of comments to October 4, 1978 was published in the FEDERAL REGISTER on September 6, 1978 (43 FR 39624).

Comments

The Customs Service has again been requested to extend the period of time for submission of comments in order to allow additional time for the preparation of responses to the American manufacturer's petition. On the basis of the interest which has been expressed by the public, as demonstrated by the substantial volume of comments received, the Customs Service has decided to extend the period of time for submission of comments to November 3, 1978. No further extensions of time will be granted.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

Correction

In FR Doc. 78-27088, appearing on page 43792, in the issue for Wednesday, September 27, 1978, the first paragraph should read as follows:

In FR Doc. 78-18299 appearing in the issue of Friday, June 30, 1978, on page 28693, the underwriting limitation listed for American Fidelity Fire Insurance Company of $371,000 should be corrected to read $532,000.

[7035-01]

INTERSTATE COMMERCE COMMISSION

[Decisions Volume No. 35]

DECISION-NOTICE

Decided: September 21, 1978.

The following applications are governed by special rule 247 of the Commission's rules of practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission on or before November 6, 1978. Failure to file a protest, on or before November 6, 1978, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after October 5, 1978.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered: In the absence of legally sufficient protests, filed on or before November 6, 1978 (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board No. 2, Members Boyle, Eaton, and Liberman (Review Board Member Boyle not participating).

H. G. HOMME, Jr.,
Acting Secretary.

MC 5470 (Sub-156F), filed August 31, 1978. Applicant: TAJON, INC., Rural Delivery 5, Mercer, PA 16137. Representative: Brian L. Troiano, 918 16th Street NW., Washington, DC 20006. To operate as a *common carrier*, by motor vehicle, over *irregular* routes, transporting: *Lime, limestone, and li-*

(Hearing site: Chicago, IL.)

MC 25798 (Sub-334F), filed August 25, 1978. Applicant: CLAY HYDER TRUCKING LINES, INC., a North Carolina corporation, P.O. Box 1186, Auburndale, FL 33823. Representative: Tony G. Russell (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products* (except commodities in bulk, in tank vehicles), (1) from East Pepperell, MA, to points in CA, FL, GA, KY, LA, SC, and VA, (2) from Fitchburg, MA, to points in AL, CA, GA, OR, and VA, and (3) from Richmond, VA, to points in CA, CO, IA, NE, NV, NM, OR, and UT. (Hearing site: Washington, DC.)

MC 41404 (Sub-149), filed July 27, 1978. Applicant: ARGO-COLLIER TRUCK LINES CORP., P.O. Box 440, Martin, TN 38237. Representative: Mark L. Horne (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except commodities in bulk, in tank vehicles), in vehicles equipped with mechanical refrigeration, from the facilities of M & M/Mars, Division of Mars, Inc., at or near Cleveland, TN, to points in AL, AR, FL, GA, IL, IN, IA, KY, LA, MI, MN, MS, MO, NC, SC, OH, and WI, restricted to the transportation of traffic originating at the named origin facilities and destined to the indicated destinations. (Hearing site: Washington, DC, or Chicago, IL.)

MC 47142 (Sub-115F), filed July 28, 1978. Applicant: C. I. WHITTEN TRANSFER CO., a DE corporation, P.O. Box 1833, Huntington, WV 25719. Representative: J. G. Dall, Jr., P.O. Box 567, McLean, VA 22101. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pelletized agricultural limestone and gypsum*, in bags, from Irvington, KY, to those points in the United States in and east of LA, AR, MO, IL, and WI. (Hearing site: Washington, DC.)

MC 50935 (Sub-23F), filed August 21, 1978. Applicant: WOLVERINE TRUCKING CO., a corporation, 1020 Doris Road, Pontiac, MI 48057. Representative: William B. Elmer, 21635 East Nine Mile Road, St. Clair Shores, MI 48080. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from Detroit, MI, to Milwaukee, WI. (Hearing site: Detroit, MI.)

MC 52214 (Sub-1F), filed July 21, 1978. Applicant: RELIABLE TRANSPORT (U.S.), Ltd., 64 Mackinaw Street, Buffalo, NY 14202. Representative: S. Harrison Kahn, Suite 733, Investment Building, 1511 K Street NW., Washington, DC 20005. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Buffalo, NY, and the port of entry on the international boundary line between the United States and Canada at Buffalo, NY; over city streets, serving no intermediate points, restricted to the transportation of traffic originating at or destined to points in the Provinces of ON and PQ, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Buffalo, NY.)

NOTE.—The restriction and condition contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled "Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada," published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of the Provinces of AB, SK, and MB regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no further force or effect.

MC 59306 (Sub-5F), filed July 27, 1978. Applicant: NIEDERGERKE TRUCK LINE, INC., 107 West Fourth Street, Fulton, MO 65251. Representative: Frank W. Taylor, Jr., Suite 800, 1221 Baltimore Avenue, Kansas City, MO 64105. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except articles of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Warrenton, MO, and East St. Louis, IL. (Hearing site: Kansas City or St. Louis, MO.)

MC 59367 (Sub-124F), filed July 24, 1978. Applicant: DECKER TRUCK LINE, INC., P.O. Box 915, Fort Dodge, IA 50501. Representative: William L. Fairbank, 1980 Financial Center, Des Moines, IA 50309. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foodstuffs* (except in bulk), from the facilities of Termicold Corp., at or near Plover, WI, to points in AR, CO, IL, IN, IA, KS, MI, MN, MO, NE, NM, ND, OH, OK, and SD, restricted to the transportation of traffic originating at the named origin facilities and destined to the indicated destinations. (Hearing site: Portland, OR, or Milwaukee, WI.)

MC 103926 (Sub-74F), filed July 26, 1978. Applicant: W. T. MAYFIELD SONS TRUCKING CO., a corporation, P.O. Box 947, Mableton, GA 30059. Representative: K. Edward Wolcott, P.O. Box 872, Atlanta, GA 30301. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Metal tanks*, (2) *aircraft refueler units*, and (3) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities in (1) above, between the facilities of General Steel Tank Co., at Birmingham, AL, on the one hand, and, on the other, points in AL, AR, FL, GA, IL, IN, KY, LA, MD, MO, MS, NC, OH, OK, PA, SC, TN, TX, VA, WV, and DC. (Hearing site: Birmingham, AL, or Atlanta, GA.)

MC 105566 (Sub-177F), filed July 26, 1978. Applicant: SAM TANKSLEY TRUCKING, INC., P.O. Box 1120, Cape Girardeau, MO 63701. Representative: Thomas F. Kilroy, Suite 406, Executive Building, 6901 Old Keene Mill Road, Springfield, VA 22150. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals* (except in bulk), from Meredosia, IL, to points in AL, AZ, CA, CT, DE, FL, GA, ID, MA, MD, ME, NC, NJ, NV, NY, OR, PA, SC, TX, UT, and VA. (Hearing site: Washington, DC.)

MC 106398 (Sub-828F), filed August 23, 1978. Applicant: NATIONAL TRAILER CONVOY, INC., 525 South Main, Tulsa, OK 74103. Representative: Irvin Tull (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by retail home improvement, home furnishing, and lumber stores, (except commodities in bulk), between points in AL, AR, FL, GA, KS, KY, LA, MS, MO, NC, OK, SC, TN, TX, and VA. (Hearing site: Saginaw, MI.)

NOTE.—In view of the findings in MC 106398 (Sub-741) of which official notice is taken, the certificate to be issued in this proceeding will be limited to a period expiring 3 years from its effective date unless, prior to its expiration (but not less than 6 months prior to its expiration), applicant files a petition for the extension of said certificate and demonstrates that it has been conducting operations in full compliance with the terms and conditions of its certificate and with the requirements of the Interstate Commerce Act and applicable Commission regulations.

MC 106398 (Sub-832F), filed August 28, 1978. Applicant: NATIONAL TRAILER CONVOY, INC., 525 South Main, Tulsa, OK 74103. Representative: Irvin Tull (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipe and fittings, and accessories for pipe*, from the facilities of Consolidated Pipe & Supply Co., at Birmingham, AL, to points in the United States (except AK and HI). (Hearing site: Birmingham or Mobile, AL.)

NOTE.—In view of the findings in MC 106398 (Sub-741) of which official notice is taken, the certificate to be issued in this proceeding will be limited to a period expiring 3 years from its effective date unless, prior to its expiration (but not less than 6 months prior to its expiration), applicant files a petition for the extension of said certificate and demonstrates that it has been conducting operations in full compliance with the terms and conditions of its certificate and with the requirements of the Interstate Commerce Act and applicable Commission regulations.

MC 106398 (Sub-833F), filed August 31, 1978. Applicant: NATIONAL TRAILER CONVOY, INC., 525 South Main, Tulsa, OK 74103. Representative: Irvin Tull (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and building materials*, (1) from the facilities of the GAF Corp., at (a) Annapolis, Kansas City, and St. Louis, MO, (b) Joliet, IL, and (c) Dallas, TX, and the facilities of GAF Corp., in Posey and Vanderburgh Counties, IN, to points in the United States (except AK and HI), (2) from the facilities of the GAF Corp., at Minneapolis, MN, to points in IA and WI, (3) from the facilities of the GAF Corp., at Baltimore, MD, to points in GA, NC, SC, PA, VA, and WV, (4) from the facilities of the GAF Corp., in Chatham County, GA, to points in AL, FL, KY, MS, NC, SC, TN, and VA, and (5) from the facilities of the GAF Corp., at Mobile, AL, to points in TX. (Hearing site: Washington, D.C.)

NOTE.—In view of the findings in MC 106398 (Sub-741) of which official notice is taken, the certificate to be issued in this proceeding will be limited to a period expiring 3 years from its effective date unless, prior to its expiration (but not less than 6 months prior to its expiration), applicant files a petition for the extension of said certificate and demonstrates that it has been conducting operations in full compliance with the terms and conditions of its certificate and with the requirements of the Interstate Commerce Act and applicable Commission regulations.

MC 107002 (Sub-532F), filed July 28, 1978. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, MS 39205. Representative: John J. Borth (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Processed clay*, in bulk, in tank vehicles, from Jackson, MS, to points in CT, DE, IA, KS, MD, ME, MA, NE, NH, NY, ND, RI, SD, and VT. (Hearing site: Jackson, MS.)

MC 107002 (Sub-533F), filed July 28, 1978. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, Jackson, MS 39205. Representative: John J. Borth (same address as applicant). MC 139858 (Sub-29F), filed August 29, 1978. Applicant: AMSTAN TRUCKING INC., a Delaware corporation, 1255 Corwin Avenue, Hamilton, OH 45015. Representative: Chandler L. Van Orman, 1729 H Street NW., Washington, DC 20006. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Steel doors*, and (2) *equipment, materials, and supplies* used in the framing and installation of steel doors (except commodities which because of size or weight require the use of special equipment), from Cincinnati, OH, to points in the United States (except AK and HI), under continuing contract(s) with American Standard Inc., of New Brunswick, NJ. (Hearing site: Cincinnati, OH, or Washington, DC.)

MC 140829 (Sub-135F), filed August 28, 1978. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, Sioux City, IA 51102. Representative: William J. Hanlon, 55 Madison Avenue, Morristown, NJ 07960. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ground clay, floor sweeping compounds*, and *absorbents*, (except commodities in bulk), from the facilities of Oil-Dri Corp. of America, at or near Ochlocknee, GA, to points in AL, AR, CT, DE, IL, IN, IA, KS, KY, MD, MA, MI, MN, MO, NE, NH, NJ, NY, ND, PA, OH, OK, RI, SD, TN, TX, VT, VA, WV, WI, and DC, restricted to the transportation of traffic originating at the named origin facilities and destined to the indicated destinations. (Hearing site: Washington, DC.)

NOTE.—Dual operations are at issue in this proceeding.

MC 141124 (Sub-22F), filed July 27, 1978. Applicant: EVANGELIST COMMERCIAL CORP., P.O. Box 1709, Wilmington, DE 19899. Representative: James W. Muldoon, 50 West Broad Street, Columbus, OH 43215. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in, by manufacturers or converters of paper and paper products, (except commodities in bulk), from Chillicothe, OH, to points in PA, MD, DE, NJ, NY, CT, MA, RI, NH, VT, ME, and DC. (Hearing sites: Columbus, OH or Washington, DC.)

MC 141124 (Sub-23F), filed July 27, 1978. Applicant: EVANGELIST COMMERCIAL CORP., P.O. Box 1709, Wilmington, DE 19899. Representative: Boyd B. Ferris, 50 West Broad Street, Columbus, OH 43215. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by manufacturers or converters of paper and paper products (except commodities in bulk), between Indianapolis, IN, Philadelphia, PA, and Newark, CA, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Philadelphia, PA, or Columbus, OH.)

MC 142416 (Sub-3F), filed July 24, 1978. Applicant: HAMILTON TRANSFER, STORAGE & FEEDS, INC., Box H, Hwy 26 West, Torrington, WY 82240. Representative: John H. Lewis, 1650 Grant Street Building, Denver, CO 80203. To operate as a *common carrier*, by motor vehicle, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Torrington, WY and Scottsbluff, NE, over U.S. Hwy 26, serving all intermediate points in WY. (Hearing site: Scottsbluff, NE, or Casper, WY.)

MC 142516 (Sub-16F), filed July 26, 1978. Applicant: ACE TRUCKING CO., INC., 1 Hackensack Avenue, Kearny, NJ 07032. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Sealing tape*, from Linden, NJ, to points in the United States (except AK and HI), under continuing contract(s) with Gentech Industries, Inc., Linden, NJ. (Hearing site: New York, NY, or Washington, DC.)

MC 142559 (Sub-42F), filed September 5, 1978. Applicant: BROOKS TRANSPORTATION, INC., 3830 Kelley Avenue, Cleveland, OH 44114. Representative: John P. McMahon, 100 East Broad Street, Columbus, OH 43215. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Materials and supplies for automobiles*, from Oakland, CA, Schenectady, NY, Flemington, NJ, Winnsboro, SC, and points in Kings County, NY, to the facilities of Standard Products Co., at Dearborn, MI. (Hearing site: Columbus, OH, or Washington, DC.)
